bricklayers, Windsor, 1484.
building trades, Chicoutimi and Lake St. John district, 1097, 1490; Hull, 1097; Joliette and district, 738, 1097; Montreal, 978, 1097, 1348, 1490; Quebec City and district, 1097, 1209; St. Hyacinthe and district, 1097; St. Jerome and district, 1097, 1348; St. Johns and Iberville, 1097, 1490, Sherbrooke and Eastern Townships, 1097, 1209; Sorel, 738, 1097; Three Rivers and district, 1097, 1348; Val d'Or and Amos, 353, 1097.
carpenters, Calgary, 1208; Moncton, 632; Regina, 1485; Sault Ste. Marie, 1484; Victoria, 1485; Winnipeg, 1208...
electrical workers, Regina, 485; Windsor, 737.
elevator constructors, Canada, 1484; Province of Quebec, 738, 978, 1097, 1348.
lathers, Toronto, 1484.
ornamental iron and bronze industry, Montreal, 738, 1348.
painters, Hamilton, 1484; Toronto, 1484.
plumbers, Vancouver, 737.
plumbers and sheet metal workers, Three Rivers, 631.
plumbers and steamfitters, Hamilton, 736.
sprinkler fitters, Canada, 1484.
Construction—shipbuilding—
See Manufacturing—shipbuilding.
Logging—
loggers, Ladysmith, 853.
Manufacturing—animal foods—
meat packers, Moose Jaw, 975, 1207 (correction); Toronto, 736; Vancouver, 736; Winnipeg, 1095.
Manufacturing—fur and leather products—
fine glove manufacturing industry, Province of Quebec, 110.
fur workers, Quebec, 630; Montreal (retail), 1490; Montreal (wholesale), 630, 978, 1097, 1348.
glove workers, Province of Quebec, 110.
leather workers, Montreal, 1346.
shoe workers, Province of Quebec, 1348; Toronto, 1208.
tanning industry, Oshawa, 853; Province of Quebec, 353, 1490; Quebec City, 1480; Whitby, 853.
work glove operators and blockers, Province of Quebec, 110.

Agreements, Industrial:—Con.

Manufacturing—metal products—
aircraft factory workers, Winnipeg, 351.
automobile factory workers, Windsor, 854, 1346, 1481.
boiler factory workers, Saint John, 1480.
boiler and engine factory workers, Vancouver, 854.
electrical equipment factory workers, Toronto, 231.
foundry workers, Bowmanville, 1480; London, 1481; Preston, 1481; St. Boniface, 736; Saint John, 628; Vancouver, 1482; Victoria, 854, 1482; Whitby, 1481; Winnipeg, 854.
machinists (steel plant); Sault Ste. Marie, 736.
metal container workers, Province of Quebec, 110.
metal factory workers, Beauharnois, 629; Longueuil, 1480; Montreal, 976; Oshawa, 1481; Oshawa (iron castings), 854; Oshawa (pipe fittings, etc.), 854; Vancouver, 629, 976.
ornamental iron and bronze workers, Montreal, 738, 1348.
radio factory workers, Montreal, 1208.
railway and tramway car and bus manufacturing industry, Montreal, 353.
vehicle factory workers, Ojibway, 1481; Regina, 1482.

Manufacturing—miscellaneous wood products—
creosote workers, Calgary, 854.
furniture workers (hard furniture industry), Province of Ontario, 234.
furniture workers, Province of Quebec, 856.
saw and planing mill workers, Priceville, 1480; Rimouski, 1480.

Manufacturing—non-metallic minerals, chemicals, etc.—
asbestos products factory workers, Lennoxville, 1346.
building materials industry, Province of Quebec, 738, 1097.
coke oven workers, Hamilton, 1483.
factory workers (abrasives and refractories), Thorold, 1483.
gypsum and lime workers, Vancouver, 1484.
paint factory workers, Province of Quebec, 110, 353, 738, 856, 1097.
pottery workers, Saint Johns, 1483.

Manufacturing—printing and publishing—
lithographers, Province of Quebec, 631.
printers, Winnipeg, 1480.
printing trades, Montreal, 353, 631, 856, 1348.

Manufacturing—pulp, paper and paper products—
paper box manufacturing industry (corrugated paper), Province of Quebec, 483, 1097.
pulp and paper mill workers, Bathurst, 853; Mont Rolland, 1096; Port Mellon, 975; St. Jerome, 1095.

Manufacturing—rubber products—
rubber factory workers, Bowmanville, 853.

Manufacturing—shipbuilding—
blacksmiths and helpers, Vancouver, 106, 737.
boilermakers, etc., Vancouver, 481, 737; Victoria, 481.
carpenters and joiners, Saint John, 1482; Vancouver, 1208; Victoria, 482.
electrical workers, Saint John, 1483; Vancouver, 481; Victoria, 481.
foundry workers, Victoria, 482, 1483.
labourers, etc., Vancouver, 481; Victoria, 482.
machinists, Saint John, 1483; Vancouver, 481.
operating engineers, Vancouver, 481.
painters, Vancouver, 481; Victoria, 482.
patternmakers, Vancouver, 481.
plumbers and steamfitters, Saint John, 1483; Vancouver, 481; Victoria, 482.

Agreements, Industrial:—Con.

sheet metal workers, Vancouver, 481.
shipbuilders, Halifax, 1482; Port Dalhousie, 1096.
shipbuilding workers, Montreal (marine department of Canadian Vickers, Limited), 976.
shipwrights and caulkers, Vancouver, 1208; Victoria, 482.
welders and burners, Vancouver, 1208.

VOLUME XLII] JANUARY, 1942 [NUMBER 1

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

THERE was a substantial contra-seasonal expansion in industrial activity at the beginning of November, according to returns furnished to the Dominion Bureau of Statistics by 12,775 firms with 1,676,193 employees, as compared with 1,658,248 in the preceding month. Each of these firms ordinarily employs a minimum of 15 workers. The index, (based on the average for the calendar year 1926 as 100), advanced from its previous maximum of 165·8 at October 1, 1941, to 167·6 at the date under review. The figures for November 1 in recent years of the record were as follows: 1940, 139·2; 1939, 123·6; 1938, 114·6 and 1937, 125·2. In 1929, when industrial employment generally averaged higher than in any other pre-war year, the November 1 figure had been 124·6.

Since the improvement at the beginning of November, 1941, over October 1 was a reversal of the usual seasonal trend indicated in the experience of the last twenty years, the seasonally-adjusted index showed a further important gain, rising from 157·7 in the preceding month, to 160·4 at the beginning of November.

The increase in personnel was accompanied by the largest advance in weekly payrolls indicated since the record of current earnings was commenced in March, 1941. The total amount reported as having been paid to those employed at November 1 for services rendered in the last week in October was $45,279,584, an increase of 3·6 per cent over the wage payments made by the same firms in the last week in September. The per capita average rose from $26.36 in the final week in September, to $27.01 in the last week in October.

Unemployment in Trade Unions.—At the beginning of December, 1941, the percentage of unemployment among local trade unions stood at 3·3 in contrast with percentages of 3·1 at the beginning of November and 6·2 at the beginning of December, 1940. The percentage for December was based on returns compiled from 2,107 labour organizations with a total membership of 324,071 persons.

Report of the Employment and Claims Offices.—Reports received by the Unemployment Insurance Commission from Employment and Claims Offices during the month of November, 1941, showed declines from October, 1941, and also from November a year ago. In the first instance all industrial divisions, except manufacturing and logging, recorded declines, the largest being in services, construction and maintenance and farming, while under the second comparison, although gains were shown in manufacturing, logging, services and trade, a very large reduction in construction and maintenance, as well as one of marked proportion in farming, were responsible for the net loss recorded. Vacancies in November, 1941, numbered 43,439, applications, 64,324 and there were 39,997 placements in regular and casual employment.

Prices and the Cost of Living.—The official index of the cost of living in Canada calculated by the Dominion Bureau of Statistics and based upon average prices in the period 1935 to 1939 as 100 was 115·8 at the beginning of December, 1941, as compared with 116·3 at the beginning of November; 108·0 at the beginning December, 1940; and 100·8 at the the beginning of August, 1939. The advance between August, 1939, and December, 1941, was 14·9 per cent. The index for December, 1941 was 4·8 per cent lower than the average for 1929. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 was 93·8 for the week ended December 26, 1941, as compared with 93·9 for the week ended November 28 and 94·0 for the weeks ended November 7 and 14.

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† Week ended December 26.

(1) Base, 1926=100. (2) Base, 1935-1939=100. (3) Figures are for the end of the preceding month. (4) Adjusted for number of business days and seasonal variation. (5) Tentative computation. (6) Adjusted where necessary for seasonal variation. (7) Excluding gold. (8) Sum of Bank of Canada and Chartered Bank notes in circulation minus the holdings of Chartered banks. (9) Figures for four weeks ended December 27, 1941 and corresponding previous periods. (10) MacLean's Building Review. (11) Sugar production given in periods of 4 weeks ending November 29 and November 1, 1941; December 31, November 30 and November 2, 1940.

Comparative figures on a monthly basis are 94·0 for November 1941; 84·2 for December, 1940; and 72·3 for August, 1939, prewar. The increase between the month of August, 1939, and the week ended December 26, 1941, was 29·7 per cent.

Business Statistics.—The latest statistics available reflecting industrial conditions in Canada are shown in the table on page 2 The index of the national income which is stated to be the most comprehensive measure of productive activity was slightly higher in November, 1941, than in the preceding month and higher also than in November, 1940. The index of the physical volume of business, reflecting activity in mining, manufacturing, construction, electric power, and in the distribution of goods, was about 5 per cent lower in November than in the preceding month but was slightly higher than in November, 1940. In the former comparison considerable decline was recorded in the manufacturing and construction groups, the latter group being substantially lower also than than in November, 1940. The other principal groups mentioned above were higher both as compared with the previous month and with November, 1940.

In manufacturing the production of flour totalled 17·3 millions of barrels for the first eleven months of 1941 or about 30 per cent more than for the similar period of 1940. The production of boots and shoes was about 20 per cent greater in the same comparison, steel ingot production 17 per cent greater, and production of automobiles and trucks 28 per cent greater.

In the distribution of goods, car loadings and exports were higher in November both as compared with the previous month and with November, 1940. Imports were lower than in the previous month but higher than in November, 1940. Substantial reduction in sales of stores specializing in the retail sale of furniture, radios and electrical equipment was recorded for November reflecting the restrictions in instalment buying imposed in October. Increases in other lines of retail business included in the monthly survey were smaller than those recorded in earlier months of the year and the general index, unadjusted, was lower than in October while the adjusted index was fractionally higher. Sales of wholesale merchants in November were 14 per cent lower than in October, a more than seasonal decline, but were 12 per cent greater than for November, 1940.

Strikes and Lockouts.—In December the number of strikes and lockouts on record was 11, involving 5,718 workers, causing time loss of 54,945 man working days, as compared with 14 disputes in November, involving 4,880 workers with time loss of 42,791 days. The strike of gold miners at Kirkland Lake, Ontario, accounted for approximately half of the workers and a large percentage of the time loss in both of these months. In December, 1940, there were 10 disputes involving 953 workers, resulting in time loss of 3,150 days. The only dispute of importance was a strike of 220 coal miners at Rosedale, Alberta, for a week.

Of the 11 disputes during December, 1941, 9 were terminated, three in favour of the employers, four in compromise settlements, one was partially successful, while one other was indefinite in result. Two disputes, involving 2,513 workers, were recorded as unterminated at the end of the month.

These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or declared terminated by the unions concerned.

Industrial Disputes Investigation Act

Eleven applications for the establishment of Boards of Conciliation and Investigation were received during the month of December. Three boards submitted reports.

Full particulars with regard to recent proceedings under the Industrial Disputes Investigation Act will be found in the section beginning on page 9.

Proceedings under Industrial Disputes Investigation Act during Calendar Year, 1941

More cases were dealt with in the administration of the Industrial Disputes Investigation Act during the calendar year 1941 than in any previous year since its enactment in March, 1907. In the 35-year period 1907-1941 the Department of Labour received 1,173 applications for the establishment of Boards of Conciliation and Investigation, an average of 34 per year, and in the same period 674 boards were established, an average of 19 per year. In the year just ended 143 applications were received and 53 boards were established.

This increase in activity was principally due to the extension of the scope of the statute to cover disputes between employers and employees engaged in war work. A similar expansion in the volume of proceedings, although to a lesser degree, was experienced during the first World War.

In the 35 years of operation of the Industrial Disputes Investigation Act, as a result of board procedure, cessation of work was

averted or ended in all but 52 cases. There were 9 such "strikes after award" in 1941.

An interesting development during the past year was the provision by Order in Council (P.C. 4020, dated June 6, 1941, as amended by P.C. 4844, dated July 2, 1941, and P.C. 7068, dated September 10, 1941), for the appointment of Industrial Disputes Inquiry Commissions consisting of one or more members. It was intended that such tribunals would make prompt preliminary investigation of disputes and, failing mutually satisfactory adjustment, would advise the Minister of Labour on the matters at issue. During the latter half of 1941 a three-man Industrial Disputes Inquiry Commission under the chairmanship of Mr. Humphrey Mitchell, the present Minister of Labour, with Messrs. Gilbert Jackson and George Hodge as associate members, investigated 50 disputes concerning which applications had been made for the establishment of Boards of Conciliation and Investigation. In 23 cases the Commission effected settlements resulting in the withdrawal of the Board applications, in 15 cases the Commission reported that the circumstances did not warrant the establishment of a board, in 4 cases it reported to the Minister on the matters at issue without making a recommendation and in 8 cases the Commission recommended the establishment of a Board of Conciliation and Investigation.

Extension of Unemployment Insurance

An Order in Council (P.C. 10156 of January 7, 1942) passed under the War Measures Act makes provision for insuring workers in insurable categories, the remuneration of whom has been raised above $2,000 per annum by war conditions. The Unemployment Insurance Act provides that persons are not insurable if employed at a rate of remuneration exceeding $2,000 in a year.

It has been represented to the Unemployment Insurance Commission that war conditions resulting in longer working hours, payment of overtime, cost-of-living bonuses, etc., result in many workers who would normally be receiving less than the $2,000 limit earning in excess of that amount. Consequently, they are unable to contribute or, if unemployed, to receive benefits. Under the Order, such persons will be brought into the insurable class.

It is also provided in the Order, that the Unemployment Insurance Advisory Committee will investigate and report upon the provision of unemployment insurance for all persons exempted only by reason of the paragraph fixing the $2,000 limit.

An article giving further information concerning this Order in Council will be found in the article entitled "Activities of Unemployment Insurance Commission," appearing elsewhere in this issue.

New Year's message of Minister of Labour

In a message issued during the Christmas season, the Minister of Labour, Hon. Humphrey Mitchell, appealed to Canadian labour and industry to close their ranks and put the full weight of their industrial strength into the fight by sinking their petty differences in the interests of the nation.

The Minister emphasized the gravity of the situation facing the Canadian soldiers assisting in the defence of Hong Kong, and declared: "So let our Yuletide celebrations be tempered by the thought that this nation has a rendezvous with its destiny. Nothing matters but that we face it strong, with courage and a common spirit of self-sacrifice."

Mr. Mitchell then stressed the importance of mass production, and stated: "The deciding factor in this war will be the mass production of munitions made possible by the industrial partnership of Canada and the United States, with the genius of the engineer and the skill and devotion of labour to fulfil it. Let us remember that the men and women in our industries are just as much 'a marching army' as the men of our fighting forces.

"We cannot put the full weight of our industrial strength into the fight unless we close our ranks. As Minister of Labour I appeal to all to put aside every interest but that of our nation and cause. That is the real basis for mutual understanding in the settlement of our labour problems at this time. The resolution for the New Year should be 'no lockouts; no strikes; no slowdowns.'

"The Department of Labour is at the service of all but there must be willingness to co-operate, willingness to sink petty differences if the department is to serve to the highest end.

"Recent and past history has shown us that the nation that is without unity lacks vital strength, cannot hope to defend itself and is headed for oblivion.

"When the story of these days is written let the pages record that we on the industrial front fully measured up to our responsibilities and duties."

New Year's messages of Canadian Labour Leaders

Emphasizing the seriousness and the vital importance of the struggle which still lies ahead before the enemies of freedom are vanquished, Canadian Labour leaders in their New Year's messages, called upon workers in particular and all citizens in general to devote themselves to the survival of democracy.

Pointing out that the nation is at war "not for the acquisition of new territories or national aggrandizement but because basic principles are at stake," Mr. Tom Moore, president of the Trades and Labour Congress of Canada declared:

"It cannot be too strongly stated that mere lip service is of no avail against the efficient barbarism of the Hun. The call is for definite action. The conviction that all we now possess is worth preserving and worth fighting and sacrificing for, inspires us to consecrate ourselves to a war effort that will more than match the fanatical zeal of Hitler and his gangster associates. . ."

In concluding his message Mr. Moore said:

"It is a people's war and workers, employers and government should each be given and accept their responsibilities for joint action in the common cause. Those I have the honour to represent know that the interests of organized labour are at stake, but it is also true that the interests of other classes in our community are likewise in jeopardy. While free trade unionism would vanish with defeat, so also would all other freedom. Let all, therefore, bravely accept the challenge and prove ourselves worthy heirs of those who, through the ages, have counted it a privilege to battle for freedom. In this manner 1942 will add another glorious page to the history of the forward march of mankind."

Mr. A. R. Mosher, president of the Canadian Congress of Labour, pledged the co-operation of his organization with other labour bodies, employers and governments "in any measures that may be taken to make our participation in the war fully effective."

Mr. Mosher emphasized the quickened tempo of Canada's war effort and the threat to the Pacific coast. He too, dealt with the all-inclusive aspect of the war saying:

"It has been truly said that this is a workers' war, for while they are not responsible for the war, they furnish the vast majority of the soldiers and sailors and airmen from their families, and their labour provides the immense quantities of material that war demands. They realize that they are more deeply concerned with the issue of the war than any other class, because not only what they have achieved but their hopes of further achievement are at stake. The workers have known slavery, feudalism, and industrial exploitation. By virtue of the principles of freedom and democracy they managed by slow degrees to build up labour organizations in many industrialized nations, but the dictatorships in Italy and Germany destroyed the labour movement in those countries, as well as in the rest of Europe which they have conquered. . ."

Mr. Mosher referred to his proposal of a conference of the four major central labour bodies on this continent to promote better relationships between the organizations concerned to provide for consultation and co-operation with representatives of industry and government.

The president of the Confederation of Catholic Workers of Canada, Mr. Alfred Charpentier, referred to the value of the establishment of the principle of stabilization of wages in wartime and the inauguration of unemployment insurance which he considered would assist greatly in providing for the adjustment period following the war. "The Unemployment Insurance Act and its system of employment placement offices and vocational rehabilitation will abolish the social unfairness of direct relief and establish the dignity of the unemployed workman." Mr. Charpentier referred to the Order in Council stabilizing wages and expressed the opinion that the adoption of this principle would tend to develop a spirit of interdependent responsibility within industry. He also stressed the necessity for an all-out industrial war effort in Canada and suggested that officers and members of affiliated bodies should carefully study the various Orders in Council passed under the authority of the War Measures Act and that they give such legislation a fair trial.

Mr. W. T. Burford, secretary-treasurer of the Canadian Federation of Labour, stated:

"We can size up the task at last. We can see that what has been done was only a beginning, that what remains to be done will take all we have and are. In the tyrant countries, everybody fights or works. We know now that we cannot win by doing less. They have set the pace; they have made total war. The only answer is to turn their rule against them, for every Canadian to fight or work.

"The ranks have closed. The call of national duty has brought quick response. It is a direct and personal response. There is little talk of class interests, of making the group solid before the nation can be solid. The old argument can be resumed later on, if the nation stays free—if all the free nations stay free. We have grasped the truth that the nation is not built of the groups and interests which in peace time seem so vital. The nation consists of men and women, and in time of peril these men and women are citizens first. They may be workers or bosses, they may have been makers or takers or fakers, but at this time they are citizens—and that is what matters. It is as Canadians that they march together in a war of peoples, a war in which they mean, as Churchill has said, 'to conquer or die' . . ."

Extension of time limit for modification of collective labour agreements

The effective date for bringing collective labour agreements into conformity with the provisions of the Wartime Wages and Cost-of-Living Bonus Order (P.C. 8253) was extended to February 15, 1942, instead of January 1, 1942.

This extension was established by Order in Council (P.C. 10195, December 29, 1941) when the National War Labour Board reported that it had not been found possible to effect all the necessary adjustments in collective labour agreements by January 1.

The amended paragraph in the Order now reads as follows:

"16. Any provision of any collective labour agreement which is inconsistent with the provisions of this Order shall be brought into conformity with this Order not later than February 15, 1942. Any agreement so modified, and any other condition of work otherwise suspended in the interest of war production shall be fully restored on the termination of the present war. The National Board shall maintain a record of all such modifications and suspensions."

Appointment of Dr. Bryce M. Stewart as vice-chairman National War Labour Board

On January 5 the honourable Humphrey Mitchell, Minister of Labour, announced the appointment of Dr. Bryce M. Stewart, Deputy Minister of Labour, as Vice-Chairman of the National War Labour Board.

In making this announcement, Mr. Mitchell stated that while he would continue to act as chairman of the National War Labour Board, in view of his appointment as Minister of Labour he would be unable to be present at all the Board's meetings and hence the necessity for a vice-chairman.

Despite the pressure of his duties as Minister of Labour, Mr. Mitchell felt that under war conditions it would be advisable for him to remain as Chairman of the Board in view of the close inter-relationship of the Board's functions with those of the Dominion and provincial Departments of Labour.

"In effect", the Minister stated, "this set-up of War Labour Boards is a co-operative procedure of the Dominion and provincial Departments of Labour to deal with pressing wartime labour problems, and in particular with the administration of Order in Council P.C. 8253, which stablizes wage rates for the period of the war."

The Minister further explained that many disputes will involve issues other than those of wage adjustments, and felt that his retaining the chairmanship of the National War Labour Board would make it possible to deal with any such dispute as a whole whether through the machinery of the War Labour Boards or through the Department of Labour "in so far as considerations other than wages are involved."

It was also pointed out that since each of the Provincial Ministers of Labour has accepted appointment as Chairman of the Regional War Labour Board for his province, Mr. Mitchell's decision to continue as Chairman of the National War Labour Board would serve to effect a close co-ordination of all the Labour Departments of the country, and would preserve the procedure with respect to the appointment of chairman embodied in Order in Council P.C. 8253.

"This decision", it was stated, "together with Dr. Stewart's appointment as Vice-Chairman, assures that the Department of Labour and the War Labour Boards will operate under a common policy, and that the machinery of the Department and the Boards will be closely integrated. Conflicts in planning and methods will be avoided and the two agencies will be harnessed to the common purpose."

Co-ordination of Conciliation Activities

Following a conference with the Hon. Peter Heenan, Minister of Labour for Ontario and Chairman of the Ontario Regional War Labour Board, the Minister of Labour, Hon. Humphrey Mitchell announced that Mr. Louis Fine, Chief Conciliation Officer of the Ontario Department of Labour, had been appointed Chief Conciliation Officer of the Ontario Regional War Labour Board.

In making this announcement Mr. Mitchell stated that while under the Wages Stabilization Order P.C. 8253 the National and Regional War Labour Boards administer the wage ceiling, an arrangement had been made between himself and the Hon. Peter Heenan whereby disputes in the Province, other than those of a national character, will be dealt with by the Ontario Regional Board. This was considered necessary he stated, as it appeared impracticable to break down any particular dispute so that it might be dealt with in its wage aspects alone by the National or Regional War Labour Boards and in its other aspects by the Dominion Department of Labour.

Consequently, in order to co-ordinate the conciliation work of the Boards with the work of the Department of Labour and by way of experiment in this direction, the Dominion Department of Labour has assigned its two conciliation officers—Messrs. Ainsborough and Nicol—stationed at Toronto, to the Ontario Regional War Labour Board.

Conference of National and Regional War Labour Boards

A conference between the National War Labour Board and its nine Regional Boards was held on January 14-15 under the chairmanship of the Hon. Humphrey Mitchell, Minister of Labour and chairman of the National War Labour Board.

The conference afforded to members of the various boards an opportunity for a comprehensive discussion of employer-employee relationships in wartime.

The importance of the conference as a thoroughly representative administrative body was indicated in the fact that memberships on both national and regional boards comprise 25 representatives of the major Canadian labour organizations who sat down with 25 representatives of the nation's employers (together with the Dominion and provincial ministers of labour) to confer on wartime wage control in Canada.

In particular, the meeting dealt with the administration of the wage ceiling regulations and the application of the cost of living bonus as a basic feature of the government's control policy.

The place of wage stabilization and price control as two fundamental moves against inflation was discussed before the conference at one session by Donald Gordon, chairman of the Wartime Prices and Trade Board.

The full text of Mr. Mitchell's and Mr. Gordon's addresses will be found elsewhere in this issue.

Quebec Superior Council of Labour established

Late in December, the Hon. Edgar Rochette announced the establishment of the Superior Council of Labour which had received official sanction during the 1940 session of the Quebec Legislative Assembly.

The council is composed of twenty-four members comprised in panels of 8 representatives from labour, management, and economists and sociologists, together with a permanent commission of six members on which the same equality of representation is preserved.

The functions of the council will include the study of questions relating to workers, salaries, rationalization of work, collective labour agreements, prevention of industrial accidents, apprenticeship, professional orientation, rehabilitation of the unemployed, insurance and social assistance, abolition of slums, etc.

The permanent commission of six members, who will prepare the council's work and serve as a liaison with the provincial minister of labour, is made up of two representatives of labour, two representatives of capital, and two persons appointed by the Lieutenant-Governor in Council. The ministers of labour and trade and commerce each appoint to the committee a member, who will take part in deliberations of the council but will not vote. Members of the committee are to hold office for one year.

Members of the permanent committee are: Gerard Tremblay, Deputy Minister of Labour; Henri Loudin, member of the Minimum Wage Commission; C. E. Sharpe, member of the Workmen's Compensation Board; Louis Coderre, Deputy Minister of Municipal Affairs, Trade and Commerce; Fortunat Fortier, head of the economic research department of the Ministry of Municipal Affairs, Trade and Commerce, and F. M. M. Gibaut of the educational division of the same department.

President Roosevelt's conference on prevention of strikes

Shortly after the American declaration of war on Japan, President Roosevelt invited labour and industrial leaders to a joint conference to consider means of preventing strikes and lockouts during the war. The president of the American Federation of Labor and the president of the C.I.O. were requested to nominate six representatives each from their respective organizations to participate in the conference and the president of S.K.F. Industries was asked to choose, after appropriate consultation, twelve representatives of industrial management.

While the essential objective of the conference was to reach agreement "to prevent the interruption of production by labour disputes", the President suggested that it might also reach an agreement "defining appropriate practices for both labour and management to secure maximum production of war needs".

As a result of this conference a war labour board for labour-management relations was recommended for the duration of the war. The new board will employ conciliation, mediation or arbitration in the settlement of all disputes threatening to impede war production.

Another result of the conference was the agreement between labour and employer representatives to forego strikes and lockouts for the duration of the war and to settle disputes by peaceful means.

National War Labour Board established in U.S.A.

By executive order, on January 12, President Roosevelt established a National War Labour Board in the United States. The Board consists of twelve members appointed by the President, four representing the public, four representing employees and four representing industry.

The National War Labour Board which is to deal with labour disputes for the duration of the war, replaces the National Defence Mediation Board (LABOUR GAZETTE, April, 1941, page 366), the chairman of the latter body, Mr. William H. Davis, being named chairman of the new board. Professor George W. Taylor, of the University of Pennsylvania, was appointed vice-chairman.

The executive order establishing the board also provided that all employers coming under the jurisdiction of the National Defence Mediation Board shall be transferred to the jurisdiction of the National War Labour Board.

The procedures to be followed in the adjustment of labour disputes which might interrupt work necessary to the effective prosecution of the war were also set forth in the executive order. These are:—

1. The parties at issue shall resort first to "direct negotiations or to the procedures provided in a collective bargaining agreement";

2. Failing to achieve settlement through such negotiations, the Labour Department's conciliation commissioners must be notified, if they have not already intervened;

3. If the dispute is not "promptly settled" by conciliation, the Secretary of Labour must certify it to the War Labour Board, "provided, however, that the board in its discretion after consultation with the Secretary may take jurisdiction of the dispute on its own motion";

4. After it takes jurisdiction the board "may use mediation, voluntary arbitration or arbitration" to effect a settlement.

No strike pledges by U.S. unions

When war broke out on December 7 between the United States and Japan, there were two defence strikes in progress and twenty threatening in the United States. Both strikes were immediately ended and most of the strike threats were withdrawn.

The cessation of labour disputes was attributed in large part to the desire of union leaders and their members to speed defence production. This was evidenced by anti-strike resolutions and pledges adopted by numerous labour groups, including the executive council of the A.F. of L., the New York State Federation of Labor (A.F. of L.), the United Automobile, Aircraft and Agricultural Implement Workers (C.I.O.), the Amalgamated Clothing Workers (C.I.O.), the Industrial Union of Marine and Shipbuilding Workers (C.I.O.) and the International Longshoremen's Association (A.F. of L.).

One of the most interesting developments was the signing of an agreement between the presidents of the Manufacturers' Association of Connecticut, the Connecticut Federation of Labour and the state C.I.O. council banning strikes in Connecticut industries for the duration of the war and providing that all differences between management and labour shall be submitted for settlement to the governor or to arbitrators.

Industrial war training on 24-hour schedule in U.S.A.

The United States Office of Production Management recently ordered that the operation of vocational schools and other industrial training programs be placed on a 24-hour a day schedule to help offset the shortage of skilled workers in war industries.

In issuing this order, Mr. Sidney Hillman, Associate Director of O.P.M., declared: "It is obvious that the existing available supply of skilled workers will soon be absorbed by war industries." Mr. Hillman reported that in the year and a half since the program began, federally financed training courses had been attended by 2,477,400 people. The most useful training courses for war work, he said, were those in welding, aircraft, riveting, sheet-metal work, machine-shop work, and ship-fitting.

It is anticipated that extra workers for war industries will come largely from the re-training of employees who lose their jobs in civilian industries and from the "training of employed people, young and unemployed people, women who are available for such work, negroes, loyal non-citizens and others whose hands and hearts are at the service of their country."

According to figures issued by the Dominion Bureau of Statistics financing of new and used motor vehicles in December totalled 6,989 units with a financed value of $3,099,867, was down 35 per cent in number and 44 per cent in dollar volume from the 10,756 vehicles financed for $5,492,353 in the same month of 1940. Results of reduced production, together with restrictions on instalment purchasing which became effective during October are revealed in the results for the latter months of 1941. During the calendar year 1941 there were 179,070 vehicles financed for $83,692,160, being up one per cent in number and 11 per cent in dollar volume from 1940 figures.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

REPORTS were received during the past month from the Boards of Conciliation and Investigation established to deal with the following disputes:—

(1) Between various shipping companies located along the Miramichi River in the province of New Brunswick and the longshoremen and truckers in their employ (supplementary report);

(2) Between the Morton Engineering and Dry Dock Company, Limited, Quebec, P.Q., and its employees, members of Local 511, United Association of Journeymen Plumbers and Steamfitters of the United States and Canada; and

(3) Between W. D. Beath and Son, Limited, Toronto, Ont., and its employees, members of Local 1039, Steel Workers Organizing Committee.

The texts of the aforementioned reports will be found at the end of this statement.

Applications Received

In the month of December eleven applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour as follows:—

(1) From employees of Electric Auto-Lite Limited, Sarnia, Ont., members of Lodge 1499, International Association of Machinists. The dispute, which arose out of the employees' request for a union agreement respecting wages and working conditions, was said to affect 450 workers directly. Shortly after the receipt of the application, the employees concerned requested the Department of Labour to take no action on the application until further notice. As a consequence, the application was being held in abeyance at the end of the month.

(2) From employees of the English Electric Company of Canada, Limited, St. Catharines, Ont., members of Local 199, United Automobile Workers of America. The dispute, which arose out of the employees' request for a union agreement was said to affect 395 workers directly. On December 18 the dispute was referred to Professor Gilbert Jackson, Industrial Disputes Inquiry Commissioner, for investigation.

(3) From employees of Motor Products Corporation, Walkerville, Ont., members of Local 195, United Automobile Workers of America. The dispute, which arose out of the employees request for a union agreement providing for wage adjustments, overtime pay, vacations with pay, grievance procedure, recognition of seniority, etc., was said to affect 435 workers directly. On December 24 the Minister of Labour appointed Mr. Louis Fine, Chief Conciliation Officer of the Ontario Department of Labour, Toronto, Ont., an Industrial Disputes Inquiry Commissioner to investigate the dispute.

(4) From employees of The Public Markets, Limited (jointly operated by the Canadian National Railways and the Canadian Pacific Railway Company), St. Boniface, Man., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The dispute, which arose out of the employees' request for wage increases of 10 per cent with a minimum wage rate of 50 cents per hour, was said to affect 130 workers directly and 155 indirectly. Inasmuch as the dispute related solely to rates of pay, the parties were advised to take up the matter with the Regional War Labour Board in Manitoba.

(5) From employees of The Consumers' Gas Company of Toronto, Toronto, Ont., members of the National Union of Domestic and Industrial Gas Workers. Approximately 800 workers were said to be directly affected by the dispute, which arose out of the alleged unjust dismissal of certain employees because of their union membership and activities. On December 24 the Minister of Labour appointed Mr. Louis Fine, Chief Conciliation Officer of the Ontario Department of Labour, Toronto, Ont., an Industrial Disputes Inquiry Commissioner to investigate the dispute.

(6) From employees of the Chrysler Corporation of Canada, Limited, Windsor, Ont., members of Local 195, United Automobile Workers of America. The dispute, which arose out of the employees' request for a union agreement providing for wage adjustments, grievance procedure, seniority rights, etc., was said to affect approximately 2,600 workers directly and an equal number indirectly. On December 24 the Minister of Labour appointed Mr. Louis Fine, Chief Conciliation Officer of the Ontario Department of Labour, Toronto, Ont., an Industrial Disputes Inquiry Commissioner to investigate the dispute.

(7) From employees of Bishop and Sons, Limited, Portneuf Station, P.Q., members of the National Catholic Union of Pulp and Paper Workers of Portneuf Station. Among the matters in dispute were the employees' request for union recognition, the alleged unjust dismissal of certain employees, and threats alleged to have been made to the employees by

42360—2½

a director of the employing company. The dispute was said to affect 40 workers directly and 28 indirectly. On December 19, Mr. Ligouri Pepin, a Montreal representative of the Department of Labour, was instructed to proceed to the locality of the dispute in an endeavour to effect a settlement.

(8) From employees of the McCord Radiator and Manufacturing Company, Walkerville, Ont., members of Local 195, United Automobile Workers of America. The dispute, which arose out of the employees' request for a union agreement providing for wage adjustments, grievance procedure, etc., was said to affect 80 workers directly and an equal number indirectly. On December 30 the Minister of Labour appointed Mr. Louis Fine, Chief Conciliation Officer of the Ontario Department of Labour, Toronto, Ont., an Industrial Disputes Inquiry Commissioner to investigate the dispute.

(9) From employees of T. McAvity and Sons, Limited, Saint John, N.B., members of Local 835, International Association of Machinists. The dispute, which arose out of the employees' request for a union agreement providing for wage adjustments and certain changes in working conditions, was said to affect 184 workers directly and 220 indirectly.

(10) From machinists and other shopmen in the employ of the Sydney and Louisburg Railway Company, Glace Bay, N.S., members of Local 684, International Association of Machinists. The dispute, which arose out of the employees' request for increased rates of pay, was said to affect 91 workers directly.

(11) From the unlicensed deck and engine-room crews of the North Vancouver Ferries, operated by the Corporation of the City of North Vancouver, B.C. The applicants are members of the Inlandboatmen's Union of the Pacific. The dispute, which arose out of the employees' request for a union agreement providing for wage adjustments, the payment of wartime cost-of-living bonuses and certain changes in hours of labour and other working conditions, was said to affect 18 workers directly and 20 indirectly.

Board Fully Constituted

The constitution of the Board of Conciliation and Investigation on November 27 to deal with a dispute between the Canadian Bridge Company, Limited, Walkerville, Ont., and its employees, members of Local 2471, Steel Workers Organizing Committee (LABOUR GAZETTE, December, 1941, page 1467), was completed early in December. The personnel of the board is as follows: His Honour Judge A. J. Gordon, Windsor, Ont., chairman, appointed in the absence of a joint recommendation from the other two members; Professor G. M. A. Grube, of the University of Toronto, appointed on the nomination of the employees; and Mr. W. H. Furlong, K.C., also of Windsor, appointed on the nomination of the employer.

Settlements

A Board of Conciliation and Investigation was established on April 9 to deal with a dispute between the Canadian National Railways and the Canadian Pacific Railway Company and four of their subsidiary railways, on the one hand, and approximately 125,000 employees, members of 18 international railway labour organizations (LABOUR GAZETTE, May, 1941, pages 503-504, and July, 1941, pages 739-751). A settlement of this dispute has been reached on the basis of the payment of wartime cost-of-living bonuses in accordance with the provisions of Order in Council P.C. 7440 from June 1 to November 15, 1941, and in accordance with the provisions of Order in Council P.C. 8253 effective from November 16, 1941.

During the progress of negotiations in connection with the dispute mentioned in the preceding paragraph, an application for the establishment of a Board of Conciliation and Investigation was received from the members of two of the aforementioned international unions, namely, the Brotherhood of Railroad Trainmen and the Brotherhood of Locomotive Firemen and Enginemen, to deal with a disagreement which had arisen as to the basis for payment of the wartime cost-of-living bonuses to these groups (LABOUR GAZETTE, November, 1941, page 1342). With the assistance of officials of the Department of Labour, a satisfactory settlement was reached and the application was withdrawn on December 11.

On April 18 another Board of Conciliation and Investigation was established to deal with four disputes involving members of the Canadian Brotherhood of Railway Employees and Other Transport Workers, as follows: (1) between the Canadian National Railways and its clerks, freight handlers, etc.; (2) between the Canadian National Railways and its sleeping and dining car employees; (3) between the Niagara, St. Catharines and Toronto Railway and its freight handlers; and (4) between the Canadian National Railways and employees in its Express Department (LABOUR GAZETTE, May, 1941, page 514, and July, 1941, pages 751-760). Settlement of these disputes has also recently been reached on the basis of the payment

of wartime cost-of-living bonuses in accordance with the provisions of Order in Council P.C. 7440 from June 1 to November 15, 1941, and in accordance with the provisions of Order in Council P.C. 8253 effective from November 16, 1941.

On November 27 His Honour Judge I. M. Macdonell, Toronto, Ont., was appointed an Industrial Disputes Inquiry Commissioner to investigate a dispute between Acme Paper Products, Limited, Toronto, and its employees, members of Locals 186 (Paper Box Workers) and 214 (Specialty Workers), International Brotherhood of Bookbinders, and Local 466, International Printing Pressmen and Assistants' Union (LABOUR GAZETTE, December, 1941, page 1467). The report of the Commissioner was received on December 9. The investigation disclosed that the employing company is willing to recognize the officials of the unions and the unions themselves as the bargaining agencies of those employees who are members of the unions and to carry on collective bargaining with those agencies. The parties were advised to submit any differences regarding rates of pay to the National War Labour Board for decision. The Commissioner also investigated complaints to the effect that certain employees had been unjustly discharged, but found that this matter had subsequently been settled by the reinstatement of the employees concerned.

During the month of December a settlement was reached in a dispute between the Canadian Pacific Railway Company's British Columbia Coast Steamship Service and employees in its Stewards', Deck and Engineroom Departments, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The settlement was based on recommendations contained in the report of the Board of Conciliation and Investigation which dealt with the dispute (LABOUR GAZETTE, November, 1941, pages 1343-1344).

In November, 1941, employees of Jas. Strachan, Limited, Montreal, P.Q., members of Local 55, Bakery and Confectionery Workers' International Union of America, made application for the establishment of a Board of Conciliation and Investigation to deal with a dispute which had arisen out of the alleged unjust dismissal of two workers on account of their union activities (LABOUR GAZETTE, December, 1941, page 1467). An investigation of this dispute was subsequently made by Montreal representatives of the Department of Labour, who advised that one of the discharged employees had been reinstated and that the matter was receiving further attention at the hands of officials of the Quebec Provincial Department of Labour and of the Montreal Trades and Labour Council.

Supplementary Report of Board in Dispute between Various Shipping Companies on the Miramichi River, N.B., and Their Employees

A unanimous supplementary report was received on December 3 from the Board of Conciliation and Investigation established to deal with the dispute between various shipping companies located along the Miramichi River in the province of New Brunswick and the longshoremen and truckers in their employ. At the request of the employers concerned, the Minister of Labour had asked the board to reconvene for the purpose of clarifying certain recommendations contained in its original report (LABOUR GAZETTE, September, 1941, pages 1062-1066, and November, 1941, page 1342).

The personnel of the board was as follows: His Honour Judge J. L. Ryan, Bathurst, N.B., chairman, appointed on the joint recommendation of the other two members; Mr. T. H. Whalen, Newcastle, N.B., appointed on the nomination of the employees; and Mr. W. H. Davidson, also of Newcastle, N.B., appointed on the nomination of the employers.

The text of the board's supplementary report is printed below.

Supplementary Report of Board

To the Honourable Norman A. McLarty, Minister of Labour, Ottawa, Canada.

In the matter of the Industrial Disputes Investigation Act, and in the matter of a dispute between various shipping merchants located along the Miramichi River in New Brunswick, namely, Charles M. Scott, British Canadian Pitwood, Limited, and Fraser Companies, Limited, of Newcastle; J. L. O'Brien and George Burchill & Sons, Limited, of South Nelson; and E. F. Malkin, Limited, and W. S. Loggie, Limited, of Chatham, and their employees.

Sir:

On the thirtieth day of September last you ordered your Conciliation Board to reconvene and to state in clearer terms our recommendation on the following points: (1) Loading lumber; (2) Flat bonus for cost of living; (3) Definition of straight time.

Your Conciliation Board had sittings on the twentieth day of October and twenty-ninth day of November, which all members attended,

and beg leave to submit our unanimous supplementary report as follows:—

We have seen fit to redraft Sections (2), (4), and (15) of our findings of August second last, representatives of the employers and employees being present and having agreed to the sections as redrafted, which sections will now read as follows:—

(2) That the present wage rate be continued for the duration of the war, namely, 62½ cents per hour for loading long lumber, pitprops and pulpwood, including work on the dock, conveying lumber, pitprops and pulpwood to the vessel, and 77½ cents per hour for semi-skilled work, that is, stowing long lumber and spoolwood and unloading ballast;

(4) That the men be granted straight time from the time they are hired to commence work with the exception of one hour's allowance at the start of a boat, and the provision that in any stoppage in work, due to causes not within the control of the employer, the employer shall be entitled to lay off men without pay for not over one hour, and if work is not resumed in one hour the men shall be paid for any further lost time unless they are definitely laid off for the remainder of the shift;

(15) That flat cost-of-living bonus as provided by Order in Council be paid by the employers on the basis that the wages set in (2), namely 62½ cents per hour and 77½ cents per hour have taken into consideration all cost-of-living increase to August 1, 1941, at which date the cost-of-living index stood at 113·7 and any raise in cost of living under which bonus would be payable shall be calculated from August 1, 1941.

We are impressed by the expressed intention of employers and employees to co-operate.

All of which is respectfully submitted.

(Sgd.) Joseph L. Ryan,
Chairman.

(Sgd.) T. H. Whalen,
Member.

(Sgd.) W. H. Davidson,
Member.

Newcastle, N.B.
November 29, 1941.

Report of Board in Dispute between Morton Engineering and Dry Dock Company, Limited, and Certain Employees

On December 8 the Minister of Labour received the findings of the Board of Conciliation and Investigation which dealt with a dispute between the Morton Engineering and Dry Dock Company, Limited, Quebec, P.Q., and its employees, members of Local 511, United Association of Journeymen Plumbers and Steamfitters of the United States and Canada. This board had previously submitted its findings in regard to a dispute between the company and another group of its employees, members of Local 601, International Brotherhood of Boilermakers, Iron Shipbuilders, Welders and Helpers of America (LABOUR GAZETTE, December, 1941, pages 1468-73).

The personnel of the board was as follows: the Honourable Mr. Justice Alfred Savard, of the Quebec Superior Court, Quebec, P.Q., chairman, appointed on the joint recommendation of the other two members; Mr. Robert Lafleur, Montreal, P.Q., appointed on the nomination of the employees; and Mr. Bernard Devlin, K.C., Quebec, P.Q., appointed on the nomination of the employer.

The report of the board is signed by the chairman and Mr. Lafleur. A minority report was submitted by Mr. Devlin.

The texts of the board's report and Mr. Devlin's minority report are printed below.

Report of Board

To the HONOURABLE NORMAN MCLARTY, K.C., Minister of Labour, Ottawa, Ont.

In the matter of The Industrial Disputes Investigation Act, and of a dispute between Morton Engineering and Dry Dock Company, Limited, and its employees being members of Local Union 511 of the United Association of Journeymen Plumbers and Steamfitters of United States and Canada.

SIR:—

The Board of Conciliation and Investigation established by you to deal with a dispute between the Morton Engineering and Dry Dock Company, Limited, and its employees being members of Local Union 511 of the United Association of Journeymen Plumbers and Steamfitters of United States and Canada, has completed its duties and desires to submit its report.

The Board held sittings on the 12th, 13th, 14th, 18th, 19th, 20th, 28th and 29th of November, and on the 1st and 2nd of December, 1941. During said periods evidence was heard and briefs were submitted by both parties. Negotiations have been continued until to-day.

The sessions, which were conducted in the City of Quebec, were attended by Messrs. R. W. Morton, and M. Scott, respectively,

President and Superintendent of the company, and by Messrs. Louis Guerard, General Vice-Chairman of the Local Union of Plumbers and Steamfitters, and John W. Bruce, General Representative in Canada of the Plumbers and Steamfitters.

The application for the establishment of a Board of Conciliation and Investigation by the employees of the company states that the nature and cause of the dispute is a request for an agreement covering wages and working conditions.

We find that there was not any objection on the part of the company to enter into such an agreement covering wages and working conditions, and as a matter of fact the parties in the dispute came to an agreement on everything except the rate of wages and the date on which the increase was to become effective.

The shipbuilding industry involved in this application is definitely a war industry of primary importance. Three shipyards operate in the same area, to wit: Davie Shipbuilding and Repair Company, Geo. T. Davie & Sons, Limited, and Morton Engineering and Dry Dock Company, Limited. There are other plants at Montreal and at Sorel.

It has been the unfortunate experience of the above shipbuilding plants that there has been little tonnage constructed since the last war.

It was stated during the hearings that certainly since 1926 or 1929, the Morton Engineering and Dry Dock Company, Limited, had no new construction except the war work on which they are now engaged; as a shipyard, therefore, its business was restricted to repairs.

Further inquiries have indicated that the same condition was found to be existing with nearly all shipyards throughout Canada.

It has been definitely established that the Morton Engineering and Dry Dock Company, Limited, is now engaged in the construction of vessels for the Canadian Government.

After carefully studying the average wage rate level now in force throughout Canada in the shipbuilding industry, we are compelled to realize that the wage rate level existing at the Morton Engineering and Dry Dock Company, Limited, is unduly low and subnormal. It is generally admitted that the shipbuilding industry throughout Canada was depressed or subnormal during the period from 1926 to 1929. During the course of 1929, uniform basic wage rates were agreed upon between all shipyard owners or corporations from coast to coast. The rates for plumbers and steamfitters were then established at 58 cents per hour, and the rates for helpers at 35 and 40 cents per hour. After proper investigation, we are informed that the same conditions of work which existed at Morton Engineering until 1939 also prevailed in all shipbuilding plants on the Great Lakes: there was very little tonnage constructed and the business was restricted to repairs.

To-day at Morton Engineering, plumbers and steamfitters are still paid 58 cents per hour, and helpers approximately 35 cents per hour.

The Dominion Government in its own shipyards at Halifax is now paying to the same class of employees, doing just as efficiently the same type of work and in the same industry, a wage rate of 85 cents per hour.

At Saint John Dry Dock and Shipbuilding Company, Limited, the minimum wage rate level for plumbers and steamfitters is 77 cents per hour.

Canadian Vickers at Montreal is paying from 78 to 83 cents per hour to its plumbers and steamfitters.

The Pacific coast shipyards are paying to their plumbers and steamfitters from 90 cents to $1 per hour.

Dufferin shipyards at Toronto, now supposedly owned by the Dominion Government, are paying to their plumbers and steamfitters $1 per hour.

Port Arthur shipyards are paying to their plumbers and steamfitters a minimum wage level of 85 cents per hour.

Until last November, shipyards at Kingston and at Collingwood, in the Province of Ontario, had been paying to their plumbers and steamfitters, according to agreements now expired, a minimum wage rate of 70 cents per hour.

It is a known fact that the prevailing rates paid in the shipyards industry throughout Canada have increased regularly since 1939 from 58 cents per hour to 75 cents, 80 cents, 90 cents and even $1 per hour.

We are compelled to conclude that the Morton Engineering and Dry Dock Company, Limited, is possibly the only shipyard plant throughout the country which has not as yet granted a single increase to its plumbers and steamfitters, outside of the 2 cents an hour cost-of-living bonus.

The evidence and facts submitted to the Board show:—

(*a*) That during the period of 1926-1929 the wage rate level applied to the trades concerned in the building industry and in the District of Quebec were higher than those that are now prevailing; it has definitely been established that during the period 1926-1929 plumbers and steamfitters in the building industry in the District of Quebec were being paid at the rate of 75 cents, 80 cents and even 85 cents per hour;

(*b*) That most of the labour required by the employer has been necessarily drawn from the building industry.

The costs of living in Quebec are not lower than in Halifax or than in other parts of the country, and although living costs in Montreal might be slightly higher than in Quebec, it would never explain and justify the above disparity in the basic wage rates.

This Board is bound to abide in its findings to Canada's Wartime Wages Policy under the specific provisions of Order in Council P.C. 7440.

No evidence was submitted at the hearings, and no explanation given, to explain and solve the problem or reasons for this subnormal difference in the basic wage rates. Even the costs of repairs have increased proportionally. The cost of transportation could not be given as an excuse, and if so, taken seriously.

By comparison it is to be noticed that the Maritime Provinces, Montreal, Western Ontario and the Pacific coast have all, from time to time, adjusted or readjusted their basic rates and given fair and proportionate increases of wages.

Under the circumstances, we must come to the obvious conclusion that Article 3 of P.C. 7440 should apply to the now existing condition at the Morton Engineering and Dry Dock Company, Limited.

The wage rate level at Morton is unduly low or subnormal. It cannot compare with other shipyards throughout the country. Because the same subnormal condition might exist elsewhere in the Province of Quebec, whether at Lauzon or at Sorel, could not alter the findings of this Board.

In view of the above conclusions, we recommend:—

(*a*) That the basic wage rate level of 58 cents now being paid to all plumbers and to all steamfitters employed at the Morton Engineering and Dry Dock Company, Limited, be increased to 75 cents per hour;

(*b*) That the wage rate level of 35 cents and 40 cents now being paid to all helpers employed at the Morton Engineering and Dry Dock Company, Limited, and engaged in the plumbing and steamfitting industry, be increased to 55 cents per hour;

(*c*) That the above new basic wage scale should be made subject of agreement between the parties and should be effective as of and from the 24th day of June, 1941;

(*d*) That the retroactivity mentioned in the preceding sub-paragraph should apply only to Government work and to those employees who are still in the employ of the company.

In view of the fact that His Excellency the Governor General in Council has revoked Order in Council P.C. 7440, of December 16, 1940, and its amendments, and considering also that His Excellency in Council has made and established a new Order in Council known as the *Wartime Wages and Cost-of-Living Bonus Order*, this Board is not qualified and cannot even make recommendations as regards the cost-of-living bonus, and should restrict its findings to the sole question of basic wage rates.

The Board expresses its appreciation of the friendly co-operative assistance rendered by the parties to this dispute and by their representatives.

All of which is respectfully submitted.

(Sgd.) Alfred Savard.
(Sgd.) Robert Lafleur.

MONTREAL, December 4, 1941.

Minority Report

To the HONOURABLE NORMAN MCLARTY, K.C., Minister of Labour, Ottawa, Ont.

In the matter of The Industrial Disputes Investigation Act and of a dispute between the Morton Engineering and Dry Dock Company, Limited, and certain of its employees being members of Local Union 511 of the United Association of Journeymen Plumbers and Steamfitters of the United States and Canada.

SIR:—

The Board of Conciliation and Investigation appointed by you to deal with the dispute between the Morton Engineering and Dry Dock Company, Limited, and certain of its employees being members of Local Union 601, International Brotherhood of Boilermakers, Iron Shipbuilders, Welders and Helpers of America, forwarded you a majority report and a minority report on October 25 last. I was then in accord with some of the conclusions of the two other members of the Board, the Honourable Mr. Justice Alfred Savard, its Chairman, and Mr. Robert Lafleur, nominated by the employees, but being of opinion that P.C. 7440, which then prevailed, would not allow us to increase the basic rate of wages beyond what was paid in the industry during the 1926-1929 period, I had to write a minority report in support of my views.

Our Board was then instructed by you, Sir, to investigate the dispute between the same employer and another class of its employees being members of Local Union 511 of the United Association of Journeymen Plumbers and Steamfitters of the United States and Canada.

The Board held sittings in the City of Quebec on the 12th, 13th, 14th, 18th, 19th, 20th, 28th and 29th of November, and on the 1st and 2nd of December.

Evidence was adduced on behalf of the employees by plumbers and steamfitters employed elsewhere in the City of Quebec to show that they had received during the 1926-1929 period wages which were higher than those presently paid to the plumbers and steamfitters employed in the Morton shipbuilding plant.

I must say, however, that this evidence was given exclusively by plumbers and steamfitters employed in the building trades and railways, and not in the shipyards.

From this evidence it would seem that these men were paid 75, 80 and 85 cents on the construction of some large buildings in the City of Quebec and at Murray Bay. These same men told us that the prevailing rate of pay that they received as plumbers and steamfitters in the building trade is 65 cents per hour.

No evidence was adduced, however, to show that in the shipbuilding industry the rates were higher during the 1926-1929 period than the rates now paid. On the other hand, your Board has the evidence which was given by the Managing Director of the Morton shipbuilding plant that the wages now paid are higher than they ever were in the past.

This being the case, I cannot but come to the conclusion, as I did in my previous dissenting report and for the same reasons as therein set forth *mutatis mutandis,* that the prevailing basic rates are not unduly low or subnormal, but that they are fair and reasonable and should be maintained in the light of the principles enunciated in Canada's Wartime Wages Policy.

I must, however, qualify my finding, as I did in my previous report, in view of the action taken by the Department of Munitions and Supply, which authorized the three shipyards operating in this area, to wit, Davie Shipbuilding and Repairing Company, Limited, Geo. T. Davie & Sons, Ltd., and Morton Engineering and Dry Dock Company, Limited, to offer their employees an increase of five cents per hour. In the two first-mentioned plants this increase was accepted by the employees and became effective on June 24, 1941, but in the Morton plant the increase was not put into effect because, while the majority of their employees voted in favour of it, the members of the Boilermakers' Union voted it down.

I find, therefore, that since the Department of Munitions and Supply saw fit to authorize an increase of five cents per hour in the basic rates of pay, presumably for the purpose of establishing generally fair and reasonable wage rate levels in this area, the employees of the Morton plant should be given the same five-cent increase.

The matter of the date upon which such increase should be made effective is one of the points under dispute.

As there is an escalator clause in the Government contracts, I would recommend, in order to help conciliation, that on Government contracts the increase of five cents per hour be made effective as of June 24, 1941, for the men still in the company's employ, but not on private work, as the company would be heavily penalized on its private work contracted for on the basis of the then prevailing labour rates; and I feel that the company should not be so penalized when the men themselves voted against accepting the increase which was offered to them.

I therefore recommend that the five-cent increase be made effective as of June 24, 1941, to men who are still in the employ of the company, but that it should apply only to Government work.

Evidence was adduced to show that higher rates prevailed in shipyards in other parts of the province and in other parts of Canada.

This, as I said in my previous minority report, is one of the factors which has caused unrest in the state of mind of labourers of the shipyards of Quebec. However, I find that I cannot take this into account in the light of the principles set forth in Canada's Wartime Wages Policy, and it is reasonable to presume that the very competent Board appointed by you, Sir, under the Chairmanship of Senator Gouin, will deal with this aspect of the question.*

I have the honour to be, Sir,

Your obedient servant,

(Sgd.) Bernard Devlin.

**Editor's Note.*—The text of the Report of the Royal Commission on Shipbuilding in the Provinces of Quebec and Ontario will be found elsewhere in this issue (pages 17-27).

Report of Board in Dispute between W. D. Beath & Son, Limited, and Its Employees

A unanimous report was received on December 10 from the Board of Conciliation and Investigation established to deal with the dispute between W. D. Beath & Son, Limited, Toronto, Ont., and its employees, members of Local 1039, Steel Workers Organizing Committee (LABOUR GAZETTE, July, 1941, page 736, and August, 1941, page 875).

The personnel of the board was as follows: His Honour Judge I. M. Macdonell, chairman, appointed on the joint recommendation of the other two members; Mr. David Goldstick, appointed on the nomination of the employees; and Mr. F. G. Gardiner, K.C., appointed on the nomination of the employer. All three reside in Toronto.

The text of the board's report is printed below.

Report of Board

To the HONOURABLE NORMAN A. MCLARTY, K.C., Minister of Labour, Ottawa.

In the matter of The Industrial Disputes Investigation Act, and re *differences between W. D. Beath and Son, Ltd., and its employees, Members of the Steel Workers Organizing Committee.*

SIR:—

The Board of Conciliation established by you to investigate this dispute has now the honour to submit its report.

An application for a Board of Conciliation was made on the 4th of June, 1941, by members of the Steel Workers Organizing Committee, who nominated Mr. David Goldstick as their representative on the board. Mr. F. G. Gardiner, K.C., was subsequently nominated by the company as its representative, and upon the recommendation of these two nominees His Honour Judge Ian M. Macdonell, of the County Court of the County of York, was appointed Chairman of the board.

The board first convened on the 13th of August, 1941, when it was found that Mr. L. B. Beath, the President and General Manager of the company, was absent from the city on account of illness, and it was accordingly agreed that preliminary briefs should be called for from both parties and submitted to a meeting of the board to be held on the 9th of September.

On September 9, Mr. H. J. Padget and Mr. J. W. Hill appeared as representatives of the employees, and Messrs. L. B. Beath, O. A. LeFrancois and F. Wilkinson for the employer, and the preliminary briefs were read. After some discussion the board suggested that Mr. Beath conduct direct negotiations with the representatives of the union to try and reach a settlement on the points involved, or at least arrive at common ground so that the issues before the board might be clarified. Mr. Beath concurred in the suggestion of the board, and expressed his willingness to commence negotiations forthwith with Mr. Padget. The board accordingly adjourned to allow the parties to proceed with negotiations.

The Chairman was, however, informed within the next few days that Mr. Beath had refused to negotiate with the representatives of the union. A subsequent meeting of the board was, therefore, called. At this meeting Mr. Beath stated that he was willing to negotiate with representatives who were in his employ, but that he had refused to negotiate with officials of the union who were not employees of the company. It was quite evident that he had changed his views since the previous meeting.

At subsequent meetings more comprehensive briefs were submitted by both parties covering the matters in dispute. As Mr. Beath had stated that he did not feel that his company could have confidence in the Steel Workers Organizing Committee, for reasons which he then stated and which it is not necessary for us to repeat at this time, he was asked to submit evidence to substantiate these complaints. At a later meeting he stated that he had no such evidence to offer.

It is obvious to the Board that Mr. Beath intends to persist in his refusal to negotiate. The board is unanimously of the opinion that he is in error in his attitude and that he should negotiate with the representatives of the union as representing those of the employees of the company who belong to the union, with a view to concluding a collective bargaining agreement covering general working conditions and the matters in dispute. In view of his attitude, however, the board feels that it would be idle for it to attempt to draw up an agreement for the parties at this stage, no draft having been submitted to the board by either of the parties. The board, however, considers it its duty to make the following observations and recommendations in detail with respect to matters in dispute:—

(1) *Union recognition.* It is the view of the board that the company should negotiate with the representatives of the Steel Workers Organizing Committee as representing those of its members who are employees of the company only, leading to the conclusion of a collective agreement. The board takes this view because it is not disputed that a substantial number, and probably a majority of the employees, belong to the union and desire to be represented in their negotiations with the company by the S.W.O.C. We think, therefore, the course of the board is laid down in P.C. 2685 and P.C. 7440.

(2) *Wages.* Under the provisions of P.C. 8253, now in force, the Board is of the opinion that a case was not made out for a general increase in wages. Some adjustment may be necessary to do away with inequalities and provide that, generally speaking, the same type of work should receive the same rate of pay, subject to proficiency and efficiency. This is a matter for negotiation.

(3) *Hours of work.*—There is now no serious dispute as to hours, changes having occurred since the board was constituted.

(4) *Overtime pay.* Mr. Beath stated that the only overtime which was called for in the plant was in connection with the manufacture of snowplows in the fall of the year; he stated

this was seasonal and necessary because of price competition with United States firms. The view of the board is that overtime should be avoided whenever possible, but when overtime is necessary that time and one-half should be paid, as that rate seems to be an accepted rate in this type of industry.

(5) *Night-work bonus.* In the opinion of the board a night-work bonus rate of five cents per hour should be paid. This may not be necessary, as Mr. Beath has informed the board that the company is enlarging its plant so as to eliminate the necessity for night work.

(6) *Holidays with pay.* After hearing considerable argument on this question, the board is of the opinion that a fair provision would be one week's holiday, with pay, for employees of the company who have had longer than one continuous year's service.

(7) *Notification in case of suspension of work.* The view of the board is that the company should place on the notice board, not later than four o'clock each day, notification to employees who are not required for work on the following day, and that any employee who reports for work, and for whom there is no work and who has not received such notification, shall receive four hours' work, or pay for four hours' work.

(8) *Seniority.* The board is of the view that in any collective agreement that is arrived at suitable provision should be made for the principle of seniority, with adequate provision for the recognition of ability.

(9) *Grievance machinery.* The board is of the opinion that there is decided need for the establishment of a procedure for the orderly adjustment of grievances, and that provision therefor should be included in any collective agreement which is concluded.

(10) *Health.* We understand there is no complaint made about this, but the usual provisions should be inserted in a collective agreement.

(11) *Discrimination.* The agreement should provide that in all of the relations between employers and employees there shall be no discrimination on either side.

In conclusion, the board desires to express the opinion that, generally speaking, working conditions in this plant are not bad, and that if a disposition for negotiation was evidenced, difficulties could easily be adjusted.

All of which is respectfully submitted.

Dated at Toronto this 8th day of December, A.D. 1941.

(Sgd.) I. M. Macdonell,
Chairman.
(Sgd.) D. Goldstick,
Employees' Nominee.
(Sgd.) F. G. Gardiner,
Company's Nominee.

REPORT OF THE ROYAL COMMISSION ON SHIPBUILDING IN THE PROVINCES OF QUEBEC AND ONTARIO

IN September, 1941, a commission was appointed under the Inquiries Act to conduct an investigation for the purpose of ascertaining what wages and other labour conditions should be established in certain shipbuilding plants of the province of Quebec (LABOUR GAZETTE, September, 1941, page 1036). Subsequently, the commission's terms of reference were extended and the scope of the investigation was enlarged to include shipbuilding plants in the province of Ontario. Those comprising the commission were: The Honourable Senator Leon Mercier Gouin, K.C., Montreal, chairman; Vincent C. MacDonald, K.C., Dean of the Faculty of Law, Dalhousie University, Halifax; F. H. Barlow, K.C., Master of the Supreme Court of Ontario, Toronto; commissioners. The text of the Royal Commission's Report follows:—

Report of the Royal Commission

The Honourable the Minister of Labour

I. INTRODUCTORY MATTERS

Pursuant to Order in Council P.C. 6931, dated the 2nd day of September, 1941, the undersigned were appointed a Royal Commission under the provisions of Part I of the Inquiries Act, to conduct an inquiry and investigation into the following shipbuilding firms in the province of Quebec: Canadian Vickers Limited, Montreal; The Davie Shipbuilding and Repairing Company, Limited, Lauzon; George T. Davie and Sons, Lauzon, and such other firms as might be designated by the Minister of Labour "for the purpose of ascertaining what wage or other labour conditions should be established, and whether or not such conditions should be uniform in the plants under inquiry, the commissioners to present their report on the matters investigated, and recommendations, to the Minister of Labour; in making their recommendations, the commissioners to have full regard to the wartime wages policy prescribed in Order in Council P.C. 7440, dated

December 16, 1940, as amended by Order in Council P.C. 4643, dated June 27, 1941."

Subsequently, however, by Order in Council P.C. 9272, dated November 27, 1941, the commissioners in making their recommendations were directed, instead, to have full regard to the wartime wages policy prescribed in Order in Council P.C. 8253, dated October 24, 1941.

Pursuant to Order in Council P.C. 7480, dated September 25, 1941, the scope of this commission was exended to include the following shipbuilding firms in the province of Ontario, engaged wholly or chiefly in war contracts, namely: Collingwood Shipyards Limited, Collingwood; Midland Shipbuilding Company, Limited, Midland; and Kingston Shipbuilding Company, Limited, Kingston.

Pursuant to the terms of the said Order in Council P.C. 6931, the Hon. Angus L. Macdonald, Acting Minister of Labour, on the 7th day of October, 1941, designated Marine Industries, Limited, of Sorel, in the province of Quebec, as coming within the scope of this commission.

Mr. Edouard G. Rinfret, of Montreal, was appointed as counsel to the commission for the hearings in the province of Quebec.

Mr. Walter F. Schroeder, K.C., of Ottawa, was appointed as counsel to the commission for the province of Ontario.

Mr. J. S. McCullagh, of Ottawa, accompanied the commission as secretary.

The following counsel appeared for the companies:—

Mr. J. Alexandre Prud'homme, K.C., Montreal, for Canadian Vickers Limited, at the Montreal hearings.

Mr. T. R. Ker, K.C., Montreal, for The Davie Shipbuilding and Repairing Company, Limited, at the Montreal and Quebec hearings.

Mr. Ross Drouin, Quebec, for George T. Davie and Sons, at the Montreal, Quebec, Sorel, Collingwood, Midland and Kingston hearings.

Mr. Lucien Beauregard, K.C., Montreal, for Marine Industries, Limited, at the Sorel hearings.

Mr. J. S. Leitch, Vice-President and General Manager of Collingwood Shipyards, Limited, presented that company's representations at Collingwood.

Mr. Howard Johnson General Manager of Midland Shipbuilding Company, Limited, presented that company's representations at Midland.

Mr. R. W. Wolvin, President of the Kingston Shipbuilding Company, Limited, presented that company's representations at Kingston.

Special representations were made on behalf of the employees, as follows:—

Mr. R. H. Haddow, of the International Association of Machinists.

Mr. W. J. Coyle, of the Metal Trades Council, at Montreal, and for the International Union of Boilermakers and Iron Shipbuilders at the Collingwood, Midland and Kingston hearings.

Mr. M. M. McLean, of the Industrial Union of Marine and Shipbuilding Workers, of Canada, at the Montreal hearing, and the Canadian Union of Boilermakers and Iron Shipbuilders, at the Quebec hearings.

Mr. A. Reith, of the International Union of Machinists, at the Collingwood, Midland and Kingston hearings.

Your commission met on the 16th day of September, 1941, at the City of Montreal, for organization purposes. After having met the President and the General Manager of Canadian Vickers, Limited, and representatives of the employees, and having inspected the shipyard and having ascertained that neither the company nor the employees were prepared to make their representations to the commission, the commission fixed Monday, the 29th day of September, for the hearings at Montreal. Your Commission then proceeded to Quebec City, where it met the General Manager and Counsel for The Davie Shipbuilding and Repairing Company, Limited, and Mr. Charles Davie, the owner of George T. Davie and Sons, and his counsel and the representatives of the employees of both companies on the 18th day of September. After having inspected the shipyards of The Davie Shipbuilding and Repairing Company, Limited, it was ascertained that neither the companies nor their employees were ready to make their representations, and the hearings at the City of Quebec were enlarged until the 6th day of October.

Your commission sat in Montreal on the 29th and 30th days of September, and on the 1st, 2nd and 3rd days of October, when briefs were submitted on behalf of the employees by the Metal Trades Council of Montreal and vicinity, by the Industrial Union of Marine and Shipbuilding Workers of Canada, by certain other groups of employees, and by Canadian Vickers, Limited.

On the 6th, 7th, 8th, 9th and 10th days of October, the commission sat at the Court House in the City of Quebec and heard the evidence adduced by the Canadian Union of Boilermakers and Iron Shipbuilders, by various employees, and by two companies—The Davie Shipbuilding and Repairing Company, Limited, and George T. Davie and Sons.

On the 14th day of October, the commission met at the City of Toronto, for a discussion of the procedure to be followed and the information to be required for its investigations of the Ontario shipyards. On the 15th and

16th days of October, and the morning of the 17th, the commission sat at the Town of Collingwood, when a brief was submitted by the Collingwood Shipyards, Limited, and evidence submitted by the company, by union officials and by a number of employees. On the afternoon of the 17th day of October, and on the 18th day of October, the commission sat at Midland, when a brief was submitted by the Midland Shipbuilding Company, Limited, and evidence submitted by the company and by union officials.

The Kingston Shipbuilding Company, Limited, and its employees, not being ready to proceed on Monday, the 20th day of October, the hearings were adjourned until the 22nd day of October, when the commission met at Kingston. A brief was submitted by the company and evidence adduced by the company, by union officials, and by various employees.

The hearings in Ontario were much expedited by the preliminary work done by Mr. Walter F. Schroeder, K.C., Commission Counsel, who, previous to the hearings, had visited the different shipyards for that purpose.

The hearings at Kingston having been completed on the 22nd day of October, and it having been ascertained that Marine Industries, Limited, and its employees would not be prepared to make their representations before the 10th day of November, the commission was compelled to adjourn until that date. Subsequently, after the chairman of the commission and Mr. Rinfret, Commission Counsel for Quebec, had attended personally on Marine Industries, Limited, at Sorel, it appeared that the hearings could not proceed until the 17th day of November.

On the 17th, 18th and 19th days of November, sittings were held in Sorel. No one appeared to make representations on behalf of the employees, though some employees testified on behalf of groups of the employees. The evidence of a large number of employees and of Mr. Ludger Simard and Mr. Arthur Simard, of Marine Industries, Limited, was taken.

The commission then adjourned until the 21st day of November. On that day and the following day it met at the new Court House in the City of Montreal, to hear argument. Argument was presented by counsel for all the companies in Quebec; by Mr. R. W. Wolvin, President of the Ontario companies investigated; by Mr. W. J. Coyle, of the International Union of Boilermakers and Iron Shipbuilders; by Mr. John W. Bruce, General Organizer of the United Association of Plumbers and Steamfitters; by Mr. Leo Dalphond, Grand Lodge Representative, French Section, International Association of Machinists; by Mr. Arthur Crawford, General Organizer of the Sheet Metal Workers' International Association; by Mr. Fred Molyneux, General Organizer of the Brotherhood of Painters, Decorators and Paperhangers of America; by Mr. Robert H. Haddow, Grand Lodge Representative, English Section, International Association of Machinists; by Mr. Louis Guerard, Local Representative, United Association of Plumbers and Steamfitters, Local 144; by Mr. Ed. LaRose, Secretary-Treasurer, Montreal District Council, United Brotherhood of Carpenters and Joiners of America; by Mr. D. S. Lyons, Canadian Vice-President of the International Association of Machinists, all the said trade unions being affiliated with the American Federation of Labour; by Mr. M.M. McLean, of the Industrial Union of Marine and Shipbuilding Workers of Canada; by Mr. Allan C. Wright, District Director for Quebec, Steel Workers' Organizing Committee; and by counsel for the commission.

Extensive statistical information covering rates and wages, wages received, classifications, etc., was required to be filed by each of the companies prior to each of the hearings; this saved much time. In all, over one hundred persons appeared and gave evidence before the commission, and over eighty exhibits were filed.

During the intervals between the various hearings, the commissioners spent much time in collective and individual consideration of the evidence so far adduced; and upon the conclusion of the final argument in Montreal on November 22, the commissioners devoted many private sessions in that city to the review of all the evidence and the preparation and completion of this report.

II. General and Historical Matters

The Commission has had constantly in mind that (in the words of the Governor General in Council) its appointment was made "with a view to ensuring harmonious and satisfactory relations between the employers and workmen, and promoting stable labour conditions in the shipbuilding industry" of the Provinces of Quebec and Ontario. Likewise, it has had constant regard to the fact that its investigations and recommendations relate to firms "occupied wholly or chiefly on work which is essential to the conduct of the War", and that their expanding activities must be carried on amidst the abnormal difficulties of a wartime economy.

The Commission was directed to make all necessary inquiries and investigations for the purpose of ascertaining:

(*a*) "What wage or other labour conditions should be established"; and

(*b*) "Whether or not such conditions should be uniform in the plants under inquiry."

These directions thus present two problems:—

(*a*) What wages and conditions should be established in each of the seven shipyards designated;

(*b*) Should wages and conditions in these shipyards be uniform.

As to each of these problems, the Commission is further directed "to have full regard to the wartime wages policy prescribed in Order in Council P.C. 8253".

Our investigations and this report relate to seven firms in two provinces, which (except for a small percentage of commercial repair work) are engaged in building ships under contracts with the Dominion Government. Up to now, these contracts have contained clauses whereby the Government absorbs additional costs to the companies created by increases in wage rates during the currency of such contracts and as to which increases the Government has consented. Under Order in Council P.C. 8253, dated October 24, 1941, these companies are prohibited from increasing the "basic scale of wage rates" paid by them at the effective date thereof, except on permission of the National War Labour Board.

It is also a relevant circumstance that the companies in question derive practically all their work from the same employer (the Dominion Government), and that that employer is able to control them in many ways. Likewise, it is relevant to note that there is available to these companies a constantly expanding demand for their services as shipbuilders, and a constant urgency for them to expedite their work and to increase their facilities. Moreover, it is a fact that these companies have reached their present stage of productivity by surmounting many difficulties of rehabilitation, construction or expansion.

The evidence shows that the shipbuilding industry in Ontario and Quebec had been in a very depressed condition since the close of the Great War. Though some repair work was done by them in the years leading to the present War, very little iron shipbuilding had been done. Canadian Vickers, Limited, at the outbreak of the War in 1939 had 278 employees. Its average number of employees for the years 1926 to 1939 inclusive, was 311; and this was only for the repair season, from March to November in each year. It is now employing 1,800 men. The Davie Shipbuilding and Repairing Company, Limited, at the outbreak of War in 1939 had from 200 to 250 employees. It now employs 1,600 men. George T. Davie and Sons had 100 employees at the outbreak of War; this firm now has from 500 to 600 employees. Marine Industries, Limited, had 313 employees at the outbreak of War; it now has 2,200 men. Collingwood Shipyards, Limited, had an average of 153 employees during the summer season for the years 1926 to 1939 inclusive. At the outbreak of War it had 58 employees, in 1936 an average of 21 employees, and in 1933 an average of 24 employees. It now has 809 employees on its payroll. Midland Shipbuilding Company, Limited, commenced operations in January, 1941, in a yard which had been closed for about thirteen years. It now has 360 employees. Kingston Shipbuilding Company, Limited, from 1926 to 1939, had only casual repair work which kept from 20 to 25 men continually employed, and had on call from 100 to 120 men, who were given a few days' work whenever it obtained a repair job. It now has 315 employees.

Throughout the whole of Canada, not more than 1,500 men were employed in the shipbuilding industry at the outbreak of the War in September, 1939. Now, more than 20,000 men are employed in our shipbuilding industry.

III. Rates and Classifications

A. *General.*—The companies investigated present an invariable characteristic in that, in each of them, wages are based on minimum rates for workmen of specified classes.

Generally speaking, the men in the various shipyards do the same kind of work on the same class of ships, under the same working conditions; nevertheless, there are differences which affect both the men and the companies. Thus, some of the yards have been, or may be, confined to ships up to the size of Corvettes, whereas others build ships of all sizes up to the standard freighter. Working conditions are much the same, except that Canadian Vickers, Limited, has covered slips, and that climatic conditions do differ in the regions from Lauzon to Midland. Some differences, also, inhere in the fact that not all of the yards are of the same degree of mechanization in point of equipment, working facilities, and details of organization.

Canadian Vickers, Limited, differs from other yards in that it operates on the same site a Boiler-making Shop and a Machine Shop for the fabrication of boilers and engines for the ships it builds; whereas, the other companies in the Province of Quebec procure such equipment chiefly from outside manufacturers.

It is to be noted that by a ruling of the Department of Labour, made on September 25, 1941, the Commission was directed to exclude from its investigations matters pertaining to the construction of marine boilers and engines, with the result that the Boiler and Machine

Shops of Canadian Vickers, Limited, are not covered by this report.

Canadian Vickers, Limited, also operates on the same site a very large aircraft industry. Marine Industries, Limited, has in close proximity to it a great armament industry in Sorel Industries, Limited. Obviously, the adjacency of such plants to the shipyards of these two companies, employing as they do many men of similar classes, has an effect on their ability to secure and retain men for shipyard work.

B. *Labour Pools.*—Canadian Vickers, Limited, enjoyed an initial advantage over the other companies in having available a relatively larger number of trained shipyard workers as a nucleus for wartime building. It continues to enjoy another advantage in the presence in Montreal of large numbers of skilled labour in other industries, who, when acquired, need only to be trained in the sense of *adapting* their skills to shipbuilding. In the other yards, the nucleus of trained shipbuilders was relatively lower, and has remained lower, because they lack entirely, or lack to a similar degree, a neighbouring skilled labour pool. These two facts account for the relative predominance of the trained shipworker or trained mechanic in the Montreal yard, and a similar predominance of the improver or specialist class in the other yards where the problem is one of training semi-skilled or completely unskilled men, and not so largely one of mere adaptation.

Conversely, Canadian Vickers, Limited, suffers from a greater relative loss of men, owing to the nearer proximity of other industries requiring men of the same class as it employs in its yard, and often paying higher rates. As already mentioned, this is notably true of Marine Industries, Limited, at Sorel. Of course, the yards vary greatly in the degree to which such factors affect their ability to acquire or retain the various classes of men in appropriate numbers, but to some degree these factors apply to all yards.

Again, the yards of The Davie Shipbuilding and Repairing Company, Limited, and George T. Davie and Sons, at Lauzon, are affected by the proximity of the yards of Morton Engineering and Dry Dock Company, Limited, at Lauzon and Quebec; and the yards at Collingwood, Midland and Kingston are affected by the existence in Toronto of the Dufferin Shipbuilding Company, Limited. These facts are relevant to our inquiry, though that inquiry does not embrace the Morton and Dufferin companies as such.

C. *Fixation of Rates.*—In dealing with the problem as to "what wage should be established", we were directed to have full regard to the wartime wages policy prescribed in Order in Council P.C. 7440; but by a further Order in Council, P.C. 9272, dated November 27, 1941, we have since been instructed to have reference, instead, to the policy prescribed in P.C. 8253, the relevant provisions of which are contained in Section 11 thereof.

If, in the words of Section 11 of P.C. 8253, we find that "any employer's basic scale of wage rates is low as compared with rates generally prevailing for the same, or substantially similar, occupations in the locality, or in a locality which . . . is comparable", we may prescribe such increased wage rates as are "fair and reasonable".

We do so find in respect of the basic wage rates of each of the seven companies designated. We must, therefore, endeavour to ascertain what increased wage rates are "fair and reasonable".

The concept of "fair and reasonable wage rates" is so vague that it cannot be dealt with as an abstract rule, but must be regarded as a practical standard to be applied in relation to all relevant factors which enter into the establishment of proper remuneration for men doing the particular kind of work they do, in the kind of industry in which they are engaged, and living in the localities where the several shipyards are located. This relativity of facts to rates has two particular aspects of importance to us: the relativity may be as between yards and their environment, and as between men and their environment. It may be as between classes of workers in the same plant. We must consider both the external and internal factors which affect the level of rates as between yards and as between classes of men.

D. *Factors in Rates.*—We have given careful consideration to the following factors, among others, which have suggested themselves or have been suggested: rates in other yards and in other localities; rates in comparable industries; the proximity of other yards and other industries drawing from the same labour pool; the migration of labour to other plants or other industries or other localities; the scarcity of fully trained or semi-trained men; the relative labour-cost of producing the same ship in different yards; the character and proximity of the source of labour supply; the character of the locality as being rural or urban; the history of particular yards and their degree of mechanization and modernity; the nature of shipbuilding work as hazardous or unhealthy or seasonal; the proximity of workers' homes to their work and their costs of transportation thereto; the effect of location and climate as affecting length of working day and working season; the kind and degree of skill possessed

by the various classes of men, and the time spent in acquiring it; and the prevailing scales of rates and how recently and by what methods they became established.

Three other factors require special mention:—

(*a*) In view of the depressed state of the shipbuilding industry previous to the War (as indicated earlier in this report), we accept the unanimous testimony of management, workers and Union Officials as showing conclusively that the scale of rates obtaining in the industry from 1926 to 1939 cannot be taken as a safe criterion in the fixation of wages.

(*b*) We have considered as factors in rate-making the rates which have been established in some of the shipyards and in neighbouring or related industries, as the result of the Reports of Conciliation Boards; but though we have tried to give such reports due weight, we have not regarded them as conclusive evidence of what are "fair and reasonable" rates at the present time in the particular yards under inquiry.

(*c*) Much testimony was given and many statistical compilations were presented or referred to as tending to show the actual cost of living in the localities of the various yards. It was quite properly contended that the actual cost of living in the particular locality was an important factor in the fixation of the rates for a yard there situated. It was further contended that it was relevant to consider the cost of living in other shipbuilding localities as essential to any comparison of rates in the yards of those localities.

The Commission concurs in the opinion that such matters are relevant and important factors in rate-fixation. It is given particular attention to such matters as food, clothing and fuel prices, and rentals as entering into the local cost of living. It has also made comparisons as to the costs of these elements as between localities, just as it has made comparisons in the matter of rate scales.

The Commission must record, however, the fact that the wealth of testimony and statistical data as to the actual and relative costs of living brought to our attention, provided a very uncertain (and sometimes illusory) guide to precise conclusions. We can but say that we have made such use of these types of information as seemed appropriate.

E. *Uniformity of Rates.*—Our Terms of Reference direct us to ascertain, *inter alia,* whether or not wage rates "should be *uniform* in the plants under inquiry".

As the several plants under inquiry are located at six different places in the two provinces, this problem has particular relation to uniformity as between *places* and as between *yards.*

The place element is important because locality enters into rates as conditioning the labour supply and the elements of climate and working seasons for the companies, and the cost of living and general working conditions of the workers. The yard element is important because the yards differ in history, age and equipment, and in the character of the labour with which they are manned. Both elements also play a part in producing varying systems of classifications of labour as between various localities and various yards. Accordingly, it is not possible to dissociate the problem of Uniformity of Rates from considerations peculiar to *regions.*

In view of the fact that all the yards are occupied on work "which is essential to the conduct of the War" and are building ships of similar types for the same Government, it is obviously desirable that the principle of the Uniformity of Rates should be applied so far as possible.

F. *Uniformity of Classifications.*—Differences of history, management and locality have produced differences in the Systems of Labour Classifications used in various yards, but as all yards are engaged in a common industry, there is a very substantial measure of Uniformity of Classification. Here, again, the problem of Uniformity has reference to *regional* factors.

Uniformity of rates must be predicated upon Uniformity of Classifications and, as both are based on factors of *region,* we must consider Uniformity of Rates in the sense of *Regional* Uniformity.

G. *Regional Uniformity.*—When we speak of Regional Uniformity or of Zones, we refer to the fact that we have regarded the companies in a particular area as a unit, for the purpose of establishing principles of Classification and Rate Fixing. But though we have selected this general basis, we have provided for such variations in Classifications and Rates as the conditions and practices in the various yards seemed to require.

Re Ontario.—The three Ontario yards investigated, though separately incorporated, are under the same management and operate under practically identical Rates and Classifications. They are situated in places which, though varying in size *inter se,* are far smaller than Toronto, wherein is situate the Dufferin Shipbuilding Company, Limited, which is their chief competitor for labour. All three places are alike in that they must

draw their labour supply largely from their own immediate localities. They may well be regarded as being in the same zone in matters of Rates and Classifications. They cannot be regarded as being in the same zone as Toronto, in relation to such matters.

Accordingly, we have adopted the principle of Regional Uniformity as regards these three companies, and have sought to secure uniformity between them in Rates and Classifications, and as large a measure of identity of Rates and Classifications as possible.

Re Quebec.—The situation in Quebec is similar to that in Ontario as regards the place-element in that one yard, Canadian Vickers, Limited, is situate in a place far larger than any of the others, whilst those others are situate in two relatively rural localities. This difference of locality produces entirely different situations as to the character and number of the labour pool as between the Montreal yard on the one hand, and the Lauzon and Sorel yards on the other. The same regional factor also produces a similar difference in the scale of Rates and the Classification of Labour.

The yards at Lauzon and Sorel are alike in that they draw their labour from their immediate localities and that their labour pools are of the same nature in that they consist largely of unskilled labour wtih a relatively small number of semi-skilled men, and a still smaller number of skilled shipbuilders. This has necessitated the training of men in entirely new skills to a much greater degree than in Montreal.

It was conceded that the proper operation of the shipbuilding industry requires the progression of workers from indentured apprenticeships to journeyman or mechanic class. Nevertheless, the needs of wartime production have required a progression from helper to learner or improver to journeyman class, and indeed the creation of men (called specialists) midway between improvers and journeymen in that their skills are confined to certain specialized operations. The Improver-Learner-Specialist class is a relatively large and vital class in production under present conditions. This class of worker is found in every yard, under varying descriptions: thus, for example, in Canadian Vickers, Limited, there is a learner-helper class, but there is also a subdivision of most of the classes of workers wherein category "B" is, roughly, equivalent to the Improver-Learner-Specialist class referred to above.

All four yards are affected by the necessity of wartime production; but the three rural yards have had to deviate from the normal and traditional labour set-up more than has the yard at Montreal. (Something will be said later about the establishment of a proper apprenticeship system, but for present purposes the apprentice strictly so-called may be disregarded as an important factor.)

The point here relevant is that the yard situated in the metropolitan and highly industrialized City of Montreal cannot be regarded as being in the same zone as the other yards situate in rural localities; and that though a considerable degree of Uniformity of Classification can be established as between all four yards, yet the three rural yards cannot be regarded as in the same zone as to both Rates and Classifications.

Accordingly, we have adopted the principle of regional Uniformity of Rates and Classifications as regards the three yards at Lauzon and Sorel.

H. *Uniformity of Classification:*—As to *Ontario,* the principle of uniformity has translated itself into practical identity of classification in the three rural yards.

As to *Quebec,* the principle of uniformity has yielded a practical identity of classification in all four yards, though local differences of practice and organization must be recognized to some extent.

I. *Zones Recommended:*—In the result, applying the principle of the desirability of Uniformity of Rates and Classifications, we recommend the establishment of the following regional zones:—

QUEBEC

A. Metropolitan Zone:—

Comprised of Montreal, and including Canadian Vickers, Limited.

B. Rural Zone:—

Comprising Lauzon and Sorel; and including The Davie Shipbuilding and Repairing Company, Limited, George T. Davie and Sons, and Marine Industries, Limited.

ONTARIO

Rural Zone:—

Comprising Collingwood, Midland and Kingston; and including Collingwood shipyards, Limited, Midland Shipbuilding Company, Limited, and Kingston Shipbuilding Company, Limited.

(It is not within our Terms of Reference to say anything about Toronto as a zone, but, as above indicated, we have regarded Toronto as being in a different zone from the three relatively rural places above included.)

J. *Rates and Classifications Recommended:*—Upon full consideration of all factors indicated in this report, we recommend that there be established for the various shipyards within the scope of our Terms of Reference, the

Scales of Wages and Classifications of Labour set out in Schedules A, B and C to this report.

The rates referred to in such schedules are the basic *minimum* rates for the respective classes. The fixation of such minimum rates is not intended to preclude promotion of men from lower to higher classes, nor to prevent advances in pay to individuals beyond the basic minimum rate for their particular classes. (See infra).

K. *Cost-of-Living Bonus:*—We recommend that the Government of Canada do proceed at once to review the extent to which the Wartime Cost-of-Living Bonus has heretofore been paid to the employees of the several yards under inquiry, in order that employees of all such yards may be put upon a footing of complete equality in this regard.

IV. Working Conditions and Miscellaneous Matters

A. *Re-Classification and Promotion of Workers:*—Related to the question of Rates and Classification of Workers discussed above, and also related to the general topic of "harmonious relations between employers and workmen," is the matter of the system whereby men are promoted to higher classifications and advanced in pay within their classifications.

This is particularly important in the shipbuilding industry, because the depressed condition of that industry at the outbreak of the war and the rapidity with which it has expanded recently, have caused the introduction into the industry of many workers requiring varying degrees of training before they can find a proper place in the recognized shipbuilding categories. Necessarily, such men must first be placed provisionally in particular classes until they have demonstrated their capacity, or acquired the skill necessary, for a higher classification.

In all the yards, this business of classifying men and advancing them within classifications is done by the company officials—usually by the yard superintendent, upon recommendation of the foreman or other departmental head concerned. This practice is probably the proper one in the present situation. Not all officials, however, act upon the same principles, nor do all of them act with the same promptitude. We regard it as of the utmost importance that demonstrated capacity or improvement in productive ability should be recognized promptly, and men advanced in class or rewarded by extra payments over the minimum rate for their classification. We think the existing practice in this regard should be supplemented by a provision for the review of the whole labour personnel of each yard at fixed periods.

We recommend, therefore, that in each yard the superintendent and departmental heads and foremen, and a representative of the Dominion Department of Labour, shall meet every three months and proceed to consider the classification of each employee and the amount of his remuneration, and the advisability of promoting him to a higher classification, or of increasing his current remuneration. This recommendation does not, of course, preclude such reclassification or increases in individual remuneration at other times.

The establishment of this procedure for the review of classifications and remuneration will, in our view, serve to give a greater measure of justice in individual cases, will promote general contentment and the development of initiative, and thus speed up production.

B. *Grievances:*—The fact that many grievances of varying kinds were presented to us—though they relate chiefly to relatively minor matters—suggests the desirability of there being in every yard some kind of a grievance procedure, by which remedies could be sought for grievances—real or imagined.

In order to promote harmonious labour relations and to expedite production, we recommend that there be constituted in every yard—where no such body now exists—a Grievance Committee selected by the workmen. Such committee should be recognized as the proper medium for investigating the grievance of any workman and presenting same on his behalf to the foreman directly concerned, and thereafter to the proper departmental heads, or to the management.

C. *Overtime:*—We recommend the adoption in all the yards of a forty-eight-hour week.

We recommend, also, that overtime work shall be paid for at the rate of one and one-half hours for every hour over the regular working time.

We recommend, also, in the interests of wartime production, that overtime shall be calculated by reference to the regular working *week* in each yard, and not by reference to the regular working day.

We recommend, also, that excessive overtime work should be avoided, so far as is practicable. Work beyond the regular working day makes for fatigue and inefficiency and, if such overtime work is continued for a period of days, the elements of fatigue and inefficiency increase to a point which retard rather than facilitate production. We recommend, accordingly, that apart from highly exceptional circumstances, an employee be neither required nor permitted to work extra hours in excess of twenty per cent of the regular working week.

D. *Labour Relations and Personnel Officer.*—In view of the expanding nature of the

shipbuilding industry and the large number of classes of workmen, and the large percentage of semi-skilled or unskilled labour employed therein, it is essential that there be in every yard a special official charged with the duty of ascertaining individual fitness for particular work.

In view of the necessity of ensuring the largest possible measure of understanding between employers and employees in every yard in this increasingly important industry which operates under emergency conditions, there should be in each yard a special official charged with the duty of promoting improved relations between employers and employees.

Accordingly, we recommend that each Company be required to engage a Personnel and Labour Relations Officer, or Officers, to discharge the duties above indicated.

E. *Safety and Health Measures.*—Many representations were made to us concerning the necessity of proper provision being made in every yard for the prevention of accidents and the establishment of sanitary conditions to safeguard the health of the employees. In various of the yards the provisions so far made for these purposes leave much to be desired. It is but fair to say, however, that most of the companies recognized the necessity of improving such provisions and expressed their desire to do so as soon as possible.

We concur in thinking that there is a real necessity for immediate steps being taken in the way of better safety and health measures. Accordingly, we recommend that the Dominion Department of Labour endeavour, at once, to arrange a better co-ordination of effort between Dominion Departments concerned with ship production and the several Provincial Departments concerned with the safety and health of shipyard workers. (See, generally, Order in Council P.C. 2685, Clause 4.)

F. *Apprenticeship.*—Apprenticeship, as the term is known in the industry, involves the employment of boys under articles of indenture for a period of four or five years, at a graduated rate of pay, during which they are trained in a rotation of operations until they have acquired the skill of a journeyman.

No such system presently exists to any extent in the shipyards under inquiry. This is the case because the depressed condition of the industry at the beginning of the War, and the urgency for production since then, have not permitted the proper training of apprentices as prospective journeymen. Rather, there has grown up a reliance upon a more specialized training of adults as Improvers or Learners or Specialists.

In view of the present situation of urgency in the industry and the deviations from normal practices now in existence in the shipyards, we do not feel we can usefully recommend anything as to an Apprenticeship System.

It is to be noted, however, that in many of the yards—notably in that of Marine Industries, Limited, at Sorel—many boys are employed as Apprentices or Labourers or Learner-Improvers, and their rates will be found under those designations.

In any view we believe that the inauguration and development of an Apprenticeship System in the shipyards is more properly the concern of competent Provincial authorities as a matter of vocational education.

G. *Miscellaneous.*—At various of our hearings we have been invited to recommend the principles of Union Recognition and of Union Shops; we do not feel, however, that these matters are within our Terms of Reference.

We were also invited to recommend the adoption of draft agreements dealing with employer-employee relations in great detail. We feel, however, that such details are more properly a subject for negotiation between the companies and the representatives of the men in the particular yards at a particular time. Accordingly, we make no recommendations on these matters, as we have sought throughout this Report to direct attention to matters of general principle.

It may be advisable to mention that there are companies engaged in iron shipbuilding in Quebec and Ontario other than the seven companies named in our Terms of Reference; as, for example, Morton Engineering and Dry Docks, Limited, in the Province of Quebec, and Dufferin Shipbuilding Company, Limited, and Port Arthur Shipbuilding Company, Limited, and others, in the Province of Ontario.

We wish to acknowledge the co-operation we have received during the course of our investigations from the officials of the various companies and their Counsel, and from the representatives of the various Unions.

We wish, also, to express our appreciation of the valuable assistance afforded to us by the Counsel to the Commission, Mr. Walter F. Schroeder, K.C., of Ottawa, and Mr. Edouard G. Rinfret of Montreal, and to Mr. J. S. McCullagh, the Commission Secretary.

All of which is respectfully submitted.

(Sgd.) L. M. Gouin,
Chairman.
(Sgd.) Vincent C. MacDonald,
Commissioner.
(Sgd.) F. H. Barlow,
Commissioner.

MONTREAL, November 28, 1941.

SCHEDULE A

Basic Minimum Rates of Wages for Canadian Vickers, Limited

	Class A	Class B
Loftsman	$0.85	$....
Engine fitter and machinist	0.80	0.65
Electrician	0.80	0.65
Plater	0.80	0.65
" Furnaceman	0.80	0.65
" Erector	0.60	....
" Plate shop operator	0.80	0.65
" Sheet metal worker	0.80	0.65
Riveter	0.80	0.65
Rivet tester	0.85	....
Chipper and caulker	0.80	0.65
Welder	0.80	0.65
Joiner	0.80	0.65
Blacksmith (forger)	0.80	0.65
Coppersmith and steamfitter	0.80	0.65
Fireman	0.80	0.65
Carpenter	0.80	0.65
Craneman—overhead	0.62	0.50
" locomotive	0.70	0.60
Holder-on	0.73	0.60
Driller	0.73	0.60
Burner	0.73	0.60
Painter	0.73	0.60
Rigger	0.73	0.60
Rivet heater	0.67	0.57
Reamer and countersinker	0.60	0.50
Bolter-up	0.60	0.50
Stagers	0.60	0.50
Rivet passer boy	0.35	0.28
Helper	0.53	0.40
Labourer	0.48	0.35
Improver, learner or specialist	0.45 up	
Apprenticeship shall be for a period of twelve thousand (12,000) hours, to which the following rates of wages shall apply:		
1st 2,400 hours	0.30	....
2nd " "	0.40	....
3rd " "	0.50	....
4th " "	0.60	....
5th " "	0.70	....

NOTE.—The above rates do not apply to men working in the boiler shop, machine shop and pattern shop.

An employee who is classified as an improver, learner or specialist shall be advanced and paid on the basis of merit, ability and performance, until he will have reached the classification of journeyman. No wage increases shall be based on length of service.

For re-classification recommendation, see page 24.

The above rates do not include foreman or assistant foreman.

SCHEDULE B

Basic Minimum Rates of Wages for The Davie Shipbuilding and Repairing Company, Limited; George T. Davie and Sons and Marine Industries Limited

	The Davie Shipbuilding and Repairing Co. Ltd., and George T. Davie and Sons	Marine Industries Ltd.
Loftsman	$0.75	$0.72
Pattern makers	0.75	0.72
Engine fitter and machinist	0.70	0.67
Electrician	0.70	0.67
Boilermaker	0.70	0.67
Plater	0.70	0.67
" Furnaceman	0.70	0.67
" Erector	0.52	0.48
" Plate shop operator	0.70	0.67
" Sheet metal worker	0.70	0.67
Riveter	0.70	0.67

Burner	0.64	0.61
Painter	0.64	0.61
Rigger	0.63	0.60
Rivet heater	0.58	0.56
Reamer and countersinker	0.53	0.51
Bolter-up	0.53	0.51
Stager	0.53	0.51
Rivet passer boy	0.30	0.28
Helper	0.48	0.45
Labourer	0.43	0.38
Improver, learner or specialist	0.40 up	0.38up
Apprenticeship shall be for a period of twelve thousand (12,000) hours, to which the following rates of wages shall apply:		
1st 2,400 hours	0.25	0.22
2nd " "	0.35	0.32
3rd " "	0.45	0.42
4th " "	0.55	0.52
5th " "	0.65	0.62

NOTE.—An employee who is classified as an improver, learner or specialist shall be advanced and paid on the basis of merit, ability and performance, until he will have reached the classification of journeyman. No wage increases shall be based on length of service.

For re-classification recommendation, see page 24.

The above rates do not include foreman or assistant foreman.

SCHEDULE C

Basic Minimum Rates of Wages for Collingwood Shipyards Limited, Midland Shipbuilding Company, Limited, and Kingston Shipbuilding Company Limited

	Hourly Rate
Anglesmith	$0.80
Blacksmith	0.80
Boilermaker	0.80
Burner	0.75
Chipper and caulker	0.80
Plater	0.80
Riveter	0.80
Rivet holder-on	0.70
Rivet heater	0.65
Rivet passer boy	0.35
Slabman	0.80
Slabman helper	0.55
Welder:	
Over two years' experience	0.80
Over eighteen months' experience	0.70
Over one year's experience	0.60
Over six months' experience	0.55
Driller—Radial	0.75
Driller—Other than radial	0.65
Punch and shear operator	0.65
Reamer	0.60
Countersinker	0.60
Bolter-up	0.58
Rigger	0.65
Crane operator	0.65
Tester—Rivet	0.80
Machinist and machine fitter	0.80
Machine operator—Minor machines	0.60
Millwright	0.80
Steam and pipe fitter	0.80
Electrician	0.80
Moulder	0.80
Patternmaker	0.80
Joiner	0.80
Joiner (plant maintenance)	0.75
Template maker	0.80
Shipwright	0.80
Painter	0.75
Red leader	0.50
Stage builder	0.55
Sheet metal worker	0.80
Labourer	0.45
Liner man	0.60
Slinger (hooker-on)	0.60
Helper	0.50
Improver, learner and specialist	0.45up

Apprenticeship shall be for a period of twelve thousand (12,000) hours, to which the following rates of wages shall apply:

1st 2,400 hours	0.30
2nd " "	0.40
3rd " "	0.50
4th " "	0.60
5th " "	0.70

NOTE.—An employee who is classified as an improver, learner or specialist shall be advanced and paid on the basis of merit, ability and performance, until he will have reached the classification of journeyman. No wage increases shall be based on length of service.

For re-classification recommendation, see page 24.

The above rates do not include foreman or assistant foreman.

Retirement of Dominion Statistician

On January 22, the Honourable James A. MacKinnon, Minister of Trade and Commerce, announced the retirement of Dr. R. H. Coats, Dominion Statistician, one of the most widely-known members of the federal public service.

In a statement issued by the Minister, Dr. Coats' official career, extending over a period of forty years, was outlined. On graduation from the University of Toronto, he turned first to journalism and, subsequently, under Mr. Mackenzie King, then Deputy Minister of Labour, was appointed to the Department of Labour to assume the editorship of the LABOUR GAZETTE.

When the Dominion Bureau of Statistics was organized by Sir George Foster, Dr. Coats became the first Dominion Statistician, and has been the directing head of the Bureau since its inception. In that capacity, Dr. Coats' services have brought high distinction to himself and have been instrumental in gaining international recognition for Canada in respect to progress in the field of statistical research and organization. Apart from his duties as Dominion Statistician, Dr. Coats has been called upon to lend assistance of the most valuable character in connection with the work of many royal commissions and special committees, both in Canada and abroad.

Mr. S. A. Cudmore, Assistant Dominion Statistician—formerly on the staff of the University of Toronto and for many years Editor of the Canada Year Book—has been appointed Acting Dominion Statistician to take over Dr. Coats' duties as executive head of the Bureau. Mr. Cudmore has himself had an extended and distinguished career both in statistical investigation and as an administrator in the statistical field. It is only two or three years ago that he returned to the Dominion Bureau of Statistics after having spent several years in Palestine, where he was invited by the Palestine Government to undertake the task of organizing an adequate system of statistics for that country.

STRIKES AND LOCKOUTS IN CANADA DURING DECEMBER, 1941

THE following table shows the number of disputes, workers involved and time loss for December, 1941, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in man working days
*December, 1941.....	11	5,718	54,945
*November, 1941.....	14	4,880	42,791
December, 1940.....	10	953	3,150

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes".

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

While the number of strikes and lockouts during December was slightly lower than in November, there were appreciable increases in the figures for workers involved and time loss due to the strike of gold miners at Kirkland Lake, Ontario, which accounted for nearly half of the workers involved and for most of the time loss during the month. The only other disputes of importance during December were those involving coal miners at Springhill, N.S., and textile workers at Lachute Mills, P.Q. In November the principal disputes included gold miners at Kirkland Lake, Ontario, cotton factory workers at Milltown, N.B., and hosiery factory workers at Hamilton, Ontario. In December, 1940, the only dispute of importance involved 220 coal miners at Rosedale, Alberta, for a week.

Four disputes, involving 2,730 employees, were carried over from November and seven commenced during December. Of these 11 disputes, 9 were terminated during the month. Three resulted in favour of the employers involved, four in compromise settlements, one was partially successful, while one other was indefinite. At the end of the month, therefore, there were two strikes or lockouts recorded as in progress, namely: Gold miners, Kirkland Lake, Ont., and beverage room employees, Crow's Nest Pass, Alta.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not yet declared terminated. Such disputes are listed in this paragraph for a period up to one year after their removal from the table of current strikes. Information is available as to one dispute of this nature, namely: truck drivers and helpers, Toronto, Ont., one employer, October 7, 1941, to December 31, 1941.

A dispute involving 60 embroidery workers in 12 establishments in Montreal who ceased work for one day on October 25 was reported too late for inclusion earlier in the LABOUR GAZETTE. Under the agreement with the International Ladies' Garment Workers' Union the dispute as to rates of pay and discrimination against certain union members was referred to arbitration and work was resumed. The result of the arbitration was in favour of the union.

A strike of 20 dressmakers employed in one factory in Montreal for one day on October 16 was not reported in time for inclusion earlier in the LABOUR GAZETTE. An agreement with the International Ladies' Garment Workers' Union was obtained.

In connection with the strike of 700 electric apparatus factory workers at Toronto from June 4 to June 12 (LABOUR GAZETTE, July, 1941, pp. 787, 789), 14 persons had been convicted of violation of the Industrial Disputes Investigation Act, some for striking and others for inciting to strike. Appeals were entered and under judgment given in December the convictions were quashed.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in progress prior to December

GOLD MINERS, KIRKLAND LAKE, ONT.—At the beginning of December the mine operators stated that small numbers of the miners were resuming work from time to time and that production was about 25 per cent of normal. By the end of the month this was reported to be 40 per cent. At the middle of the month a conference of representatives of the unions affiliated with the Canadian Congress of Labour with which the union on strike, the International Union of Mine, Mill and Smelter Workers, is affiliated, appointed a committee to support the strike by collecting money, etc.

The Association of Mining Municipalities of Northern Ontario forwarded a resolution to the Prime Minister urging him to bring about a settlement and to provide for the speedy settlement of all industrial disputes. In reply to a request from the union the Prime Minister had stated that in view of the steps already taken by the Labour Department it appeared that further intervention by the Government would be of little avail. At the end of the month a delegation from the mining municipalities met the Minister of Labour and early in January the Minister met some of the mine operators and also union representatives with a view to a settlement. In connection with picketing, a number of persons were charged with intimidation, assault, etc. Some were convicted and fined or sentenced to imprisonment, while a number were acquitted. Appeals were entered in some cases.

BEVERAGE ROOM EMPLOYEES, TORONTO, ONT. —This strike which commenced on August 19, involving 8 hotels, increasing to 66 early in September, is recorded as terminated early in December, all those on strike having resumed work where agreements were signed or obtained work elsewhere. The Beverage Dispensers' local of the Hotel and Restaurant Employees' International Alliance and Bartenders' International League of America was reported to have had agreements with approximately 100 hotels for the beverage room employees. These expired during August and in renewing them the union wished to have the agreements made with the Toronto board for all the locals and include clauses providing for agreements with the hotel and restaurant locals whenever such other employees in each hotel were organized. An increase in wages of $2 per week was also requested and this was granted by all of the hotels. Only about 30 of the hotels, however, signed the new agreement and a strike was called against the others. Early in September, however, about 20 of the hotels signed the agreements leaving about 45 involved in the dispute. A number of these claimed none of their employees were on strike and the others claimed to have replaced those on strike from time to time.

Disputes commencing during December

COAL MINERS, SPRINGHILL, N.S.—A one-day strike of miners in three collieries of one mining company occurred on December 1 in support of some 40 miners on a new longwall, who objected to the wage scale proposed by the management for the local contract to be negotiated under the agreement. Work was resumed next day and the district president of the union arranged for negotiations under the terms of the agreement which provides for a reference to the Board of Adjustment in case of disagreement.

TEXTILE WORKERS (WOOL AND COTTON), LACHUTE MILLS, P.Q.—Employees in one establishment ceased work during the afternoon of December 26 in protest against the dismissal of 18 workers who objected to working on the afternoon before Christmas Day and left before the closing hour following an altercation with the superintendent. As a result of conciliation by an official of the Department of Labour and union officials, work was resumed on December 30, the discharged workers to be reinstated on January 5. A dispute as to recognition of the United Textile Workers of Canada, increases in wages and adjustment of the cost of living bonus, reported on by a Board under the Industrial Disputes Investigation Act, has not been settled. (LABOUR GAZETTE, December, 1941, p. 1473).

SHIPYARD WORKERS, QUEBEC, P.Q. — The machinists, carpenters, electricians, steamfitters, and their helpers in one establishment ceased work at noon on December 1 to obtain increases in wages equal to those recommended for the boilermakers, iron shipbuilders, etc., by a Board under the Industrial Disputes Investigation Act (LABOUR GAZETTE, December, 1941, p. 1468). The employer explained that wage increases could not be given until approved by the National War Labour Board and that a Royal Commission was reporting on the shipbuilding industry in Quebec and Ontario. As a result of conciliation by an official of the Department of Labour, work was resumed by the carpenters on the morning of December 4 and by the others at noon, the wage scale to be referred to the National War Labour Board. Early in January a scale based on the recommendations of the Commission was put into effect. The report of the Commission appears elsewhere in this issue.

TAXI DRIVERS, WINNIPEG, MAN.—A number of employees of one taxicab company ceased work on December 9 in protest against the dismissal of four employees alleged to be for union activity. The union requested the Department of Labour to investigate and F. E. Harrison, western representative of the Department was appointed as an Industrial Disputes Inquiry Commissioner on December 24. As a result of the inquiry a settlement was reached, the management agreeing to reinstate those on strike and those dismissed who wished to return with the exception of one or two alleged to be guilty of traffic offences.

STRIKES AND LOCKOUTS IN CANADA DURING DECEMBER, 1941*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to December, 1941				
MINING, ETC.—				
Gold miners, Kirkland Lake, Ont.	8	2,500	50,000	Commenced Nov. 18, 1941; for union recognition; unterminated.
MANUFACTURING—				
Textiles, Clothing, etc.—				
Hosiery workers, Hamilton, Ont.	1	90	270	Commenced Oct. 29, 1941; against discharge of workers on Sept. 29; terminated Dec. 3; return of workers and replacement; in favour of employer.
Printing and Publishing—				
Truck drivers and helpers, Toronto, Ont.	1	50	400	Commenced Oct. 7, 1941; against reduction of staff during negotiations for union agreement; employment conditions no longer affected by Dec. 31; replacement; in favour of employer.
SERVICE—				
Business and Personal—				
Beverage room employees, Toronto, Ont.	(a) 45	90	100	Commenced August 19, Sept. 1, etc., 1941; for new union agreement covering additional classes of workers; terminated early in December; replacement, return of workers, also negotiations; partially successful.
(b) Strikes and Lockouts commencing during December, 1941				
MINING, ETC.—				
Coal miners, Springhill, N.S.	3	1,600	1,600	Commenced Dec. 1; against proposed wage rates on new work; terminated Dec. 1; work resumed pending negotiations and possible reference to Board of Adjustment; indefinite.
MANUFACTURING—				
Animal Foods—				
Meat packing workers, West Toronto, Ont.	1	(b) 100	25	Commenced Dec. 23; against dismissal of worker; terminated Dec. 23; return of workers; in favour of employer.
Textiles, Clothing, etc.—				
Textile workers (wool and cotton), Lachute Mills, P.Q.	1	400	900	Commenced Dec. 26; against dismissal of workers; terminated Dec. 29; conciliation (federal); compromise (men to be reinstated on Jan. 5.)
CONSTRUCTION—				
Shipbuilding—				
Shipyard workers (machinists, carpenters, etc.), Quebec, P.Q.	1	200	500	Commenced Dec. 1; for increased wages; terminated Dec. 4; conciliation (federal), work resumed pending reference to National War Labour Board; compromise.
Shipyard workers, Collingwood, Ont.	1	600	300	Commenced Dec. 2; for improved working conditions; terminated Dec. 2; work resumed pending investigation of grievances; compromise.

STRIKES AND LOCKOUTS IN CANADA DURING DECEMBER, 1941*—*Concluded*

SERVICE—				
Business and Personal—				
Beverage room employees, Crow's Nest Pass, Alta.	7	13	100	Commenced Dec. 20; for union agreement and increased wages; unterminated.

*Preliminary data, based where possible on direct reports from parties involved, in some cases incomplete; subject to revision for the annual review.

†In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which time was lost to an appreciable extent.

(a) 66 establishments and 330 workers originally affected. *(b)* 162 indirectly affected.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March, 1941, issue, in the review of "Strikes and Lockouts in Canada and other Countries, 1940." The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is taken for the most part from newspapers.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July, 25, 1940, provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the LABOUR GAZETTE, August, 1940, page 760.

The number of disputes beginning in October was 145 and 11 were still in progress from the previous month, making a total of 156 disputes in progress during the month; 34,800 workers were involved in the disputes in progress during the month and the time loss was 96,000 working days.

Of the 145 disputes which began during October, 50 arose out of demands for increased wages and 41 were over other wage questions, 5 over working hours, 17 were over questions regarding employment of particular classes or persons, 28 arose out of questions respecting working conditions, 3 on questions of trade union principle, and one was a sympathetic strike. During October, final settlements were reached in the case of 122 disputes, of which 14 were settled in favour of workers, 69 in favour of employers and 39 resulted in compromise settlements. In 20 other disputes, work was resumed pending negotiations.

The strike of 1,600 bus workers at Glasgow on November 13, mentioned in the last issue of the LABOUR GAZETTE was settled after two days when it was agreed that work be resumed, and the strikers' complaints be discussed by the city transport department and the union.

New Zealand

The number of disputes in the first half of 1941, was 36, involving 39 firms and 8,975 workers, with a time loss of 19,375 working days.

United States

Preliminary figures show the number of strikes beginning in November as 300 involving 235,000 workers in the new strikes. The time loss for all disputes in progress during the month was 1,450,000 working days.

A strike of interurban bus drivers began December 3, at Cleveland, Ohio, and spread to other centres. By December 23, the strike involved 1,800 drivers of the bus lines affected, from Chicago to the east coast. Settlement was reached January 3, through a federal government conciliator and the dispute referred to arbitration.

WARTIME MEASURES AFFECTING LABOUR

Summary of Orders in Council Governing Industrial Relations, Disputes, Wages, Cost of Living, Regulation of Labour Supply, and Rehabilitation, Issued Since Outbreak of War

THE following is a summary of the measures affecting labour which have been adopted by the Dominion Government since the outbreak of war. They deal with industrial relations, the settlement of disputes, wages and cost of living, the regulation of labour supply and the rehabilitation of discharged soldiers, etc.

Early Price Control

With the outbreak of war in September, 1939, one of the first domestic problems with which the Government had to contend was that of protecting the consumer against undue increases in prices and the hoarding of the necessities of life and yet permit a maximum diversion of goods to war needs. (This action was taken under the authority of the War Measures Act 1914, through Order in Council P.C. 2516 of September 3, 1939.)

The importance and urgency of this requirement is indicated in the establishment of the Wartime Prices and Trade Board on September 3 and its announcement on the same day in a radio address delivered by the late Hon. Norman McL. Rogers, then Minister of Labour, a few hours following Great Britain's declaration of war against Germany. Authority was given the Board to check unjustifiable demands for any classes of necessary goods and prevent the charging of excessive prices in regard to any necessity of life.

Because of immediate action taken by the Board, a buyers' panic in sugar was averted, and speculation in butter was forestalled, prices and supplies of wool, sugar, hides and leather, coal, cod liver oil, vegetable oils, animal feeds, bread and flour, etc., have been scrutinized and controlled. Rents have been controlled in many districts where an abnormal demand for housing accommodation would have caused an unwarranted increase in rent.

In August, 1941, the Wartime Prices and Trade Board was transferred from the jurisdiction of the Department of Labour to that of the Department of Finance and subsequently its powers were extended, making it the supreme authority in the field of price control.

Wartime Labour Policy

In Order in Council P.C. 2685, June 19, 1940, the Government issued a declaration "of certain principles for the regulation of labour conditions during the war, the acceptance of which by employers and workpeople would make for the avoidance of industrial strife and the utmost acceleration possible in the production which is so essential in present circumstances". Among other things it is recommended that fair and reasonable standards of wages and other conditions should be observed, that there should be no undue extension of hours but where necessary a shift system should be adopted, that every precaution should be taken to ensure safe and healthful conditions of work, that the right of workmen to organize in trade unions and bargain collectively should be recognized, that disputes should be settled by negotiation or with the assistance of Government conciliation services or under the provisions of the Industrial Disputes Investigation Act, and that collective agreements should provide machinery for adjusting grievances.

Industrial Disputes in War Industries

To provide machinery for the peaceful settlement of disputes in war industries, the Industrial Disputes Investigation Act was extended by P.C. 3495, November 7, 1939, as amended by P.C. 1708, March 10, 1941, to cover defence projects and all industries producing munitions and war supplies. Supplies include any articles or equipment which are considered by the Minister of Labour to be essential, and the following industries were declared, on the dates mentioned, to be within the Act: coal and metallic ore mining, on March 31, 1941, thus bringing British Columbia mines within the Act; pulp and paper, on April 10; the bank note, stamp and engraving industry, on May 2; and the West Kootenay Power and Light Company, on September 15. The Industrial Disputes Investigation Act provides for the reference of disputes to tripartite Boards of Conciliation and Investigation and prohibits any stoppage of work due to a dispute until the Board appointed has reported to the Minister. It normally applies to mines, transport and communication facilities and certain public utilities. Where they are not under Dominion legislative authority, these industries are covered in all the provinces but British Columbia and Prince Edward Island by virtue of provincial legislation declaring the Act to apply.

Industrial Disputes Inquiry Commission.—The extension of the Act, together with the expansion of industrial activity, resulted in a marked increase in the number of applications for Conciliation Boards. As it was considered that some of these disputes could be settled quickly and inexpensively if supplementary machinery of a less formal nature were set up, an Industrial Disputes Inquiry Commission of three members was established under P.C. 4020, June 6, 1941, to inquire into such disputes as might be referred to it by the Minister of Labour, to settle them if possible, and if not to advise the Minister whether there were good grounds for establishing a Board. Further flexibility was achieved when it was provided, by P.C. 4884, July 2, 1941, that a Commission may consist of one or more of its members. This amendment also imposed on the Commission the duty, under direction of the Minister, of examining allegations regarding discrimination against workers for trade union activity or coercion of workers into joining or refraining from joining trade unions. A further amendment, P.C. 7068, September 10, 1941, clarified certain points of interpretation.

Restriction of Right to Strike.—To eliminate the possibility of strikes being called without all the workers concerned having the opportunity to consider the matter fully, P.C. 7307, September 16, 1941, as amended by P.C. 8821, November 13, imposes certain conditions on the right of workers to strike after a Conciliation Board has submitted its findings. The Minister of Labour must be informed of a proposed strike, and he may at his discretion direct that a vote be conducted among those who in his opinion are affected by the dispute. A strike may take place only if a majority of those entitled to vote are in favour of such action.

Picketing.—At the same time, care has been taken to protect lawful strikers from prosecution under regulations which were designed for other purposes. On January 6, 1941, the Ontario High Court of Justice upheld a lower court judgment in which a picket had been convicted under Regulation 6 of the Defence of Canada Regulations prohibiting loitering near designated premises. Paragraph (6) was therefore inserted, by P.C. 892, February 7, 1941, to make it clear that picketing and other actions connected with lawful strikes are not loitering as defined in Regulation 6. Similar safeguards have been incorporated in other Defence of Canada Regulations.

Wage Stabilization

As a result of the somewhat inconsistent nature of the recommendations concerning wages of many Conciliation Boards, a wage policy for their guidance was enunciated in P.C. 7440, December 16, 1940, as amended by P.C. 4643, June 27, 1941. (These orders have been repealed by P.C. 8253.) The policy was designed to conform to the Government's anti-inflationary policy without imposing undue hardship on wage-earners.

Simultaneously with the introduction of an entirely comprehensive price control policy, the Wartime Wages and Cost of Living Bonus Order was passed (P.C. 8253, October 24, 1941, amended by P.C. 9514, December 5, and P.C. 10195, December 31). By this measure, the principles of P.C. 7440 were generalized, with some modification, for all industries. Wage rates are now stabilized at the level of November 15, 1941, though provision is made for the raising of rates which are unduly low. At the same time, a cost of living bonus is payable, which is to be adjusted with changes in the cost of living index. Provision is made for permanent enforcement machinery in the form of a National War Labour Board which, with the assistance of nine Regional War Labour Boards, is to administer this order as well as the Fair Wages and Hours of Labour Act, 1935, and P.C. 7679. Each of these Boards consists of an independent chairman (the Dominion Minister of Labour for the National Board and the Provincial Ministers for the Regional Boards) and an equal number of employers' and employees' representatives. The National Board has issued 18 Interpretative Rulings of the order. These have been published as Bulletin No. 1.

The Wartime Salaries Order (P.C. 9298 of November 27, 1941) supplements P.C. 8253 by stabilizing the salaries of officials above the rank of foreman (generally, those receiving more than $250 per month). It is administered by the Income Tax Division of the Department of National Revenue.

Wages and Hours on Government Contracts

Wage rates on Government contracts for equipment and supplies have been raised to meet the rise in the cost of living and every effort has been made to secure strict enforcement of these rates and of the wage schedules in contracts for construction for the Dominion Government. By P.C. 6801, November 23, 1940, the Deputy Minister of Labour is made responsible for the investigation of claims under the Fair Wages and Hours of Labour Act applying to construction for the Dominion Government, and a procedure is set forth for the settlement of claims. To ensure the payment of the legal rates in manufacturing, a co-operative scheme between the Dominion and Provincial Labour Departments has been worked out by which the inspection staffs of the provincial departments will be utilized.

P.C. 5522, July 22, 1941, authorizes the Dominion Minister of Labour to appoint provincial officials and other persons as inspectors. Penalties are provided for obstructing the inspection work of any duly authorized representative of the Minister.

In the spring of 1941 the conclusion was reached that rates of 30 cents per hour for male workers over 18 years of age and 20 cents for women over 18, which had been established in 1934 for work on contracts for Government supplies, were no longer fair and reasonable and that much industrial unrest would be avoided if they were increased. P.C. 3884, May 30, which has since been repealed by P.C. 7679, raised these rates to 35 cents and 25 cents, with lower rates permitted for learners and for those under 18. The order provided a penalty for any contractor who paid less than the legal minimum.

P.C. 7679, October 4, continues the rates established by P.C. 3884 for adult workers, and the minimum of 20 cents for any person under 18 and for beginners together with the special provision made for apprentices and for handicapped workers. The number of employees who may be paid learners' rates is limited to 20 per cent of the total working force. Penalties may be imposed for violation of the wage schedule or for failure to comply with the requirements as to posting notices and keeping records. In addition, P.C. 7679 prescribed for all employees of government contractors and sub-contractors.

P.C. 3947 was passed on August 15, 1940, to meet the urgent need for buildings and training facilities for men called up under the National Resources Mobilization Act. It provided that the eight-hour day and 48-hour week provided for by the Fair Wages and Hours of Labour Act should not apply to the construction of buildings and defence projects at places set out in the schedule or at such other places as might be designated by the Minister of National Defence.

Labour Supply

Several advisory bodies have been set up to consider means whereby manpower can be made available and used effectively in the war program. The National Labour Supply Council, consisting of six representatives each of industry and labour, was established by P.C. 2686, June 19, 1940, "to advise on any matters touching labour supply for industry which may be referred to it by the Minister of Labour". On its initiative, a National Joint Conference of the building and construction industry, authorized by P.C. 868, February 5, 1941, was held in Ottawa on February 10-12. The problem of labour supply in the industry was considered, including the broader question of preventing stoppages due to disputes. A National Joint Conference Board was formed to continue the work of the Conference.

P.C. 5922, October 25, 1940, established an Interdepartmental Committee on Labour Co-ordination whose functions are to anticipate and devise means of meeting labour requirements and to co-ordinate the activities of federal agencies and secure the co-operation of provincial governments. The "growing shortage of competent chemists, engineers and other technically trained personnel" led to the establishment of the Wartime Bureau of Technical Personnel under the Minister of Labour, by authority of P.C. 780, February 12, 1941.

War Emergency Training Program.—There has also been a number of specific measures designed to increase the supply of skilled labour and distribute it efficiently. Immediately after the outbreak of war the existing Youth Training Program was altered, with greater emphasis being placed on classes for air mechanics and other skilled workers. Due to the urgency of the need, however, a special War Emergency Training Program was drawn up during the summer of 1940, and schedules were appended to the Youth Training agreements with the provinces to carry it out. Special authority under the War Measures Act was needed for this expanded program, to permit the Dominion Government to assume the full cost and to overcome restrictions of the Youth Training Act regarding the circumstances and age limit of trainees. This authority was provided by P.C. 4506, September 11, 1940. In the latter part of 1940, the Interdepartmental Committee on Labour Co-ordination made an exhaustive study of the problem, and, as a result of its recommendations (made on December 28), the program was revised and expanded.

Restriction on Enlistment of Certain Classes of Skilled Workers.—Steps have been taken to prevent the loss to industry of skilled men who are subject to compulsory military training. The National War Services Regulations, 1940 (Recruits) (Consolidation, 1941) as amended by P.C. 7680, October 4, 1941, provide that the training of men employed in industries which the Minister of National War Services has declared to be essential or seasonal, may, on the representation of the employer, be advanced or postponed. Postponement orders are effective for not more than six months, but they may be renewed. Section 23 of the Reserve Army (Special) Regulations, 1941, provides that, on the application of the employer, a key man who has already been called up may be released after two months' training.

Recruiting policy has also been shaped to prevent the absorption into the army of men needed elsewhere. On September 21, 1939, the then Minister of Labour, the late Hon. Norman McL. Rogers stated that restrictions had been placed on the enlistment of men with certain specified qualifications. On May 27, 1941, the Department of National Defence issued instructions to District Officers Commanding regarding the recruitment of key men. If an enlisted man appears to be a key man, his employer will be given an opportunity to state reasons why he should not be withdrawn from industry. The District Recruiting Officer may thereupon grant him leave of absence without pay, provided he himself consents.

Prohibition of Enticement of Employees.—Efforts have been made to prevent competition among employers for skilled men and in general to ensure the efficient distribution of such men. P.C. 6286, November 7, 1940, prohibits employers from "endeavouring to entice to their service those who are already engaged in the production of munitions, war equipment and supplies. . . ." An amendment of June 25, 1941 (P.C. 4642) extends the coverage of the order "to all the industries, including civilian companies engaged in the British Commonwealth Air Training Plan, now covered by the Industrial Disputes Investigation Act", and provides that "regulations may be issued to prevent the employment of persons in certain designated skilled and scarce trades except through employment offices in accordance with a system of priorities".

Mobility of Labour.—The mobility of labour has been increased by P.C. 10/6172, August 13, 1941, under which the Government may defray the expense incurred by workers when they (and, if necessary, their dependents and effects) are transferred from one locality to another according to the labour needs of war industries. Loans of up to $10 may also be made to cover living expenses during the first week of employment.

Regulations Respecting Seamen

The Merchant Seamen Order, 1941 (P.C. 2385, April 4), provides for the discipline of seamen who refuse to sail on outgoing ships, or whose conduct is likely to cause delay in the departure of a ship. P.C. 14/3550, May 19, 1941, establishes manning pools and extends welfare facilities for merchant seamen, and by P.C. 141/4015, June 5, a Director of Merchant Seamen was appointed. Regulations have also been passed providing for the payment to merchant seamen and salt-water fishermen of pensions for disabilities suffered due to enemy action and of compensation for loss of earnings due to capture or internment in a foreign country.

Re-establishment of Discharged Soldiers

From the beginning of the war attention has been given to the problems which will arise in connection with the demobilization and rehabilitation of the armed forces. A Special Committee of the Cabinet was constituted under P.C. 4068½, December 8, 1939, to consider these problems, and P.C. 421, October 8, 1940, gave legal status to a General Advisory Committee whose duty is to make reports and recommendations to the Special Committee. By P.C. 1218, February 17, 1941, the terms of reference of the Special Committee were extended to include the general question of post-war reconstruction, and by P.C. 6874, September 2, 1941, a Committee on Reconstruction was set up.

Steps have been taken to provide discharged soldiers with employment opportunities and with financial assistance while awaiting employment, in addition to clothing and transportation allowances, medical treatment and pensions for disabilities.

A rehabilitation grant, amounting to 30 days' pay and dependents' allowance, is provided, under P.C. 7521, December 19, 1940, as amended, to all men who have served continuously on active service for a period of not less than 183 days. The Post Discharge Re-establishment Order (P.C. 7633, October 1, 1941) is designed to afford "substantially the same standard of protection as under the Unemployment Insurance Act to discharged persons until they become re-established in civil life", and to establish "as nearly as may be, parity . . . between discharged persons who may return to insurable employment . . . and those in insurable employment during the war period". Out-of-work benefits roughly equivalent to the benefits payable under the Unemployment Insurance Act to those in the upper wage scale, are to be paid to ex-service men discharged after July 1, 1941, while they are awaiting employment opportunity, receiving vocational training, completing interrupted educational courses, awaiting returns from independent enterprises such as agriculture, or receiving remedial treatment. Moreover, after a discharged person has been in insurable employment for 15 weeks in any 12-month period after discharge, his military service subsequent to July 1, 1941, will be counted as insured employment, with the Government making the necessary employer's and employee's contributions to the Fund.

Guidance service is to be provided by the Veterans' Welfare Division of the Depart-

ment of Pensions and National Health, which was set up by P.C. 6282, November 27, 1940, to advise returned men on employment opportunities and other matters. Vocational training is to be provided under P.C. 15/10066, December 24, 1941, which authorizes the Department of Labour to provide such training in co-operation with the provinces, and to co-ordinate it with the training now being provided under the youth training and war emergency training programs.

Finally, discharged men are ensured of their former jobs under the War Measures (Civil Employment Re-instatement) Regulations, 1941 (P.C. 4758, June 27), which provide that it is "the duty of any employer by whom a person accepted for service in His Majesty's Forces was employed when accepted for such service, to re-instate him in employment at the termination of that service . . . under conditions not less favourable than those which would have been applicable to him had he not enlisted". Section 21 of the National War Services Regulations, 1940 (Recruits) (Consolidation, 1941), as amended by P.C. 7680, makes the Re-instatement Regulations applicable to men called up on the same terms as they apply to enlisted men.

Unemployment Insurance Act

Probably the most important measure of social security enacted in Canada is the Unemployment Insurance Act, which provides for a system of unemployment insurance throughout the Dominion. In so far as contributions are concerned the Act came into effect on July 1, 1941 and is being administered under the direction of an Unemployment Insurance Commission. It is estimated that approximately 2,200,000 workers were brought under the plan during 1941. This means that when dependents are taken into consideration approximately 4,600,000 Canadians are protected by the cloak of unemployment insurance. (LABOUR GAZETTE, June, 1941, pp. 633-38.)

According to a statement issued by the Commission for the period July 1 to December 31, 1941, total receipts (largely contributions), amounted to approximately $8,500,000.

Persons contributing to the Unemployment Insurance Fund from July 1, will become eligible to make application for benefit on January 27, 1942, it being required that 180 daily contributions be made prior to application for benefit.

Factory Law in South Africa

A new Factories Act was assented to on April 10, 1941, to go into effect on proclamation. Important new provisions include an increase in the minimum age from 14 to 15, reduction of maximum weekly hours for adult males from 48 to 46, compulsory two weeks holidays with pay, and new regulations to prevent accidents from machinery and in building operations.

Other features of the Act are a more liberal child-birth allowance from public funds, an increase from three to four in the number of public holidays granted with pay, and a change in overtime rates. A maximum of 10 hours overtime a week is fixed for adult males, and the daily overtime limit for women is cut from three hours to two. The overtime maximum may be exceeded only if a permit is secured from an inspector. Overtime pay is raised from time and one quarter to time and one third. Double pay or, within seven days, a full day's holiday with pay must be provided if work is done on Sunday. One hour is cut off the night period during which women may not be employed. It now extends from 6 p.m. to 6 a.m. No change has been made in the hours for women. The maximum remains at eight a day, the daily limit for all workers, with the added prohibition against the employment of women after 1 p.m. on Saturday or on any other day set aside as a weekly half-holiday.

The safety regulations concerning machinery are expanded and clarified. New safety precautions for building workers follow the main lines of the Safety Provisions (Building) Convention adopted by the 1937 International Labour Conference.

Extensive powers are given to inspectors who may, for reasons of health and safety, prohibit or restrict the employment of individuals or forbid overtime for any class of employees. The Minister may prohibit the employment of any designated class of workers in any occupation. The Minister is also given power to prohibit homework in any type of work. No factory employee may do home work.

Employers are forbidden to reduce wages on account of improved working conditions such as shorter hours resulting from the application of this Act. Workers are protected from dismissal or wage reductions for the giving of information or other activities required in the administration of the Act.

CANADA'S LABOUR RESOURCES AND THE WAR EFFORT

Summary of Measures Adopted Under Various Agencies

IN order to indicate the measures in operation under various agencies in the utilization of Canadian manpower, it is necessary to point out:—

(1) That total war implies that all the human and material resources of Canada shall be mobilized and utilized in a manner that will most effectively contribute to the war effort—directly through the armed forces, and through the production of machines of war and other supplies, or indirectly through the meeting of essential civilian needs and the maintenance of civilian morale.

(2) That Canada entered the war at a time when, unfortunately, a large proportion of its manpower and materials was not being put to any effective use for any purpose. Many men and machines were unemployed.

Until quite recently therefore, the Canadian problem of organizing for war consisted largely of putting such men, materials and machines to any effective use, and, in fact, through the Government's rapidly expanding program a very large proportion of the country's resources, human and material, has been diverted to war services or direct war production.

It is only recently, however, that Canada has reached a stage of nearly full employment of her manpower and material resources. Very little specific action, therefore, was previously required for the formal or official organization for the use of the nation's total manpower. The subject, however, has by no means been neglected, and has been necessarily under consideration by those Departments and agencies which were concerned with various aspects of the problem. These may be summarized briefly as follows:—

(1) Under the chairmanship of Lieut.-General A. G. L. McNaughton, now Commander of the Canadian Corps, an inter-departmental committee, immediately prior to the outbreak of war, made a study of reserved occupations.

(2) The National Labour Supply Council and the Inter-Departmental Committee on Labour Co-ordination have had the problem continuously under review and have dealt with several of its phases. In particular, they are responsible for initiating those sections of the National War Service regulations which relate to the deferment of "key" men called for military training, and the issuance of orders by the several armed services concerning the enlistment of "key" men and leave to soldiers returning temporarily to industry.

(3) Under the authority of a special Order in Council there was established during the summer of 1941 a temporary Labour Supply Investigation Committee which, in co-operation with the Bank of Canada and the Department of Labour, undertook a broad, intensive survey of labour supply.

(4) The Dominion Bureau of Statistics, in co-operation with the Unemployment Insurance Commission and the Department of Labour, has recently published two special bulletins, "Statistics Relating to Labour Supply Under War Conditions, 1941" and "Recent Extension of Industrial Employment and Sources of Labour Supply, 1942".

(5) In co-operation with the Unemployment Insurance Commission and the Dominion Bureau of Statistics, the Department of Labour has conducted an experiment in laying the foundations for the establishment and current maintenance of an inventory of manpower.

(6) A Special Committee was recently appointed by the Deputy Ministers of the Department of Labour and National War Services and the Dominion Statistician, to investigate the problems of, and make recommendations with respect to, the establishment and maintenance of such an inventory.

(7) The Department of National War Services, in co-operation with the Dominion Bureau of Statistics, has established and maintained the National Registration.

(8) The Department of Munitions and Supply has necessarily had to consider the manpower requirements of its production program. It is to be expected that the newly-established Industrial Planning Branch will give particular attention to this problem.

(9) A special Order in Council authorizing the establishment of the Wartime Bureau of Technical Personnel in the Department of Labour. The function of this Bureau is to arrange for the most effective employment of engineers, scientists and technicians. The Bureau has established a nearly complete register of all such personnel in Canada.

(10) In accordance with the terms of the Unemployment Insurance Act, the Employment Service of Canada has been taken over by the Federal Government and re-organized. The Unemployment Insurance Commission has now established approximately 75 full-time employment offices and will shortly have in full operation 100 offices throughout the country with such other part-time offices as

experience proves to be necessary. The basic machinery for this expanded service is thus being established as quickly as premises and staff can be obtained.

In summary: Directed by the Cabinet, and more particularly by the War Committee of the Cabinet, the subject of the utilization of Canadian manpower has been continuously under study by the appropriate agencies of the Government since before the war began. That it now becomes a matter of more widespread public interest simply reflects the fact that as the stage of full employment is reached, the problem of the fuller use of Canada's labour resources in the war effort becomes increasingly important and no doubt further measures of regulation will be required.

INDUSTRIAL HYGIENE IN ONTARIO

IN the sixteenth annual report of the Ontario Department of Health, the section dealing with the activities of the Division of Industrial Hygiene under the directorship of J. G. Cunningham, B.A., M.B., states that "the war has emphasized the attention which must be directed to measures for the control of general sickness, occupational diseases, and fatigue among industrial workers. Health, important for its own sake, becomes much more important as a factor in maximum sustained output as required at the present time. As far as industry is concerned, when the need has been pointed out, the initiative rests with employers of labour."

The Division's report is divided into two sections, viz.: General sickness and occupational diseases. In the former the Director declares: "It should be appreciated that general sickness is the main cause of lost time from work, responsible for ten times as much absence as industrial accidents. If this sickness is to be recognized early and disability prevented, the physician should be brought to the workman in the factory for day-to-day supervision of personal health and of conditions of work—no more than is now provided for the armed forces."

The Director indicates, however, that an increasing number of factories provide for varying degrees of supervision not for treatment but for prevention, but this is apt to be limited to those who have large numbers employed, whereas the majority of workers are in plants employing less than two hundred.

Dealing with occupational diseases, the Director makes the following general observation that: "Longer working hours, new employees, new processes and pressure for maximum output increase the number of cases of occupational disease." He also refers to various factors in war production and their relation to occupational diseases.

Under the heading of fatigue the Director states:

"The importance of this state is apt to be discounted, but its possible effect on output under war conditions can hardly be overemphasized. The recorded increase in sickness absence under conditions of stress is very largely attributable to it, brought about by unfavourable conditions of work and of living incidental to rapid expansion in industry. Many men are working sixty and some seventy hours a week. There is an optimum figure for this which is not always easy to determine and varies with the kind of work, but it is important to remember that the response to excessive hours of work is immediate in reduced output, while recovery when the condition is corrected is a matter of months. There enters also night work and conditions of ventilation, lighting, speed of operation, which, if unfavourable, contribute to reduced output through ill-health. The requests to the Department of Labour for permits for overtime and night work for women sometimes suggest total lack of appreciation of these facts. It is wise to recall that the death rate from tuberculosis in women fifteen to twenty-four in the last war increased by fifty per cent while no increase was recorded in those over forty-five years of age not employed or in those in non-industrial areas. In these respects it is essential that existing information be applied in the interest of sustained output."

CONFERENCE OF NATIONAL AND REGIONAL WAR LABOUR BOARDS

Price and Wage Control Outlined by Minister of Labour and Chairman of Wartime Prices and Trade Board—Jurisdiction and Composition of National and Regional Boards

THE first plenary conference of the National and Regional War Labour Boards, which were established to administer the Wartime Wages and Cost of Living Bonus Order P.C. 8253, was held on January 14 and 15 in the Senate Railway Committee Room, the sessions being presided over by the Chairman of the National Board, Hon. Humphrey Mitchell, Minister of Labour.

The conference dealt with problems of administration in the application of the wage stabilization order and was attended by the provincial ministers of labour and the 25 representatives of employees and 25 representatives of employers who constitute the National and Regional Boards.

Throughout the sessions, emphasis was placed on the necessity of avoiding wage increases that could not be fully justified under the Order, since this was a fundamental factor in the fight to maintain the price ceiling and prevent inflation. Donald Gordon, Chairman of the Wartime Prices and Trade Board, who addressed the conference's opening session, again appeared before the conference at its conclusion to answer a wide variety of questions about price control.

"We have a tough, vital job ahead of us", the Minister of Labour told the meeting as it adjourned, and concluded:

"It has been said by some that the government did not consult both sides, employers and employees, sufficiently. The National War Labour Board and the Regional Boards are each comprised half of representatives of employers and half of representatives of employees. Let us show the people of Canada that we can work well together."

"Throughout the conference, neither representatives of the employers nor of the employees had taken a partisan attitude", he said. They had considered only the national interest. As in the sessions of the National Board itself, members had taken the attitude that they were servants of the state and not of any particular group of interest.

Replying for the Regional Boards, Hon. Peter Heenan, Minister of Labour for Ontario and Chairman of the Regional War Labour Board for Ontario, assured the National Board that while there had naturally been some differences of opinion, the Regional Boards would "go back and carry out your policies as far as humanly possible".

At its opening plenary session, the Conference was addressed by the Minister of Labour, Hon. Humphrey Mitchell, and by the Chairman of the Wartime Prices and Trade Board, Mr. Donald Gordon. Since both these addresses emphasized the importance of price and wage control and the close relationship between these controls in the prevention of inflation, the texts of both speeches are reproduced herewith in their entirety:—

Address of Minister of Labour, Hon. Humphrey Mitchell

Gentlemen, I need hardly tell you that you are sitting in a room that will go down in the history of this country. Most important meetings between the government and the people have been held here. I trust that the National War Labour Board and the Regional Boards will live up to the best traditions that have emanated from here, and that when you move forward into the more practical phases of our policy they will be a tower of strength to you in your deliberations.

This meeting this morning is unique in that the government of this country has asked and received the co-operation of the provincial governments and of the representatives of industry and labour—freely chosen—in working out the most important and far-reaching policy affecting working men and women and industry that has ever been undertaken in the history of any democratic country.

This policy is predicated not on a theory but on the practical application of a principle designed to ward off the inflationary tendency inherent in the present situation. We are charged with the heavy responsibility of making that policy function, of making it work in the true sense of the term. The policy is unique in this respect: that it provides for uniformity of treatment for all workers in the salary and wage groups, in that the same amount of bonus is paid to the higher wage earners and those in receipt of higher salaries as is paid to those of both these classes in the lower groups.

Inflation in Last War

I do not need to tell you—you are all grown-up men like myself—of the experience in the last war. There is nothing mysterious or wonderful about inflation. As it affects the working people it is the straight story

of the high cost of living. I think it is better that we should speak of it in that way, because management and employees understand common language. I have seen the effects of inflation in my own lifetime. I saw the effects of inflation in Germany after the last war, where, at the time it reached its zenith, the people would try to get half an hour off in which to spend their money before it became valueless. When it was all over everyone who had saved a dollar or who had bought a bond or an insurance policy was destitute, and the following year there were a great many suicides in that country—suicides of the best people, the best elements in the true sense of the word; older people who had saved up for their old age and who then said: "Well, the jig is up; we can't start again; the best way is to end it all."

Now, I am not saying these things to frighten you about the present situation. But I am a great believer in the power of precedent, and I believe that if we can make this thing function as it should, and keep the ship on an even keel, the people will express gratitude to us when they get to the end of the road.

To my labour friends I would like to say this. I passed through the period of the last war—not in this country because I was at the war—when the inflationary movement of that time was at its height. I remember, after we had come back from the war, getting a gratuity in one hand and having it taken out of the other through the high cost of living. I remember paying $60 for a suit of clothes that was not worth $15. I remember paying 25 cents a pound for sugar. I remember my first Christmas dinner after I was married, when I paid 90 cents a pound for chicken. We never caught up with the price conditions of that time; we were always from 30 to 50 cents behind. Now, the war-time policy was built on the principle of making a repetition of such conditions impossible. The initial success of the policy under Mr. Donald Gordon's direction has been amply shown in a reduction in the cost of living index figures of ·5 in the last month. So you see that we are moving in a practical way in the direction that the policy was designed to follow.

When you get back to your people I would just like you to bring these thoughts to them: how the inflationary movement would affect the people in respect of old age pensions; how it would affect the people in respect of widows' pensions and in respect of soldiers' pensions; how it would affect the dependents of the men who are defending our institutions on land and sea and in the air.

Civilian Discipline

We expect discipline from the men who go forward to fight the battles for the institutions which we have built up, and I do not think it is too much to ask of the civilian population of this country that they should —voluntarily, you understand—impose upon themselves the discipline which we expect from the men in the fighting forces. I have no doubt in my own mind as to the answer the Canadian people will make to that request. I have no doubt in my own mind as to the manner in which the National War Labour Board and the Regional War Labour Boards will function. They will function having in mind the national interest. They will function in the manner that all boards function which are representative of two points of view. So I would ask you to be frank and honest with your own people on both sides and tell them to keep in mind the background and the fundamental principles of the two policies that we have to administer.

Pioneering Policy

It has been said that this policy has been imposed upon the people of this country largely through the instrumentality of one side or the other. Many people charge that it is the working people's representatives who have been responsible for the policy; others have charged that it is the employers. Let me say to you in all sincerity that this policy was devised by young people who had the interests of this country at heart. Make no mistake about that; and when you go back to your people in the provinces from the Atlantic to the Pacific you can say that just as sincerely as I say it to you this morning. We have been a pioneer in this regard; I think other countries will follow, and I would like it said when the history of these times is written that the men of industry, the management and the employees, measured up to their responsibilities and made a distinct and lasting contribution to the life not only of the present time but also of the time to come.

At this time I would like to introduce to you Mr. Donald Gordon, who has an even tougher job than I have—Chairman of the Wartime Prices and Trade Board.

Address of Chairman of Wartime Prices and Trade Board, Mr. Donald Gordon

Mr. Chairman and Gentlemen, I am glad to have the opportunity to join this meeting and to make a few comments and outline a few suggestions to men who will be colleagues and associates with me in the tremendous task of trying to defeat the imminent danger of inflation which is threatening this country.

As newly-appointed men you probably have not had a chance to get at real grips with the various questions which have come before you, and as one who has had the experience of about five weeks I can regard myself as almost a veteran of this campaign. I thought therefore it would be useful to point out one or two things to you, particularly in view of the fact that a great many people in this country do not appreciate that inflation is upon us and do not understand what inflation means when the word is used. I begin to think that a great many people have begun to suspect that inflation is a bogey man trotted out by the big interests to scare them into doing something that they would not otherwise do. It may be useful in your work, therefore, if I give you just a general background and suggest to you a few simple facts which you might keep in mind when these discussions arise.

First of all I would ask you to try to recapture the atmosphere of the conditions prevailing at the outbreak of war. At that time we were spending some $50,000,000 in our whole national defence effort. To-day the figure is running at the rate of about $2,300,000,000. I use the dollar sign in making that comparison merely because it is a common denominator that we all understand. The real significance of this figure, however, is that a tremendous physical effort has been put forth in order to produce and increase the total output of goods and services which are needed not only for civilian consumption but also for the tremendous demands of the war.

Supply vs. Demand

Now, until recently, owing to the fact that we had large idle resources at the beginning of the war in the form of labour, raw materials and other resources ready to be used—until recently, I say, we have not been conscious of an actual scarcity of goods. On the contrary we have been able pretty well to maintain our peace-time standard of living in the matter of actual necessities, and in point of fact have given up relatively few luxuries. The situation now, however, has changed completely, first because of the fact that the tremendous speed of the war effort has finally caught up with the idle resources to which I refer; second, because of the situation in the Pacific, which cuts us off from very many sources of supply; and finally because of the important fact that the United States is now actually in the war and has suddenly become tremendously conscious of her own needs in the matter of materials and services. In the meantime the deliberate expansionist money policy which was followed by the government to bring these idle resources and labour into operation has caused a tremendous increase in the national income of this country—and again I use the dollar sign merely to indicate the comparison which we should keep in mind. The national money income has increased since the beginning of the war at least two billion dollars, and this increased purchasing power is now pressing against a reduced supply of goods available for civilian consumption. Indeed if it is not already the case, it soon will be that the actual amount of goods and services available for civilian consumption will be reduced below pre-war standards, notwithstanding the fact that this terrific increased purchasing power at the rate of two billion dollars a year is pressing against that short supply of goods.

Inflation and Social Injustice

It does not take very much imagination to see what would happen in these circumstances. I would like to make a point which is often misunderstood, namely, that so long as goods are in abundant supply it does not matter what increased purchasing power you have in the hands of your people. It is true that by increasing purchasing power very substantially you eliminate perhaps some element of bargaining, and the individual is less inclined to worry about the price he pays. But as a matter of common sense I suggest that if the supply of goods is so abundant that it presses constantly upon your market it is not very likely that prices will rise substantially. When the situation develops that goods become scarce and the increased purchasing power to which I have referred presses against that scarcity, the government, faced with its essential needs for war goods, and the people, with extra money in their pockets, begin a sort of national auction for goods which causes prices to rise erratically and unevenly and in point of fact gives rise to grave social injustice.

Effect on Business

The people cannot win against the long purse of the government; the government must have goods for the war effort, and so the two pressures get together and we see

42360—4½

the familiar spiral known as inflation. When that situation develops it is obvious that the war effort itself must be seriously affected, because production under conditions of rising prices and rising costs without any form of control is bound to be affected.

Business men are unable to plan ahead and have no means of deciding what price they should charge for their goods at some later date. So far as the employer is concerned it can be argued that he can get higher prices for his goods to take care of his rising costs, but as a matter of fact under inflationary conditions of the character I have mentioned it is impossible for him to make his planning so perfect that he can anticipate the extent to which he should plan for increased prices six months ahead, and he spends a great deal of time worrying and trying to outguess the movement of the inflationary spiral instead of settling down to his real business, which should be to produce the maximum in the form of goods.

Effect on Labour

Furthermore, these rising prices bring demands for higher wages, and with the best goodwill in the world there must be a difference of opinion between employer and employee in regard to what those wage increases should be; therefore we get into the problem of labour disputes, of strikes and of the other disrupting and disorganizing events which take place when differences arise between labour and employers. In the case of the employee it is also true that some people will argue that a carefully organized labour force can protect itself against inflation by skilful adjustment of wage rates. Well, all history has shown that no organized labour group has been able to adjust itself to those conditions. In the very nature of things wage increases must follow the cost of living, and it is a matter of record, and I think it is agreed by everybody who has given the matter a moment's thought, that labour must lose out in a race of wages against price increase in an inflationary spiral.

Effect on Post-war Period

Furthermore, think for a moment about adding this problem to the tremendous problems which will face us in the post-war period. The problems themselves are going to be bad enough, but if we add to them the paralyzing effects of a deflationary movement, we shall find ourselves facing an impossible task. Obviously deflation must occur after the war when our producing machinery is suddenly thrown idle because of the fact that the war pressure is relieved. The terrific adjustment which will be necessitated by demobilization and the reorientation of our labour force to the pursuits of peace certainly cannot be undertaken with any degree of efficiency if we are trying at the same time to adjust the effects of a runaway inflation.

Faced with these well-known facts the government decided that "it can't happen here". Whatever else may be said about this government—and I am not speaking now as a partisan of one party or the other—no one can help agreeing that the government of this country has had the courage to face boldly and resolutely the problems inherent in inflation. Right from the start of the war the government's monetary and fiscal policy has been aimed at preventing inflation. In the first instance, as I said, it was necessary to proceed with an expansionist money policy, which means government spending on a large scale to bring idle resources and labour into action. At the same time the government embarked on a heroic policy of taxation and an all-out effort in the matter of victory loans and war savings generally, for the specific purpose of trying to reduce as rapidly as possible the excess purchasing power which had been released into the hands of the people.

Timing of Control

During the summer and the fall of 1941, however, the cost of living rose about one per cent each month. Furthermore, the cost of industrial material had risen from the beginning of the war about forty-one per cent. Consequently the evidence was plain that in spite of the use of the taxation and borrowing weapons, inflation was upon us unless some other steps were taken. The situation ever since last fall was bad enough, but thinking of it in terms of the tremendous potentialities that were there by reason of the extraordinary increase in purchasing power it was quite clear that some other drastic action had to be taken.

Now, I would like to make it plain that the policy which was adopted, that of the over-all price ceiling, was not a policy of desperation. It was a policy which could be put in force only at the right time. If it had been put in force too early it would have had the effect of dampening down our war effort; if too late, it might have been impossible to recapture or even to hold the ground in the battle against inflation. Whether or not the imposition of the price ceiling policy was correctly timed will remain an argument for many years. But I do not think we are particularly concerned with that, because we have to deal with the fact as it exists. The policy did go into force, as you know,

starting from the first of December, and in my judgment the timing was as close to perfect as could be expected of human beings.

Prices and Wages

The price ceiling policy itself is essentially that of maintaining the retail price of goods. We have recognized in our administration various types of adjustments which will have to take place, but our main objective is to hold that retail selling price. In this way we will guarantee the wage-earner a stabilized cost of living, and it seemed to be the only policy which could be integrated with a wage policy in such a way as to be consistent. Consequently when the wage policy was adopted it was important that the costs of industry generally should be stabilized also as far as possible.

Since the labour cost represents one of the most important costs in industry, a wage policy had to be adopted which would be consistent with the price ceiling policy. Fortunately there was a formula at hand in the form of Order in Council P.C. 7440 which had already been adopted in war industry, namely, that of tying wage increases to the cost of living index. That seemed to be the intelligent thing to do; and it means this, that the government is staking the issue of the battle with inflation almost on the one point—the success of the price ceiling policy. If prices cannot be held, obviously it means increased costs to the wage earner in the matter of his normal living, which will produce, as I said before, demands from him for wage increases, which in turn will increase industrial costs, and as industrial costs go up, so we start in again on the familiar spiral.

Wages and Costs

In respect to this wage policy which you gentlemen are asked to administer, there are one or two things which I think I should say to you quite frankly. First, it is recognized that there may be cases in which low wage rates must be adjusted, and there may be anomalous conditions which ought to be ironed out as a matter of justice. But you should remember that every time an adjustment in wages is granted, other than that which is automatically provided for in the cost of living index arrangement, somebody's costs are being increased. I admit that there is a great temptation, and the argument has a good deal of appeal to me, that when we get an organization together for the first time in this country such as a national labour board and regional labour boards and they are considering labour problems—there is a great temptation to undertake reforms and to eliminate obvious injustices in the labour field.

But that temptation has to be resisted, because we cannot while fighting a war, and we cannot while asking business and industry to accept a squeeze beyond anything they have ever had before, select that particular time to remedy all these injustices or anomalies which may be apparent to you. Consequently it seems to me that despite your instinctive feeling that certain adjustments should be granted, you must consider each case in the light of the fact that every time a wage increase is granted a cost goes up, and if a cost goes up the pressure against the price ceiling is intensified.

Now, the point to keep in mind, I believe, in your job, is this—and please do not think I am trying to read you a lecture; I am merely trying to bring before you some facts which appeal to my judgment as bearing upon the whole policy. Every friend of labour, I think, must agree that there is a definite danger of well-intentioned efforts to improve the lot of the worker bringing about the calamity of inflation which in the long run would be a most disastrous thing for labour generally. So that we have to think of the broader interests of labour and in a sense to protect labour from its own friends.

Co-operation of all Classes

In the administration of the price ceiling policy so far, we have received simply splendid co-operation from business generally. Business men have accepted the principle that they are to make sacrifices. The farmer, I believe, has accepted the principle that he is not going to get as much benefit out of the war as he might have been led to believe. Generally speaking every class in the country must co-operate in this general policy to make it a success. I am the first to admit that labour has been suffering for many years because it was operating in a buyer's market. I am the first to admit that in my judgment there has been shortsightedness both on the part of the employer and on the part of governments generally for many years in dealing with the labour situation—I state that as my personal view. But having said that, it seems to me, now that labour is in the position of being in a seller's market, it is up to labour to recognize that that condition has come about at a time of national crisis, at a time when the country is in actual danger. Consequently all concerned are obliged to exercise self-restraint and self-discipline, to give an example of longsightedness which may be held up as an example to others when this

whole mess is cleaned up. We simply cannot afford to attempt now the reforms which might be attempted in happier days.

I suggest to you that you will likely meet the contention or the argument that certain classes have not been as well treated as others. That is perfectly true, but equality of sacrifice in a time of war is not possible. It is out of the question to delude ourselves into thinking we can so adjust our economy that everybody in this country will make exactly the same type of contribution to the winning of the war. It does not apply on the battlefield; one soldier is shot, the other gets the V.C. Equality of sacrifice in war is simply impossible, and we may as well accept that realistic view.

"It Shall Not Happen Here"

The final point I wish to suggest to you is to think of the alternative of inflation as against a policy of self-discipline and self-restraint which is inherent in the price ceiling policy. Inflation, as Mr. Mitchell has suggested, destroys completely any system of organized security for the future. The little fellow, the wage-earner, the salary earner, who has not anything more than his daily income to live upon and make arrangements for his future—he is the lad who finds the only possibility of organized security in insurance policies, annuities, and various other types of savings schemes. If his plans for future security are destroyed by reason of the fact that the purchasing value of these instruments becomes very much reduced in terms of goods, as happens under inflation, then he has no opportunity to protect himself in respect of his old age. The effect of such a condition is ruinous to public morale, and you get a situation where the people generally lose confidence in themselves. When they have lost their security and when they have lost confidence in themselves they seek elsewhere for the security which has been denied them. I need hardly remind you that inflation spawned Adolf Hitler and the monstrous crew who surround him. I need hardly remind you that one of the first victims of the system in Germany which grew out of inflation was organized labour. Consequently I say to you that in discharging the duties which have been placed upon you, you should weigh your every act in the light of what it means in regard to the objective which we are all seeking to achieve—that of defeating inflation; and you should make up your minds in discharging those duties that it cannot happen here because you and I and everybody else charged with the administration of this policy have determined that it shall not happen here.

Jurisdiction and Composition of National and Regional War Labour Boards

With the completion of the composition of the nine Regional War Labour Boards, the machinery of wartime wage control is now established throughout the Dominion.

The National War Labour Board has as its chairman the Dominion Minister of Labour and its vice-chairman is the Dominion Deputy Minister of Labour. Each Regional War Labour Board is headed by the Minister of Labour of the province concerned. On all Boards, National and Regional, the principle of equal representation of employers and employees is maintained.

In general, the National Board will develop broad policy and the Regional Boards will supervise inspection, enforcement and the details of administration. The staffs of the Regional Boards will consist chiefly of members of the staffs of the provincial departments of labour, assigned to them through the co-operation of the provinces. In effect, this set-up of war labour boards is a co-operative procedure of the Dominion and Provincial departments of labour to deal with pressing wartime labour problems, and in particular with the administration of Order in Council P.C. 8253, which controls the wage structure for the period of the war.

Since wage control, and price control, have become integral parts of Canada's wartime design for living, the National War Labour Board has considered it necessary to demarcate, for the purposes of the administration of the Order, the respective jurisdictions of the National and Regional Boards.

National Employers

In general, National Employers are designated as those whose operations—such as transportation and public utilities, etc.—are interprovincial in character or those whose industrial activities—particularly mining and shipbuilding—are closely related to the national war effort as a whole. Accordingly, communications from employers and employees in the following employments should be addressed to the Secretary, National War Labour Board, Ottawa:—

(1) the operation of lines of steam or other ships, railways, canals or telegraphs, including all services ancillary thereto, connecting any province with any other or others of the provinces or extending beyond the limits of the province;

(2) the operation of any system of air, bus or truck transportation connecting any

province with any other or others of the provinces or extending beyond the limits of the province;
(3) the operation of any electrical power or transmission works connecting any province with any other or others of the provinces or extending beyond the limits of any province, or serving two or more provinces;
(4) mining;
(5) the operation of any shipyard;
(6) all undertakings located in the Yukon or Northwest Territories.

Regional Employers

Regional employers are considered those in which the operations of the industry or business is definitely within provincial or municipal boundaries. In this category fall most war production plants, all sections of retail and wholesale trade, and services, etc. Therefore, employers and employees in employments other than those above designated should address their communications to the Regional War Labour Board in care of their respective provincial governments.

Interpretative Rulings on the Order have been issued in bulletin form, and these may be obtained on application to any Regional War Labour Board.

The following are the members of the National and Regional War Labour Boards:

National War Labour Board

Chairman.—Hon. Humphrey Mitchell, Minister of Labour, Ottawa.

Vice-Chairman.—Dr. Bryce M. Stewart, Deputy Minister of Labour.

Representing Employers:—

A. Deschamps, President, Builders Exchange, 680 Sherbrooke St. W., Montreal, Quebec.

George Hodge, Manager, Department of Personnel, Canadian Pacific Railways, Montreal, Que.

G. Jackson, Sentinel Securities of Canada, Ltd., Toronto, Ontario.

J. H. Stovel, Vice-President & General Manager, Dome Mines, South Porcupine, Ontario.

H. Taylor, Canadian National Carbon Co. Ltd., Toronto, Ontario.

Representing Employees:—

John A. Bell, General Chairman, Order of Railroad Telegraphers, 139 Pacific Ave., Toronto, Ontario.

W. J. Dunn, Financial Secretary-Treasurer, Toronto District Labour Council, 404 Merton Street, Toronto, Ontario.

J. A. McClelland, Valois, Quebec.

A. R. Mosher, President, Canadian Congress of Labour, 230 Laurier Ave. W., Ottawa, Ontario.

Gerard Picard, General Secretary, Confederation of Catholic Workers of Canada, Quebec, Que.

Executive Committee:—

Hon. Humphrey Mitchell, Chairman, National War Labour Board.

George Hodge, Manager of the Department of Personnel, Canadian Pacific Railway.

J. A. McClelland, International Association of Machinists.

Chief Executive Officer.—E. R. Complin, Industrial Relations Manager, Canadian Industries Limited.

Secretary.—R. H. Neilson, Conciliation Staff, Department of Labour.

Regional War Labour Boards

Prince Edward Island

Chairman.—Hon. Horace Wright, President of the Executive Council.

Executive Officer.—James A. McKinnon, Coleman, P.E.I.

Representing Employers.—J. M. Hunter, Charlottetown, P.E.I.

Representing Employees.—Leo. F. Corcoran, Charlottetown, P.E.I.

Nova Scotia

Chairman.—Hon. L. D. Currie, K.C., Minister of Mines and Labour.

Executive Officer.—J. P. Bell.

Representing Employers:—

Sydney C. Mifflen, Office Engineer, Dominion Coal Company, Ltd., Sydney, N.S.

Arthur W. Schwartz, Vice-President, Lunenburg Foundry Company, Limited, Lunenburg, N.S.

Representing Employees:—

Clinton Giles, Local Chairman, Brotherhood of Locomotive Engineers of the International Railway Labour Organization, Stellarton, N.S.

Doane Curtis, Member of the Steel Workers' Organizing Committee of the Steel Plant of the Dominion Steel and Coal Corporation, Sydney, N.S.

New Brunswick

Chairman.—Hon. J. Andre Doucet, Minister of Health and Labour.

Vice-Chairman and Executive Officer.—Charles J. A. Hughes.

Representing Employers:—

R. W. Cameron, Lumberman, Fredericton, N.B.

C. Allan Beatteay, Manager, Snowflake Lime Company, Limited, Saint John, N.B.

Representing Employees:—

Geo. R. Melvin, Secretary-Treasurer, New Brunswick Federation of Labour, Saint John, N.B.

R. F. Gould, Claims Investigator, C.N.R. and President Canadian Brotherhood of Railway Employees and Other Transport Workers, Local Division No. 137, Moncton, N.B.

Quebec

Chairman.—Hon. Edgar Rochette, Minister of Labour.

Vice-Chairman.—Gerard Tremblay, Deputy Minister of Labour, Quebec.

Executive Officer.—J. B. Germain.

Representing Employers:—

Francois Faure, Vice-President, Consolidated Paper Corporation Limited, Montreal, P.Q.

Robert McLagan, General Manager, Canadian Vickers Limited, Montreal, P.Q.

Col. J. N. Dessureault, Dessureault and Company, Quebec, P.Q.

Representing Employees:—

Paul N. Marquette, General Representative, Canadian Congress of Labour, Montreal, P.Q.

Phillipe Lessard, President, National Catholic Pulp and Paper Federation, Port Alfred, P.Q.

Lionel Thibeault, Representative, Boot and Shoe Workers' Union, Montreal, P.Q.

Ontario

Chairman.—Hon. Peter Heenan, Minister of Labour, Ontario.

Vice-Chairman.—

Executive Officer.—J. C. Adams, K.C.

Representing Employers:—

S. E. Dinsmore, President, Dinsmore-McIntire, Ltd., Windsor, Ont.

C. B. C. Scott, Superintendent, Massey-Harris Company, Ltd., Toronto, Ont.

E. E. Sparrow, Director, Imperial Varnish and Color Company, Ltd., Toronto, Ont.

Representing Employees:—

J. Cauley, Member of Ontario Executive, Trades and Labour Congress of Canada, Hamilton, Ont.

Joseph Corbett, Chairman, Joint Protective Board, Canadian National Railways, Brotherhood of Railway Carmen, London, Ont.

Elroy Robson, Director of Organization for the Province of Ontario, Canadian Congress of Labour, Toronto, Ont.

Manitoba

Chairman.—Hon. S. J. Farmer, Minister of Labour.

Executive Officer.—W. Elliott Wilson, Barrister, Winnipeg.

Representing Employers:—

J. H. Parkhill, Parkhill Bedding Limited, Winnipeg, Man.

E. Claydon, President, Claydon Company, Ltd., Winnipeg, Man.

Representing Employees:—

Fred Keeley, Chairman, Manitoba Provincial Executive Committee of the Trades and Labour Congress of Canada, Winnipeg, Man.

John S. McNabb, Secretary, Winnipeg Labour Council, Winnipeg, Man.

Saskatchewan

Chairman.—Hon. R. J. M. Parker, Minister of Municipal Affairs and Minister in charge of Bureau of Labour and Public Welfare.

Executive Officer.—H. S. Johnstone, Regina.

Representing Employers:—

LeRoy Johnson, K.C., Natural Sodium Products Ltd., Moose Jaw, Sask.

F. E. Doull, Office Manager, The Robert Simpson Co. Ltd., Regina, Sask.

Representing Employees:—

H. D. Davis, General Chairman, Brotherhood of Railway Carmen, Prince Albert, Sask.

Gerald Dealtry, Secretary, Trades and Labour Council, Saskatoon, Sask.

Alberta

Chairman.—Hon. E. C. Manning, Provincial Secretary and Minister of Trade and Industry.

Vice-Chairman.—W. D. King, Deputy Minister.

Executive Officer.—Clayton Adams, Chairman, Provincial Board of Industrial Relations.

Representing Employers:—

Wm. Innes, Burns and Company, Limited, Calgary, Alta.

H. G. MacDonald, Edmonton, Alta.

Representing Employees:—

T. G. Thompson, President, Local 271, Sheet Metal Workers' International Association, Edmonton, Alta.

D. Mathieson, Secretary, Locals 6783, 6784, 4119, United Mine Workers of America, District 18, Edmonton, Alta.

British Columbia

Chairman.—Hon. George S. Pearson, Minister of Labour.

Vice-Chairman.—Adam Bell, Deputy Minister of Labour.

Executive Officer.—H. Morrison.

Representing Employers:—

Byron Johnson, Gilley Brothers, New Westminster, B.C.

John Tucker, Vancouver, B.C.

Sidney Garfield Smith, Bloedel Welch and Stewart, Vancouver, B.C.

Representing Employees:—

Chris Pritchard, President, Vancouver Metal Trades Council, Vancouver, B.C.

L. Campbell, Boilermakers and Iron Shipbuilders' Union of Canada, Vancouver, B.C.

H. W. Mackey, Vice-General Chairman of the Brotherhood of Locomotive Engineers, Vancouver, B.C.

EMPLOYMENT OF CHILDREN AND SCHOOL ATTENDANCE IN CANADA

With Some Reference to Legislation in Great Britain and the United States

THE shortage of skilled and semi-skilled workers for the armed forces and for war industries which has necessitated the training of about 130,000 men and women in technical schools and industry in 1941 has emphasized a problem revealed in another aspect during the depression and unemployment of the thirties, the individual impairment and social wastage which often follows the completion of school life at too early an age.

The ill effects of early school leaving were pointed out on September 26 by the Honourable Ernest Bevin, British Minister of Labour and National Service, when he deplored the policy which had permitted children to leave school and enter employment:

> I should like to say how much it has been borne in upon me, since I have had to deal with the problem of manpower, that the State made a great mistake in maintaining such a low school-leaving age for the last twenty years. How valuable it would have been to the State now if those children had been kept at school and under the control of the educational institutions of the country for another couple of years, and a portion of that time devoted to some form of training, so as to give them at least a basic knowledge of production, not merely in industry but in agriculture. . . I trust that this will be borne in mind in the future.

That children who ended their schooling at 14 were improperly equipped for the workaday world was the opinion also expressed on September 2 by Lord Soulbury, Chairman of the Unemployment Assistance Board and formerly, as Mr. Herwald Ramsbotham, President of the Board of Education for England and Wales. Lord Soulbury considered "blind alley" work, in which there was no opportunity to develop aptitude or acquire skill of lasting value, by far the largest single cause of individual unemployment. At 18 young people who had had no other work found themselves stranded:

> An experienced investigator has reported that the hard core of unemployment is composed mainly of those who having left school at fourteen, or earlier, had taken any available job to bring additional money into the home, and who in many cases were physically and mentally unfit for work because when young they did not have enough nourishing food.

Similar statements have been based on studies made in the United States and Canada. Of a group of unemployed in Montreal in 1940, an inquiry made under the auspices of McGill University revealed that in a group aged from 27 to 32 those with only elementary school education reported an average of $21 a month less salary than those who had had some high school education and in a group aged 39 to 44 the average for those with longer schooling was $14 a month higher. The average among this group was distinctly in favour of those who had attended continuation classes.

In New York City in 1935, over 60 per cent of those unemployed had not gone beyond the eighth grade in school. In the less severe depression of the early twenties, those with secondary school education had an even greater advantage, it appears from the following extract from the report of a study made by the Welfare Council of New York City:

> A comparison of the amount of unemployployment of young men and women who first sought employment in the 1920's with those who joined the labour supply in the 1930's shows that for those of the earlier decade a high school education had proved a great asset, but that in the 1930's youth with a high school education appear to have been little better off in getting employment than those without. There is practically no difference in the percentage of time spent out of work between high school graduates and others if they started their search for a job in 1930 or later, whereas in the case of young people beginning to look for work in the earlier decade, uemployment embracing half or more of the working life was almost twice as common among those without a high school education as among those who had graduated from high school.

The discipline and training of school life is reflected to some extent, too, in figures from Canada's criminal records. The National Registration returns of August, 1940, show that of the whole population over 16 years of age, about 37 per cent had received some secondary school education but in the five years, 1935-39, the proportion of persons over that age convicted of indictable offences who had gone beyond the primary schools was only between 2½ per cent and 5 per cent.

Thus, failure to keep children at school, adapting, of course, the curriculum to their needs, appears from considerable evidence to result not only in loss to the individual child and to the community in which he becomes an adult citizen with the right to vote, but in many cases in much greater public expense for unemployment relief, for training under costlier conditions in order to fit for employment, in expenditure for the maintenance of a larger number of inmates in prisons and for the numerous social services, including medical care, which are made necessary by poverty.

Another cause of heavy expense borne in the first instance by employers but finally by the public, a cause, too, of personal suffering and hardship, is the high rate of accidents when juveniles are employed in industry. That workers under 18 are liable to a higher proportion of accidents and to a relatively high proportion of permanent disability accidents is agreed upon by all authorities. The U.S. Department of Labor has reported that "industrial accidents are to-day more damaging to production than any form of labor wastage, even including strikes."

These problems are all cumulative in effect from one generation to another unless measures are taken to give one generation a better chance. But to the present generation of children and young persons has come the war to aggravate these conditions, to give opportunity for jobs unsuitable to children, to relax parental control and make impatient of discipline, to provide higher earnings for the family which lead, in some cases, to foolish extravagance, to overtax the strength by long hours of work, to lead to shifting from one job to another, with probable unemployment after the war for many of them.

In Britain During and After the Last War

In England before the enactment of the Education Act, 1918, the law permitted exemption from school attendance of children under 14 and the half-time system of school and work for those between 12 and 14 still survived in the north of England. On the situation during the war, 1914-18, when the number of children under 14 exempted for work in agriculture or industry increased far beyond the normal, the following comment was made in a report to the Minister of Reconstruction on an inquiry made by the Ministry of Labour in 1917-18 on juvenile employment during the war and after:

> The general effect of [this] movement. . . has been to convert a large number of young persons, who four years ago would have been regarded as the recruits of industry and have received a training offering some special industrial qualifications, into a body of semi-skilled labourers employed for their immediate productive capacity. In age and experience, in strength and character, they are still boys and girls. Economically, they are treated as adults. The consequence, both for themselves and for the workers with whom they will in future compete, are likely to be of some moment.

The report also points out the short-sightedness of the policy which permitted children to leave school for work during the war and also the futility of it in relation to the labour force needed for war work:

> Where the policy of granting exemptions from school attendance at an earlier age than was customary before the War has been adopted, its effect has been to add an uncertain number of children to the ranks of full-time wage-earners, sometimes a few months, sometimes more than a year, before they would otherwise have entered them; to cause the community to carry for the next half century an age-group somewhat less developed in body and mind than the general population, and to make slightly more unmanageable the problem of juvenile unemployment which is likely to arise at the end of the War. Demoralizing as this expedient has been for the children affected by it, the number involved has not been large enough to cause any great addition to the total number of young persons employed. No very striking increase in the number of young persons occupied in industry has taken place, such as has taken place in the case of women, because there was no source from which such an increase could come. Whether in peace or in war the rising generation is fully engaged. It does not offer any considerable army of manœuvre.

The Chief Medical Officer of the Board of Education reported in 1916:—

> The future of the child in respect both of health and of equipment is heavily mortgaged. The increase in the employment of children and young persons in 1916-17 in munitions work and otherwise has demonstrated beyond all question or doubt that many boys and girls are being spoiled physically, mentally and morally.

Only too prophetic of conditions in both Britain and Canada was another statement in the report to the Minister of Reconstruction:

> The appearance at the close of the War of widespread unemployment among young persons would be a phenomenon the gravity of which could hardly be exaggerated. Many boys and girls, as has already been pointed out, have been working for more than three years under conditions calculated to offer little opportunities of industrial training, to impair their morale and to prejudice their mental and physical development. If, at the end of the War, they are to be faced with some months of unemployment, if the boy of 17 who left school prematurely and has since been earning high wages for long hours of labour, without either the leisure or the inducement to qualify for work of a permanent character, is for some months to tramp the streets or to relapse into casual employment, the consequences both to the rising generation and to the whole community must be disastrous.

Concerning the proposal to abolish exemptions from school attendance for employment in agriculture, a Committee appointed by the Board of Education to make recommendations concerning juvenile education in relation to employment after the war expressed this opinion in 1917:

There is no doubt that it will prove easier to raise the standards of education in the towns than in the villages, and we are fully prepared to find that a good deal of time may be necessary in order to make any changes now determined upon completely operative throughout all rural districts. Nevertheless, we consider that it would be a fatal mistake to accept a lower standard... in these districts; not only for the sake of the large number of children. . . but also for the sake of agriculture and of the agricultural population themselves. After all, agriculture is essentially from top to bottom a skilled industry, and if there is to be an agricultural revival in England, one of the most potent means for bringing it about must be an improved education, resulting both in a higher degree of farming ability and in a higher conception of the possibilities of village life. Of this, those who most desire the revival are the most firmly convinced. We are glad to find that most of the agricultural witnesses who have appeared before us, while fully realizing the special difficulties that will attend progress in rural areas, hold firm to the faith in equality of educational conditions as the essential objective.

Education Acts, 1918

The Committee recommended that a uniform school leaving age of 14 should be established and all exemptions, total and partial, below that age should be abolished; that no child should be permitted to leave school until the end of the term in which he attained his 14th birthday; that for young persons between 14 and 18 years of age, except those who were undergoing other instruction or who were over 16 and had completed a secondary school course, part-time day classes should be made compulsory for not less than 320 hours in a year with courses adapted to the age and environment; that difficulties of poverty be met in other ways than by regarding poverty as a reasonable excuse for non-attendance, as the Courts had recently permitted; and that greater restrictions should be placed on employment outside school hours. These proposals contemplated very important changes in education and industry, but the evidence of the evil effects of the existing system was so substantial that the Education Act, 1918, giving effect to these recommendations in England and Wales was passed and widely acclaimed. The provision for compulsory day continuation classes was put in effect in nine areas, but the Government's economy policy in 1921 caused the collapse of these schemes in all but Rugby. Voluntary continuation schools exist in some fifty centres.

It is of interest in Canada at this time to note statements made by the Honourable H. A. L. Fisher, then President of the Board of Education, who introduced the Bill in the House of Commons on August 10, 1917. Concerning provisions to regulate further the employment of children outside school hours, he said:

We desire a full period of school life, unimpaired by the competing claims of employment, for all children of the working population. At the present moment the value of our elementary school education is gravely harmed by the work which is imposed upon children out of school hours. They are liable to be employed for three hours before the school opens and for some time after the school closes, and the general opinion of my inspectors is that of all reforms affecting elementary education there is none more vital than the enforcement of strict limitation of the employment of children in their school-going days. This is not merely a question of scholastic efficiency. It affects the physical welfare of the race. We have now an overwhelming mass of evidence to the effect that the health of our children suffers from premature or excessive employment. You may trace the evil effects in diminished height and weight, in curvature of the spine, in cardiac affections, and in deficiency of the senses, especially the sense of vision, and in the bad dentition of our working classes. The reports of our school medical service are full of them.

Accordingly we propose that no child under twelve shall be employed for profit, and here we have already been anticipating by by-laws passed in some of our large municipalities, and we further provide that no child under fourteen shall be employed on any day on which he is required to attend school before the close of school hours or after eight p.m. on that day, or on other days before six a.m. or after eight p.m. . . . The Bill [also] provides that the local education authority, if they are satisfied, on the report of the school medical officer or otherwise, that the child is being employed in such a way as to be prejudicial to health or education, may forbid or regulate that employment.

The arguments advanced for the abolition of the half-time system apply with almost equal force to the abolition of all partial exemptions for children under the school leaving age and since the enactment of the Education Act, 1918, children under 14 have not been permitted to leave school even for limited periods in order to work at home or for others. A definite handicap is placed on children whose school day, through the half-time system, or whose school year, through a system of exemptions, is divided between school and work. Both systems were devised to permit increased attendance at school when educational opportunities were being extended; both survived, and in Canada the latter system still survives, thus depriving some children of educational opportunities available to others. Of the half-time system, Mr. Fisher said:—

Originally the half-time system represented a concession to the claims of education. Boys and girls in Lancashire were released from the factory for a half-day's schooling at a time when, in other parts of the country, they were

still deprived of all educational opportunities. Now the situation is reversed, and the child population in the half-time regions of the North suffers under peculiar and exceptional disabilities. The system, of course, has its defenders, as any system long continued and become a habit must. The wages earned by the children are acceptable to the parents. The labour supplied by the children is acceptable to the employers, but it is very difficult to see any grounds, apart from the convenience of cheap labour, upon which the continuance of this exceptional system can be defended. . . . The system has been condemned by every educationist and every social reformer. It is bad for the physique of the children. It is injurious to the intellectual prospects of the half-timer. It has been shown that the work upon which the children are engaged is not such as to develop the higher forms of industrial activity. . . . We consider then that the time has come when, in the general interests of the country and in the special interest of the children concerned, notice should be given that this system should after a convenient interval come to an end, and we consider that after the termination of the War, when a large mass of new labour will be thrown on the market, will be a convenient period at which to terminate this undesirable custom.

The Education Act, 1918, went into force on July 1, 1922, and a similar statute applied to Scotland. To raise the school-leaving age in Britain to 15 was the next step, one that could be taken in the large cities only after considerable preparation. A resolution of the House of Commons in April, 1925, urged this lengthening of school life and the Consultative Committee of the Board of Education reporting in 1926 expressed its opinion thus:—

Problems of educational organization cannot be sharply divided from other departments of public policy. It is evident that the question whether it is desirable to extend the age of compulsory school attendance to 15, like the question whether it was desirable to extend it from 13 to 14, to abolish "half-time", and indeed to establish any system of public education at all, is not one which can be, or is likely to be, decided on educational grounds alone. The economic and social issues which arise are only too familiar. On the one hand, there are considerations of the reactions on industry of withdrawing children between 14 and 15 years of age from industrial employment, of the ability and willingness of parents to dispense with part or all of their earnings, and of the financial cost involved to the nation in providing education for something approaching half a million children during an additional period of a year. On the other hand, there is the proved social and intellectual deterioration resulting from the premature entry of many thousands of young persons into wage-earning employment, the grave waste of part of the effort and money applied to the early stages of child life, which is inevitable when education ceases abruptly at 14. . . . There is no capital more productive than the energies of human beings. There is no investment more remunerative than expenditure devoted to developing them. . . . The course of wisdom, therefore, it appears to us, would be to pass legislaion fixing the age of 15 as that up to which attendance at school will become obligatory after the lapse of five years from the date of this Report—that is to say at the beginning of the school year 1932.

Education Acts, 1936

Not until 1936, however, was legislation enacted to fix 15 as the minimum school leaving age in both England and Scotland, the change to be made on September 1, 1939.

Distinguished from the Act of 1918 applying to England and Wales in permitting children to be exempted from school attendance under certain conditions, the Education Acts, 1936, for England and Scotland restrict such exemption to those over 14. Exemption may be granted: (1) in any case of exceptional hardship, to a child over 14 who can give assistance in the home, and (2) to a child over 14 whose parents desire him to secure employment, if the authorities are satisfied that the employment will be beneficial to the child, consideration being given to his health and physical condition, the wages, hours and other conditions of work, the opportunities for further education and for recreation, and the value, in relation to his future career, of any training or other opportunities afforded by the employment.

Before the effective date of these provisions, the Consultative Committee of the Board of Education for England and Wales in a report on secondary schools had expressed the opinion that

the adoption of a minimum leaving-age of 16 years may not be immediately attainable, but in our judgment must even now be envisaged as inevitable.

On the outbreak of war, however, the tremendous problem of providing school accommodation for children evacuated from dangerous areas and of replacing schools destroyed by enemy action made it necessary to postpone giving effect to the legislation of 1936 until after the war.

Employment of School Children

Another aspect of the Education Acts, 1918, deserves to be noted—the regulation of the employment of school children so that they may derive the greatest benefit from school. These statutes enabled a local education authority to prohibit any employment of a child of school age if they were satisfied by a school medical officer or otherwise that the employment was prejudicial to the child's health or physical development or was rendering him unfit to obtain proper benefit from school. In addition, the Children and Young Persons Acts now forbid: (1) employment under 12 years of age at any time except where a local by-law permits such employment by a parent or guardian in light agricultural work; (2) employment of children under the school-leaving age on any school

day before the close of school except under a by-law permitting not more than one hour's employment before school; (3) employment of a child of school age before 6 a.m. or after 8 p.m.; (4) employment of a child of school age for more than two hours on any school day or on Sunday; (5) street trading, such as selling newspapers, by any person under 16 years in England, 17 years in Scotland. The evil effects on children of street selling are emphasized by the high minimum age for that work. Under these statutes local authorities may, subject to the provisions indicated, make by-laws fixing the number of working hours or other conditions for the employment of children on school holidays.

In February, 1941, the Board of Education for England and Wales addressed a circular to local education authorities suggesting that within the limits permitted by law the fullest use should be made in agricultural employment of the help which could be given by older children, consistent with the maintenance of their health and the interests of their education. The Board proposed that school holidays should be adjusted to meet agricultural needs and that in secondary schools in agricultural areas parties of pupils over the age of 14 should be organized under proper supervision, to visit local farms on certain days in term time to help with the planting and lifting of potatoes. The Trades Union Congress protested against the application of these arrangements pointing out that some Local Authorities had no by-laws limiting the hours on school holidays during which children between 12 and 14 could be employed while other Authorities restricted such employment to four hours in a day. The Congress urged that if the proposals of the Board were put into effect children should be employed only on light agricultural work, that a standard by-law should be required of the Local Education Authorities prescribing the maximum hours for which children between 12 and 14 could be employed, the maximum not to exceed four in a day, and that Authorities should furnish full reports of any alterations of school holidays to meet agricultural requirements and of the number of days during secondary school terms on which children were released for work on the land.

Future Policy

Recently, there has been considerable discussion in Britain of educational problems. The need for trained workers in the Forces and in industry, the physical condition of young workers, and latterly, the high incidence of juvenile delinquency, all have contributed to a renewed interest in educational policy. As regards school attendance, there appears to be general agreement that after the war compulsory education, either full time or part time, should continue until 18 years of age, and that full time education in secondary schools attended by all children under 16 should be adapted to the differing abilities and interests of the pupils.

In the House of Commons on December 2 the Prime Minister, in outlining the plan to meet the need for increased man-power, announced:—

> It is proposed to register boys and girls between the ages of 16 and 18. This will be done by Defence Regulations. We must be careful particularly that our boys do not run loose during this time of stress. Their education, their well-being, their discipline, and the service they can render must all be carefully supervised. All boys and girls in these age groups will be registered and subsequently interviewed under arrangements made by the Youth Committees of the education authorities, who will thus be able to establish and maintain direct contact with all of them. We have to think of the future citizens as well as of the business of carrying on the defence of the country. Those who are not already members of some organization or doing useful work of some kind will be encouraged to join one or other of the organizations through which they can obtain the training required to fit them for national service. There are fine opportunities for helping in the war open to strong lively boys of 16 to 18. They can serve in the various youth organizations, such as the Cadets of the Junior Training Corps, the Air Training Corps, the Sea Cadets, and in voluntary organizations on the civil side.
>
> Boys of 17 may already join the Home Guard and we hope to be able to take some of the 16-year old class—like the powder-monkeys in Nelson's day—in some areas where the Home Guard will be entrusted with anti-aircraft and coast defence duties. However, in all this the well-being and training of the boys will be the prime consideration.

Mr. Bevin later referred to the youth organizations which boys were to be encouraged to join. He said:—

> There is nothing to stop the trade unions and the co-operative societies having youth movements if they want them. We want variety. We do not want all the people driven into one machine. But we cannot allow the youth of this country to run wild.

The Board of Education published details of this scheme on December 22. Boys and girls between 16 and 18 in full-time education will not be disturbed, but after registration will be asked to undertake some form of National Service in the schools. Those of these ages fully occupied after working hours with continued education or domestic work will not be expected to undertake any extra duties. Other boys and girls will be given an opportunity to join an organization to equip themselves for the responsibilities of citizenship, but those 15 and 16 are to be encouraged to continue their education as a

preparation for further technical training when they enter the Services. "The registration of boys and girls from 16 to 18 and the encouragement to be given them to undertake suitable training or service were but a first start towards building an arch to span the neglected gulf between 14 and 18." (London *Times*, January 19, 1942.)

School Attendance and Child Labour Standards in the U.S.A.

Turning to the United States, we find a statutory school leaving age of 18 years in seven states, 17 in 10 states, 16 in 28 other states and less than 16 in only four. Exemption is usually given to a child who has completed eight grades and to one 14 or over who has an employment certificate. Nearly half the states require employed persons under 18 to attend part-time classes, usually day classes, for a few hours a week. The federal Fair Labor Standards Act, 1938, has been a strong factor in eliminating much child labour and encouraging school attendance. This statute prohibits the employment of a child under 16 by any producer, manufacturer or dealer who ships or delivers goods for shipment in interstate or foreign commerce but, except in certain occupations, permits children over 14 to be so employed outside school hours for not more than three hours a day or 18 a week during the school term or for not more than eight hours a day and 40 a week during school holidays. The excepted occupations are: manufacturing, mining, or processing occupations; the operation or tending of power-driven machinery, other than office machines, or of elevators, or other hoisting apparatus; a public messenger service or occupation declared hazardous for juveniles 16 and 17 years of age by the Chief of the Children's Bureau. Occupations forbidden under this last clause to any person under 18 are those in plants manufacturing explosives, in or about coal mines, in logging or sawmilling (except in planing mills), occupations involved in the operation of power-driven woodworking machinery and those of motor vehicle driver and helper. State laws also impose restrictions on juveniles in dangerous trades.

The United States Department of Labour, in October, 1941, published the following comment on juvenile employment as affected by the war:

> When present sources of information are examined, an upward trend in employment is evident for both workers under 16 years of age and those 16 and 17 of age, though much more accentuated for the latter group .....particularly in areas where defence production has taken older workers from their former jobs. The children under 16 are going chiefly into non-factory jobs, for instance, in delivery work, for news distributing agencies, and in stores—employment on the whole less subject to regulation than factory work. However, where not prevented by a 16-year minimum-age standard, some children are going into local manufacturing industries. For instance, reports came to the Children's Bureau this summer that some canning establishments were increasing their use of younger workers, even under 16 years, whereas formerly they had employed older girls.
>
> There is evidence also that in some localities where considerable presure on the labour supply exists, there may be a drift into employment that is illegal for these children. Reports are already coming of difficulty in enforcing school attendance and child-labour requirements because children are picking up jobs which they could not fill legally but which are open and tempt them to leave school. This is found particularly in areas where there has been great expansion in employment so that jobs are easy to find. There has also been an unusual demand for child labor in agriculture, and in some localities there has been a tendency to retard the opening of schools or to excuse children from attendance for this work.
>
> .....This upswing in employment, encouraging as it is for the most part as regards 16- and 17-year-old minors, brings to the fore grave problems with respect to children under 16. The increase in the number of 14- and 15-year-old workers is not yet large, but, without sufficient legal safeguards re-enforced by good administration, the situation may rapidly become serious and result in a break-down of the standards which have been developed through the years. Moreover, in view of the large increase in employment of boys and girls of 16 and 17 at this early stage of the defence program, care must be exercised to see that the new employment opportunity will be beneficial to all youth engaged in it. Pressure toward break-down of child-labour and school-attendance standards is already evident. Such pressure appears to be an inevitable accompaniment of the strain that accompanies any intense and nation-wide productive effort, such as this country is now making and must continue to make. But the impact of this strain on young people must be made as light as possible. They will have a major responsibility for the character of American life for the next half century, and potential dangers to their welfare must be foreseen and averted by wise planning.

School Attendance Laws in Canada

In Canada, as in Britain, school attendance standards have been raised since the last war. At the present time all provinces except Quebec have compulsory school attendance laws. The statutory school-leaving age is 16 in Ontario and in the urban areas of Nova Scotia, 15 in Prince Edward Island, Saskatchewan, Alberta and British Columbia, and 14 in New Brunswick, Manitoba and the rural districts of Nova Scotia. In Manitoba the age is 16 for juveniles "not actively and regularly employed", and the local school boards may in any case raise it to 15. In rural areas of Nova Scotia the local authorities are empowered to raise the age to 15 or 16. In all provinces, except Prince Edward Island, full time attendance is normally required up to the age specified or until a certain school grade has been attained but except in British Columbia provision is made for exemptions. In Prince Edward Island attendance only for 75 per cent of the term is required in the rural districts.

The Canadian school attendance Acts are unlike the statutes in Great Britain in permitting a child under the school-leaving age to cease attendance when he has completed a certain school grade or on the date he attains the required age. In Britain "broken terms" are avoided by requiring children to continue at school until the end of the term in which they reached the school-leaving age.

In Ontario the Adolescent School Attendance Act of 1919 requires school attendance until 16 or until matriculation or equivalent standing has been attained but the Act provides for a system of employment certificates and home permits for children over 14. The statute prohibits employment, without such certificate or permit, of any child under 16 between 8 a.m. and 5 p.m. In 1923, the formal system of exemption by a school attendance officer was abandoned with respect to children over 14 in rural districts and such children are permitted to leave school if their services are "required in the household or on the farm" of their parents or guardians. The statutory conditions for the exemption of other children between 14 and 16 are that the child's services are "required in any permitted occupation in or about the home of his parent or guardian" or are required "in some permitted gainful occupation for the necessary maintenance" of himself or some person dependent on him.

School attendance of children under 14 in Ontario is governed by a statute originally enacted as the Truancy Act, 1891. The 1891 law required attendance for the full school year and imposed a penalty on any person employing in school hours any child required by law to attend school. The Act was partly the result of recommendations made by the Dominion Royal Commission on Capital and Labour following its investigation into working conditions and the provisions of the Act represented a considerable advance over earlier standards. Another statute of the same year provided for night schools for those over 14. The Truancy Act, however, permitted a child to be absent from school for a maximum of six weeks in a term, or 12 weeks in a year, if his services, in the opinion of a Justice of the Peace or of the Principal of the school, were "required in husbandry or in urgent and necessary household duties or for the necessary maintenance of such child or of some person dependent on him." These provisions still stand, the attendance officer having the authority formerly given to a Justice of the Peace or the school principal.

The provision in Ontario for exemption of children under 14 for a maximum of 12 weeks or from 28 to 30 per cent of a school year, which has been copied in Alberta, Manitoba and New Brunswick, and with modifications in Nova Scotia, was taken from the English and Scottish Education Acts of the time but in Britain the period of exemption was limited to six weeks in a calendar year and the clause was restricted to children over a specified age, raised to 12 in 1901 and to 13 in Scotland in 1918 but in that year exemption was abolished in England. The 1936 Scottish Act would raise the age limit for exemptions to 14 and permit them only on the ground of hardship at home or, as in the English Act, for "beneficial employment" as noted above.

Only in Manitoba and Nova Scotia is there an age limit fixed for children who may be exempt from school attendance, 12 in both provinces. Nova Scotia permits such absence only for a maximum of six weeks in a year.

In Saskatchewan, the Act imposes no time limit on the exemption of a child from attendance at school. The British Columbia statute makes no provision for exemption similar to that in the other provinces but under the Act it is a defence for a parent to prove that the child was prevented from attending school by any "unavoidable cause". There is no information as to whether this provision has been construed to include the poverty of the family.

The specific grounds on which exemption may be granted in all provinces except British Columbia are the need for the child's services or for his earnings. In Prince Edward Island and Nova Scotia poverty is expressly mentioned as a reasonable excuse for non-attendance. In Alberta, Manitoba, New Brunswick, Nova Scotia and Ontario exemption may be

given if the child's services are required in husbandry or in home duties. This provision also was taken from the English Act where children over a specified age were, until 1918, exempt from school if their services were needed for "the necessary operations of husbandry and the ingathering of the crops" but only Nova Scotia has adopted the restriction that the child's services in such case should be available only to his parents or guardian. Some of the Canadian provinces went further than the Imperial statutes and Alberta, New Brunswick and Saskatchewan, following Ontario, permit a child, under 14 or 15, as the case may be, to be exempt from school attendance if his services are required for the maintenance of himself or of some one dependent on him. Thus, all these provinces recognize poverty a legal excuse for not attending school. In Britain, on the other hand, this long ago ceased to be the case and the education authorities in both England and Scotland are empowered to provide scholarship and maintenance allowances for children up to 16, and to arrange wherever necessary for their conveyance to school or their maintenance near a school.

Dangerous Trades

In Canada, outside Quebec, no regulations prevent the employment of young persons under 18 in dangerous trades except in mining. In this respect, legislation in other countries is in advance of that of the Canadian provinces which merely give general power to the factory inspector to see that no person is employed so that his health or safety is endangered, a provision taken from the British Factories Act by Ontario and Quebec in the eighties and copied by other provinces. Neither is there any medical examination required of children or young persons before employment in Canada although Quebec and Nova Scotia have such provision in their statutes. In the United States in 23 states where employment certificates are required for those under 16, or under 18 according to the school law, medical certificates of fitness for the job must first be obtained. In Britain no child under 16 may be employed in any factory unless he has been certified to be fit for the work and a medical examination of any person under 18 may be required by the factory inspector and a certificate of his fitness for the job. A local education authority, at the request of an examining surgeon for any factory, is required to place school medical records of young persons at the disposal of the examining surgeon for his confidential information.

Employment of School Children and Street Trades

Restrictions on the hours of employment of children outside school hours have not been imposed in Canada except in Manitoba where boys of 13 may be employed about a shop only for two hours on a school day and for not more than eight hours on a school holiday. In most of the provinces there are statutes applying to children up to 16 years of age at least which provide for by-laws to regulate street selling by children and their employment in places of amusement and as messengers and errand boys. In Ontario street selling by boys under 12 or after 9 p.m. by boys under 16 is unlawful but the enforcement of this provision varies considerably from one city to another.

Minimum Ages for Employment

The minimum ages fixed by provincial laws for employment in mines, factories and shops are shown in the table below:—

—	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Yukon
MINES	Coal: 16, above. 16, below ground Metal: 16,above. 16,below.	—, above 16, below.	— above. 15, below.	16, above. 18, below.	16, above. 18, below.	Coal: 14 in workings. Metal: 14,above. 16,below.	17, above. 17, below.	Coal: 16,above 18,below. Metal: 15,above. 18,below.	12, above. 12, below.
FACTORIES	14, except during fruit and vegetable canning season. July-Oct.	.....	14; 16 unless able to read and write fluently or attending night school.	14-16 from 8 a.m. to 5 p.m., except with permit.	15	14, boys; 15, girls.	15	15, except with permit.	.....
SHOPS	.....	.....	As for factories.	As for factories.	15	.....	15, in towns of over 5,000 population.	.....	.....

School Attendance, 1931

In the Canadian provinces the proportion of children 7 to 14 years of age in the rural and urban population who attended school for seven or more months in 1930-31 was reported at the Census, 1931, as follows:—

—	Canada	P.E.I.	N.S.	N.B.	Que.	Ont.	Man.	Sask.	Alta.	B.C.
Rural.....	85·3	83·0	83·3	79·2	81·3	90·1	86·9	84·5	85·3	88·4
Urban.....	93·8	91·2	93·7	94·3	89·8	95·9	97·1	96·4	97·3	95·4

These figures show a considerable advance over those for 1921, particularly in rural areas in the three eastern provinces and in the three prairies provinces.

Employment Certificates in Ontario

As to the number of children now employed in Canada full time or part time, there is little information. It is generally observed, however, that advantage is being taken of the opportunities for employment and children are reported to be leaving school in increasing numbers. In Ontario, the only province from which reports as to employment certificates are available, the number of certificates granted in 1940 to children 14 and 15 years of age was over twice the number for 1939—4,871 in 1940 and 2,146 in 1939. The figure for 1940 is higher than for any year since 1923, the second year in which the Adolescent School Attendance Act was in force. It is safe to say that the number for 1941 will be substantially higher than for 1940. In addition to the children between 14 and 16 given employment certificates, there were 1,885 children of these ages granted "home permits" in 1940, about 500 more than in the preceding year, making a total of 6,756 children given formal exemption in 1940. This figure does not include the number of children of these ages in rural districts who left school to work at home or on their parents' farms. In addition there are the children under 14 who were absent from school for a maximum of six weeks in a term to work at home or for others.

Number of Children Employed, 1931

The nature of the jobs taken by children under 16 cannot be stated but it is evident that a substantial proportion are working as messengers and delivery boys, in and about shops, restaurants, places of amusement and automobile service stations — occupations requiring and affording little or no training. Work in factories and mines is restricted in almost all provinces to those over a specified age but there is little regulation of employment in shops and the other workplaces mentioned and of selling on the streets. Agriculture and domestic service are affected only by school attendance Acts.

The 1931 Census throws some light on the number of employed children but only those are reported who were employed on June 1 and "for the major portion of the year". As a result many of the children who engage in part-time and seasonal occupations are not reported in the Census. Such work is likely to cause children to fall behind in their classes and to drop out of school as soon as the law permits. Moreover, since 1931 was a year of business depression, more young people remained at school because of lack of jobs and the figures are hardly comparable with recent years, certainly not with the war years. The number of employment certificates granted in Ontario to 14- and 15-year olds in 1932 was 1,360.

In 1931 there were 5,397 children under 14 gainfully occupied for the major portion of their time and not attending school. Of these children, 3,545 were in Quebec and 633 in Ontario. At 14 years of age there were 13,716 working children of whom 11,743 were boys. In other words, 11 out of every hundred boys of that age in 1931 were employed. In 1921, the proportion was 19 per cent and the figure for 1941 is likely to be much nearer that for 1921. In Quebec, 22 per cent of the 14-year old boys in the province, or 6,765, were employed, in Ontario 7 per cent or 2,478. The Ontario figure dropped from 5,698 or 16 per cent in 1921, chiefly as a result of the Adolescent School Attendance Act but it reflects, too, the dearth of jobs in 1931. Other provinces showing a high proportion of children employed at this age, mostly boys, were Prince Edward Island with 16 per cent, New Brunswick with 14 per cent and Manitoba with 9 per cent.

The number of 15-year old children who were reported as working on their parents' farms or employed in 1931 was 33,517, of whom 27,412 were boys representing 26½ per cent of the boys of this age. In 1921, the number of working 15-year olds was 43,642, boys making up 33,518 or over 40 per cent of the boys of this age. The higher school age in Ontario after the Census of 1921 contributed to a drop in that province from 14,553 employed 15-year olds in 1921 to 7,396 in 1931. But in 1931, 38½ per cent of all

boys 15 years of age in Quebec were working, 19 per cent in Ontario, 29 per cent in Saskatchewan, 24 per cent in Manitoba, 29 per cent in New Brunswick, 18 per cent in Nova Scotia and 39 per cent in Prince Edward Island. Thus, of all children under 15 in 1931, 19,113 were employed and not at school, of whom 16,583 were boys. Of those under 16, there were 52,630 employed, 25,921 in Quebec and 10,507 in Ontario.

Farm labour occupied the great majority of child workers in 1931 as in 1921. 4,162 children between 10 and 13 were working on farms in 1931, 918 as hired labourers. Of the 19,113 children under 15 employed in 1931, 13,503 were on farms, 1,103 as hired labourers and 12,400 on their home farms. Of those under 16, 33,677 were in agriculture, 30,032 on their home farms and 3,654 as hired labourers.

These children work most of the time and do not attend school or only for two or three months in the year. Much child labour on farms, of course, is not reported since children may attend school for part of the year and work only with such special crops as the orchard fruits, tomatoes, peas, beans, potatoes, onions, sugar beets, tobacco, and so on. Concerning these special crops, the United States Children's Bureau has reported that in industrialized agriculture as it is to-day, and it is expanding,—

> More children are employed in agriculture to-day than in factories even when child labour was at its peak in 1910. . . . Children work under conditions entirely different from the healthful out-door life of many farm boys and girls a generation ago. In recent years. . . . there has undoubtedly been a large increase in the employment of children as members of family groups engaged in hand work on farm and orchard crops. . . . Young children work from dawn to dark in the fields with their parents. Many are deprived of education and are subject also to most unfavourable living and working conditions.

The family contract system, here referred to, is used in Canada, especially in sugar beet and tobacco districts, and in most special crop areas even the younger school children help at home or hire their services to farmers in the district. Reports from different provinces indicate that every year some rural schools in such areas are almost disorganized at busy seasons. The extent of such work by children varies with the nature of the crop, the appreciation by the parents of the value of schooling for their children and their unselfishness and ability to arrange for other help as well as the far-sightedness and influence of the school authorities. Where the work is light and the hours short, the chief objection to such work is its interference with school attendance, likely to develop the habit of irregular attendance and cause falling behind in class and leaving school as soon as possible.

In industrial undertakings, including lumbering, mining, manufacturing, construction and transport, there were 1,977 children under 15 employed in Canada in 1931 as compared with 6,023 in 1921. Of the 15-year olds, there were 5,097 in industrial employment in 1931 but 12,786 in 1921.

In trading establishments, mostly shops, the Census report shows 1,204 under 15 and 2,530 who were 15 years old in 1931 and 2,608 under 15 and 3,896 over 15 and under 16 in 1921. Again, it should be noted that the difference over the ten-year period was due partly to the higher school age in Ontario but partly to the scarcity of jobs in 1931. As already stated, the Census figures give an inadequate picture of juvenile employment in shops, much of this work being done before and after school hours. They give, too, little or no information on the actual numbers of children who work on the streets, in bowling alleys, billiard rooms, in hotels and restaurants, and in the numerous places where children find employment, often in unsuitable environment for young boys and girls, employment requiring no training and with little or no educative value except the discipline of obedience and punctuality.

International Labour Conventions

The International Labour Conference has adopted conventions for a minimum age in agriculture, in industrial employment and in non-industrial employment. As first agreed upon, the age fixed in each convention was 14 but the conventions applying to industrial and non-industrial employment were revised to raise the age of entry to 15.

Agricultural Employment

This Convention, which has been ratified by 20 countries, fixes 14 as the minimum age for agricultural work during school hours but permits such work outside school hours if it does not prejudice attendance at school. The Convention applies to the unpaid work of children on their parents' farms as well as work done for hire. For purposes of practical vocational instruction, the Convention permits hours of school attendance to be arranged so as to permit employment on light agricultural work, particularly in connection with the harvest, provided attendance at school is not reduced to less than eight months in a year.

Industrial Employment

The Convention making 15 the minimum age for industrial employment applies to factories, shipyards, power stations, mines and quarries, works of construction and demolition and the transport of passengers or goods by road, rail or inland waterway, including the handling of goods at docks and warehouses, but

excluding transport by land. For dangerous trades, the law giving effect to the Convention must fix, or empower administrative authorities to fix, a higher age than 15.

The Convention of 1919 fixing 14 as the minimum age for industry was ratified by 29 countries before December, 1939. The revised Convention of 1937 with 15 as the minimum age had been ratified only by Norway and China when war broke out.

Non-industrial Employment

This Convention applies to any employment not covered by the other two or by the Convention applying to employment at sea. It applies, therefore, to shops, messenger services, places of amusement, street trades, domestic service and many other jobs held by children. The minimum age under this Convention is 15 or the legal minimum school-leaving age if higher than 15 and the age applies to work done during school hours. Children over 13 may be employed outside school hours for "light work" for not more than two hours in a day or, where there is no compulsory school attendance law, for not more than 4½ hours in a day. Hours of work and school are limited to seven on any day.

For harmful trades, such as street selling, the authorities must fix an age higher than 15, or higher than the minimum school-leaving age where that is above 15.

STABILIZATION OF PRICES IN CANADA

First Month's Operation of Price Ceiling Policy

DURING the first month of its operation, the price ceiling policy has been clarified by the Wartime Prices and Trade Board, methods developed to meet many of the difficulties arising under it, and the administrative machinery for its application brought near completion.

Power has been given to the administrators of the Board to allow manufacturers, importers and wholesalers to increase their price above the highest price at which they made sales between September 15 and October 11, where this is necessary to secure a proper distribution of the burden of maintaining stable prices, but only when they are satisfied that such charges will not be reflected in any increase in retail prices. The requirement for authorization by an administrator has been extended to include increases in the price of the products which are indirectly used for war production and to imports of the machinery and equipment.

At the same time, adjustments are being made by agreement in numerous industries and trades by which manufacturers, wholesalers, primary processors and importers will reduce their price below the "ceiling" level when this is necessary to lighten the burden on retailers and secure a fair distribution of the "squeeze." Such adjustments have been agreed upon, for example, in the primary cotton textile industry, the shoe trade and the tea trade.

In addition, consideration is being given to possible methods by which processors, importers, manufacturers and merchants can absorb a part of the "squeeze" by effecting economies in their operations. They are cutting out duplications and unnecessary varieties of styles, elaborate wrappings and non-essential services. They are expected to eliminate "frills" while maintaining to their customers essential quality, choice and service, especially in the less expensive lines of merchandise. The elimination of "frills", such as fancy wrappings and excess deliveries in the bakery trade is an example. Wide ranges of colours and patterns are being cut down to a relatively few in the case of women's stockings and men's socks.

If, after all possible economies and adjustments have been effected, the total margin between the retail price and the primary or import costs is insufficient to maintain the necessary flow of supplies, consideration will be given to subsidies or other forms of assistance.

Subsidies

Subsidies to milk producers and, in some areas, to producers selling for fluid distribution have been provided to encourage larger production. A subsidy has been arranged to prevent heavy capital losses on large stocks of tea on hand. Subsidies are to be paid to importers whose costs have risen above the level at which they can carry on their business within the limits of the retail ceiling. Certain exceptions were announced in the Board's first Statement on Import Policy, on December 2. A new Statement on Import Policy adds to exclusions from the subsidy over thirty classes of non-essential goods as from January 1, 1942. (Consideration will be given to imports cleared before March 31, 1942, in accordance with the firm contracts made during December, 1941.) In addition imported goods which are exempt from the retail price ceiling will not be eligible for subsidy. To reduce the cost of imports, provision has been made for withdrawal of dumping duties, and in some cases, for payment of duties on the basis of invoice values.

Price Rulings

A number of especially complicated price situations have been under investigation. In the case of rayon print fabrics, for example, a maximum limit has been set of an increase of 10 per cent in prices as compared with those

charged in January, 1941. The London and Port Stanley Railway has been refused permission to raise its rates. Regulations have been issued regarding hay, barley, flaxseed, oats and rye. The price of some kinds of fish, and of all furs and fur goods, have been exempt from the ceiling in order to meet special export situations.

Goods and services which were not being sold between September 15 and October 11, are to be so priced that their prices bear the usual relationship to the prices of goods which were being sold in the basic period. In the case of seasonal goods and services which the Board has ruled are not similar to any sold at retail during the basic period, the price charged by manufacturers and wholesalers must be approved by an Administrator of the Board in consultation with the Administrator of Retail Trade. Retailers may then price such goods for sale at a "mark-up" not greater than the "mark-up" used in pricing similar goods during the last season in which they sold the product.

Provision has been made to allow administrators to control the quantity of goods that is sold to any one commercial buyer, in order to prevent particular buyers from securing an unreasonably large share of the total available. Favouritism of this type will not be allowed.

Modification of Licensing Regulations

The board has modified its licensing regulations. Licence numbers need no longer be filled in on sale slips, but individual licences must now be secured before March 31 by all persons and businesses coming within the scope of the price ceiling.

Amendment of Consumer Credit Regulations

The Consumer Credit Regulations have also been amended to relax their provisions in the case of farmers and other primary producers whose income is seasonal in character, to regulate lay-away buying and credit advertising, and to clarify the distinction between cash and consumer credit prices. Except in the case of automobiles, trade-in values may no longer be counted as part of the minimum cash payment.

Rentals Administration

The Rentals Administration has been reorganized and the method of securing compliance with the rentals ceiling and of preventing evictions, detailed in a new order of the board which became effective on December 30, 1941. The rentals ceiling extends control to commercial properties as well as housing accommodation, and from the areas in which rentals were already controlled, to the whole of Canada. (See December 1941, LABOUR GAZETTE, page 1462.)

Co-operation of Public

With few exceptions the business community and the public at large have given the board excellent co-operation in bringing into effect the price ceiling controls and in meeting and overcoming the difficulties involved.

Compliance with the Maximum Prices Regulations has been most satisfactory in the majority of cases. Most of the complaints received have been found to be based on misunderstandings, and when the price has been too high this has been due in most cases to some mistake, and adjustments have been willingly made.

There have been, however, a few cases of actual or attempted breach of the regulations. In one case, a representative of a retailer tried to persuade a wholesaler to supply him with a product in a cheaper container to be sold above the ceiling price under another name. Rentals have presented some difficulties and there were some violations in the sale of soft drinks on New Year's Eve.

F. A. McGregor is in charge of enforcement and enforcement counsel have been appointed in thirteen local offices.

Mr. Donald Gordon, chairman of the Wartime Prices and Trade Board appealed to the women of Canada to help to maintain the price ceiling by keeping a careful record of the prices they pay but to make sure that they do not make mistaken allegations as to violations.

Appointment of Administrators

The administrative machinery of the board is now almost complete. Among the major appointments of administrators are the following:—

Administrator of Retail Trade, E. G. Burton.

Administrator of Wholesale Trade, R. F. Chisholm.

Co-ordinator of Textiles and Clothing Administration, F. B. Walls.

Administrator of Foods, J. G. Taggart.

Co-ordinator of Metals Administration, D. P. Cruikshank.

Co-ordinator of Pulp and Paper, W. H. Howard.

Administrator of Services, James Stewart.

In addition, the controllers of the Department of Munitions and Supply are to act as administrators of the Wartime Prices and Trade Board.

Prices and supply representatives have been appointed to act locally for both the Wartime Prices and Trade Board and the Department of Munitions and Supply at Vancouver, Edmonton, Regina, Winnipeg, London, Toronto, North Bay, Brockville, Montreal, Quebec, Saint John, Halifax and Charlottetown.

The Commodity Prices Stabilization Corporation, to handle import problems and subsidies, has been set up under the chairmanship of H. B. McKinnon. (See LABOUR GAZETTE, December 1941, page 1462.)

RECENT REGULATIONS UNDER DOMINION AND PROVINCIAL LEGISLATION

Seamen—Minimum Wages in Quebec and Saskatchewan—Alberta Hours of Work Act—Regulations for Dry Cleaning Business in Manitoba

SEVERAL new Dominion orders affecting seamen have been issued. They raise pilotage dues in Quebec and Montreal pilotage districts, make sectional passes valid throughout the Empire, require all seamen on foreign voyages to be provided with identity certificates, and demand that masters of foreign ships, before clearance, furnish lists of all Canadian seamen employed by them. The regulations regarding the examination of officers acting without appropriate certificates are amended to broaden the facilities for examinations. In Quebec wage increases provided in 14 orders in November have been repealed to avoid conflict with the Dominion's wage policy. Three orders, including Order 4, have been renewed and the levy on employers to meet the cost of administering the Act has been reduced. In Saskatchewan, the first minimum wage order applying to the lumbering industry has been made. The Alberta orders exempting certain classes of employees in the lumbering industry from the sections of the Hours of Work Act which deal with maximum weekly hours and a weekly rest day have been extended to October 31, 1942. New safety regulations for dry cleaning establishments in Manitoba have been issued.

War Measures Act

Two new war orders affecting seamen were gazetted December 13. The first requires that after January 1, 1942, masters of ships of foreign registry must, before they can clear from Canadian ports, furnish a list of all Canadian seamen engaged by them. This measure is designed to facilitate the establishment of claims under the regulations providing compensation for Canadian seamen and their dependents in case of disablement or death resulting from enemy warlike action (LABOUR GAZETTE, 1939, p. 1202). The second, decrees that all seamen employed on foreign voyages who are either Canadian citizens or British subjects legally admitted to Canada must hold a certificate establishing their national status and identity. Shipping Masters and Collectors of Customs acting as Shipping Masters will issue identity certificates upon application in writing. No Canadian ship may clear for a foreign voyage unless all on board subject to this order hold identity certificates.

Canada Shipping Act

War conditions are reflected in two orders in council gazetted December 6 providing for a 10 per cent surcharge on all pilotage dues in the pilotage districts of Quebec and Montreal. Movage, detention and minimum charges are exempted.

The regulations permitting the clearance of ships with officers acting in capacities above the grade of their certificates (LABOUR GAZETTE, August, 1941, p. 958) are amended by an order in council gazetted December 6, to broaden the facilities for examination of such officers. Certificated Master Mariners approved by the Minister may now conduct the examinations in the absence of an Examiner of Masters and Mates.

Two orders in council, gazetted December 13, render valid in the United Kingdom, the other Dominions and the Colonies the sectional passes awarded for six months to candidates who pass only one section of the examination for Foreign Going Certificates of Competency in the Mercantile Marine. Similarly, by reciprocal arrangements, passes issued in these areas are now valid in Canada. The first order in council related only to the United Kingdom and was dated January 7, 1941. A second order, dated December 2, extended the arrangements to the other Dominions and the Colonies of the Empire.

Alberta Hours of Work Act

By Orders 21 and 21A, gazetted November 29, 1941, the Board of Industrial Relations has again extended, until October 31, 1942, the exemption from the weekly rest day and the 54-hour week of all cooks, cookees, bull cooks, night watchmen and barn bosses in the lumbering, logging and railway tie industries operating more than 10 miles from a city, or in a centre of less than 1,000 population. (LABOUR GAZETTE, June, 1941, p. 651.)

Manitoba Factories Act

New safety regulations for the dry cleaning, dyeing and cleaning business in Manitoba were gazetted December 27, retrospective to December 1, 1941.

Permits must be obtained from the Department of Labour before dry cleaning and dyeing can be undertaken on any premises. Applications for a permit must include a detailed plan of the premises which should be constructed and equipped in accordance with specifications set forth in these regulations. The flash point and degree of toxicity of cleaning agents to be used must also be submitted. Permits, which must be renewed yearly, are granted after inspection by the Department of Labour, the fee for inspection

varying with the size of the plant and the cleaning agents used. Failure to comply with the regulations is a cause for cancellation of the permit and makes the operator liable to a fine up to $50, or imprisonment up to three months. Penalties up to $500 or 12 months' imprisonment are provided for the operation of a plant where the health and safety of the employees are endangered. Responsibility for minimizing the hazards of the industry and for educating the employees in safety measures is placed on the employer.

Plants with a capacity of less than 100 gallons of inflammable cleaning agent or using non-inflammable but toxic or injurious agents may, at the discretion of the Minister of Labour, be exempted from the construction and equipment requirements. In no plant may a cleaning solvent with a flash point lower than 100 degrees F. be used.

The construction requirements for dry-cleaning or dyeing rooms call for fire-proof construction, the provision of at least two exits, and separation from the rest of the building and from other buildings. Windows and skylights must be built with wired glass to act as vents for possible explosions. As few openings as possible in the walls for machinery are recommended and adequate safeguards against the spreading of fires must be provided. An approved system of ventilation shall be installed. Non-ferrous metal is to be used in the construction of exhaust fans.

The equipment requirements forbid the use of any machines or engines unless approved by the local board of fire underwriters. Electrical equipment must be so installed and protected as to minimize any possibility of fire from this source. Steam pipes and a hand fire extinguisher should be provided. A humidifying system to maintain a 40 per cent saturated atmosphere is also required. Tanks in which inflammable agents are kept must be of special construction, and all except those for clarifying or refining purposes, are to be located three feet underground outside the plant.

In plants using toxic or injurious agents, machines must be so constructed as to prevent the escape of fumes.

Operation requirements for plants using inflammable or explosive agents forbid the use of open vessels or electric irons in the cleaning and dyeing rooms. Electric irons must be of a type approved by the Western Canada Fire Underwriters Association and must have incombustible stands. Drying on dust wheels may be done indoors only if exhaust fans of sufficient capacity to carry away gases and fumes are installed. All inflammable liquid must be kept in storage tanks when not in use. Smoking and carrying of matches on the premises are forbidden.

Quebec Minimum Wage Act

Renewals of three orders were gazetted December 20. Order 4, covering industries to which special orders do not apply (LABOUR GAZETTE, 1938, p. 512) is renewed until April 1, 1942. Order 22 revised, which deals with the manufacturing of bricks and building blocks (LABOUR GAZETTE, 1940. p. 22) is renewed until February 1, 1943. Order 34 which applies to the ice industry and trading in the city and district of Quebec (LABOUR GAZETTE, 1939, p. 1233) is renewed until January 1, 1943.

On January 10 were gazetted orders repealing Order 41 setting rates for shoe repairers in Montreal, and also amendments in 13 other orders which had provided for a 10 per cent increase in minimum rates in specified districts for stationary enginemen, in foundries, brickyards, food shops (Quebec), laundries and in the following industries: shoe counters, dairies, waste paper, glass containers, full-fashioned hosiery, tailoring and dressmaking, mattresses, and ice. (LABOUR GAZETTE, 1941, November, p. 1383; December, p. 1503.)

An amendment in By-law B-1 revised (LABOUR GAZETTE, January, 1941, p. 31), gazetted December 20, reduces the levy on employers subject to any minimum wage orders from one-fifth to one-sixth of one per cent of the wages paid to their employees. The new rate applies to the assessment payable on January 1, 1942.

Saskatchewan Minimum Wage Act

Order No. 9, gazetted December 31 and effective January 19, 1942, is the first minimum wage order applying to lumbering and related operations since the Minimum Wage Act was extended to these industries on December 17 (LABOUR GAZETTE, December, 1941, p. 1504). The order fixes a minimum hourly rate of 30 cents. Employees are to be paid for waiting time on the job and for time consumed in travelling from the employers' premises to the place of work. A maximum of 85 cents a day may be deducted for three meals and lodging if these are included in the wage contract. The order applies to employees in lumbering, logging, river driving, rafting, booming, the operation of saw mills, shingle mills, lath mills and the cutting, hewing and manufacture of wooden railway ties, telephone poles, timbers and fence posts and the production of pulpwood, cordwood, boxwood, shingle bolts, shim wood and veneer wood in Saskatchewan. It also applies to workers in any building or place where such businesses are carried on.

WAR EMERGENCY TRAINING PROGRAM

Statistical Summary for December, 1941

REPORTS from the 108 technical and vocational schools and training centres in which War Emergency Training was in progress in December indicate that at the end of that month the total number in training was 14,059. The highest previous total was that of November when 13,629 were reported in the classes.

The number in pre-employment industrial classes at the end of December was 4,433 and there were 1,025 in the part-time (evening) classes conducted at the request of certain employers in war production with the object of up-grading selected employees. There were 4,370 in the pre-enlistment R.C.A.F. classes at the year end and the number of navy and army tradesmen and mechanics in training was 4,231.

At December 1 there were 4,585 in the industrial pre-employment classes, 1,035 in the part-time classes, 4,009 in the R.C.A.F. classes, and 3,997 in the navy and army classes. During December, 2,474 new trainees were enrolled in pre-employment classes, 229 were added to the numbers in the part-time classes for employed persons, 1,283 entered the R.C.A.F. classes, and 1,311 enlisted men were referred to the classes by the Navy and Army.

From the pre-employment classes, 1,919 were placed in employment during December, while 25 from these classes enlisted in various units of the armed forces. From the R.C.A.F. classes, 760 men were enlisted in the air force in December.

Explanation of Tables

Table 1 shows by provinces the numbers in training at December 1, 1941, the numbers enrolled during the month of December, the numbers placed in employment, enlisted, etc., in the month, and the numbers in training at the end of the month, with a separation being made of those in pre-employment, part-time classes, R.C.A.F. classes, and Navy and Army classes. The table also shows the numbers in training, etc., in the first nine months of the current fiscal year.

In Table 2 the numbers in training at the end of December are shown by provinces and schools with the main trade categories of training provided in the pre-employment classes being given. The numbers who were placed, enlisted, or who withdrew from the pre-employment or R.C.A.F. classes are also shown for each school.

An age classification of new trainees enrolled in pre-employment classes since April 1, 1941, and in the month of December is supplied in Table 3. Veterans of the 1914-18 war and discharged soldiers of the present war are included in Table 3, but these are also shown separately in Table 4. Table 5 is a classification by main trade categories of those who were in training as navy and army tradesmen and mechanics at the end of December.

Summary of Training in 1941

From January 1, 1941, when Canada's War Emergency Training Program was revised and expanded, to December 31, 1941, the total number provided training was 62,102. Of these, 32,612 were in pre-employment industrial classes, 1,961 were in part-time classes for employed persons, 11,779 were in the pre-enlistment R.C.A.F. classes, and 15,750 were in the Navy and Army classes. Graduates of the pre-employment classes who were placed in employment numbered 18,378, and 133 from the R.C.A.F. classes found employment in the aircraft industry. Enlistments from the pre-employment classes numbered 605 during the year, and 6,201 from the R.C.A.F. classes were enlisted in the air force. The numbers in training, placed in employment, and enlisted by provinces during the year 1941, were as follows:—

ACTIVITIES OF UNEMPLOYMENT INSURANCE COMMISSION

Extension of Unemployment Insurance—Commencement of Benefit Payments—Claims and Benefits Instruction School—Insurance Registration—Unemployment Insurance Fund—Report of Employment and Claims Offices—Employment Conditions at the end of December.

AN Order in Council (P.C. 10156) was passed on January 7, under the War Measures Act enlarging temporarily the provision of the Unemployment Insurance Act which excludes persons who are receiving remuneration amounting to more than $2,000 per annum.

Numerous representations have been made to the Unemployment Commission, requesting the provision of unemployment insurance for persons excepted as a result of the $2,000 limit. It was pointed out, that the war situation has appreciably increased the remuneration of many persons normally earning less than $2,000 per annum. Longer working hours, overtime, cost of living bonuses, higher rates of remuneration, or other similar causes, have operated in such a manner as to exclude many persons from insurance. As a consequence, they, and their employers on their behalf, do not contribute to the Unemployment Insurance Fund.

Under the Order in Council, the Unemployment Insurance Advisory Committee is directed to investigate and report upon the provision of unemployment insurance for all or part of the employments excepted by the paragraph of the schedule fixing the $2,000 limit. As some time must elapse before this investigation can be completed however, the Order provides that persons who are in insurable employment but disqualified because of the $2,000 limit will be insured under certain conditions.

The text of the Order follows:

Whereas the Minister of Labour reports that he is informed by the Unemployment Insurance Commission:

That pursuant to the provisions of Section 13 of The Unemployment Insurance Act, 1940, chapter 44 of the Statutes of Canada, 1940, persons who would otherwise be insured against unemployment in the manner provided by that Act are not so insured when *inter alia* they are employed in an

> "Employment at the rate of remuneration exceeding in value two thousand dollars a year or in cases where employment involves part time service only, at a rate of remuneration which, in the opinion of the Commission, is equivalent to a rate of remuneration exceeding two thousand dollars a year for full time service."
>
> (Item (n) of Part II of the First Schedule to the said Act.)

That numerous representations have been made to the Commission requesting the provision of unemployment insurance for persons excepted by the provisions of the said item (n).

That by reason of the existence of war the situation has been greatly aggravated and there are many persons whose employment in peace time would be at a rate of remuneration not exceeding in value two thousand dollars a year but whose rate of remuneration, owing to the existence of war, now exceeds in value two thousand dollars a year because of longer working hours, overtime, cost of living bonuses, or higher rates of remuneration, or other similar causes, and that such persons are excluded from insurance under Part II of the Act and they and their employers, on their behalf, do not contribute to the Unemployment Insurance Fund.

That it is therefore advisable that pursuant to the provisions of Section 86 of the Unemployment Insurance Act, the Unemployment Insurance Advisory Committee be directed to investigate and report upon the provision of unemployment insurance for all or part of the employments excepted from the operation of Part II of the Act by the said item (n) of Part II of the First Schedule by extending thereto the provisions of Part II of the Act.

That some time must elapse before the said Committee can investigate and report on the matter and since, in the meantime, many workers, by reason of the higher earnings resulting from full war employment, will be excluded from the operations of the Act and will not be required to make contributions under the said Act, it is therefore advisable for the peace, order and welfare of Canada that any person whose employment is described by Part I of the First Schedule to the Unemployment Insurance Act, and by item (n) of Part II of that Schedule, but by no other item in Part II, be insured against unemployment in the manner provided by the said Act

> (i) if his rate of remuneration exceeds in value two thousand dollars a year by reason of the payment of a cost of living bonus, or
>
> (ii) if, in the case of any person paid on an hourly basis, the basic rate of remuneration does not exceed ninety cents per hour, or
>
> (iii) if the rate of remuneration exceeds in value two thousand dollars a year by reason of an increase in working hours or overtime caused by changed industrial conditions resulting from the war, or
>
> (iv) if his remuneration exceeds in value two thousand dollars a year by reason of an increase in basic wage rates which has come into effect since June 30th, 1941, or
>
> (v) if his rate of remuneration exceeds in value two thousand dollars a year for any reason which in the opinion of the Unemployment Insurance Commission is a result of the war.

That by reason of the urgency of this problem the Commission has discussed the matter with the Unemployment Insurance Advisory Committee at a special meeting of that Committee and the said Committee concurs in the statements contained in paragraphs four and five herein.

Now, therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour and pursuant to the provisions of Section 86 of the Unemployment

Insurance Act, 1940, is pleased to direct and doth hereby direct the Unemployment Insurance Advisory Committee to investigate and report upon the provision of unemployment insurance for all or part of the employments excepted from the peration of Part II of the said Act by item (*n*) of Part II of the First Schedule to the said Act by extending thereto the provisions of Part II of the said Act, and

His Excellency in Council, on the same recommendation and under the authority of the War Measures Act, chapter 206 of the Revised Statutes of Canada, 1927, is pleased to order and doth hereby order that persons whose employment is described by Part I of the First Schedule to The Unemployment Insurance Act, and by item (n) of Part II of that Schedule, but by no other item in Part II, be insured against unemployment in the manner provided by the said Act

(i) if their rate of remuneration exceeds in value two thousand dollars a year by reason of the payment of a cost of living bonus, or

(ii) if, in the case of persons paid on an hourly basis, the basic rate of remuneration does not exceed ninety cents per hour, or

(iii) if the rate of remuneration exceeds in value two thousand dollars a year by reason of an increase in working hours or overtime caused by changed industrial conditions resulting from the state of war, or

(iv) if their remuneration exceeds in value two thousand dollars a year by reason of an increase in basic wage rates which have come into effect since June 30th, 1941, or

(v) if their rate of remuneration exceeds in value two thousand dollars a year for any reason which in the opinion of the Unemployment Insurance Commission is a result of the state of war now existing.

Insured Workers Eligible for Benefit

Another milestone in the Unemployment Insurance Plan was passed during the latter part of January when some insured workers became eligible for benefit. Under the Unemployment Insurance Act a worker is required to have paid at least 30 weekly (or 180 daily) contributions while in insurable employment during the two years preceding the date on which his claim for benefit is made, in order to be eligible. As contributions under the Plan started on July 1, 1941, workers who contributed consistently were in a position, if unemployed, to claim benefit at the end of January.

As a first step in training its field staff on benefit procedures under the Act, the Unemployment Insurance Commission held a school of instruction at Ottawa for four days, starting January 5 and running until January 8 inclusive. The main purpose of the Ottawa school was to instruct regional superintendents and key members of their staffs who then were able to return and act as instructors in regional schools to be held throughout Canada. Approximately 25 members of the field staff of the Commission attended the Ottawa school. Regional schools opened on Monday, January 12.

The Ottawa school opened with brief addresses by R. J. Tallon and Allan M. Mitchell, members of the Unemployment Insurance Commission. Owing to illness, the Acting Chairman of the Commission, A. MacNamara, was unable to be present at the opening or during subsequent sessions of the school. Dr. Allon Peebles, Executive Director for the Unemployment Insurance Commission, outlined the insurance procedure in general, after which chiefs of the various divisions dealt with different phases of procedures to be followed in connection with the payment of benefits. Division of the school into two panels on the third day, enabled those present to concentrate on subjects which were of particular significance in their own field.

A number of senior officers on the staff at Ottawa also attended regional schools in different parts of Canada and assisted in the work of instruction. Canada is divided into five regions under the Plan, the first embracing the Maritime Provinces, the second Quebec, the third Ontario to the head of the lakes, the fourth the remainder of Ontario, the three prairie provinces, and a part of northern British Columbia, and the fifth the remainder of British Columbia. As payment of benefits commences in all sections of Canada simultaneously, it was necessary to have the machinery in operating condition throughout the Dominion.

W. K. Rutherford, Employment Adviser, acted as chairman of the Ottawa school, and among those participating in the Ottawa schools as well as, in some cases, in the regional schools were George Barclay, Chief Insurance Officer, V. C. Phelan, Chief Employment Officer, Major H. S. Relph, Chief Reviewing Officer, Eric Stangroom, Chief Inspector of Insurance Revenue, A. A. Heaps, Registrar to the Umpire, H. C. Hudson, Supervisor of Placement Operations, H. F. Caloren, Treasury Officer, O. J. Shaw, Head Clerk in Charge of Registration, and T. R. Walsh, of the Unemployment Insurance Commission staff. A. D. Watson, Dominion Actuary of the Department of Insurance, also addressed the school.

Insurance Registration

Reports from the district offices of the Unemployment Insurance Commission show that 149,185 employers have registered throughout Canada, and that they have requisitioned 2,922,701 insurance books for their employees.

A progress report of registration of employers and employees on December 31, 1941, contained the following figures:—

Region	Employers Registered	Books Requisitioned
British Columbia	13,038	231,726
Prairies	29,113	417,107
Ontario	57,425	1,193,375
Quebec	38,377	855,945
Maritimes	11,232	224,548
Total	149,185	2,922,701

Unemployment Insurance Fund

On December 31, 1941, the Unemployment Insurance Fund had received a total of $24,727,736.69 from contributions made since the beginning of July, 1941, when the Unemployment Insurance Act went into effect. Employer and employee contributions were made by bulk payment, meter credits and the purchase of Unemployment Insurance stamps. The Dominion Government adds its share of 20 per cent to the total employer-employee contributions.

STATEMENT OF RECEIPTS TO DECEMBER 31, 1941

Unemployment Insurance Stamps	$12,733,870 60
Meter Credits	3,344,872 72
Bulk Payments	4,381,312 03
Government's Contribution	4,089,917 07
Interest on Investments	177,720 00
Miscellaneous Receipts	44 27
Total Receipts	$24,727,736 69

Up to December 31, 1941, the Unemployment Insurance Commission, with the authorization of the Investment Committee, has invested $23,826,133.89 in bonds of the Dominion of Canada.

Report of Employment and Claims Offices for November, 1941

A loss of nearly 11 per cent was recorded in the average daily placements effected by offices of the Unemployment Insurance Commission during November, 1941, when compared with those of the preceding month; likewise a decline of almost 2 per cent was shown in comparison with the work reported by offices of the Employment Service of Canada in November a year ago. In the first instance, all groups, except manufacturing and logging, recorded fewer placements, the greatest losses being those in services, construction and maintenance and farming, with others of lesser importance in mining, transportation and trade. Under the second comparison a very heavy reduction was shown in construction and maintenance, followed by one of more moderate proportions in farming, with nominal losses in mining and transportation, but these decreases more than counter-balanced the gains shown in manufacturing, logging, services and trade. The first named was comparatively substantial in volume.

The accompanying chart shows the trend of employment since January, 1939, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. From the graph it will be seen that the curve of vacancies in relation to applications showed a slight upward tendency during the first half of November, followed by a downward course during the second half, while that of applications was downward throughout the entire month. The ratio of vacancies to each 100 applications was 68·4 during the first half and 66·6 during the second half of November, 1941, in contrast with the ratios of 52·4 and 54·8 during the corresponding periods of 1940. The ratios of placements for each 100 applications during the periods under review were 63·0 and 61·3, as compared with 49·8 and 52·2 during the corresponding month of 1940.

The average number of vacancies reported daily by employers to the offices of the Commission throughout Canada during November, 1941, was 1,810, as compared with 1,966 during the preceding month and with 1,779 in November a year ago.

The average number of applications for employment received daily by the offices during the month under review was 2,681, in comparison with 2,804 in October, 1941, and with 3,319 during November, 1940.

The average number of placements made daily by the offices of the Commission during November, 1941, was 1,667, of which 1,104 were in regular employment and 563 in work of one week's duration or less, as compared with a total daily average of 1,870 during the preceding month. Placements in November a year ago averaged 1,694 daily, consisting of 1,141 placements in regular and 553 in casual employment.

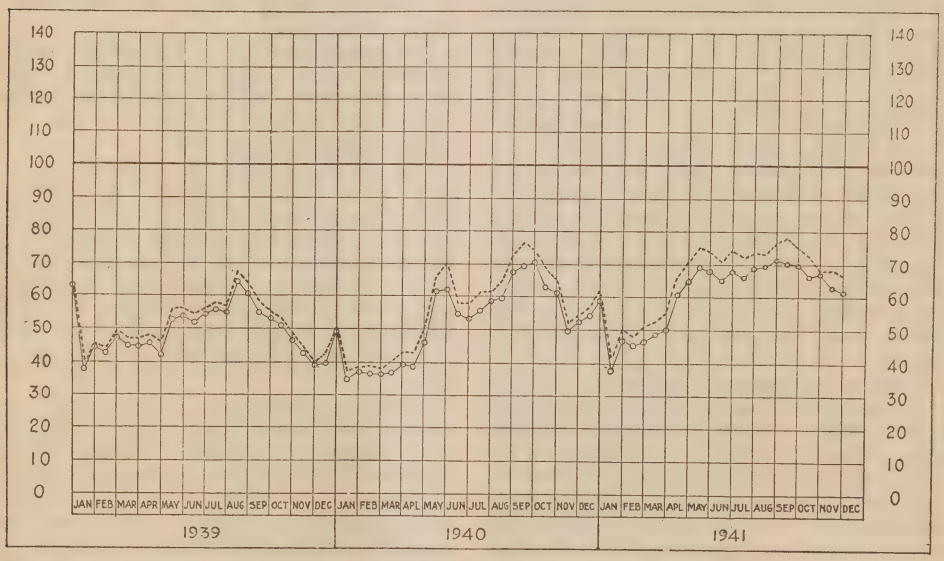
During the month of November, 1941, the offices of the Commission referred 40,492 persons to vacancies and effected a total of 39,997 placements. Of these, the placements in regular employment were 26,481, of which 20,344 were of men and 6,137 of women, while placements in casual work totalled 13,516. The number of vacancies reported by employers was 26,730 for men and 16,709 for women, a total of 43,439, while applications for work numbered 64,324, of which 42,951 were from men and 21,373 from women. Reports for October, 1941, showed 51,098 positions available, 72,897 applications made and 48,599 placements effected, while in November, 1940, there were recorded 44,451 vacancies, 82,793 applications for work and 42,326 placements in regular and casual employment.

42360—6

The following table gives the placements effected by employment offices, each year, from January, 1931, to date:—

Year	Placements		
	Regular	Casual	Totals
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939	242,962	141,920	384,882
1940	320,090	155,016	475,106
1941 (11 months)	292,902	176,918	469,820

Nova Scotia



During November, positions offered through Employment and Claims Offices in Nova Scotia were over 4 per cent fewer than in the preceding month and over 27 per cent below those of the corresponding month of the previous year. There was a decrease in placements of over 2 per cent when compared with October and of over 28 per cent in comparison with November, 1940. The large decrease in placements from November a year ago was due to a decline in the building division of construction and maintenance. This loss was partly offset by fairly important gains in manufacturing and services. Changes in all other groups were quite small. Placements by industrial divisions included manufacturing 397; logging 114; construction and maintenance 574; trade 64 and services 1,366, of which 1,102 were of household workers. During the month 1,047 men and 106 women were placed in regular employment.

New Brunswick

There was a decrease of over 21 per cent in the number of positions offered through employment offices in New Brunswick during November when compared with the preceding month and of over 18 per cent in comparison with November, 1940. There was a decline also in placements of 27 per cent when compared with October and over 29 per cent in comparison with November of the previous year. A fairly large decrease in services and smaller losses in construction and maintenance, logging and transportation accounted for the decline in placements from November, 1940, as the changes in all other groups were nominal only. Industrial divisions in which most of the placements were effected during the month were: Manufacturing 44; logging 39; construction and maintenance 112, trade 45 and services 573, of which 247 were of household workers. Regular placements numbered 163 of men and 84 of women.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications———— Vacancies - - - - - - - - - Placements—o—o—o—o—o—o

Quebec

Orders received at the employment offices in the Province of Quebec during November

called for nearly 14 per cent fewer workers than in the preceding month, but for 4 per cent more than during the corresponding month of the previous year. There was a decrease of nearly 17 per cent when compared with October, but an increase of nearly 6 per cent in comparison with November a year ago. Placements in the manufacturing industries and in services were considerably higher than during November, 1940, but these increases were largely offset by a substantial decline in construction and maintenance and a smaller loss in logging. The changes in other groups were unimportant. Placements by industrial divisions included manufacturing 1,967; logging 2,920; transportation 1,004; construction and maintenance 1,834; trade 195 and services 5,400, of which 4,775 were of household workers. There were 6,775 men and 2,452 women placed in regular employment.

ONTARIO

Employment opportunities, as indicated by orders received at employment offices in Ontario during November, were nearly 9 per cent fewer than in the preceding month and nearly 2 per cent below those of the corresponding month of the previous year. There was a decrease of 14 per cent in placements when compared with October and of over 11 per cent in comparison with November, 1940. Although the decrease in placements from November a year ago was not large, there was considerable variation by industrial groups, the most important of which were declines in construction and maintenance, services and farming and increases in manufacturing, trade and transportation. Placements by industrial divisions included manufacturing 3,273; logging 1,766; farming 330; transportation 557; construction and maintenance 2,608; trade 628 and services 3,958, of which 2,474 were of household workers. During the month 6,742 men and 2,134 women were placed in regular employment.

MANITOBA

Positions offered through employment offices in Manitoba during November were over 34 per cent fewer than in the preceding month and nearly 18 per cent below those in the corresponding month of the previous year. There was a decrease of over 16 per cent in placements when compared with October, but an increase of over 10 per cent when compared with November, 1940. When comparing placements by industrial groups during the month under review with November a year ago, declines were recorded in construction and maintenance and farming, but these losses were more than offset by gains in logging, manufacturing, services and trade. Industrial divisions in which most of the placements were effected during the month were manufacturing 598; logging 1,030; farming 257; construction and maintenance 127; trade 89 and services 933, of which 597 were of household workers. During the month 1,976 men and 321 women were placed in regular employment.

SASKATCHEWAN

Employment and Claims Offices in Saskatchewan received orders for nearly 27 per cent fewer workers than in the preceding month, but nearly 7 per cent more than in the corresponding month of the previous year. There was a decrease of 26 per cent in placements when compared with October, but an increase of over 9 per cent in comparison with November, 1940. Placements by industrial groups showed small variation from November a year ago, the largest changes being gains in logging and services and a decline in farming. Placements by industrial divisions included logging 267; farming 242; construction and maintenance 328 and services 837, of which 528 were of household workers. Placements in regular employment numbered 803 of men and 319 of women.

ALBERTA

During November, orders received at employment offices in Alberta called for nearly 32 per cent fewer workers than in the preceding month, but over 13 per cent more than during the corresponding month of last year. There was a decrease of 36 per cent in placements when compared with October, but an increase of nearly 2 per cent in comparison with November, 1940. Placements showed a fairly large increase in logging over November a year ago, but this improvement was almost entirely offset by declines in nearly all other groups, the most important of which were in farming, construction and maintenance and services. Industrial divisions in which most of the placements were effected during the month were manufacturing 146; logging 791; farming 398; construction and maintenance 158 and services 777, of which 490 were of household workers. During the month 1,548 men and 407 women were placed in regular employment.

BRITISH COLUMBIA

There was a decrease of nearly 14 per cent in the number of positions offered through employment offices in British Columbia during November when compared with the preceding month and of over 3 per cent in comparison with the corresponding month of the previous year. Placements were nearly 25 per cent fewer than in October and nearly 16 per cent below November, 1940. Manufacturing was the only industrial group in which there was an important placement gain over November

a year ago and this increase was more than offset by declines in construction and maintenance and services. The changes in all other groups were unimportant. Placements by industrial divisions included manufacturing 818; transportation 101; construction and maintenance 531 and services 1,123, of which 799 were of household workers. There were 1,290 men and 314 women placed in regular employment.

Movement of Labour

During the month of November, 1941, the offices of the Unemployment Insurance Commission effected 26,481 placements in regular employment, 13,309 of which were for persons for whom the employment located was outside the immediate district of the offices at which they were registered. Of the latter, 2,451 were granted the reduced transportation rate, 1,074 proceeding to centres within the same province as the despatching office and 1,377 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the employment offices, who may desire to travel to distant employment for which no workers are available locally.

In the province of Quebec there were issued 356 certificates at the reduced rate, of which 123 were provincial and 233 interprovincial, all but one voucher in the entire number, that for a steel sharpener despatched by Val d'Or to Chicoutimi, being secured by workers for the logging industry. In the provincial group, La Tuque received 119 bushmen from Montreal, 2 bushmen from Thetford Mines and one cook from Quebec. Under the interprovincial division, bushmen were despatched as follows: by Hull, 5 to Sault Ste. Marie, 44 to Pembroke, 48 to Sudbury and 2 to Port Arthur; by Montreal, 119 to Sault Ste. Marie and by Quebec, 15 to Timmins. The movement in Ontario which was provincial, with the exception of one toolmaker and one machinist sent from Toronto to Montreal, consisted of the transfer of 590 persons sent as follows: to points within same zone as the despatching office, Fort William was responsible for the shipment of 68 bushmen and 2 truck drivers; Port Arthur, 347 bushmen, 8 cooks, 5 truck drivers, 4 cookees, 4 blacksmiths, 3 domestics, 3 tractor operators, one jackhammer man and 61 labourers for Hydro Electric and highway construction and Sudbury, 37 bushmen, one cook, one cookee and one saw filer. From North Bay proceeded 27 bushmen and one clerk to Timmins, 10 bushmen to Sudbury and 4 bushmen to Sault Ste. Marie, while Pembroke transferred to Fort William 2 foremen for road construction. The Manitoba offices assisted in the forwarding of 759 workers, of whom 6 went to provincial centres and 753 to interprovincial. Of those sent to points within the jurisdiction of the despatching office, 3 pulp and paper mill labourers proceeded from Dauphin and 2 bushmen and one farm hand from Winnipeg. Interprovincially, from Dauphin to Port Arthur journeyed 3 pulp and paper mill labourers and from Winnipeg to Port Arthur, 664 bushmen, 14 cookees, 4 cooks, 2 blacksmiths, 2 carpenters, and one truck driver, one machine helper and 22 labourers for hydro construction; to Fort William 30 bushmen;

to Sudbury, one miner and to Yorkton 9 bushmen. Vouchers for reduced transportation were granted in Saskatchewan to 63 persons going to provincial employment and 366 to interprovincial. Nearly all provincial transfers emanated from Regina and were for bushmen, 44 travelling to Swift Current, 16 to Saskatoon and one to Yorkton, while Saskatoon sent to Prince Albert one cook and one bushman. Of the persons proceeding to interprovincial points, Regina shipped 344 bushmen to Timmins, 21 bushmen to Winnipeg and one riveter to Victoria. Alberta certificates were 312 in number, 289 provincial and 23 interprovincial. To points within its own zone, Calgary transferred one farm hand, and Edmonton, 259 bushmen, 4 cooks, 4 miners, 3 cookees, 3 blacksmiths, 3 saw filers, 3 waitresses, 2 labourers, one planerman, one engineer, one machinist, one timekeeper, one teamster and one farm hand. In addition, Edmonton sent one cook to Calgary. Of those workers bound for centres outside of Alberta, Calgary forwarded one mechanic to Fort William, one riveter and one iron worker to Vancouver, one rivet heater to Victoria and one lumber piler to Kamloops, and Edmonton sent to Kenora 3 bushmen and to Prince George 11 bushmen, 3 cooks and one blacksmith. Taking advantage of the reduced fare in British Columbia, one cook and one engineer secured certificates at Vancouver for points within that zone and one bush worker also was carried at the special rate from the same office to Kamloops.

Of the 2,451 workers who profited by the reduced transportation rate during November, 1,755 were conveyed by the Canadian National Railways, 667 by the Canadian Pacific Railway, 28 by the Temiskaming and Northern Ontario Railway and one by the Pacific Great Eastern Railway.

Employment Conditions at the End of December

An earlier section of this report deals with the activities of Employment and Claims offices during the month of November, together with statistical summaries for that period. Later reports received from these offices indicate that conditions at the end of December were as follows:—

Farming operations in the Maritime Provinces were chiefly confined to chores and odd jobs. In the face of the heavy demand for turkeys, shipments were smaller than expected, but adequate and of good quality, so that no stock had to be held over in cold storage. The enlistment of fishermen, port work and war industry reduced the number of men available for the fishing industry; this, together with storms, resulted in a scarcity of fish. Weather conditions, likewise, were not favourable for extensive logging operations, but, apart from pulpwood cutters, camps seemed well supplied with help; nearly all small lumber mills were operating steadily. Coal mines in the New Glasgow area operated 3 to 4 days per week, while those in Cape Breton and vicinity worked 2 to 6 days. All manufacturing plants, except canneries and evaporators which were experiencing a seasonal slow down, operated on full time and no idleness was reported by the iron and steel industry. All construction was progressing well, skilled tradesmen and building labourers were in demand. Transportation was exceptionally heavy and trade, both wholesale and retail, the best it had been for many years. Numerous calls were received for domestics and char workers; applications from the former being scarce, but numerous placements were effected in casual employment.

In the province of Quebec the demand for lumbermen was very active, but labour so scarce that it was impossible to fill all orders. Production in the mining centres was high, although there was much shifting of employment as young men were called for military training. Activity in manufacturing was increasing and a greater output was noted, in spite of the lack of raw material in a few industries. Some building operations had decreased, owing to the colder weather but the industry, on the whole, remained very busy. Road, dam and bridge construction provided employment for several hundred men, while National Defence projects also absorbed many workers. Transportation was very heavy, except as Gaspé, where snow made the roads impassable. Commercial activity, especially at Montreal, was greatly increased by the holiday season; there, an all time high was reached in wholesale and retail trades. Orders in domestic service were very hard to fill, as there are numerous positions, but a scarcity of applicants.

Farming in Ontario was quiet; some orders were received, but experienced men were few. Activity in logging was extensively curtailed, owing to the holiday season, camps operating with skeleton staffs and greatly reduced production. To obtain pulpcutters for the many available vacancies is a difficult problem, as few applicants will take this type of work. Mining was steady, although no additional help was being taken on. Nearly all manufacturing concerns were very busy. There was not much call for unskilled help, but a shortage of skilled mechanics was reported. Textile, chemical, abrasive factories and all steel

companies, as well as moulding shops, were particularly active, however, the discontinuing of auto-part manufacturing will necessitate a readjustment in some plants, which will retard staff increases for a short period. Lay-offs of employees were reported by the rubber companies and some reductions of a temporary nature only, were made by firms engaged in the taking of inventory. Construction, though somewhat slacker than formerly, was still brisk, the employment of building tradesmen being on a higher level than for many years. Lack of materials slowed down work in some cases and in others, where men had been laid off, projects were nearing completion. Small crews only were retained for maintenance work on highways. Trade was exceedingly good and transportation heavy. The domestic situation remained unchanged, with numerous requests for cooks-general who were difficult to obtain, as many women preferred employment in war industries.

Little activity was reported in farming in the Prairie Provinces, part of this decline being due to the holiday season and part to the fact that in nearly all cases the men showed a marked preference for war work rather than for agriculture. Scarcity of bushmen also hampered the logging industry, transportation being paid by the companies in some instances, provided the men remained for two months' employment. Coal mining was somewhat less active during the milder weather, but oil drilling manifested considerable activity. Manufacturing, on the whole, was steady, although some lay-offs had been reported by concerns which had completed their contracts. Construction was slacker and highway work quiet. Transportation was very brisk and in trade a record turnover of holiday goods took place, greatly exceeding that of previous years. As elsewhere, throughout Canada, there was a shortage of capable domestics and inexperienced help was hard to place.

Applicants for farm work in British Columbia were fairly plentiful; this was largely due to their inability to secure employment in industrial plants, otherwise farm hands were scarce. Nearly all packing houses had closed down and fruit cold storage plants, with stocks, were operating with their usual crews. The majority of logging camps observed the holidays; sawmills likewise were slack, in some districts, having been shut down for repairs and annual overhaul. Mining was not so brisk and there was no call for labour. In the metal trades, however, there was a continued shortage of skilled machinists and floor moulders. Construction, though somewhat quieter, was steady. Shipyards were very busy, but it was almost impossible to secure highly skilled tradesmen. Longshoring was quiet. Trade was good. The holiday season exerted considerable influence on the labour situation, as a large number of persons found short periods of employment in stores and in the Post Office, over 400 men and 200 women having been placed at this work. In the domestic section, however, experienced household workers were very scarce.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA

Industrial Situation as Indicated in Reports of Employers, Trade Unions and Value of Building Permits

IN view of the transference of the functions of the Employment Service of Canada to the Unemployment Insurance Commission, information formerly presented in this article concerning applications, vacancies and placements made by the offices of the Employment Service will now be found in the preceding article entitled "Activities of Unemployment Insurance Commission", under the heading "Report of Employment and Claims Offices for the month of November 1941". In this section information is given concerning the number of applications for work, existing vacancies and the number of placements made through the Employment Claims Offices of the Unemployment Insurance Commission. The latest available information concerning the employment situation in Canada is also given in another section, under the heading "Employment Conditions at the end of December".

The accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting November 1, was 12,775, the employees on their payrolls numbering 1,676,193, compared with 1,658,248 (revised) in the preceding month.

The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for November was 2,107 having an aggregate

membership of 324,071 persons, 3·3 per cent of whom were without employment on December 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

Recorded in the concluding section of this article and indicative of the employment situation in the building trades are the detailed statistics compiled by the Dominion Bureau of Statistics each month showing the value of building permits granted and the value of building materials.

During November the total value of building permits granted in 57 of the larger municipalities was $8,573,689 compared with a total of $7,716,170 in November, 1940.

The Employment Situation at the Beginning of November, 1941, as Reported by Employers

There was a further expansion in industrial activity at the beginning of November, when the tenth successive increase in employment was reported by the firms furnishing monthly returns to the Dominion Bureau of Statistics. Although the gain was considerable, it was the smallest indicated in the period since March 1. The latest increase in employment was accompanied by the largest advance in the payrolls reported to the Bureau since the record of current earnings was commenced in March, 1941.

Employment at November 1 in the period since 1920 has shown an increase in nine and a decline in eleven years, the average change being a slight reduction. The advance at the date under review is, therefore, contra-seasonal. It was, however, smaller than the gain reported at November 1 in either 1939 or 1940; in those years, the advance at the beginning of November marked the close of a period of uninterrupted expansion extending in each case over seven months, rather than over ten months, as in 1941.

Statistics were received by the Bureau from 12,775 establishments whose staffs at November 1, 1941, aggregated 1,676,193; this was an increase of 17,945 persons, or 1·1 per cent, over their working forces at October 1. The crude index of employment (based on the 1926 average as 100) rose from 165·8 in the preceding month, to 167·6 at the beginning of November. This figure was over 20 per cent above the November 1, 1940, index of 139·2, heretofore the highest for that date.

As already stated, the average change at November 1 in preceding years has been a decline. The seasonally-corrected index at November 1, 1941, therefore advanced, rising from 157·7 at October 1, to 160·4 at the date under review. These two adjusted figures, like the corresponding crude index numbers, were the highest so far indicated in any month of the record.

With only one exception in the last twenty years, employment on the whole has shown curtailment between November 1 and December 1. The average loss at the latter date has approximated two per cent.

Manufacturing showed further important improvement, some 12,750 persons having been added to the forces of the co-operating factories between October 1 and November 1. The gains in the durable goods division were exceedingly large, particularly those in iron and steel. Pronounced seasonal curtailment in vegetable food factories resulted in a loss in the non-durable goods group as a whole. The general advance in manufacturing brought the index to a new high at November 1, when it stood at 187·6 per cent of the 1926 average; the October 1, 1941, figure had been 185·0, and that at November 1, 1940, was 144·6, previously the maximum for November in this record.

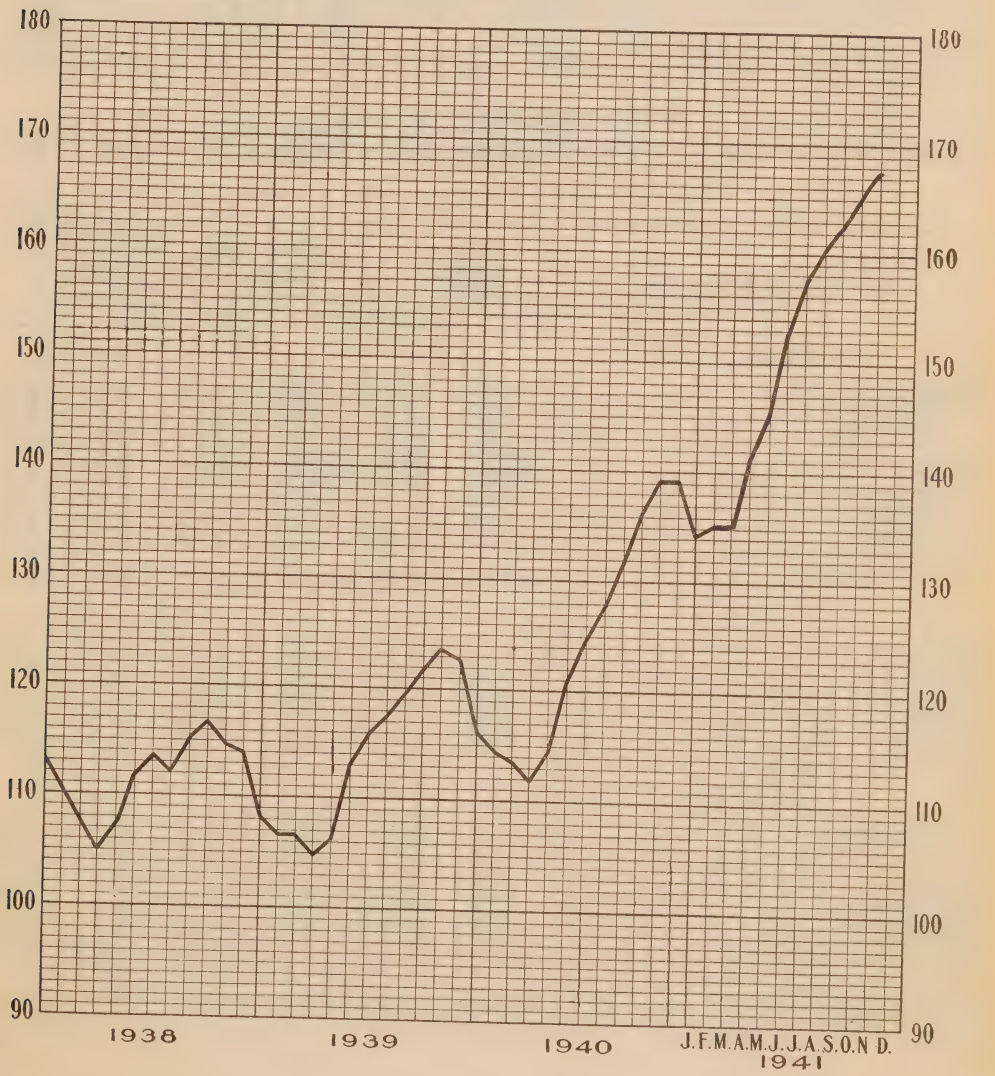
Among the non-manufacturing divisions, logging, mining, building and retail trade afforded greater employment. While the gain in logging at November 1, 1941, was important, it was not equal to that recorded at the beginning of November in any of the last few years; this was probably due to a shortage of labour in some sections of the country. Seasonal contractions were shown at the date under review in communications, transportation, highway and railway construction and maintenance and services.

A fuller analysis of the situation in the various industries as at November 1, 1941, follows the text dealing with conditions in the economic areas and the leading cities.

For November 1, 1940, 12,392 employers had reported staffs aggregating 1,364,720, an increase of some 28,500 persons, or 2·1 per cent, as compared with their October 1 returns. Manufacturing had then shown considerable gains, and improvement had also been noted in the non-manufacturing classes with the exception of steam railway operation and construction work.

In recent years of the record, the unadjusted indexes at November 1 have been as follows (1926=100):—1941, 167·6; 1940, 139·2; 1939, 123·6; 1938, 114·6 and 1937, 125·2. In 1929, when industrial employment on the

whole was at a higher level than in any other pre-war year, the November 1 figure had been 124·6.



The Course of Wartime Employment

In the first twenty-six months of the war, employment generally in the Dominion has shown an unprecedented rise, the all-industries index increasing from 119·6 at September 1, 1939, to 167·6 at the latest date, or by 40 per cent. This gain appears particularly impressive when compared with the growth of employment in previous years. Thus from 1931 to 1940, the general index rose by some 21 per cent, while the increase from 1921 to 1940 approximated 40 per cent.

It is estimated that the firms co-operating in the Bureau's current surveys of employment have added some 480,200 persons to their working forces since the outbreak of hostilities. The additional personnel required by the smaller establishments must also have been considerable, while the extension of working hours, together with more effective use of plant and equipment under the spur of necessity, have no doubt greatly increased the general productive capacity of workers in the Dominion.

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

The enlistment of large numbers of men of working ages in the various branches of the armed services and the ancillary forces since the outbreak of war makes the record even more impressive, and tends further to emphasize the changes in the industrial, the sex and the age distribution of wage-earners by which the growth of employment has been accompanied. No information is available at present respecting the sex and the age distributions, and that regarding the industrial distribution is incomplete.

Under present circumstances, the figures for the manufacturing industries are probably more significant than those for industry as a whole. Between September 1, 1939, and November 1, 1941, the number employed by the co-operating manufacturers increased by approximately 376,000. The index of employment in factories rose in this period by almost 63 per cent, a proportion greatly exceeding that of 24 per cent indicated from 1921 to 1930, and that of about 38 per cent in the decade from 1931 to 1940.

In the first twenty-six months of war, the index in the durable goods industries has advanced from 100·4 to 207·6 at November 1, or by nearly 107 per cent. Smaller, but also important has been the increase of 36 per cent in those engaged in the production of non-durable goods. At September 1, 1939, some 40 per cent of the workers reported in manufacturing were employed in the heavy industries, a proportion which had risen to over 50 per cent at November 1, 1941.

With the exception of construction, all branches of the non-manufacturing division have shown increases. These have been as follows:—mining, 10·1 per cent; communications, 14·5 per cent; transportation, 14·2 per cent; services, 14·5 per cent; trade 21·1 per cent and logging, 264·2 per cent. The large gain in logging is to a considerable extent seasonal in character. The seasonal factor is

NOTE.—The "Relative Weight" as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

also largely responsible for the decline of three per cent in construction in the period from September 1, 1939 to November 1, 1941; this took place wholly in highway and railway work, building showing a gain of 108 per cent in the twenty-six months.

The expansion in employment since the outbreak of war has extended in greater or less degree to all parts of the country. The gains vary from that of 19·4 per cent in the Prairie Provinces and 28·1 per cent in British Columbia, to 49·1 per cent in Ontario, and 54·3 per cent in the Maritime Provinces.

Firms in the eight leading cities whose statistics are regularly segregated have also shown important advances; in each case, this has exceeded that noted in the province in which the city is situated. The increase in activity in the first twenty-six months of war has raised the index by 35·6 per cent in Winnipeg, and by 39·1 per cent in Vancouver; the improvement in the other six centres has been even more impressive, the gains ranging from that of 44·7 per cent in Montreal, to 74·6 per cent in Hamilton and 112·4 per cent in Windsor. The concentration of the heavy industries in the last two municipalities is responsible for the unusually great expansion therein.

Statistics of Earnings

The results of the eighth tabulation of statistics of weekly earnings as reported by establishments ordinarily employing 15 persons and over, are contained in the present report. The figures are preliminary.

The 1,676,193 men and women employed at November 1 by the 12,775 establishments furnishing information to the Dominion Bureau of Statistics were paid $45,279,584 for services they rendered in the final week in October. In their last report, these establishments had indicated a staff of 1,658,248 employees, whose earnings in the period of observation in September had amounted to $43,717,942. Thus a gain of 17,945 or 1·1 per cent, in the number of employees was accompanied by an advance of $1,561,642, or 3·6 per cent in the aggregate payrolls.

The per capita average earnings continued to rise; the gain of 65 cents shown in the weekly pay envelope in October as compared with September was the largest reported in the brief experience of the payroll statistics. This is partly due to the fact that a number of more or less casual employees were laid off with the completion of seasonal work in certain industries. The payment of a cost of living bonus in many cases, and the raising

of such allowances in others also contributed to the result, while overtime work likewise continued as a factor in certain establishments. The average pay envelope of those on the staffs of the co-operating employers was $27.01 in the final week in October, as compared with $26.36 in September and $26.03 in August.

The last bulletin on employment and payrolls stated that the earnings of the 1,657,326 employees reported by the 12,720 establishments whose returns were then tabulated had amounted to $43,694,382 in the last week in September; the per capita average was $23.36. This average was not altered by the slight differences in the figures for some of the

TABLE III.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100).

[1] The relative weight shows the proportion of employees reported in the indicated industry, to the total number of employees reported in Canada by the firms making returns at the date under review.

provinces, cities and industries. These revisions were due to the inclusion of late returns and to the correction of errors in the reported information which became apparent by comparison with the statistics for pay periods in the succeeding months.

Pending the establishment of a more satisfactory basic period for an index number of earnings, the data furnished for the last week in May have been revised to serve as a starting point from which may be measured the current changes in the purchasing power distributed in payrolls by the establishments co-operating in the current surveys of employment and earnings. The employees of such firms constitute a large proportion of the total working forces engaged in industries other than agriculture in the Dominion. The presentation of the figures of earnings in the form of an index number gives a clearer picture of the situation than can be obtained from the use of the current aggregate or average per capita figures. The latter especially are affected very considerably by the dilution of labour which has been a marked feature of the situation in recent months.

The firms furnishing information for the first of November, as already stated, reported the disbursement of $45,279,584 in salaries and wages, as compared with $43,717,942 in the last week in September, while the payrolls that the same employers distributed to those on their staffs at June 1 for services rendered in the last week in May amounted to $38,373,951. An index number based upon this figure had, therefore, risen to 113·9 in the last week in September, and to 118·0 in the last week in October. The upward movement has been steadily maintained during the summer, the index of earnings in the period of observation in June being 104·6, in July, 107·5 and in August, 110·5. Meanwhile, an index number of employment recalculated on the comparable base, rose to 102·9 at July 1, 105·0 at August 1, 106·5 at September 1, 108·4 at October 1 and 109·7 at November 1. The increase in earnings distributed in the last six months has, therefore, considerably exceeded that in the numbers on the payrolls, in spite of the employment of increasingly large numbers of inexperienced workers who presumably are usually taken on at the lower rates of pay. This situation results of course from several factors. The growing concentration of workers in the highly-paid heavy industries, the extension of the system of paying wartime cost-of-living allowances, the increase in the amounts of such allowances, and the extensive use of overtime work, have contributed in varying degree to the growth in earnings, which is also probably seasonal in character.

Manufacturing.—The preliminary index numbers of payrolls in manufacturing show even greater gains than those in all industries, despite the employment of increasingly larger numbers of inexperienced workers; from 100 in the last week in May, the earnings of those employed in factories rose to 104·7 in June, to 108·4 in July, 112·0 in August, 116·6 in September, and 121·6 in the period of observation in October. Meanwhile, the index of employment on a comparable base, has risen to 111·7 at November 1. A comparison of these data with those prepared by the United States Bureau of Labor Statistics shows similar movements; from May 15 to November 15, the American index of payrolls in manufacturing advanced by 14·9 per cent and that of employment by 7·8 per cent.

The 975,544 persons employed at November 1 by the co-operating manufacturers throughout the Dominion were paid $26,916,095 for their services in the preceding week. The same firms had employed 962,797 persons at the beginning of October, and had disbursed $25,795,172 in earnings in the last week in September. The increase of 1·3 per cent in the number of employees was accompanied by that of 4·3 per cent in their aggregate earnings. The per capita average accordingly also showed a gain, rising from $26.79 in the last week in September to $27.59 in the last week in October.

There was a further important advance in the employment afforded in the durable goods division of manufacturing, and the earnings in this class also rose steeply; the increase in the former was 2·8 per cent, and that in the reported payrolls, 5·8 per cent. In the non-durable class, on the other hand, a reduction of 0·1 per cent in employment was accompanied by an increase of 2·7 per cent in the reported earnings. This situation was partly due to the fact that many of those laid off were seasonal employees, whose work was irregular; their earnings consequently being relatively low; however, the payment of higher cost-of-living allowances, together with other factors, contributed to the discrepancy shown in the number of employees and the reported earnings in the non-durable goods group.

The highest earnings in the manufacturing classes were again those reported in the production of miscellaneous non-metallic mineral products, largely petroleum products; those in the iron and steel, non-ferrous metal and pulp and paper industries were also unusually high. These classes employ a large proportion of males, and require many highly skilled and experienced workers.

In general, the lowest per capita averages were reported in the tobacco, leather and textile groups, in which considerable numbers of females are employed; not only are the earnings in these categories affected by the sex distribution, but also the age distribution of workers therein, since the women workers tend, in the main, to belong to the younger age groups. In considering the relative earnings, it must also be noted that the existence or the absence of overtime work is also a factor, while the employment of any considerable number of casual workers greatly affects the per capita earnings in any industry.

Logging.—In logging, there was a considerable increase in the number of employees reported, accompanied by a slightly smaller gain in the aggregate earnings; the disparity is due in general to the fact that those added to the working forces are usually taken on at the lower rates of pay, while it is also probable that many of the additional workers were not employed throughout the pay period reported. The per capita average showed a decline, falling from $18.88 in the last week in September, to $18.66 in the last week in October. It must again be mentioned that the figures of earnings given in this report make no allowance for the value of board and lodging, frequently a part of the remuneration of employees in logging camps.

Mining.—Employment in mining showed a gain of 1·5 per cent and there was an increase of 7·6 per cent in the aggregate earnings, probably due in part to seasonal causes. The statistics show that 86,989 persons were paid $3,047,946 for their services in the last week in October, a per capita figure of $35.04. The average per employee in the last week in September had been $33.06.

Communications.—In communications, there was a seasonal decrease of 1·5 per cent in the number employed, accompanied by a reduction of 1·8 per cent in the weekly earnings. The decline in the latter was to some extent due to the fact that the data for the period of observation in September had included the payment of a retroactive cost-of-living allowance by one large organization, which could not separate such payments from the statement of the current wages and salaries paid. The average pay envelope contained $27.30 in the period of observation in October, compared with $27.37 in the same week in September.

Transportation.—The transportation industries reported at November 1 an aggregate working force of 129,576 men and women, whose earnings in the preceding week amounted to $4,392,651. The former figure was lower by 1·3 per cent than that at October 1, but the reported earnings in the last week in October were higher by two per cent than those disbursed by the same employers in the final week in September. There was accordingly a large increase in the average earnings of the individual, which rose from $32.81 in the last week in September, to $33.90 in the same period in October.

Construction.—Construction, on the whole, was quieter, there being a loss of five per cent in the number of workers, and of 3·5 per cent in the reported earnings. There was a reduction in employment in the railway and the highway construction and maintenance group, but building showed an advance. The per capita earnings in the group as a whole rose from $23.65 in the last week in September, to $24.01 in the period of observation in October.

Services.—The service establishments furnishing returns showed a seasonal decline in the number of their employees, together with a moderate gain in the aggregate earnings reported. The contents of the average pay envelopes increased from $16.40 in September, to $16.75 in the last week in October. These averages are lower than in any other industrial group, partly because of considerable proportions of female and part-time workers, and partly because the earnings quoted exclude the value of board and lodging, in many cases a part of the remuneration of employees in hotels and restaurants. This group accounts for over 61 per cent of those in the service industry.

Trade.—In trade, there was a gain in the number of persons on the staffs, accompanied by a rather greater advance in the aggregate payrolls distributed; the former were higher by 1·6 per cent and the latter by 1·8 per cent. The reported per capita earnings, therefore, slightly increased, being $23.07 in the last week in October as compared with $23.02 in the last week in September.

Finance.—In the financial group, 63,252 men and women were reported to have earned $1,850,450 in the last week in October, a per capita average of $29.26. In the last return, their employees had aggregated 62,978, and their earnings, $1,829,831, an average of $29.06 per employee. The inclusion of the data for the financial organizations raises the general per capita figure of earnings in the Dominion to $27.09 in the last week in October, as compared with $26.46 in the same period in September.

Provincially.—A review of the data for the various provinces shows generally increased employment except in Prince Edward Island and British Columbia; in the former, a

decline was noted, while in the latter the situation, on the whole, showed little change. In all nine provinces, however, the aggregate earnings reported for the one week in October were greater than in the corresponding period in September. The average per capita earnings were therefore higher.

Employment and Earnings.—Table 1 gives preliminary data on employment and earnings for a number of industries in each of the five economic areas. The industrial groups included are those employing considerable numbers of persons; in those which appear in each of the economic areas, it is interesting to note the similarity in the levels of the average earnings, in relation to each other and also in relation to the general average in the same area. Thus, in iron and steel the reported earnings in each case were considerably above the average for manufacturing, being also higher than in most other classes of factory production, as well as exceeding the all-industries figure in the same area. The variation in the earnings of those employed in iron and steel manufacturing was from $28.96 in the Maritime Provinces in the last week in October and $30.72 in the Prairie Provinces, to $31.85 in Quebec, $32.27 in Ontario and $32.96 in British Columbia. The occurrence of varying proportions of overtime work contributes largely to the differences in many of the figures shown in the various areas.

Among the non-manufacturing industries, the lowest figures, in general, are those reported in logging and services, in both of which board and lodging frequently constitute part of the remuneration of employees; allowance is not made in these statistics for earnings in this form. In trade, the earnings in the last week in September varied from $20.35 in the Maritime Provinces to $24.11 in the Prairie Provinces, where the wholesale group employs an unusually large proportion of those engaged in trading establishments. In general, the earnings in the wholesale division are higher than those in retail establishments, in which the proportion of women workers is higher, as is also the proportion of part-time workers. In all cases, the earnings of those engaged in transportation are considerably above the average, and in most provinces, the earnings of those in mining are also relatively high.

Eight Leading Cities.—Employment and payrolls advanced in each of the eight cities for which information is separately compiled. The gains in the aggregate earnings ranged from those of 1·6 per cent in Hamilton and three per cent in Windsor, to those of 5·8 per cent in Ottawa and 6·6 per cent in Winnipeg. In Montreal, the reported payrolls rose by four per cent and in Toronto, by 3·7 per cent from the period of observation in September to that in October.

Except in Hamilton, the average per capita earnings in the cities were also greater in the last week in October than in September. In that city, however, the increase in employment was at a slightly higher rate than that in the reported payrolls; the per capita weekly earnings in October were $29.32, compared with $29.49 in September.

Employment By Economic Areas

Seven of the nine provinces shared, to a greater or less degree, in the upward movement indicated at November 1. The exceptions were Prince Edward Island and British Columbia; the former showed a general reduction due to curtailment in construction, while in the latter there was on the whole no change in the situation. The largest percentage gains were those of 3·9 and 4·6 in New Brunswick and Saskatchewan, respectively. Firms in Quebec reported the greatest number of additional employees, having taken on 9,239 extra workers; this was a gain of 1·8 per cent. The improvement in the provinces in which additions to staffs were reported resulted in most cases in the establishment of new, all-time high levels of industrial activity.

Maritime Provinces.—Increases in employment were recorded in Nova Scotia and New Brunswick, while the tendency was downward in Prince Edward Island. On the whole, there was a seasonal advance in the Maritime Provinces taken as a unit. Returns were received from 922 employers in this area with 134,363 men and women on their payrolls, as compared with 131,225 at the beginning of October. Manufacturing as a whole showed moderate improvement; additions to staffs were recorded in iron and steel and some other plants, but lumber and animal food factories were seasonably slacker. Among the non-manufacturing divisions, heightened activity was indicated in construction, mining and trade, and there were pronounced seasonal gains in logging camps.

Greater improvement had been recorded at November 1, 1940, by the 870 co-operating establishments, whose payrolls had included 99,526 men and women; the index was then many points lower than the latest figure of 179·6, the maximum to date.

Quebec.—Further important expansion was shown in Quebec, chiefly in logging and manufacturing. Building, steam railway operation, mining and retail trade also afforded rather more employment. On the other hand, there were losses in shipping, highway and railway

construction and maintenance, communications and services. Within the manufacturing group, the lumber and vegetable food divisions reported a seasonal falling-off; there were, however, moderate increases in rubber, beverage, clay, glass and stone and non-ferrous metal plants, together with large gains in chemical and iron and steel works.

The 3,196 employers furnishing returns enlarged their forces by 9,239 persons, bringing them to 516,492 at November 1. This increase, of 1·8 per cent brought the index to 177·1, a new all-time maximum. Activity was much greater than at November 1, 1940, although a considerably larger advance had then been indicated in the 3,112 reporting establishments, whose staffs had numbered 426,384.

Ontario.—The trend continued upward in Ontario, bringing employment generally in the province to a new high. The 5,525 firms whose data were tabulated reported 703,152 employees, or 3,253 more than in the preceding month. The average change from October to November in the twenty preceding years for which statistics are available has been a decline, so that the latest advance is contra-seasonal; it was, however, not equal to that recorded at the beginning of November in 1939 or 1940.

At the date under review, there were fairly large gains in logging as the camps gradually opened for the winter's operations; the difficulty of obtaining labour probably accounted for the fact that the increase was smaller than usual for the time of year. Metallic ore mining and trade showed moderate improvement from October 1, while there was further important expansion in manufacturing. This took place chiefly in iron and steel plants, which absorbed some 8,800 additional workers. Increased activity was also reported in the food, textile, chemical, non-ferrous metal, miscellaneous non-metallic mineral products and miscellaneous manufacturing divisions. Of these gains, those in chemical works were greatest. On the other hand, the vegetable food, beverage, electrical apparatus and lumber industries reported reductions in staffs, the seasonal losses in fruit and vegetable canneries being particularly marked. Transportation, construction and maintenance also released employees; the decline in the latter was considerable. The general index in Ontario at the latest date stood at 173·2, a new maximum; this figure was nearly 31 points higher than at November 1 of last year, when statistics had been received from 5,361 employers with 569,654 men and women on their paylists. The advance then indicated had been on a larger scale.

Prairie Provinces.—There were substantial increases in employment in Manitoba and Saskatchewan at November 1, 1941, together with a slight gain on the whole in Alberta. Returns were compiled from 1,795 firms in the Prairie Provinces, having 184,190 employees, as against 181,871 at October 1. Manufacturing, logging, coal-mining and building afforded more employment, while there were declines in communications, transportation and railway construction and maintenance. Most of the improvement in manufacturing took place in food, chemical and iron and steel factories. The expansion in the Prairie Area was contra-seasonal, the trend having been retrogressive at November 1 in thirteen of the twenty preceding years for which data are available. The index was higher than in any other month of the record, standing at 136·1, compared with 119·7 at November 1, 1940. Statements had then been tabulated from 1,751 establishments, employing 157,065 workers; this was an increase of 2,022 from their October 1, 1940 payrolls.

British Columbia.—No general change in employment was recorded in British Columbia; the staffs of the 1,338 employers furnishing returns aggregated 137,996, practically the same number as in the preceding month. There were increases on the whole in manufacturing, mining and retail trade. Transportation, construction and logging, however, were quieter. In the group of factory employment, there were important, seasonal reductions in food canneries; the lumber and non-ferrous metal groups were also quieter, On the other hand, pulp and paper, chemical and iron and steel plants were brisker, the gain in iron and steel works being substantial.

Employment generally was more active than at November 1 of last year, when 1,298 establishments had reported a total working force of 112,091 persons, compared with 113,423 in the preceding month. The index then stood at 126·3, as compared with 149·4 at November 1, 1941; the latter figure (the same as that at October 1) was higher than in any earlier month for which data are available.

Table 11 gives index numbers by economic areas.

Employment By Cities

Additions to staffs were recorded in each of the centres for which data are segregated, firms in Montreal, Quebec City, Toronto, Ottawa, Hamilton, Windsor, Winnipeg and Vancouver reporting heightened activity. The increases ranged from that of 0·6 per cent in Windsor to 2·6 per cent in Toronto and 3·7 per cent in Quebec City. The volume of employment in each of these eight cities was

greater than at the beginning of November of 1940, or indeed, than in any other month for which information has been tabulated.

Montreal.—Further improvement of a contra-seasonal nature took place in Montreal at November 1, when 3,834 persons were added to the payrolls of the 1,848 co-operating firms, who employed 239,957. Construction and manufacturing showed heightened activity. The increases in the latter took place mainly in iron and steel factories, but beverage, food and some other works also reported gains. On the other hand, shipping was quieter, and there was little general change in services and trade. An increase had also been noted at the same date of last year; the index was then many points lower than that of 158·2 at the latest date, when a new maximum was established. Statements for November 1, 1940, had been received from 1,803 establishments, providing work for 193,685 men and women.

Quebec City.—In Quebec, 219 employers reported a staff of 26,445 persons, compared with 25,495 at October 1. There was a slight increase in trade and a substantial gain in manufacturing, while construction and services were rather quieter. Employment on the whole was more active than in any other month for which data are available, the index being decidedly higher than at the beginning of November, 1940, when the 217 co-operating businessmen had employed 20,751 workers, compared with 20,156 in the preceding month.

Toronto.—There was an important increase in the payrolls of 1,903 firms in Toronto, who had 215,143 men and women in their employ, a number greater by 5,380 than in their last report. Most of the expansion took place in manufacturing; in this division, food, textile, non-ferrous metal, iron and steel, chemical and other industries showed improvement, that in chemicals and iron and steel being most pronounced. Trade also afforded more employment, but transportation and construction were quieter. A smaller advance had been registered at the beginning of November of a year ago, and the index was then some 32 points lower; the 1,834 employers making returns for November 1, 1940, had reported staffs aggregating 175,804, compared with 173,017 in the preceding month.

Ottawa.—In Ottawa, curtailment was shown in manufacturing, where it took place mainly in lumber mills. Construction, however, was brisker. The 242 establishments furnishing data employed 21,655 persons, as against 21,222 at October 1. Employment, at a new maximum for this record, was in decidedly greater volume than at the same date in 1940. The trend had then also been upward, according to information from 237 employers of 17,923 workers.

Hamilton.—Industrial activity again increased in Hamilton at November 1; the 340 co-operating firms reported 57,985 employees, as compared with 56,741 at the beginning of October. Manufacturing afforded decidedly more employment, mainly in the textile, electrical apparatus and iron and steel groups. Moderate gains were also made in construction, services and trade. Expansion on a smaller scale had been recorded at the beginning of November of last year, when the index was many points below the latest figure of 177·7. The November 1, 1940, paylists of the 334 co-operating employers had included 43,854 men and women.

Windsor.—The situation in Windsor showed further improvement; 201 establishments reported 33,253 persons in their employ, compared with 33,044 at the beginning of October. The increase took place mainly in the iron and steel industries; construction and trade, on the other hand, were rather slacker. Although a larger gain had been indicated at the same date of a year ago, employment was then at a decidedly lower level. Statistics for November 1, 1940, had been tabulated from 195 firms, whose staffs aggregated 26,082.

Winnipeg. — Employment advanced in Winnipeg, according to 559 employers with 55,531 workers at the beginning of November, as compared with 54,426 in their last report. Manufacturing was brisker, especially in the chemical, food and iron and steel divisions; construction also showed a moderately upward movement, while transportation and services were quieter. The 538 concerns furnishing information for the first of November of last year had 47,035 men and women on their payrolls; the index of employment then stood at 107·5, compared with 133·2 at the date under review. This is the highest figure yet recorded.

Vancouver.—There was a contra-seasonal expansion in Vancouver, where the 587 co-operating establishments had 57,464 persons on their staffs, or 1,070 more than in the preceding month. Manufacturing reported an important gain, mainly in iron and steel plants, and trade also showed improvement, while construction was quieter and there were small losses in communications, transportation and services. Industrial activity generally was at a higher level than at the beginning of November of last year, when curtailment had been indicated by 568 firms, whose employees had numbered 43,500, a reduction of 557 from October 1, 1940.

Employment By Industries

Manufacturing.—Employment in manufacturing at November 1 showed its tenth consecutive increase, in the longest series of

uninterrupted advances in the nearly twenty-one years during which the current surveys have been made. The latest gain was substantial, amounting to 1·3 per cent; it was nevertheless the smallest in this period of continuous improvement. The trend of employment at November 1 in fifteen of the years since 1920 has been downward, so that the expansion at the date under review is contra-seasonal. Considerably exceeding that indicated at November 1, 1940, the latest increase provided employment for approximately the same number of persons as were added to the payrolls at November 1, 1939; the percentage gain then, however, was greater, at 2·1 per cent. In the few other years since 1920 in which the movement at November 1 has been favourable, the increases were slight.

The 7,038 manufacturers co-operating at the beginning of November, 1941, reported a combined working force of 975,544 men and women, or 12,747 more than in the preceding month. The unadjusted index (based on the 1926 average as 100), rose from its previous maximum of 185·0 at October 1, 1941, to a new high of 187·6 at November 1. This figure was 29·7 per cent above that of 144·6 at November 1, 1940, until now the highest for November.

Since the gain at the date under review is contra-seasonal, the seasonally-adjusted index also advanced, rising from 179·3 at October 1, to 185·9 at November 1. These two figures, like the corresponding crude indexes, are the highest yet recorded.

As compared with the preceding month, there was a particularly large increase of 15,199 persons in iron and steel plants. This greatly exceeds that reported in any other November for which data are available, having indeed, rarely been exceeded in any month in the years since 1920. Employment in chemical factories also showed a further important expansion, while there were smaller advances in animal food, pulp and paper, textile, rubber, non-ferrous metal and miscellaneous manufacturing plants; in the last-named, the gain took place mainly in the production of scientific instruments.

Seasonal declines at November 1 as compared with October were reported in vegetable food factories, which released nearly 6,500 workers; in lumber mills there was also a considerable seasonal falling-off. Losses on a small scale took place in musical instrument, beverage and electrical apparatus plants and in central electric stations.

Employment in practically every branch of manufacturing was brisker at November 1 than at the same date in any other year for which information is available.

For November 1, 1940, 6,762 manufacturing establishments had reported 744,144 employees, compared with 740,073 in the preceding month.

Calculated on the 1926 average as 100, the unadjusted indexes of employment in manufacturing have been as follows at the beginning of November in the last few years:—1941, 187·6; 1940, 144·6; 1939, 122·1; 1938, 110·9 and 1937, 119·0. In 1929, when industrial activity, on the average was at its maximum in the pre-war period, the November 1 index had been 117·2.

Logging.—Data were received from 442 firms employing 65,156 men, or 13,535 more than in the preceding month. The expansion was decidedly less than that reported at November 1 in any recent year. It is probable that difficulty in securing help is largely responsible for the relatively small gain. The index, at 219·6, was lower than that of 258·6 at November 1 of last year, and was also below the November 1, 1937, figure of 306·3; with these exceptions, it was higher than at the same date in any earlier year of the record. There were advances in logging at the latest date in all provinces except British Columbia, those in Quebec being most extensive.

Mining.—Improvement was indicated in the mining of metallic ores and of coal, while quarrying and other non-metallic mineral mining showed no general change. The forces of the 420 mining operators furnishing returns totalled 86,989 persons, compared with 85,713 at October 1. A much smaller increase had been noted at the beginning of November, 1940, and the index was then some eleven points lower. With infrequent exceptions, the movement in mining has been upward at November 1 in other years for which data are available; the latest increase approximated the average for that date.

Communications. — Telephones and telegrams showed a falling-off in activity, as is customary in the late autumn, the decline being of normal proportions. The companies and branches whose statistics were tabulated had 26,715 workers in their employ, or 402 fewer than at October 1. The index of employment was some ten points higher than at November 1, 1940, when a smaller loss had been noted.

Transportation.—A seasonal decrease was reported by the 552 co-operating employers in the transportation group; their staffs numbered 129,576, compared with 131,312 in the preceding month. Shipping and stevedoring and local transportation and storage showed reduced activity, while there was a slight gain in railway operation. The contraction in employment indicated in transportation at the

beginning of November of a year ago was not so large, but the index was then nine points lower than that of 102·8 at the date under review.

Construction and Maintenance.—Curtailment was recorded in highway and railway construction and maintenance, but building showed further improvement. Statements were received from 1,450 contractors employing 185,513 workers, compared with 195,243 at the beginning of October. This general reduction is seasonal, but the loss was slightly below average, according to the experience of the last twenty years. The index, at 147·7 at November 1, 1941, was higher than in any other November in the last decade.

Services.—Hotels and restaurants were seasonally quiet, and there was a small decrease in laundering and dry-cleaning establishments; 616 firms in the service group reported 38,706 men and women in their employ, or 445 fewer than at the beginning of October. The index, at 173·7, was considerably above that of November 1, 1940, although a moderate increase in staffs had then been indicated by the co-operating employers.

Trade.—The trend of employment in trade continued upward, 2,700 workers being added to the forces of the 2,196 trading establishments furnishing returns, whose employees aggregated 167,994. The improvement occurred wholly in retail stores, wholesale houses being rather quieter. The index in this division, at 163·4 at November 1, was at its maximum for that date in the years since 1920. The gain indicated at the beginning of November, 1940, had been on a smaller scale. The percentage advance this year was fractionally above the average at November 1 in the years since 1920.

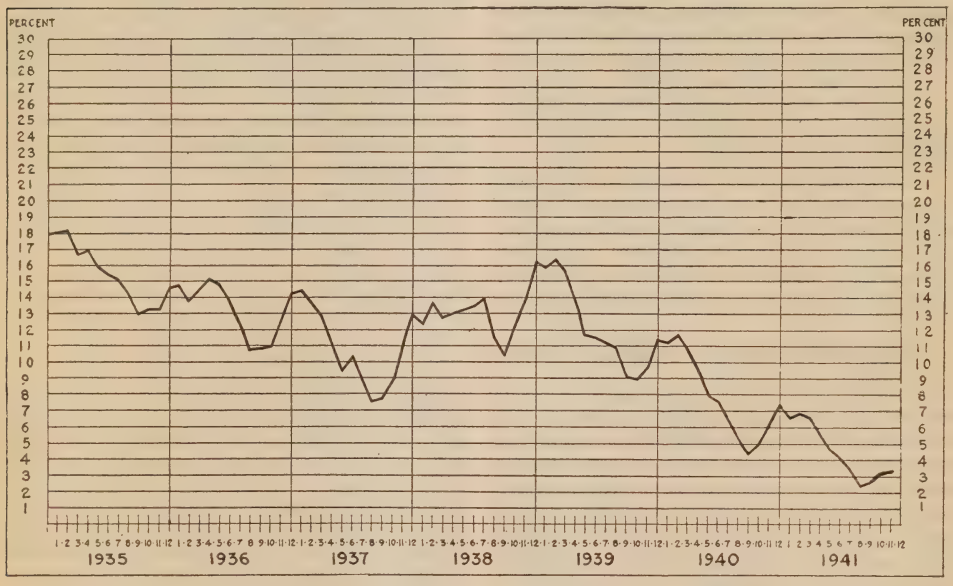
Finance.—The 760 financial institutions and branches furnishing data for November 1 employed 63,252 men and women, as compared with 62,978 in their last report. The index stood at 122·5; in the preceding month it was 122·0, while at November 1, 1940, the figure had been 112·8. The addition of the returns for this group to those already given for the manufacturing, logging, mining, transportation, communications, construction, service and trade industries brings to 1,739,445 the number of persons in recorded employment in 13,536 establishments and lowers the general index of 167·6 in the eight industries just enumerated, to 165·4. When the employees of financial organizations are added to the statistics for October 1, 1941, the index was lowered from 165·8 to 163·6. The index at November 1, 1940, had stood at 139·2 without the figures for the finance group, and at 137·8 when they were included.

Index numbers in industries are given in Table 111.

Unemployment in Trade Unions at the Close of November, 1941

Unemployment in the following report has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades, or who are involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only, to the organizations reporting.

Reports were received at the close of November from 2,107 labour organizations, whose combined membership was 324,071 persons, of whom 10,738, or a percentage of 3·3, were unemployed, in contrast with percentages of 3·1 at the end of October and 6·2 at the close of November, 1940.



The slight employment contraction shown in November from the preceding month was due principally to seasonal recessions in work available for fishermen and to the slightly lower employment levels which prevailed among the members in the building and construction trades and in the manufacturing industries. A minor employment increase over October was reflected in Alberta returns; in Nova Scotia and Ontario there were fractional advances only. On the other hand nominal decreases in work afforded were indicated in New Brunswick, Quebec, Saskatchewan and British Columbia; among Manitoba members employment showed a moderate decline. Contrasted with returns received at the close of November, 1940, employment rose substantially in Quebec and Saskatchewan and considerable improvement was apparent likewise, in New Brunswick, Ontario, Alberta and British Columbia; in Nova Scotia and Manitoba there were nominal increases, only.

A separate compilation is made each month of unemployment among trade union members in the largest city in each province, with the exception of Prince Edward Island. In Toronto there was a nominal expansion in available work over October, while in Halifax the percentage of unemployment was identical with that indicated at the close of the previous month. On the other hand, nominal declines in work provided were apparent in reports received from unions in Saint John, Montreal

and Edmonton. Slightly adverse conditions prevailed for Regina and Vancouver members; in Winnipeg there was a moderate decline in employment. In contrast with reports tabulated at the end of November, 1940, substantially better conditions prevailed among union members in Montreal and Toronto, and moderate improvement was in evidence also, in Vancouver; gains of lesser degree were apparent in Saint John, Winnipeg, Regina and Edmonton. Halifax was the only city in this comparison to reflect an employment contraction and this was on a small scale, only.

From the chart which accompanies this article and shows the trend of unemployment from January, 1935, to date, it will be seen that the curve during November inclined slightly, thus manifesting some contraction in employment from the preceding month. It rested, however, at a substantially lower level than at the end of November, 1940, thus indicating a considerable improvement in conditions.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

Reports were tabulated from 649 unions in the manufacturing industries. These organizations had a combined membership of 146,770 persons, of whom 3,980, or a percentage of 2·7 were unemployed, in contrast with percentages of 2·4 in October and 6·2 at the close of November, 1940. In comparison with October, a fair advance in work occurred for members in the iron and steel trades; these reports continued to reflect a very high employment level. An increase of noteworthy proportions was apparent, also, among fur workers. Butchers, meat and fish packers, indicated a minor advance in work provided; among papermakers and printing pressmen there were nominal employment increases, only. Metal polishers and clay, glass and stone workers recorded an unchanged situation; while, as in the previous month, unions of cigar and tobacco workers, electric current employees, textile and carpet workers, tailors, jewellery workers, mine, mill and smeltermen and gas workers all reported that their members were fully employed. On the other hand, nominal declines in work afforded occurred among soft drink and hat, cap and glove workers. Among bakers and confectioners, woodworkers, leather workers and general labourers there were minor recessions, and employment for members in the garment trades manifested a substantial seasonal contraction. A large majority of the trades participated in the employment expansion shown in November over the corresponding month in 1940. A much higher employment level was reflected in reports received from unions in the iron and steel trades, while viewed from the percentage standpoint, although involving comparatively few members, returns received from tailors and hat, cap and glove workers, indicated marked employment expansion. On the other hand, minor contractions in work afforded, were in evidence among fur and leather workers.

Returns were tabulated from 54 organizations of coal miners, whose total membership was 22,536 persons, of whom 204, or a percentage of 0·9 were unemployed, in contrast with a percentage of 2·5 at the end of October and 2·0 per cent at the close of November, 1940. In contrast with October, gains of noteworthy proportions were reflected in reports received from Alberta unions. In British Columbia there was an employment increase, likewise, although this was to a lesser degree; while in Nova Scotia there was only a nominal advance. As in the preceding month, members in New Brunswick unions were reported as fully engaged. Contrasted with conditions at the end of November, 1940, the employment level among British Columbia members was substantially higher; nominal advances only were apparent in Nova Scotia and Alberta. In New Brunswick the members, as in the previous comparison, were reported as having adequate work.

There were 247 reports received from unions in the building and construction trades. These organizations had a combined membership of 36,464 persons, of whom, 3,143, or a percentage of 8·6, were without work at the close of November, in contrast with percentages of 7·7, at the end of the previous month and 11·6 at the close of November, 1940. In comparison with October, employment among granite and stonecutters showed an appreciable advance. A favourable tendency was reflected, likewise, in returns received from unions of bridge and structural iron workers; among steamshovelmen there was a nominal increase, only. Viewed from the percentage standpoint, although involving comparatively few members, tile layers, lathers and roofers were much better engaged. On the other hand, a moderate contraction in employment was indicated in reports received from unions of carpenters and joiners. Slightly lower employment levels were apparent for bricklayers, masons and plasterers, painters, decorators and paperhangers, and hod carriers and building labourers; fractional declines only, were observed among electrical workers and plumbers. In comparison with reports tabulated at the end of November, 1940, important employment increases were observed among carpenters and joiners, likewise among painters, decorators and paperhangers, employment attained a much higher level. From the percentage viewpoint, tile layers, lathers and roofers were much better engaged, but as their membership is small, this change had but little effect on the building group percentage as a whole. On the other hand, there were nominal declines in work available for steamshovelmen, and hod carriers and building labourers. Among bricklayers, masons and plasterers and bridge and structural iron workers there were moderate employment recessions; much quieter conditions were apparent among granite and stonecutters.

Reports were tabulated from 861 organizations in the transportation industries, whose total membership was 76,479 persons. Of these, 2,004, or a percentage of 2·6 were unemployed, in contrast with percentages of 2·4 at the end of October, and 4·6 at the close of November, 1940. Compared with the previous month, there was a fractional increase for navigation workers; among street and electric railway employees, teamsters and chauffeurs, the percentages of unemployment remained identical with those of the preceding month. On the other hand among steam railway employees, whose returns constitute over 76 per cent of the

TABLE I.—PERCENTAGE OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

entire group membership, there was a nominal contraction in available work. In comparison with returns received at the end of November, 1940, employment rose substantially for navigation workers and considerable improvement was in evidence likewise, among steam railway employees. Unions of teamsters and chauffeurs indicated minor advances, while among street and electric railway employees the percentage of unemployment remained unchanged.

Returns were tabulated from 9 unions of retail shop clerks, whose combined membership was 3,781 persons, of whom, 5, or a percentage of 0·1 were without work, compared with a percentage of 0·3 in October and 0·1 per cent at the end of November, 1940.

Reports were received from 95 unions of civic employees, whose aggregate membership was 9,476, of whom, 12, or a percentage of 0·1, were unemployed. This percentage was identical with that shown at the end of October. The percentage of members, who were without work at the close of November, 1940, was 0·6.

In the miscellaneous group of trades there were 150 reports tabulated. The total membership included in these returns was 12,231, of whom, 294, or a percentage of 2·4 were without employment, in contrast with percentages of 1·8 in October and 4·2 at the end of November, 1940. Slightly better conditions than those reported in the previous month, were apparent among hotel and restaurant employees; barbers indicated a nominal increase, only. Among stationary engineers and firemen the percentage of unemployment remained unchanged, while among theatre and stage employees there was a slight recession. A moderate decrease in available work was observed among unclassified workers. In contrast with conditions at the close of November, 1940, a substantially higher employment level prevailed among stationary engineers and firemen and moderate advances in work provided, were reflected in reports received from unions of hotel and restaurant, theatre and stage employees and barbers, while among unclassified workers there was a moderate employment contraction.

Returns were tabulated from 4 unions of fishermen, whose total membership was 1,891. Of these, 275, or a percentage of 14·5 were without work at the end of November, compared with a percentage of 6·3 in October and 22·8 per cent at the close of November, 1940.

There were 4 reports received from unions of lumber workers and loggers. These organizations reported a total membership of 3,112 persons. Of these, 214, or a percentage of 6·9 were unemployed, in contrast with percentages of 6·5 at the close of October and 9·3 at the end of November, 1940.

Table I shows by provinces the percentage of members, who were on an average unemployed each year from 1930 to 1940, inclusive, and also the percentage of unemployment for November of each year from 1930 to 1939, inclusive, and for each month from November, 1940, to date. Table II summarizes the returns in the various groups of industries for the same months as Table I.

Building Permits Issued in Canada During November, 1941

The November report of Building Permits compiled by the Dominion Bureau of Statistics includes returns from 190 of the 204 municipalities in Canada which have systems for issuing such permits and of this number 167 reported detailed operations. The remaining 23 advised that no permits had been issued during the month of November while 14 municipalities had failed to report at the close of December 12.

The total value of permits reported as issued in the month of November is $11,465,444. Revised values for the month of October include returns from 203 municipalities and aggregate $13,137,056. Reports were received from 57 of the original 58 municipalities and show a value of $8,573,689 for November. The corresponding revised value for October includes 58 returns and is $10,100,422, while the November, 1940, value was $7,716,170.

The total value of permits issued by all municipalities during the eleven elapsed months of the current year is $126,506,945. The value of the 58 municipalities for the same period is $94,467,439, while their corresponding value in 1940 was $74,206,357.

During the month of November new construction of all types amounted to 84·5 per cent of the total value, while the percentage of new residential construction was 34·7.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

SEPTEMBER-OCTOBER RECORD

THE British *Ministry of Labour Gazette* for November, 1941, summarizes the September-October employment situation in Great Britain as follows:—

The number of men and boys registered at Employment Exchanges in Great Britain as wholly unemployed October 13 was 97,034, a decrease of 3,014 as compared with September 15. Of this total, 28,722 had been classified by interviewing panels as unsuitable for ordinary industrial employment.

Those registered as on short time or otherwise temporarily suspended from work on the understanding that they were shortly to return to their former employment numbered 6,620, a decrease of 1,304 as compared with September 15. Those registered as unemployed casual workers (being persons who normally seek their livelihood by jobs of short duration) numbered 9,420, a decrease of 91 as compared with September 15.

The corresponding figures for women and girls on the registers at October 13 were 88,816 wholly unemployed, 13,832 temporarily stopped, and 477 unemployed casual workers. Of those wholly unemployed, 3,482 had been classified by interviewing panels as unsuitable for normal full-time employment, and 4,082 had been classified as unable for good cause to transfer to another area. As compared with September 15, the numbers wholly unemployed showed a decrease of 7,730, those temporarily stopped a decrease of 2,217, and unemployed casual workers a decrease of 66.

The number of applicants for unemployment benefit or allowance on the registers at October 13 was 147,541, as compared with

157,466 at September 15, and 696,962 at October 14, 1940.

United States

Total civil non-agricultural employment in November (40,693,000) was 3,165,000 greater than in November, 1940 and 4,114,000 above the November, 1929 level, according to a statement issued on December 31 by United States Secretary of Labour, Miss Frances Perkins. Due primarily to seasonal recessions in the manufacturing, transportation, and fianance and service groups, there was a decrease in employment between mid-October and mid-November, 1941 of 83,000.

While 70,000 fewer factory workers were employed in November than in the preceding month, the decline in factory employment was of less than the usual seasonal proportion. Employment continued to advance sharply in shipbuilding and aircraft industries, while moderate increases were reported in a number of other industries. These gains were offset, however, by seasonal losses in canning and clothing industries and also by employment reductions in many establishments where operations have been curtailed in the effort to conserve critical raw materials.

Employment in the transportation and public-utility group declined by 58,000 from October to November; the finance and service group showed a decrease of 25,000; and the mining group showed a small decrease (4,000). These losses over the month interval were partly offset by increases in trade (61,000) and government (3,000). Federal construction continued to rise sharply but a seasonal decrease occurred in non-Federal construction and total construction showed a gain of only 10,000 workers.

The greater part of the gain of 3,165,000 in non-agricultural employment over the year occurred in manufacturing with an increase of 1,734,000 workers. Employment in Federal, State, and local government services increased 391,000; trade increased 336,000; construction rose 261,000; transportation, 242,000; finance and service, 143,000; and mining, 58,000.

Seasonal declines in employment occurred in canning and preserving (49,600), sawmills (11,500), and women's clothing (9,700). In the automobile industry reduced production quotas resulted in a decline of 7,300 workers, the November total of 511,400 being 2·2 per cent lower than in November a year ago.

The employment index for all manufacturing industries combined in November stood at 134·5 of the 1923-25 average, and the payroll index was 165·5. Compared with November, 1940, factory employment has increased 17·3 per cent and payrolls 42·2 per cent. The considerably greater increase in payrolls reflects expansion in working hours, overtime payments, and wage-rate increases.

Wage-rate increases averaging 8·1 per cent, and affecting 165,511 factory wage earners, were reported by 586 co-operating establishments between mid-October and mid-November. The number affected by wage increases in November was less than in any month since March, 1941. Since January, wage increases affecting more than 4,500,000 workers have been reported.

Employment in anthracite and bituminous coal mines showed virtually no change between October and November, but payrolls in both industries declined (15 per cent and 5 per cent, respectively) partly as a result of holidays observed in the first half of November. Less than seasonal reductions were reported by quarries and non-metallic mines, while employment in metal mines showed virtually no change and payrolls rose slightly. Wholesale-trade employment and payrolls showed slight contra-seasonal gains, largely as a result of pronounced employment increases in establishments handling farm products. Greater-than-seasonal increases occurred in retail trade, despite employment losses experienced by automobile, lumber, and building-material dealers, and dealers in radios and household appliances.

Increased activity on the construction of Naval Vessels and non-residential buildings was largely responsible for an employment increase of 81,000 in the month ending November 15 on construction projects financed from regular Federal appropriations. The number of men at work on low-rent projects of the United States Housing Authority declined from 40,800 to 36,000. Seasonal employment decreases occurred on both maintenance and new road projects financed from State funds. A preliminary estimate indicates that 23,000 persons were added to executive service payrolls in November. Employment on work relief projects of the Work Projects Administration rose 16,000 in November and 83,000 were added to the rolls of the National Youth Administration. About 1,000 fewer persons were employed in camps of the Civilian Conservation Corps in November.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wage Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by Orders in Council of April 9, 1924, and of December 31, 1934. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On May 30, 1941, an Order in Council, P.C. 3884, was passed rescinding the schedule of minimum wage rates set out in the "B" conditions which had been in effect since December, 1934, and establishing increased rates of 35 cents and 25 cents respectively for male and female workers over eighteen years of age. It also made provision for a system of permits to employ beginners and handicapped workers at sub-standard rates, and provided penalties for non-compliance with the prescribed rates.

On October 4, 1941, P.C. 3884 was revoked by the passage of Order in Council P.C. 7679 and minimum rates were prescribed for all employees of Government contractors and subcontractors. (The full text of this Order in Council appears at pages 1226 and 1227 of the LABOUR GAZETTE for October.)

The four major changes made by the new Order are: (1) the application of the minimum rates to *all* employees of contractors and subcontractors throughout an establishment of which any part may be engaged on Government orders, and not only as previously to those employees actually engaged on Government work; (2) the addition of a new minimum wage rate of 20 cents an hour for employees under 18 years of age whose rates previously had been set by provincial regulation; (3) the authorization of special beginners' rates; and (4) the exemption from the necessity of obtaining beginners' permits unless the number of beginners exceeds a quota of 20 per cent of the total number of employees in any establishment.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were suspended in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight-Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. This clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other persons doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages: The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide or except in cases of emergency as may be approved by the Minister."

This Act, like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance, or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, and certain other works being carried out under agreements with the provinces which are also assisted by grant of federal funds, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for over-

42360—7½

time and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours, on contracts for governmental supplies and equipment the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

War Contracts

All contracts awarded by the Department of Munitions and Supply are subject to labour conditions for the protection of the workpeople concerned.

In the case of building and construction contracts, the labour conditions include fair wages schedules based on the rates current in the particular district where the work is being performed, and provide that the working hours shall not exceed eight per day and forty-four per week.

In the case of contracts for the manufacture and overhaul of aircraft, the labour conditions include one scale of minimum wage rates which has been approved for all work of this nature undertaken in Eastern Canada (Ontario, Quebec and the Maritime Provinces), and a separate and higher scale for all such contracts undertaken in Western Canada (comprising the area from Fort William to the Pacific Coast). These contracts are subject also to a working week of not more than forty-eight hours, provision being made that any necessary and authorized overtime work shall be paid for at a rate of not less than one and one-half times the regular rate.

Contracts for shipbuilding and repair are all subject to labour conditions including fair wages schedules based on the rates current in the district where the work is being executed. Provision is made for the observance of working hours of not more than forty-eight per week and for a wage of not less than one and one-half times the rgeular rate for any overtime that is necessary and authorized by the Dominion Government inspector in the plant.

Contracts for the manufacture of equipment and supplies for the defence forces are subject to the "B" labour conditions of the Fair Wages Order in Council referred to in the introduction to this article.

As complete lists of the contracts awarded by the Department of Munitions and Supply

are being issued weekly through the office of the Director of Public Information, and are being published in the press, this information will not be duplicated here.

Schedules Prepared and Contracts Awarded During December

During the month of December the Department of Labour prepared, on request 94 fair wages schedules for inclusion in building and construction contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

Particulars of the contracts which have been entered into recently by the various Government departments (other than the Department of Munitions and Supply referred to above) appear hereunder:—

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

NOTE: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work, and also specify that the rates of wages set out therein are *"minimum* rates only" and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

DEPARTMENT OF TRANSPORT

Building construction at Kenora, Ont. Name of contractors, Bergman & Nelson, Ltd., Kenora, Ont. Date of contract, December 1, 1941. Amount of contract, $5,740. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 85
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 65
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Compressor operators (gasoline or electric)	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 70
Electricians (inside wiremen)	0 70
Engineers, operating, steam:	
Single or double drums	0 65
Three or more drums	0 75
Engineers, on steel erection	0 90
Engineers, crane (steam, gasoline or electric)	0 70
Enginemen, stationary	0 50
Hoist operators—tower (gasoline or electric)	0 50
Labourers	0 40
Lathers—metal	0 65
Lathers—wood	0 60
Linoleum layers	0 55
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Ornamental iron workers	0 60
Painters (spray)	0 70
Painters and glaziers	0 60
Plasterers	0 80
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 70
Rodmen, reinforced steel	0 50
Roofers, felt and gravel: patent: comp.	0 45
Roofers, sheet metal	0 70
Sheet metal workers	0 70
Shinglers (wood, asbestos)	0 65
Shovel operators (gasoline)	1 00
Structural steel workers	0 90
Tile setters, asphalt	0 65
Tile setters' helpers (all men assigned to help tradesmen)	0 45
Watchmen	0 35
Waxers and polishers (floor)	0 45
Welders and burners—on steel erection	0 90

Development work at St. Joseph, Ont. Name of contractors, Johnson Bros. Co., Ltd., Brantford, Ont. Date of contract, December 3, 1941. Amount of contract, $50,472.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' helpers	0 45
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drill runners	0 50
Engineers, crane (steam, gasoline or electric)	0 70
Enginemen, stationary	0 50
Labourers	0 40
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Powdermen	0 50
Pumpmen	0 50
Road grader operators:	
Horsedrawn	0 45
Including team	0 80
Gasoline	0 50
Road roller operators (steam or gasoline)	0 65
Steam shovel engineers	1 00
Steam shovel cranemen	0 75
Steam shovel firemen	0 60
Steam shovel oilers	0 50
Shovel operators (gasoline)	1 00
Tractor operators (small)	0 50
Tractor operators (LeTourneau, etc.)	0 60
Watchmen	0 35

Additional development work at Mount Pleasant, P.E.I. Name of contractors, Curran & Briggs, Ltd., Toronto. Ont. Date of contract, December 3, 1941. Amount of contract, $203,-207.25. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers	$0 50
Asphalt tampers, smoothers and spreaders	0 40

	Per hour
Carpenters and joiners	0 55
Cement finishers	0 50
Cement and concrete mixer operators:	
Steam	0 60
Gasoline or electric	0 45
Compressor operators (gasoline or electric)	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Drill runners	0 45
Labourers	0 35
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Road grader operators:	
Horsedrawn	0 40
Including team	0 60
Gasoline	0 45
Road roller operators (steam or gasoline)	0 60
Steam shovel engineers	0 90
Steam shovel cranemen	0 70
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Shovel operators (gasoline)	0 90
Tractor operators (small)	0 45
Tractor operators (LeTourneau, etc.)	0 55
Watchmen	0 30

Additional development work at Mohawk, Ont. Name of contractors, King Paving Co., Ltd., Oakville, Ont. Date of contract, December 3, 1941. Amount of contract, $170,220. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers	$0 55
Asphalt tampers, smoothers and spreaders	0 45
Blacksmiths	0 60
Blacksmiths' helpers	0 45
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Compressor operators (gasoline or electric)	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Labourers	0 40
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Road grader operators:	
Horsedrawn	0 45
Including team	0 80
Gasoline	0 50
Road roller operators (steam or gasoline)	0 65
Steam shovel engineers	1 00
Steam shovel cranemen	0 75
Steam shovel firemen	0 60
Steam shovel oilers	0 50
Shovel operators (gasoline)	1 00
Tractor operators (small)	0 50
Tractor operators (LeTourneau, etc.)	0 60
Watchmen	0 35

Development work at Douglas, Man. Name of contractors, Long Lac Construction Co., Ltd., Port Arthur, Ont. Date of contract, December 3, 1941. Amount of contract, $39,036. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers	$0 54
Asphalt tampers, smoothers and spreaders	0 45
Blacksmiths	0 65
Blacksmiths' helpers	0 45
Carpenters and joiners	0 80
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 70
Gasoline or electric	0 45
Compressor operators (gasoline or electric)	0 45
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 85
Drill runners	0 50
Electricians (inside wiremen)	0 80
Engineers, operating, steam:	
Single or double drums	0 75
Three or more drums	0 80
Engineers on steel erection	0 50
Labourers	0 40
Motor truck drivers	0 45
Motor truck driver and truck	1 40
Pipefitters (surface—temp. work)	0 50
Pipelayers, caulkers and solderers	0 45
Powdermen	0 50
Pumpmen	0 45
Road grader operators:	
Horsedrawn	0 45
Including team	0 90
Gasoline	0 60
Road roller operators (steam or gasoline)	0 70
Rodmen, reinforced steel	0 50
Steam shovel engineers	1 00
Steam shovel cranemen	0 75
Steam shovel firemen	0 60
Steam shovel oilers	0 50
Shovel operators (gasoline)	1 00
Tractor operators (small)	0 60
Tractor operators (LeTourneau, etc.)	0 70
Watchmen	0 35

Additional development work at Granum, Alta. Name of contractors, General Construction Co., Ltd., Vancouver, B.C. Date of contract, December 3, 1941. Amount of contract, $39,036. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers	$0 55
Asphalt tampers, smoothers and spreaders	0 45
Blacksmiths	0 60
Blacksmiths' helpers	0 45
Compressor operators (gasoline or electric)	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 70
Drill runners	0 50
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Pipefitters (surface—temp. work)	0 55
Pipelayers, caulkers and solderers	0 45
Powdermen	0 50
Pumpmen	0 50
Road grader operators:	
Horsedrawn	0 45
Including team	0 75
Gasoline	0 55
Road roller operators (steam or gasoline)	0 70
Shovel operators (gasoline)	1 00
Tractor operators (small)	0 50
Tractor operators (LeTourneau, etc.)	0 60
Watchmen	0 40
Labourers	0 40

Development work at Souris, Man. Name of contractors, Tomlinson Construction Co., Ltd., Winnipeg, Man. Date of contract, December 4, 1941. Amount of contract, $470,150.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers	$0 54
Asphalt tampers, smoothers and spreaders	0 45
Blacksmiths	0 65
Blacksmiths' helpers	0 45
Cement and concrete mixer operators:	
Steam	0 70
Gasoline or electric	0 45
Compressor operators (gasoline or electric)	0 45
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 85
Drill runners	0 50
Labourers	0 40
Motor truck drivers	0 45
Motor truck driver and truck	1 40
Road grader operators:	
Horsedrawn	0 45
Including team	0 90
Gasoline	0 60
Road roller operators (steam or gasoline)	0 70
Rodmen, reinforced steel	0 50
Tractor operators	0 60
Watchmen	0 35

Construction of a water supply main at Neepawa, Man. Name of contractors, Henry Borger & Son, Ltd., Winnipeg, Man. Date of contract, December 5, 1941. Amount of contract, $6,315. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 65
Blacksmiths' helpers	0 45
Carpenters and joiners	0 80
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 70
Gasoline or electric	0 45
Compressor operators (gasoline or electric)	0 45
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 85
Drill runners	0 50
Dragline operators (steam or gasoline)	1 00
Dragline firemen	0 60
Dragline oilers	0 50
Labourers	0 40
Machinists	0 65
Machinists' helpers	0 45
Motor truck drivers	0 45
Motor truck driver and truck	1 40
Pipefitters (surface—temp. work)	0 50
Pipelayers, caulkers and solderers	0 45
Plumbers and steamfitters	0 95
Plumbers and steamfitters' helpers (all men assigned to help tradesmen)	0 45
Powdermen	0 50
Pumpmen	0 45
Watchmen	0 35

Road development at Fort William, Ont. Name of contractor, E. A. Bell, Fort William, Ont. Date of contract, December 6, 1941. Amount of contract, $4,886.75. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers	$0 55
Asphalt tampers, smoothers and spreaders	0 45
Blacksmiths	0 60
Blacksmiths' helpers	0 45
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Compressor operators (gasoline or electric)	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drill runners	0 50
Engineers, operating, steam:	
Single or double drums	0 65
Three or more drums	0 75
Enginemen, stationary	0 50
Labourers	0 40
Machinists	0 65
Machinists' helpers	0 45
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Pipefitters (surface—temp. work)	0 55
Pipelayers, caulkers and solderers	0 50
Plumbers and steamfitters	0 90
Powdermen	0 50
Pumpmen	0 50
Riggers (general)	0 55
Road grader operators:	
Horsedrawn	0 45
Including team	0 80
Gasoline	0 50
Road roller operators (steam or gasoline)	0 65
Rodmen, reinforced steel	0 50
Steam shovel engineers	1 10
Steam shovel cranemen	0 90
Steam shovel firemen	0 65
Steam shovel oilers	0 55
Shovel operators (gasoline)	1 10
Tractor operators (small)	0 50
Tractor operators (LeTourneau, etc.)	0 60
Watchmen	0 35

Additional development work at Cartierville, Montreal, P.Q. Name of contractors, Armand Sicotte & Sons, Montreal, P.Q. Date of contract, December 6, 1941. Amount of contract, $120,157.60. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers	$0 55
Asphalt tampers, smoothers and spreaders	0 46
Blacksmiths	0 60
Carpenters and joiners	0 81
Cement finishers	0 64
Cement and concrete mixer operators:	
Steam	0 64
Gasoline or electric	0 58
Compressor operators (gasoline or electric)	0 58
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drill runners	0 50
Electricians (inside wiremen)	0 87
Engineers, operating, steam:	
Single or double drums	0 76
Three or more drums	0 80
Enginemen, stationary	0 58
Hod carriers	0 53

	Per hour
Labourers	0 46
Machinists	0 75
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Pipefitters (surface—temp. work)	0 58
Pipelayers, caulkers and solderers	0 50

Tractor operators	0 60
Watchmen	0 35

Additional development work at Sydney, N.S. Name of contractors, Standard Paving Maritime Ltd., Halifax, N.S. Date of contract, December 15, 1941. Amount of contract, $433,363.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers	$0 55
Asphalt tampers, smoothers and spreaders	0 45
Blacksmiths	0 60
Blacksmiths' helpers	0 45
Carpenters and joiners	0 90
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Compressor operators (gasoline or electric)	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 70
Drill runners	0 50
Electricians (inside wiremen)	0 70
Engineers, operating, steam:	
Single or double drums	0 65
Three or more drums	0 75
Enginemen, stationary	0 50
Labourers	0 40
Machinists	0 60
Machinists' helpers	0 45
Motor truck driver and truck	1 45
Motor truck drivers	0 45
Pipefitters (surface—temp. work)	0 55
Pipelayers, caulkers and solderers	0 50
Plumbers and steamfitters	0 75
Powdermen	0 50
Pumpmen	0 50
Riggers (general)	0 55
Road grader operators:	
Horsedrawn	0 45
Including team	0 80
Gasoline	0 50
Road roller operators (steam or gasoline)	0 65
Rodmen, reinforced steel	0 50
Steam shovel engineers	0 90
Steam shovel cranemen	0 70
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Shovel operators (gasoline)	0 90
Tractor operators (small)	0 50
Tractor operators (LeTourneau, etc.)	0 60
Watchmen	0 35

Construction of water supply main at Caron, Sask. Name of contractors, Saskatoon Contracting Co., Ltd., Saskatoon, Sask. Date of contract, December 10, 1941. Amount of contract, $6,931. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 65
Blacksmiths' helpers	0 40
Carpenters and joiners	0 75
Cement finishers	0 55
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 45
Compressor operators (gasoline or electric)	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Drill runners	0 45
Dragline operators (steam or gasoline)	1 00
Dragline firemen	0 60
Dragline oilers	0 50
Engineer, operating, steam:	
Single or double drums	0 70
Three or more drums	0 75
Engineers, crane (steam, gasoline or electric)	0 75
Enginemen, stationary	0 50
Labourers	0 35
Machinists	0 70
Machinists' helpers	0 40
Motor truck drivers	0 40
Motor truck driver and truck	1 40
Pipefitters (surface—temp. work)	0 50
Pipelayers, caulkers and solderers	0 45
Plumbers and steamfitters	0 85
Plumbers and steamfitters' helpers (all men assigned to help tradesmen)	0 42½
Powdermen	0 45

	Per hour
Pumpmen	0 45
Road grader operators:	
Horsedrawn	0 40
Including team	0 70
Gasoline	0 50
Road roller operators (steam or gasoline)	0 70
Steam shovel engineers	1 00
Steam shovel cranemen	0 75
Steam shovel firemen	0 60
Steam shovel oilers	50
Shovel operators	1 00
Tractor operators (small)	0 50
Tractor operators (LeTourneau, etc.)	0 60
Watchmen	0 30

Additional development work at Kohler, Ont. Name of contractors, Law Construction Ltd., Toronto, Ont. Date of contract, December 12, 1941. Amount of contract, $16,609. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers	$0 55
Asphalt tampers, smoothers and spreaders	0 45
Blacksmiths	0 60
Blacksmiths' helpers	0 45
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Compressor operators (gasoline or electric)	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drill runners	0 50
Electricians (inside wiremen)	0 70
Engineers, operating, steam:	
Single or double drums	0 65
Three or more drums	0 75
Enginemen, stationary	0 50
Labourers	0 40
Machinists	0 65
Machinists' helpers	0 45
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Pipefitters (surface—temp. work)	0 55
Pipelayers, caulkers and solderers	0 50
Plumbers and steamfitters	0 75
Powdermen	0 50
Pumpmen	0 50
Riggers (general)	0 55
Road grader operators:	
Horsedrawn	0 45

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Construction: Shipbuilding

VANCOUVER, B.C.—A CERTAIN SHIPBUILDING COMPANY AND THE BLACKSMITHS AND HELPERS UNION OF CANADA, LOCAL NO. 1.

Agreement in effect from November 10, 1941, for the duration of the war and wartime contracts. Only union members to be employed, if available. Hours, 44 per week on day shift, 45 hours on second and third shifts, on which 9 hours' pay to be given for 8 hours' work on second shift and 7½ hours' work on third shift; overtime at time and one half for first four hours and double time thereafter, and double time for all work on Sundays and nine specified holidays. Minimum hourly wage rates effective from September 23: blacksmiths, 90 cents, blacksmiths' helpers, 65 cents. A cost of living bonus to be paid in accordance with Order in Council P.C. 8253 and amendments.

Transportation and Public Utilities: Street and Electric Railways

MONTREAL, QUEBEC.—THE MONTREAL TRAMWAYS COMPANY AND THE ASSOCIATION OF THE EMPLOYEES OF THE MONTREAL TRAMWAYS COMPANY.

Agreement in effect from July 24, 1940 (wage rates, etc. from July 1, 1940) to July 23, 1943, or for the duration of the war, whichever period is longer. Reports of a board under the Industrial Disputes Investigation Act which decided against the request of an organization for a separate agreement for bus drivers, etc., were published in the LABOUR GAZETTE, February, 1941, page 99, and August, 1941, page 891. A request for another board to settle a dispute as to a cost of living bonus was not granted, as noted in the LABOUR GAZETTE, September, 1941, page 1041.

Transportation Department.—Hours for conductors, motormen, operators and autobus chauffeurs limited to 54 per week, but if sufficient men not available, up to 60 hours may be worked. Overtime: time and one half for all work over 60 hours in a week; for all work on Sundays and seven specified holidays, 5 cents per hour extra to be paid. Hourly wage rates: conductors, motormen and car starters, 50 cents during first year's service, 55 cents during second year's service and 60 cents thereafter (5 cents extra to operators of one man cars); autobus chauffeurs, 61 cents during first year's service, 65 cents during second year; hillmen and switchmen 40 cents during first year, 42 cents during second year's service (these are increases of 5 cents per hour over the previous rates). Provision is made for seniority rights and for one week's vacation with pay.

Rolling Stock Department.—Hours: 45 per week at Youville shops, 44 at car barns; overtime at time and one half for all time over 10 hours in a week day; for work on Sundays and legal holidays, time and one quarter. Certain standard hourly wage rates in Youville shops: machinists 58 to 72 cents, millwrights 68 to 72 cents, welders 62 to 70 cents, blacksmiths 60 to 70 cents, toolmakers 70 to 78 cents, patternmakers 72 cents, other skilled trades 52 to 70 cents, improvers in mechanical trades 42 to 50 cents, labourers 38 to 42 cents. Certain standard hourly wage rates in car barns: truck, brake, motor and electrical inspectors 54 to 60 cents, pitmen 54 to 60 cents, labourers 38 to 42 cents. An amount equal to 10 per cent of total existing payrolls to be established as a general increase and distributed among employees in accordance with the standard wage rates. One week's vacation with pay.

Construction Department.—Hours 48 per week in track department, 44 in construction shops: overtime at time and one quarter for work over 10 hours (in track department time and one half for day gangs after midnight) on week days, and time and one half for work over 10 hours on Sundays and holidays. One week's vacation with pay to employees of this department. Certain standard hourly wage rates: in track division, trackmen 51 to 56 cents, sectionmen 40 and 46 cents, welders 58 to 62 cents, mechanics 60 to 66 cents; in structures division (maintenance)—carpenters, electricians and plumbers 60 to 68 cents, bricklayers and painters 60 to 65 cents, helpers 40 to 50 cents. An amount equal to 10 per cent

of total existing payrolls to be established as a general increase and distributed among employees in accordance with the standard wage rates.

Autobus—Mechanical.—Hours, 50 per week; overtime at time and one half for work over 10 hours in a day; time and one quarter for all work on Sundays and legal holidays. Certain standard hourly wage rates: mechanics 44 to 76 cents, apprentices 28 to 38 cents, electricians 40 to 70 cents, body workers 59 to 70 cents, cleaners and washers 38 to 42 cents. An amount of 10 per cent of total existing payrolls to be established as a general increase and distributed among employees in accordance with the standard wage rates, to be established by the Company. One week's vacation with pay.

Power House.—Station operators previously working 56 hours per week to work 48 hours (a 6-day week) with approximately the same annual income; overtime at time and one half for all time over 10 hours on any week day; operating employees in the power houses and substations to be paid 5 cents extra for work on Sundays and seven specified holidays. Maintenance men of the power department to receive an increase of 10 per cent. Certain standard hourly wage rates: operators 66 and 70 cents, floormen 59 cents, electricians (maintenance) 62 to 70 cents, helpers 51 to 56 cents, enginemen 66 and 70 cents, firemen 52 to 56 cents, oilers 50 to 54 cents, cleaners 42 to 46 cents. One week's vacation with pay.

Overhead Department.—Hours, 45 per week; overtime at time and one quarter after 10 hours' work on any day of the week; time and one quarter for all work on Sundays and legal holidays. Certain standard hourly wage rates: linemen 60 to 62 cents, groundmen 55 to 58 cents, chauffeurs 55 to 58 cents, conduit inspectors 60 cents. An amount of 10 per cent of the total existing payrolls to be established as a general increase and distributed among employees in accordance with the standard wage scale. One week's vacation with pay.

Cashier's Department.—Monthly wage rates: box exchange clerks from $65 during first year to $85 after two years; branch ticket salesmen $95 during first year and $100 after first year; transfer clerks $110, ticket clerks and relief men $120.

Promotions to be made with justice, considering ability and seniority. The total gross receipts of the company from passenger bus and tramway fares to be computed for twelve months ending June 30 of each year, and if such receipts exceed the sum of fifteen million dollars, the company will set aside 25 per cent of such excess as a fund to be paid as additional remuneration to employees who have earned $2,500 or less during such twelve months and have been continuously on the payroll during this period.

TORONTO, ONTARIO.—TORONTO TRANSPORTATION COMMISSION AND THE EMPLOYEES OF THE ELECTRICAL DEPARTMENT (MEMBERS OF THE CANADIAN ELECTRICAL TRADES UNION, LOCAL NO. 1).

The agreement which came into effect April 1, 1938, and was summarized in the LABOUR GAZETTE, December, 1938, page 1413, was renewed without change for the period April 1, 1940 to April 1, 1942. The commission granted a cost of living bonus of 3 cents per hour from October 1, 1940, and an additional 2 cents per hour from June 1, 1941.

HAMILTON, ONTARIO.—THE HAMILTON STREET RAILWAY COMPANY AND THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES, DIVISION 107.

This agreement came into effect April 1, 1936, and was amended April 15, 1939 to provide for a vacation with pay, as summarized in the LABOUR GAZETTE, August, 1936, page 748, and August, 1939, page 858. From June 1, 1940, an increase of 2 cents per hour in wage rates was granted without any amendment to the agreement. The agreement was amended from June 1, 1941, to provide for an increase of 5 cents per hour for hourly paid employees and of $10 per month for monthly paid employees, over the rates effective from April, 1936 to May, 1940. Certain hourly wage rates, effective from June 1, 1941: one man car and bus operators from 53 cents during first year of service to 63 cents after two years (two man car operators 5 cents per hour less); ticket clerks $125 per month; blacksmiths 61½ cents, painters 57½ cents, pitmen 53 and 57½ cents, electricians 64 cents, other trades 57½ and 62½ cents, car cleaners 50 and 52½ cents.

LONDON AND PORT STANLEY, ONTARIO.—SCHEDULE OF WAGES AND WORKING CONDITIONS FOR EMPLOYEES OF THE LONDON AND PORT STANLEY RAILWAY (MEMBERS OF THE CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES, DIVISION 262).

Schedule in effect from May 1, 1941, subject to 30 days' notice. Hours, 48 per week; overtime at time and one-half except that passenger and freight crews to be paid overtime only after 9 hours' work. Hourly wage rates: motormen and conductors 50 cents during first year, 55 cents second year, brakemen 45 and 47 cents, shop mechanics 60 and 65 cents, linemen 52 to 60 cents, machinist helper 48 cents, car cleaners 42 cents, maintenance of way men 46 cents; clerks $65 to $130 per month, freight and passenger agents $150. Provision is made for seniority rights, settlement of disputes; one week's vacation for those with one and under five years' service, two weeks with over five years' service.

WINDSOR, ONTARIO.—SANDWICH, WINDSOR AND AMHERSTBURG RAILWAY COMPANY AND THE AMALGAMATED ASSOCIATION OF STREET, ELECTRIC RAILWAY AND MOTOR COACH EMPLOYEES, DIVISION 616.

Agreement in effect January 1, 1941, to December 31, 1941, and till 30 days' notice.

All employees to become union members within 30 days of their employment. The Company agrees to the check-off of union dues and assessments. Hours for bus operators to be as close as possible to 9 hours per day, but may not exceed 10 hours, to be completed within 11 consecutive hours, where possible; for all employees other than operators, 48 per week. Hourly wage rates for bus operators, from 55 cents during first six months' service to 70 cents after two years' service; overtime for bus operators 20 cents per hour for all work over 10 hours in a day. Hourly wage rates for shop and maintenance men: licensed motor mechanics 80 cents, helpers 72 cents, trouble shooter and air mechanic 75 cents, service men 64 cents, washers and cleaners 65 cents, machinist and toolmaker 82 cents, electrician and general maintenance man 80 cents, welder 75 cents; overtime to be paid at 30 cents per hour extra. Apprentices from 30

cents during first six months to 50 cents during second half of third year. Provision is made for seniority rights, one week's vacation with pay and for arbitration of disputes.

PORT ARTHUR, ONTARIO.—PUBLIC UTILITIES COMMISSION OF PORT ARTHUR AND AMALGAMATED ASSOCIATION OF STREET, ELECTRIC RAILWAY EMPLOYEES, DIVISION 966.

Agreement in effect May 1, 1941, to May 1, 1942, and thereafter from year to year, subject to notice.

Hours, 48 per week as nearly as possible for car operators, 44 for car house and trackmen. Hourly wage rates for two-man car operators, from 45 cents during first six months' service to 54½ cents after one year; for one-man car operators, from 52½ cents during first six months' service to 62 cents after one year. Hourly wage rates: carpenter, painter, machinist and blacksmith 65 cents, pitmen 57 and 62 cents, car cleaners 50 cents, track bonder 53 cents, trackmen 51 cents. A cost of living bonus of $1.25 per week for each 5 per cent rise in cost of living since August, 1939. Provision is made for seniority rights, one week's vacation with pay, ten days sick leave with pay if employee has been absent through illness for 20 consecutive days in the same year and for settlement of disputes.

FORT WILLIAM, ONTARIO.—CITY OF FORT WILLIAM AND AMALGAMATED ASSOCIATION OF STREET, ELECTRIC RAILWAY EMPLOYEES, DIVISION 966.

Agreement in effect May 1, 1941, to April 30, 1942 and till a new agreement is made. This agreement is similar to that noted above between the same local and the Port Arthur Public Utilities, with the exception of the following hourly basic wage rates: painters 61 cents, pitmen 55 and 60 cents, track bonder 51 cents, trackmen 49 cents.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND MOTORMEN, CONDUCTORS AND BUSMEN EMPLOYED BY THEM.

Agreement in effect May 1, 1941, to April 30, 1942, and thereafter from year to year, subject to notice. No discrimination on account of employees being or not being union members. Hours: runs to be as nearly as possible a 7-hour day; overtime at time and one-half for all work over 7⅞ hours in any day. Hourly wage rates, effective from April 1, 1941: two-man car operators 51 cents during first six months' service to 59 cents after 18 months' service; one-man car operators and busmen 5 cents per hour extra; for work on Sunday, 5 cents per hour over the week-day rates. Provision is made for seniority rights, two weeks' vacation with pay, and for the settlement of grievances.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND MECHANICAL DEPARTMENT EMPLOYEES.

Agreement in effect May 1, 1941, to April 30, 1942, and thereafter from year to year, subject to notice. No discrimination on account of employees being or not being union members. Hours: in car house section, 48 per week, but not more than 88 hours in a two week period; in shops section, 44 per week; overtime and all work on Sundays and Dominion holidays, time and one-half. Hourly wage rates, effective from April 1, 1941: machinists, blacksmiths, welders, carpenters, pipefitters, wiremen, etc., 74 cents; wheelmen, electric repairmen, motor inspectors, 63½ cents; oilers, pitmen, 57 cents; motor repairmen, mechanics' helpers, etc., 55 cents; general helpers 45 cents; apprentices from 28 cents during first six months to 68 cents during second half of fifth year. Provision is made for seniority rights, apprentice regulations, two weeks' vacation with pay, and for the settlement of grievances.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND MOTOR BUS AND TRUCK DEPARTMENT EMPLOYEES.

Agreement in effect June 1, 1941, to April 30, 1942, and thereafter from year to year, subject to notice. No discrimination on account of employees being or not being union members. REGINA, SASKATCHEWAN.—CITY OF REGINA AND AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES, DIVISION 588.

Certain hourly wage rates effective since April 1, 1941, under this agreement are: motor conductors from 51½ cents during first six months' service to 67 cents after second year; machinist and welder 71 cents; machinist, carpenter, painter and blacksmith 68 cents, car cleaners 53 cents, linemen 73 cents, trackmen 52 cents.

BRITISH COLUMBIA ELECTRIC RAILWAY COMPANY, LTD. AND AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES, DIVISIONS 101 (VANCOUVER), 134 (NEW WESTMINSTER) AND 109 (VICTORIA).

Agreement in effect from March 1, 1941, to February 28, 1944, and thereafter, subject to notice.

City and Suburban Lines.—Hours for motormen and conductors: 8 per day as nearly as possible with every sixth day off; overtime

payable after 8⅓ hours' work, at time and one-half for first hour, and double time thereafter. For motor bus operators (mainland), time and one-half payable for all time on regular runs over 8⅓ hours, time and one-quarter for all work on Sundays. Hourly wage rates: motormen and conductors from 59 cents during first six months to 69 cents after 18 months' service; one man car operators 75 cents; motor bus operators (mainland), 75 cents.

Interurban Lines.—Hours: 8 per day, with five days off per month; overtime at time and one-half for work per 8¼ hours in case of passenger runs and over 8 hours in case of freight or work train runs, with double time for any work over 16 hours; time and one-quarter for all work on Sundays. Hourly wage rates: for passenger motormen and conductors, from 59 cents during first six months' service to 71 cents after 18 months; for freight motormen and conductors, from 62 cents during first six months' service to 73½ cents after 18 months; for passenger brakemen, from 59 cents during first six months' service to 68 cents after 18 months; for freight brakemen 69 cents, trolleymen 67 cents.

Shop and Barn Departments.—Hours, 44 per week, with overtime payable at time and one-half for first five hours and double time thereafter; time and one-half for all work on Saturday afternoon, Sundays and holidays. Hourly wage rates: motor car and freight car repairers from 62 cents during first six months' service to 72 cents after 18 months; mechanics' helpers 57½ to 67½ cents; car cleaners 52 and 58 cents; painters and carpenters 78½ cents, machinists and blacksmiths 81 cents; apprentices from 38 cents during first year to 53 cents in fourth year; freight shed checkers 63 cents; freight shed truckers 60½ cents.

Track Maintenance.—Hours: 44 per week; overtime at time and one-half; all work on Saturday afternons, Sundays and holidays, time and one half. Hourly wage rates: 51½ cents for first three months and 56 cents thereafter on interurban lines; 55½ cents for first three months and 60 cents thereafter on city and suburban lines; track welders 74½ cents, blacksmith 79 cents, yard men (Vancouver), 58½ cents.

Freight and Baggageroom.—Hours: 8 per day; overtime at time and one-half to 10 p.m.; all other overtime and all work on Sundays and holidays, double time. Monthly wage rates for baggageroom men: $138.90 at Vancouver, $134.40 at New Westminster.

Station Agents.—Hours: 10 per day for 6 days per week; on Sundays one-half hour for attendance on each regular passenger or express train; two whole days off per month. Overtime at time and one-half. Monthly wage rates for station agents: $140.40 and $158.40, with free house, fuel and light.

Garagemen at New Westminster.—Hours 48 per week; time and one-half for overtime. Hourly wage rates: mechanics 69 and 78 cents.

General.—All wage rates are subject to a bonus of 2½ cents per hour for every 5 per cent increase in the cost of living over the March, 1941 level. All employees to be union members. Provision is made for seniority rights, two weeks' vacation with pay and the settlement of grievances.

Collective Agreement Act, Quebec

The following agreements and amendments of agreements have recently been made obligatory by Orders in Council and are summarized in the next article:—

- Bakers and Bakery Salesmen, Montreal (amendment)
- Work Glove Operators and Blockers, Province of Quebec (amendment)
- Fine Glove Manufacturing Industry, Province of Quebec (amendment)
- Textile and Jute Bag Manufacturing, Montreal (amendment)
- Can and Metal Container Manufacturing Industry, Province of Quebec (amendment)
- Paint Manufacturing Industry, Province of Quebec (amendment)
- Funeral Undertakers, Montreal (amendment)

COLLECTIVE AGREEMENT ACT, QUEBEC

Recent Proceedings under the Act

THE Collective Agreement Act was assented to June 22, 1940, and was summarized in the LABOUR GAZETTE, August, 1940, page 812. It replaces the Collective Labour Agreements Act, 1938. Agreements and regulations under the "Collective Labour Agreements Act," the "Act respecting Workmen's Wages" and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Agreement Act, any party to a collective agreement made betwen the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act made obligatory on all employers and employees in the trade, industry, commerce or occupation throughout the province or within the district determined in

the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date the Order in Council is adopted. The Order in Council may be amended or revoked by a further Order in Council on the recommendation of the Minister of Labour after consulting the parties to the agreement and after the required notice has been published in the *Quebec Official Gazette*. A parity committee (formerly called a joint committee) must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and noted in the *Quebec Official Gazette,* the committee is constituted a corporation. A parity committee may require certificates of competency from workers within the scope of the agreement and such by-laws must be approved by Order in Council and published in the *Quebec Official Gazette*. Proceedings under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues from May, 1938, to July, 1940. Proceedings under the Collective Agreement Act are noted in the issues beginning August, 1940.

Recent proceedings under the Act include the amendment of eight agreements, as noted below. Requests for the amendment of the agreements governing the paper box (corrugated paper) manufacturing industry throughout the province, building trades at Montreal were published in the *Quebec Official Gazette,* December 6; another amendment to the paper box (corrugated paper) manufacturing industry, an amendment to the dress manufacturing industry throughout the province, in the issue of December 13; clerks and accountants at Jonquière and Kenogami, in the issue of December 20. In addition, Orders in Council were published in the *Quebec Official Gazette* during December, approving or amending the constitution and by-laws of certain parity committees and others approving the levying of assessments by certain parity committees.

Manufacturing: Vegetable foods, etc.

BAKERS AND BAKERY SALESMEN, MONTREAL.—An Order in Council, dated December 4, and published in the *Quebec Official Gazette,* December 6, extends the terms of the agreement (LABOUR GAZETTE, October, 1939, page 1064, September, 1940, page 970, January, 1941, page 70, and February, page 183) to March 31, 1942.

Manufacturing: Fur and Leather Products

WORK GLOVE OPERATORS AND BLOCKERS, PROVINCE OF QUEBEC.—An Order in Council, dated December 4, and published in the *Quebec Official Gazette,* December 6, extends the terms of this agreement (LABOUR GAZETTE, September, 1940, page 971, March, 1941, page 333, and October, page 1314) to December 31, 1942.

FINE GLOVE MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, dated December 4, and published in the *Quebec Official Gazette,* December 6, extends the terms of this agreement (LABOUR GAZETTE, April, 1941, page 472, July, page 854, and October, page 1314) to December 31, 1942.

Manufacturing: Textiles and Clothing

TEXTILE AND JUTE BAG MANUFACTURING, MONTREAL.—An Order in Council, dated December 19, and published in the *Quebec Official Gazette,* December 27, extends the terms of this agreement (LABOUR GAZETTE, May, 1939, page 527, March, 1940, page 282, June, 1940, page 608 and February, 1941, page 183) to December 31, 1942.

Manufacturing: Metal Products

CAN AND METAL CONTAINER MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, dated December 18, and published in the *Quebec Official Gazette,* December 27, extends the terms of this agreement (LABOUR GAZETTE, May, 1940, page 496, June, page 608, July, page 730, January, 1941, page 70, and May, page 593) to December 31, 1942.

Manufacturing: Non-Metallic Minerals, Chemicals, Etc.

PAINT MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, dated December 19, and published in the *Quebec Official Gazette,* December 27, extends the terms of this agreement (LABOUR GAZETTE, March, 1940, page 282) to February 28, 1942.

Service: Business and Personal

FUNERAL UNDERTAKERS, MONTREAL.—An Order in Council, dated December 9, and published in the *Quebec Official Gazette,* December 27, extends the terms of this agreement (LABOUR GAZETTE, June, 1940, page 610, May, 1941, page 593, October, page 1316 and November, page 1426) from January 4, 1942, for a period of 60 days.

PRICES, RETAIL AND WHOLESALE, IN CANADA, DECEMBER, 1941

Cost of Living, Prices of Staple Articles and Index Numbers

THE official index number of the cost of living in Canada, calculated by the Dominion Bureau of Statistics on the base period 1935 to 1939 as 100 declined from 116·3 at November 1 to 115·8 at December 1. The decrease was due almost entirely to a decline in the food group from 125·4 to 123·8. The clothing group was fractionally lower while other principal groups were unchanged. The decline in the food group was due to lower prices for eggs, meats and fresh fruits while the prices of butter and fresh vegetables advanced. Comparative figures for the total index at certain dates are, 115·8 at December 1, 1941; 116·3 at November 1; 108·0 at December 2, 1940; and 100·8 at August 1, 1939.

After adjustment to the base 100·0 for August, 1939, the increase in the cost of living as indicated by the index at December 1 was 14·9 points.

Foods advanced 24·7 per cent between August, 1939, and December, 1941; clothing 19·8 per cent; home furnishings and services 16·8 per cent; fuel and light 13·8 per cent; rent 7·1 per cent; and miscellaneous 5·3 per cent.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, the Order having been amended to change the effective date from November 17 to December 1. The text of P.C. 8527 which appeared in the LABOUR GAZETTE for November on page 1371 provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, except under the regulations of the Wartime Prices and Trade Board. In the LABOUR GAZETTE for December on pages 1498 to 1501 under the title "Stabilization of Prices in Canada" there appears an outline of the measures taken by the Board. Prices of fresh fruits and vegetables, furs and certain kinds of fresh, cured and canned fish have been exempted by the Board from the provisions of the maximum prices regulations. The order does not apply to sales by farmers and fishermen to dealers or processors of live stock, poultry, eggs, milk, cream, dairy butter, farm made cheese, honey, maple syrup and fish but does apply to sales by such dealers and processors and to sales by farmers and fishermen to consumers. On December 19 the Board announced that an increase in the price of milk by one cent per quart might be authorized in certain areas and under specified conditions. Authorization for similarly limited increases in retail prices of some kinds of tea in certain provinces, by amounts up to five cents per pound, was announced on January 16.

The index number of the cost of living was constructed on the basis of a survey of expenditure of 1,439 families of wage-earners and salaried workers with earnings between $450 and $2,500 in 1938. The average expenditure was $1,453.90 divided as follows: food (31·3 per cent), $443; shelter (19·1 per cent), $269.50; fuel and light (6·4 per cent), $90.50; clothing (11·7 per cent), $165.80; home furnishings (8·9 per cent), $125.70; miscellaneous (22·6 per cent), $319.40.

The last named group includes health (4·3 per cent), $60.80; personal care (1·7 per cent), $23.90; transportation (5·6 per cent), $79.30; recreation (5·8 per cent), $82.10; life insurance (5·2 per cent), $73.30. Other expenditure not directly represented in the index was $40.

The Dominion Bureau of Statistics has issued an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. The figures at certain dates since August, 1939, are: August, 1939, 100·0; September, 100·0; October, 103·8; November, 104·3; December, 104·3; January, 1940, 104·2; February, 104·3; March, 105·5; April, 105·5; May, 105·3; June, 105·3; July, 106·4; August, 106·8; September, 107·9; October, 108·4; November, 109·7; December, 110·0; January, 1941, 110·4; February, 110·1; March, 110·2; April, 110·7; May, 110·9; June, 112·7; July, 114·9; August, 117·7; September, 119·4; October, 120·1; November, 121·4; December, 120·6.

Wholesale Prices

The Dominion Bureau of Statistics weekly index of wholesale prices on the base of 1926 as 100 was 93·8 for the week ended December 26 as compared with 93·9 for the week ended November 28, 94·0 for the week ended November 7 and 93·3 for that ended October 3. The slight decline recorded during December reflected substantial decline in the prices of lard and eggs and smaller declines in the prices of furs, cheese, cotton fabrics and cedar lumber which more than offset increases in the prices of grains, flour, potatoes, fish, live stock, fresh meats, raw cotton, carpets, spruce and hemlock lumber, and coal.

Comparative figures for the general index at certain dates are 93·8 for the week ended December 26, 93·9 for the week ended November 28; 94·0 for the month of November; 84·2 for December, 1940; and 72·3 for

August, 1939. The increase in the index during the year was 11·4 per cent and since the outbreak of war was about 30 per cent. The index of the prices of Canadian farm products advanced 11·3 per cent during 1941 and 27·9 per cent since the outbreak of war. Consumers' goods advanced 33 per cent between August, 1939, and November, 1941, the latest date for which the group figures are available and producers' goods 28 per cent during the same period.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of December of seventy-six staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except the following are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers; milk, bread, shoulder of veal, leg roast of pork, unsliced bacon, dairy

butter, evaporated apples, vinegar and coal oil. Information as to the prices of the foregoing with the exception of milk and bread is obtained by the correspondents of the LABOUR GAZETTE. The prices of milk, bread, fuel and the rates for rent are obtained by the Bureau of Statistics and by the correspondents of the LABOUR GAZETTE.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

By Order in Council P.C. 8965, dated November 21, 1941 (LABOUR GAZETTE, December, 1941, page 1462) the price ceiling established by P.C. 8527 (LABOUR GAZETTE, November, 1941, page 1371) was extended to rentals charged for all real property, the order to be administered by the Wartime Prices and Trade Board. Under authority conferred by Order in Council P.C. 5003 (LABOUR GAZETTE, October, 1940, page 995), the Board from time to time fixed maximum rentals for housing accommodation in certain of the cities in the list on page 120. In these cities the maximum rentals already fixed continue unchanged, based in some cases on those in effect on January 2, 1940, and in the others on those in effect on January 2, 1941. The former are Halifax, New Glasgow, Sydney, Thetford Mines, Kingston, Ottawa, Windsor, Brandon, Calgary, Nanaimo, New Westminster, Prince Rupert, Vancouver, and Victoria; the latter are Truro, Moncton, Brockville, Belleville, Fort William, Hamilton, Niagara Falls, Oshawa, Peterborough, Port Arthur, St. Catharines, Sault Ste. Marie, Regina, Edmonton, Medicine Hat, and Lethbridge. In all the other cities in the list the maximum rental for any housing accommodation is the rental which was in effect on October 11, 1941.

Retail Prices

Retail prices of meats again averaged lower at December 1 than one month earlier continuing the slightly downward movement which commenced in November. Prices were substantially higher than at the beginning of December, 1940. Sirloin steak averaged 33·8 cents per pound at December 1, 34·2 at November 1 and 29·9 cents at December 1, 1940; lamb averaged 31·1 cents per pound at December 1; 31·3 cents at November 1; and 27·2 cents at December 1, 1940; and fresh loin of pork 32·7 cents per pound for December, 32·8 for the previous month and 24·5 cents for December, 1940. Bacon averaged 43·1 cents per pound for December, 43·4 cents for November and 32·2 cents for December, 1940. The price of lard at 17·1 cents per pound was 1 cent per pound lower at December 1, than for the previous month as compared with 10·5 cents for December 1, 1940. The price of fresh eggs at 47·4 cents per dozen was nearly 4 cents per dozen lower than at November 1. The price at December 1, 1940, was 46·2 cents per dozen. Production increased during the month under review and storage stocks while showing substantial reduction at December 1, from the previous month were slightly greater than at December 1, 1940. The price of creamery butter at December 1 averaged 38·5 cents per pound, 37·5 cents at November 1 and 39·3 cents at October 1. Production during November decreased about 40 per cent as compared with the previous month but was about the same as for November, 1940. Stocks in storage at December 1 were about one-sixth smaller than at November 1 but were more than 25 per cent greater than at December 1, 1940. The price of cheese at 36·5 cents per pound was unchanged from the previous month following increases month by month during the last year. The average price at December 1, 1940 was 23·4 cents per pound. Production of cheese during November while showing a substantial seasonal fall as compared with October was considerably greater than during November, 1940. The average price of flour at 3·6 cents per pound has been unchanged since September. The price of potatoes at 29·4 cents for 15 pounds at December was little changed during recent months as compared with 25·6 cents at December 1, 1940.

The following are the prices reported for Welsh coal, "cobbles" and "French nut" at the beginning of December, 1941; Halifax, $18.25; Charlottetown, $17.60; Moncton, $18.50; Quebec, $16.50; Three Rivers, $16.50; Sherbrooke, $18.75; St. Hyacinthe, $17.50; Montreal, $17.75; Ottawa, $18.50; Kingston, $18.50; Belleville, $18.50; Oshawa, $18; Toronto, $16; St. Catharines, $18; Hamilton, $17.50; Brantford, $17.75; Galt, $17.50; Cobalt, $22.

† The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡ For the week ended December 26, 1941, monthly figures not yet available.

* Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices, in Great Britain and certain of the principal industrial and commercial countries appeared in the October, 1941, issue of the LABOUR GAZETTE. Since these monthly notes are all compiled from British and foreign sources, the information contained therein usually deals with conditions prevailing some months previous to the date of publication in the LABOUR GAZETTE. In Great Britain both wholesale and retail trade are now subject to government control, the main objects of which are to conserve supplies of vital materials and to protect the public from unwarranted increases in prices. In order to achieve these ends the government of the United Kingdom has fixed retail and wholesale prices of some articles and is controlling the entire trade in some commodities, including importation and exportation.

Great Britain

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930 = 100 was 155·2 for November, an increase of 0·4 per cent over the October level. Food prices rose 0·7 per cent, due chiefly to an advance of 1·8 per cent in the cereals group. Very slight increases were recorded in most of the industrial materials and manufactures groups.

COST OF LIVING.—The index number of the *Ministry of Labour Gazette*, on the base July, 1914 = 100, was 200 at November 1, an increase of one-half of one per cent for the month, due to advances of from one to two per cent in

clothing prices; other groups were unchanged from the previous month's level.

South Africa

COST OF LIVING.—The index number of the Census and Statistics Office, on the base 1938 = 1000, was 1096 for October, an increase of 0·5 per cent for the month.

India

WHOLESALE PRICES.—The index number of the Labour Office, Government of Bombay, on the base July, 1914 = 100, was 140 in July, an increase of 10 per cent for the month. As compared with the previous month, cereals were 10 per cent higher, pulses 11 per cent, cotton manufactures 18 per cent and metals 23 per cent.

COST OF LIVING.—The official index number for cost of living, Bombay, on the base July, 1933, to June, 1934 = 100, was 126 for July, an increase of 3 per cent for the month.

United States

WHOLESALE PRICES.—The index number of the Bureau of Labor Statistics, on the base 1926 = 100, was 92·5 for November, an increase of 0·1 per cent. Very small increases were recorded in all groups except fuel and lighting materials which were 0·8 per cent lower than the October level.

COST OF LIVING.—The Bureau of Labor Statistics index number, on the base 1935-1939 = 100, was 110·2 at November 15, an increase of 0·7 per cent for the month. Food prices rose 1·3 per cent, clothing 1·4 per cent, rent 0·4 per cent, housefurnishings 0·8 per cent and miscellaneous commodities 0·1 per cent.

The index number of the National Industrial Conference Board, on the base 1923 = 100, was 92·9 for November, an increase of one per cent for the month. The food and the clothing groups each advanced 1·7 per cent over the October level, with only fractional increases in the other groups.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Ontario Court of Appeal Reverses Decision granting Damages to Labourer Injured while Operating Saw Machine.

On November 6, the Ontario Court of Appeal allowed with costs an appeal by the defendant from a judgment of Mr. Justice Roach of the Ontario High Court of Justice granting damages of $4,000 to a workman who suffered an injury resulting in the loss of a leg when, in the course of his employment, a fly-wheel on a sawing machine flew loose and struck him. (LABOUR GAZETTE, 1941, p. 722). The sawing machine was not owned by the defendant but by one Laidlaw who was employed by the defendant at an hourly rate to supply and operate the machine. The plaintiff was employed by the defendant to assist in the sawing. The trial Judge held that any liability there was rested on the defendant since Laidlaw was not an independent contractor merely by virtue of the fact that he supplied and operated the machine.

This finding was overruled by the Appeal Court. It was held that Laidlaw was in fact an independent contractor, and that the defendant was not responsible for machinery of which he was not owner and over which he had no control. Leave was reserved to the plaintiff to sue any person whom he conceived had done him an injustice. No written reasons were delivered. *Marshment* v. *Borgstrom (1941) 4 Dominion Law Reports 804.*

Hospital Employee not a Domestic Servant and therefore not Excluded from Part II of British Columbia Workmen's Compensation Act.

On December 8, Mr. Justice Fisher in the British Columbia Supreme Court awarded damages of $1,500 and costs to a cook-housekeeper employed in the hospital at Enderby who had suffered a severe injury during the course of her employment. The claim of the plaintiff husband for damages for loss of *consortium* was rejected on the ground that for nearly two years the wife had been absent from home, living in the hospital.

The injuries to the plaintiff resulted when a step on a stairway at the rear of the hospital gave way. The Court found, therefore, that they "were caused by reason of a 'defect in the condition....of the ways.... buildings, or premises connected with, intended for, or used in the business of [her] employer' within the meaning of such words as used in Part II of the Workmen's Compensation Act" applying to workers under the Act but outside the scope of the collective liability system. The defendant contended that the plaintiff was a domestic servant and the Act is expressly declared not to apply to domestic servants. The plaintiff's work consisted of cooking meals under the supervision of the matron and of carrying out certain household duties such as looking after stores and preserving fruits.

The Court held that, though there were difficulties in the case, "the duties of the female plaintiff and the circumstances here were such that her employment did not constitute her a domestic servant." *Bailey and Bailey* v. *Society of Enderby General Hospital Incorporated (1942) 1 Western Weekly Reports 28.*

Member of Board of Directors did Manual Work—Held to be Workmen under British Columbia Truck Act.

With Mr. Justice O'Halloran dissenting, the British Columbia Court of Appeal on December 12 dismissed an appeal from a decision of Sidney Smith, J., who had granted the respondent recovery in cash of a part of his wages, amounting to $1,505.75, which had been paid in shares of the appellant company. In May, 1933, the respondent had joined his father in incorporating the company, had acquired shares in it and become a director and also secretary. He had, however, done a great deal of manual work. He had entered into an agreement with his father whereby he received part of his wages in cash and part in shares. In the summer of 1940 he and his father severed connection with the company and the action was commenced in May, 1941.

The majority of the Court held that the respondent was a workman within the meaning of the Truck Act. The fact that he had assented to payment of part of his wages in shares or that he had voted as a shareholder and had been director and secretary of the company was immaterial, since the Act specifically prohibits the deduction from a workman's wages of any sum for shares in a company and declares illegal any contract made in contravention of the Act.

Mr. Justice O'Halloran, in giving reasons for his dissent, stated that the respondent was not in the same position as the workmen whom the Truck Act was designed to protect. To a workman as defined by the Act the success of a company is not a primary consideration. His concern is to do his job and receive adequate payment and he therefore should not have shares of uncertain prospect foisted on him. To the respondent, however, the success of the venture was a direct concern. Having this interest, it was not unnatural for him to accept part of his remuneration in shares, since he would wish to draw sparingly on the company's cash resources. In a small and struggling company, where administrative and clerical duties were small, a company officer would naturally help the company by doing considerable manual work and the varied nature of the tasks performed by the respondent indicated that his function was that of a company overseer, acting generally in the company's interests. In other words, manual labour was not his "real and substantial business". *Arnett* v. *Allouette Peat Products Limited (1942) 1 Western Weekly Reports 33.*

VOLUME XLII] FEBRUARY, 1942 [NUMBER 2

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

INDUSTRIAL employment at the beginning of December showed further expansion, continuing the steadily upward movement indicated since January, 1941. Although the increase was smaller than that reported in any immediately preceding month, it was of particular significance because it was contra-seasonal, declines having been recorded at December 1 in nineteen of the twenty earlier years for which data are available. The working forces of the 12,795 co-operating establishments aggregated 1,688,005 at December 1, compared with 1,675,645 at the beginning of November. The index (average 1926=100) rose from 167·6 in the preceding month, to 168·8 at December 1, as compared with 139·1 at the same date in 1940, previously the maximum for December in the period since 1920. At December 1 in recent years, the index has been as follows:—1939, 122·7; 1938, 114·0 and 1937, 121·6.

Since the increase in employment was contrary to the usual movement at December 1, the seasonally-adjusted index showed an advance, rising from 160·4 at November 1, 1941, to 164·8 at the beginning of December. These two figures, like the corresponding crude index numbers, are the highest in the record of twenty-one years.

The improvement in employment at December 1 was accompanied by a further rise in the weekly earnings of those on the staffs of the co-operating employers. The total amount of salaries and wages disbursed at December 1 for services rendered in the last week in November was $46,128,842, a gain of 1·9 per cent over the payments made by the same firms for the last week in October. The per capita average rose from $27.02 in the period of observation in October, to $27.33 in the final week in November.

Unemployment in Trade Unions.—At the beginning of January, 1942, the percentage of unemployment among local trade unions stood at 5·2 in contrast with percentages of 3·3 at the beginning of December and 7·4 at the beginning of January, 1941. The percentage for January was based on returns compiled from 2,100 labour organizations with a total membership of 321,314 persons.

Report of the Employment and Claims Offices.—Reports received by the Unemployment Insurance Commission from Employment and Claims Offices during the month of December, 1941, showed a decline from November, but a slight gain over December a year ago. In the first instance all industrial divisions, except logging, services and trade, recorded declines, the largest being in manufacturing, and construction and maintenance, while under the second comparison, substantial increases shown in manufacturing, services and logging, more than offset a very heavy loss in construction and maintenance and a moderate decline in farming. Vacancies in December, 1941, numbered 43,181, applications 58,020, and placements in regular and casual employment 37,943.

Prices and the Cost of Living.—The official index of the cost of living in Canada calculated by the Dominion Bureau of Statistics and based upon average prices in the period 1935 to 1939 as 100 was 115·4 at the beginning of January, 1942, as compared with 115·8 at the beginning of December, 1941; 108·3 for January 2, 1941; 103·8 for January 2, 1940; and 100·8 for August 1, 1939, the last prewar month. The advance between August, 1939, and January, 1942, was 14·5 per cent, as compared with an advance of 21·2 per cent between July 1914, and December 1916. In wholesale prices the weekly index number has been discontinued. On a monthly basis the index for January, 1942, was 94·3 as compared with 93·6 for December, 1941; 84·6 for January, 1941; 82·6 for January, 1940; and 72·3

Output of central electric stations, k.w.h.		3,220,800,000	3,183,982,000	2,634,695,000	2,584,341,000	2,524,860,000
Sales of insurance $		46,536,000	44,470,000	28,067,000	33,364,000	32,506,000
Newsprint production tons		300,820	300,310	261,300	252,900	282,340
Automobile prod., cars, trucks, etc.	21,751	20,313	21,545	23,195	23,355	23,621

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† Week ended January 29, 1942.

(1) Base, 1926=100. (2) Base, 1935–1939=100. (3) Figures are for the end of the preceding month. (4) Adjusted for number of business days and seasonal variation. (5) Tentative computation. (6) Adjusted where necessary for seasonal variation. (7) Excluding gold. (8) Sum of Bank of Canada and Chartered Bank notes in circulation minus the holdings of Chartered banks. (9) Figures for four weeks ended January 31, 1942 and corresponding previous periods. (10) MacLean's Building Review. (11) Sugar production given in periods of 4 weeks ending December 27, November 29 and January 25, 1941; December 31, and November 30, 1940.

for August, 1939, prewar. The advance between August, 1939, and January, 1941, was 30·4 per cent and between July, 1914, and December, 1916, (the similar period during the first great war) was 48·8 per cent.

Business Statistics.—The table on page 126 shows the latest statistics available reflecting industrial conditions in Canada. The national income stated to be the most comprehensive measure of productive activity was higher in December, 1941, than in any other month and for the year was about 9 per cent greater than for 1940. The index of the physical volume of business reflecting activity in mining, manufacturing, construction, electric power production, and in distribution of goods was 138·3 for December, 1941; 131·7 for November, 1941; 128·3 for December, 1940, and 109·3 for August 1939. The average for 1941, was about 11 per cent higher than for 1940, and about 30 per cent higher than for 1939. All of the above named principal groups recorded advance in December, both as compared with the previous month and with December, 1940, with the exception of mineral production the index of which was slightly lower in December than in November.

The production of coal during 1941, was 17·9 millions of tons as compared with 17·2 millions in 1940.

The index of the manufacturing group was two per cent higher in December than in November and seven per cent higher than in December, 1940. Cumulative figures for the year 1941 in some of the important divisions of this group show flour production 26 per cent higher than for 1940; footwear (11 months) 24 per cent higher; steel production 20 per cent higher; automobiles and trucks 21 per cent higher; cigarettes released (11 months) 12 per cent greater; and hog slaughtering (11 months) 15 per cent greater. Newsprint production was slightly lower in the same comparison and lumber exports were seven per cent lower.

The output of electric power in December was the greatest on record and the adjusted index was 27 per cent higher than for December 1940. Total production for 1941, the largest recorded, was 11·2 per cent higher than in 1940 and about 18 per cent higher than in 1939.

The value of construction contracts awarded in 1941, was $394 millions as compared with $346 millions in 1940 and $187 millions in 1939.

The index indicating the volume of goods distributed was 6 per cent higher in December 1941 than in November, 1941, and 11 per cent higher than in December 1940, the figures for carloadings, imports and exports each showing advance in both comparisons. The number of cars of revenue freight in 1941, was 13 per cent greater than in 1940; the value of imports was 34 per cent greater and of exports 37 per cent greater.

Strikes and Lockouts.—In January the number of strikes and lockouts on record was 13, involving 2,715 workers, causing time loss of 46,606 man working days, as compared with 11 disputes in December, involving 5,718 workers with time loss of 54,945 days. In both of these months the strike of gold miners at Kirkland Lake, Ontario, accounted for a large part of the workers involved and the time loss. During January, 1941, there were 10 disputes, involving 1,453 workers with time loss of 3,238 days. The noteworthy disputes involved coal miners at Sydney Mines, N.S., and hotel waiters at Vancouver, B.C.

Of the 13 disputes during January of this year, 12 were terminated, three in favour of the employers, one in favour of the workers, one was partially successful, five were compromise settlements; while two were indefinite in result. One dispute, involving 2,000 workers, was recorded as unterminated at the end of the month.

These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or declared terminated by the unions concerned.

Industrial Disputes Investigation Act

Four applications for the establishment of Boards of Conciliation and Investigation were received during the month of January and one board was established. Four boards submitted their reports.

Full particulars with regard to recent proceedings under the Industrial Disputes Investigation Act will be found in the section beginning on page 133.

Industrial Disputes Inquiry Commissioners appointed

The Honourable Humphrey Mitchell, Minister of Labour, recently announced the appointment of four Industrial Disputes Inquiry Commissioners, as follows:

F. E. Harrison, Western Representative of the Dominion Department of Labour, Vancouver, B.C.;

Louis Fine, Chief Conciliation Officer of the Ontario Department of Labour, Toronto, Ont.;

Bernard Rose, K.C., Montreal, P.Q.; and

H. R. Pettigrove, Labour Relations Officer of the Dominion Department of Labour, Fredericton, N.B.

The Commissioners have been appointed pursuant to the provisions of Order in Council P.C. 4020, dated June 6, 1941, as amended by Orders in Council P.C. 4844, dated July 2,

1941, and P.C. 7068, dated September 10, 1941, and under the authority of the War Measures Act, Chap. 206, R.S.C., 1927.

The Minister of Labour may authorize an Industrial Disputes Inquiry Commissioner to investigate any dispute falling within the scope of the Industrial Disputes Investigation Act wherein a cessation of work exists or appears imminent whether or not an application has been made for the establishment of a Board of Conciliation and Investigation. It is the duty of the Commissioner to endeavour to effect a mutually satisfactory adjustment of the dispute, and, failing this, to report to the Minister of Labour on the matters at issue and to advise the Minister, whether in his opinion, the circumstances warrant the establishment of a Board of Conciliation and Investigation.

The Minister of Labour is also empowered to direct an Industrial Disputes Inquiry Commissioner to investigate any alleged unjust dismissal, discrimination, coercion or intimidation in connection with trade union membership or activity and, failing an adjustment of the complaint, to report his findings and recommendations to the Minister, who shall then issue whatever order he deems necessary to give effect to such recommendations.

Cost-of-living bonuses February 15-May 15

The National War Labour Board has announced that there will be no change in cost-of-living bonuses for at least another three months.

The cost-of-living index number for January, 1942, issued by the Dominion Bureau of Statistics shows a fall of one-tenth of one point from the index for October, therefore the National War Labour Board has ordered that for the three-month period February 15 to May 15 there will be no increase or decrease in the amounts of any cost-of-living bonuses now being paid by employers who are subject to the Wartime Wages and Cost of Living Bonus Order (P.C. 8253).

Under the terms of this Order the Board is required to announce at the end of each three-month period the amount by which bonuses are to be changed. The change is to be based on the rise or fall in the adjusted cost-of-living index (August 1939=100) as determined by the index number published by the Dominion Bureau of Statistics. However, adjustments are to be made only if the rise or fall in the index number amounts to one whole point or more. The next quarterly announcement of the National War Labour Board will show the amount of the change to be made, if any, in cost-of-living bonuses for the first payroll period beginning on or after May 15 next.

It was pointed out on behalf of the Board that the Wartime Wages and Cost-of-Living Bonus Order, with the administration of which the National and the nine provincial Regional Boards are charged, provides that employers who have not been paying any cost-of-living bonus shall pay a bonus only to meet the rise in the cost of living as indicated by the index number after October, 1941. However, this does not preclude an adjustment to the index number of an earlier month in a particular case and payment of the bonus accordingly if permission has been granted by a War Labour Board. No rise having occurred, a bonus cannot be paid by these employers without such permission.

Policy in regard to Japanese Nationals in Canada

The situation in regard to Japanese nationals in Canada was reviewed in the House of Commons on February 9 by the Prime Minister, Rt. Hon. W. L. Mackenzie King.

The Prime Minister pointed out that the Japanese problem had received the closest attention during the past four years, and that when Japan joined the Axis in September, 1940, a special standing committee was appointed by the Government to investigate and report upon the matter from the standpoint of national security.

This committee recommended re-registration of the Japanese population of British Columbia, which had practically been completed when the war with Japan commenced. To determine the policy to be followed under war conditions, the committee convened in Ottawa on January 8 under the chairmanship of Hon. Ian Mackenzie, Minister of Pensions and National Health, and recommended the following policy as summarized in the Prime Minister's statement:

Persons of Japanese race, who are Canadians either by birth or by naturalization, and Japanese nationals resident in Canada will be justly treated. Their persons and property will receive the full protection of the law. No action will be taken which would give any excuse for the ill-treatment of Canadians under the control of Japan. Nor will action be permitted which might give Japan an excuse to inflame Asiatic hostility against the white race. Canadian policies will march in step with those of Britain and the United States.

As specific measures, all persons of Japanese race will be removed from fishing boats and other vessels for the duration of the war. For the same period the sale of gasoline and explosives to persons of Japanese race will be controlled by the Royal Canadian Mounted Police. Japanese nationals have been forbid-

den to possess or use short-wave receiving sets, radio transmitters and cameras. Their present surveillance by the Royal Canadian Mounted Police—similar to that successfully exercised over German and Italian nationals—will be continued.

For Canadians of Japanese race who are anxious to serve Canada, a civilian corps is being formed to be used on projects that will contribute to the national war effort.

Enemy aliens, whether nationals of Japan or of Germany or of Italy, will be required to leave the protected area on the coast of British Columbia. Permits to remain may be granted by the Royal Canadian Mounted Police. For the time being, permits will normally be granted to women and children and to men who are unfit. Those required to leave may be placed in normal employment, if it can be found for them, outside the protected area. They will, of course, be under the usual police surveillance over enemy aliens.

A commission has been set up to arrange for the sale, lease, requisition or charter of fishing vessels with a view to ensuring the sustained productivity of the fishing industry in British Columbia, and fairness to Canadians of Japanese race who own or have an interest in such vessels.

The defence area from which enemy aliens must withdraw has been defined by the Minister of National Defence (Mr. Ralston) and the Minister of Justice. The placing or employment of enemy aliens is being arranged by the Department of Labour through the unemployment insurance commission. The civilian corps is also being organized by the Department of Labour. A committee of the cabinet, consisting of the Minister of Pensions and National Health, the Minister of Labour and the Minister of Agriculture, has been entrusted with a general supervision of the programme. This committee will recommend to the government from time to time such further action as may be necessary.

Bulletins on "Training for War Industry"

A series of four bulletins is in the course of preparation and publication by the Training Branch of the Department of Labour, outlining the various training methods being followed in meeting the increasing demands for skilled and semi-skilled labour in Canada's war industries.

Two bulletins have already been published. Bulletin No. 1 deals with the subject in general and informs employers concerning the facilities at their disposal in the matter of pre-employment training.

Bulletin No. 2 deals with apprenticeship training and is intended particularly for the information of employers. It gives a detailed description of four typical apprenticeship plans which are now in use and have proven satisfactory; it also contains two typical forms of indenture.

Bulletin No. 3, which is in the course of being printed, deals with the training in industrial plant schools and gives details concerning the operation of certain plant schools by large Canadian companies.

Bulletin No. 4, which is being prepared, will deal with the subject of up-grading and training on the job.

As pointed out in Bulletin No. 2, the Dominion Department of Labour is prepared to assist any employer engaged on war production in the formulation of an apprenticeship plan. With this objective, the Department has obtained the co-operation and assistance of a number of experts who are actively engaged in industrial training and personnel work. These have agreed to act as local advisers to firms desiring assistance, either in the formulation of a new plan of apprentice training, or in specific problems developing from any plan already established. Requests for such service and for copies of the above-mentioned bulletins should be directed to the Supervisor of Training, Department of Labour, Ottawa.

Old age pensions increased in British Columbia

On January 23, when the 1942-43 Budget for the Province of British Columbia was introduced in the Provincial Legislature by the Hon. John Hart, it was indicated that old age pensions were to be increased from $20 to $25 monthly.

U.S. program of assistance for workers displaced by war priorities

It was recently announced by the United States Federal Security Administrator, that President Roosevelt on January 19 had approved a budget estimate of $300,000,000 for weekly unemployment-benefit payments to workers displaced in private industry while the plants are being adapted to war production.

The benefit plan, still to be put in the form of a bill, would provide a maximum of $24 a week for 26 weeks to an estimated 4,000,000 unemployed persons. The Federal Government would contribute the whole $24 in instances in which workers are not receiving State unemployment compensation. If workers do receive such State aid, the Government will make up the difference. Workers receiving the benefits would be required to enter a 26-week training course for war industry under the plan.

U.S. Secretary of Labour on relaxation of labour standards

In a formal statement issued recently, Miss Frances Perkins, United States Secretary of Labour, dealt with the position of state labour laws and regulations in their relationship to the exigencies of war production.

Miss Perkins said that the sole test of labour standards under the government's "all-

out program of production" must be "the effect on the efficiency of the individual for top war production."

While declaring that labour standards "must be relaxed if and when necessary for total war production," the statement, which was endorsed by the War and Navy departments, emphasized "that there must be vigilance to prevent any unnecessary abrogation or suspension of labour laws and regulations" and that "social gains not inconsistent with war needs must be preserved."

Almost simultaneously with the release of the Secretary's statement, Governor Lehman of New York signed a bill giving the State Industrial Commissioner authority to suspend labour regulations hampering production, and Senator Reed of Kansas introduced a bill in the United States Senate to modify the overtime provisions of the Fair Labour Standards Act for the duration of the war. The bill, which was referred to the Senate Labour Committee, would permit employment up to forty-eight hours a week without payment of overtime rates.

Regularization of dock labour in Britain

A plan to ensure an adequate, regular and mobile labour force for the speeding of port clearances has been worked out in Great Britain by the National Joint Council for Dock Labour, at the request of the Ministry of Labour and National Service and the Ministry of Transport. The National Joint Council was established in 1920 by the employers and the Transport and General Workers' Union. The new project virtually achieves the decasualization of dock labour by providing continuous employment and a guaranteed weekly wage.

The scheme was made legally effective by the Essential Work (Dock Labour) Order of September 15, 1941, setting forth conditions of employment to be written into individual dock labour schemes drawn up for each port covered by the order.

To administer and finance the scheme, the National Joint Council has set up a National Dock Labour Corporation composed of three employer and three worker representatives appointed by the Council, and a chairman and finance member appointed by the Minister of Labour. The Corporation will maintain a national management fund made up of contributions from employers and underwritten by the Exchequer. Dock labourers covered by the scheme will be paid regular piece rates when working for a port transport employer. When without work they will be paid by the Corporation 5s. a half day for a maximum of eleven half days a week. Workers in the pay of the Corporation form a reserve pool. They must report regularly for work and can be required to travel to another port, and to accept work, such as debris clearing, not strictly classed as dock work. An annual week's holiday with pay is included in the plan.

All but ten of more than 30 ports covered by the plan have submitted dock labour schemes to the Minister of Labour for approval. When a port enters the scheme, the Corporation appoints a Local Board and a Port Labour Manager to co-operate with the Regional Port Directors and Port Emergency Committees in controlling labour supply at the port. Employers and employees must be registered under the Port Registration Committees to engage in port transport work.

For the ports on the Mersey and the Clyde a different arrangement was worked out last March by the Government in consultation with the Transport and General Workers' Union and employers' associations. Dock labourers in these ports are employed directly by the Ministry which guarantees them a weekly minimum wage if they report for employment 11 half days a week. When work is available Regional Port Directors assisted by local joint committees of the industry allocate the workers to "approved employers" who pay them regular piece rates. When no work is provided the workers receive 7s. 6d. per half day if their weekly earnings fall below the guaranteed minimum of £4 2s. 6d. On the other hand dockers at all ports under the Corporation receive their 5s. attendance money each half day they are without work irrespective of the amount they earn during the week.

Trade union membership in Great Britain

There were approximately 6,542,000 members of trade unions in Great Britain and Northern Ireland at the end of 1940, an increase of 312,000 or 5 per cent compared with the total membership registered for the end of the previous year.

These figures which were compiled by the British Ministry of Labour from data supplied by the Chief Registrar of Friendly Societies and from returns supplied direct to the Ministry by unregistered organizations, show that at December 31, 1940, the number of males registered as members of trade unions totalled 5,460,000, an increase of 202,000 or 3·9 per cent over the figure for the previous year, and the number of female trade unionists numbered 1,082,000, an increase of 110,000 or 11·3 per cent.

The increase in male membership during 1940 occurred mainly in the engineering and metal industries and in local authority ser-

vices. The increase in female membership was most marked in the distributive trades, transport services, national government service and the clothing industries.

Australia imposes strict control on all economic resources

According to a statement made by the Prime Minister of Australia, Mr. John Curtin, the Australian War Cabinet on February 10 adopted a plan to stabilize and place under strict government control practically the whole, economic, wage, industrial and business structure of the Commonwealth. The plan is designed to marshal the entire national resources of the country in a united effort.

Among the measures forecast in the Prime Minister's statement and to be implemented by government regulations are:

1. Pegging of wages at the present level.
2. Limitation of profits to four per cent.
3. Prohibition of all forms of speculative trading.
4. Fixing of interest rates.
5. Government control of employment.
6. Prohibition on all persons from absenting themselves from work.
7. Proclamation of specified areas as being under military control.

"We are at a state in our history when the struggle for survival over-rides every consideration," Mr. Curtin declared.

According to an Australian Associated Press despatch part of the machinery necessary to enforce the new scheme already exists. The rest will be established immediately.

The regulations will aim at flexibility in order to prevent abuse. Sale or investment of capital except for war purposes such as investment in war loans or in officially sanctioned issues will be prohibited.

The scheme will result in virtual suspension of stock exchange transactions other than in government bonds. Speculation will be eliminated. The purchase as a hedge against inflation of real estate or intrinsic value property such as jewelry probably will be prohibited.

Prices of goods and services will be pegged at current levels. Profits, excluding taxes, will be limited to four per cent on the combined paid-up capital and reserves reinvested in the enterprise. The four per cent figure is roughly one per cent higher than the war bond rate.

Profits in excess of four per cent will either be passed on to the consumer in the form of price reductions or will be taken by the government in the form of taxes.

It will be noted that in principle the wartime economic program adopted in Australia corresponds closely with the prices and wages stabilization policy and the control of excess profits in Canada.

Resolution of Australian trade unions in regard to government's control of economic life.

Following the action of the Government of Australia in assuming the control of all phases of economic life, as outlined above, representatives of all trade unions in Australia met in conference on February 12 in Melbourne and passed the following resolution in connection with the government's policy of economic control.

"1. The policy of the union movement is determined opposition to Nazism and Fascism, and whole-hearted support of the democracies;

"2. Examination of the man-power regulations reveals certain principles opposed to unionism, such as restriction of freedom of movement from one job to another.

"3. While disagreeing with such principles, the conference accepts them and agrees to assist the government in implementing them because of the national emergency."

Control of labour supply in South African engineering industry

To prevent wasteful competition for labour and the enticement of engineering artisans from one plant to another by the offer of higher wages, the Controller of Industrial Man-Power issued an order on November 14, 1941, prohibiting the payment (except with the permission of the Controller) of higher rates for this class of workers than those current on that date. On December 20 an amending order made it clear that the prohibition did not apply to any increase agreed upon between an employer and worker employed by him continuously since November 14, 1941, or to any increase granted in accordance with established practice in the workshop concerned. The order was designed merely to prevent "poaching" and was approved by employers' associations and trade unions.

The Controller of Industrial Man-Power, who was appointed under the Control of Industrial Man-Power Regulations of February 13, 1941, has power over labour supply in any industry declared to be a controlled industry. The engineering industry was placed in this category on March 19, 1941, and in accordance with the regulations a local control board consisting of the Controller and an equal number of representatives of employers and

employed was set up on April 8. The board must be consulted on all matters of principle under the regulations and on all matters directly affecting established working conditions but the final decision rests with the Controller who is restricted only by the stipulation that he may not abrogate any existing agreement under the Industrial Conciliation Act.

Measures to increase the labour supply in the engineering industry were also included in the November order. Higher wages for apprentices were established and the industry was asked to absorb 2,000 more apprentices during the next six or eight months. Every employer is required to employ an additional apprentice for every apprentice already employed by him who has completed at least three years of his apprenticeship. He must enter into the required number of apprenticeship contracts within four months. The new apprentices must be trained in the following trades or corresponding ones designated by the Apprenticeship Act: electric welding, boilermaking, coppersmithing, fitting, instrument making and repairing, millwrighting, press tool making, turning, die sinking, lead-burning and ship's plumbing.

Nazi technique in industrial manpower shortage

In order to indicate the methods by which Nazi Germany is meeting its industrial manpower shortage, the following news item from the *New York Times* of January 29, is of interest: "The Berlin correspondent of the Stockholm, Sweden, *Social Demokraten* reported January 28 that 'responsible authorities in Germany let it be understood' that despite reduction in production, the shortage of manpower is now extremely acute. It is planned, therefore, to mobilize, if necessary by force, the populations of the occupied countries for work in German factories. Russian prisoners will be enlisted from prison camps and civilians will be recruited mainly from the Ukraine in the future. The newspaper says the Nazis expected to obtain more than a million Russian workers, instead of the 300,000 they have at present."

Wartime Trade Union Membership Problem in Great Britain

An article entitled "Trade Union Membership Problems of Transferred War Workers in Great Britain", appearing in the February issue of the *International Labour Review* published by the International Labour Office, Montreal, will be of interest to trade unionists and particularly trade union secretaries.

The movement of workers from one job to another in Great Britain has raised a variety of complicated internal problems for the trade union movement as a whole and for each individual trade union. One of these problems is that of the recognition by one trade union of the membership cards of another. The special arrangements which have been and are now being worked out to safeguard the trade union membership rights of transferred workers are essential to facilitate the movement of workers from one job to another in accordance with changing war labour requirements. Although the British trade union movement is united through the Trades Union Congress, each trade union retains autonomy in dealing with its own affairs. The wartime problems of membership raised by the large-scale transfer of workers from non-essential to essential work overlap the sphere of action of each individual union, and have, therefore, been given considerable attention both by the General Council of the Congress and by the executives of the many unions concerned. Trade unions in the industries subject to a concentration of production, such as the textile industry, have been faced with a tremendous loss of membership. On the other hand, trade unions in war industries, such as the engineering industries, have been faced with a tremendous influx of new members, which has brought up unpleasant memories of the state of the industry after the last war. An individual trade unionist who goes from one job to another has been faced, in the absence of special arrangements, with a double entrance fee and dues, as well as with the loss of the privileges which he had acquired through membership in his former union.

In order to avoid confusion in the trade union movement and inconvenience and financial loss to transferred workers, many unions have come to agreement among themselves in regard to the mutual recognition of trade union membership cards. The General Council of the Trades Union Congress has made recommendations on the subject; but the conditions on which any one union will accept members has traditionally been a question for that union to decide and not for the General Council, which has no jurisdiction whatever in the matter. As yet, therefore, there has not been any general recognition of trade union cards and the question is handled through inter-union wartime agreements.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

REPORTS were received during the past month from the Boards of Conciliation and Investigation established to deal with the following disputes:—

1. Between the Canadian Bridge Company, Limited, Walkerville, Ont., and its employees, members of Local 2471, Steel Workers Organizing Committee;

2. Between Saguenay Terminals, Limited, Port Alfred, P.Q., and its stevedores, warehousemen, etc., members of the National Catholic Union of Longshoremen of Ha Ha Bay;

3. Between the Speirs Parnell Baking Company, Limited, and the Canada Bread Company, Limited, Winnipeg, Man., and their employees, members of the Legislative Council of Bakery Salesmen and Inside Bakery Employees' Unit, One Big Union; and

4. Between the Canadian Westinghouse Company, Limited, Hamilton, Ont., and its employees, members of Local 504, United Electrical, Radio and Machine Workers of America.

The texts of the aforementioned reports will be found at the end of this statement.

Applications Received

In the month of January four applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour, as follows:—

1. From coal miners and coal mine labourers in the employ of the Granby Consolidated Mining, Smelting and Power Company, Limited, Princeton, B.C., members of Local 7875, United Mine Workers of America. The dispute was said to have arisen out of the employees' request for recognition of the union as their collective bargaining agency, the checkoff of union dues, increased wages for helpers, and the application of classified rates for hoistmen and rope riders. It was stated that 80 workers are directly affected and 10 indirectly. On January 30 Mr. F. E. Harrison, Western Representative of the Department of Labour, Vancouver, B.C., was authorized to investigate this dispute in pursuance of powers recently vested in him as Industrial Disputes Inquiry Commissioner (see page 127).

2. From coal miners and coal mine labourers in the employ of the Princeton Tulameen Coal Company, Limited, Princeton, B.C., members of Local 7875, United Mine Workers of America. The dispute was said to have arisen out of the employees' request for recognition of the union as their collective bargaining agency, increased wages, and the application of classified rates to all company workers such as hoistmen and rope riders. It was stated that 75 workers are directly affected and eight indirectly. On January 30 Mr. F. E. Harrison, Western Representative of the Department of Labour, Vancouver, B.C., was authorized to investigate this dispute in pursuance of powers recently vested in him as Industrial Disputes Inquiry Commissioner (see page 127).

3. From coal miners and coal mine labourers in the employ of Tulameen Collieries, Limited, Princeton, B.C., members of Local 7875, United Mine Workers of America. The dispute was said to have arisen out of the employees' request for recognition of the union as their collective bargaining agency and increased wages. It was stated that 21 workers are directly affected and four indirectly. On January 30 Mr. F. E. Harrison, Western Representative of the Department of Labour, Vancouver, B.C., was authorized to investigate this dispute in pursuance of powers recently vested in him as Industrial Disputes Inquiry Commissioner (see page 127).

4. From employees of Lakeside Coals, Limited, Wabamun, Alta., members of Local 7894, United Mine Workers of America. It was stated that 54 workers are directly affected by the dispute, which was said to have arisen out of the employees' request for union recognition and an agreement providing for the checkoff of union dues, increased wages and changes in working conditions.

Board Established

On January 27 the Minister of Labour established a Board of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act to deal with a dispute between the Chrysler Corporation of Canada, Limited, Windsor, Ont., and its employees, members of Local 195, United Automobile Workers of America, and, on the nomination of the employees, appointed Mr. Drummond Wren, Toronto, Ont., a member of the board. Following receipt of the employees' application for the establishment of a board, the Minister had appointed Mr. Louis Fine, Chief Conciliation Officer of the Ontario Department of Labour, Toronto, Ont., an Industrial Disputes Inquiry Com-

44998—2½

missioner to investigate the dispute (LABOUR GAZETTE, January, 1942, page 9). The Commissioner's report stated that his investigation had disclosed that the establishment of a Board of Conciliation and Investigation was warranted and he recommended that such action be taken. The constitution of the board had not been completed at the end of the month.

Other Proceedings

On January 2 the Minister of Labour appointed Mr. H. R. Pettigrove, Labour Relations Officer of the Department of Labour, an Industrial Disputes Inquiry Commissioner to investigate a dispute between T. McAvity & Sons, Limited, Saint John, N.B., and certain of its employees, members of Local 835, International Association of Machinists (LABOUR GAZETTE, January, 1942, page 10). On January 14 an interim report was received from the Commissioner stating that considerable progress already had been made toward a settlement of the dispute and that a final report would be submitted when complete agreement had been reached by the parties concerned.

In December, 1941, an application was received for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Sydney and Louisburg Railway Company, Glace Bay, N.S., and its machinists and other shopmen, members of Local 684, International Association of Machinists (LABOUR GAZETTE, January, 1942, page 10). Following discussions with an official of the Department of Labour, the interested parties agreed to submit the dispute which related solely to a request for increased wages, to the National War Labour Board. On January 5 the dispute was accordingly brought to the attention of the National War Labour Board, which subsequently ruled that the employing company falls within the category of "regional employers." On January 17 the dispute was referred to the Nova Scotia Regional War Labour Board for decision.

On January 22 the Minister of Labour received the report of Professor Gilbert Jackson on the latter's investigation, as Industrial Disputes Inquiry Commissioner, of a dispute between the English Electric Company of Canada, Limited, St. Catharines, Ont., and its employees, members of Local 199, United Automobile Workers of America (LABOUR GAZETTE, January, 1942, page 9). The Commissioner's report stated that in his opinion no constructive purpose would be served by the establishment of a Board of Conciliation and Investigation in this instance. On January 26 the interested parties were notified that the Minister had decided against the establishment of a board.

On January 28 the Minister of Labour directed that, pursuant to the provisions of Order in Council P.C. 7307, as amended by Order in Council P.C. 8821, a strike vote be taken among employees of Ayers, Limited, Lachute Mills, P.Q., on February 2 under the supervision of Messrs. E. McG. Quirk and Liguori Pepin, officials of the Department of Labour. A dispute between the company and its employees, members of Local 9, United Textile Workers of Canada, had been dealt with by a Board of Conciliation and Investigation (LABOUR GAZETTE, December, 1941, pages 1473-1479). Negotiations subsequent to the receipt of the Board's findings not having resulted in a settlement of the dispute, the employees concerned notified the Minister of their desire that a strike vote be taken.

Settlements

Early in January the Department of Labour was advised that an agreement had been signed between the Canadian General Electric Company, Limited, and a committee representing the employees of its Lansdowne Avenue (Davenport) Works, Toronto, Ont. A summary of the agreement will be found in the article entitled "Recent Industrial Agreements and Schedules of Wages" appearing elsewhere in this issue. The agreement was reached following negotiations subsequent to the receipt of the findings of a Board of Conciliation and Investigation which dealt with a dispute between the company and the employees of its Davenport Works and Ward Street Works (LABOUR GAZETTE, November, 1941, pages 1344-1349). The management of the company also advised that steps were being taken with a view to the execution of an agreement covering employees of the Ward Street Works.

On January 12 the Minister of Labour received the report of Mr. Louis Fine, Chief Conciliation Officer of the Ontario Department of Labour, on the latter's investigation, as Industrial Disputes Inquiry Commissioner, of a dispute between The Consumers' Gas Company of Toronto, Toronto, Ont., and its employees, members of the National Union of Domestic and Industrial Gas Workers (LABOUR GAZETTE, January, 1942, page 9). The Commissioner reported that he had succeeded in bringing about a settlement of the dispute, which related to the alleged unjust dismissal of an employee. The settlement provided that in view of his length of service the discharged employee be granted a special allowance of seven weeks' pay. The company having fulfilled its undertaking to pay this allowance, the employees' application for the establishment of a Board of Conciliation and Investigation was withdrawn.

On January 16, through the efforts of a Board of Conciliation and Investigation, a settlement was reached of a dispute between the Canadian Bridge Company, Limited, Walkerville, Ont., and its employees, members of Local 2471, Steel Workers Organizing Committee. Details of the settlement will be found in the board's report, which is printed below.

On January 28 notification was received of the withdrawal of an application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between Bishop & Sons, Limited, Portneuf Station, P.Q., and its employees, members of the National Catholic Union of Pulp and Paper Workers of Portneuf Station (LABOUR GAZETTE, January, 1942, pages 9-10), a settlement having been reached as a result of the mediation of Mr. Liguori Pepin, an officer of the Department of Labour.

Report of Board in Dispute Between Canadian Bridge Company, Limited, and Its Employees

A unanimous report was received on January 19 from the Board of Conciliation and Investigation established to deal with a dispute between the Canadian Bridge Company, Limited, Walkerville, Ont., and its employees, members of Local 2471, Steel Workers' Organizing Committee (LABOUR GAZETTE, January, 1942, page 10). Attached to the report were two memoranda signed by representatives of the parties to the dispute and setting forth the terms of the settlement which had been reached with the assistance of the board.

The personnel of the board was as follows: His Honour Judge A. J. Gordon, Windsor, Ont., chairman, appointed in the absence of a joint recommendation from the other two members; Professor G. M. A. Grube, of the University of Toronto, appointed on the nomination of the employees, and Mr. W. H. Furlong, K.C., also of Windsor, appointed on the nomination of the employer.

The text of the board's report and of the memoranda of settlement are printed below.

Report of Board

Windsor, Ontario, January 17, 1942.

The Honourable the Minister of Labour,
Parliament Buildings,
Ottawa, Ontario.

Dear Sir:

We, the undersigned, Chairman and Members of the Board of Conciliation and Investigation established by your Department under the Industrial Disputes Investigation Act for the purpose of endeavouring to bring about a settlement of the dispute existing between the Canadian Bridge Company, Limited, the employer, and its employees, members of Local 2471, Steel Workers' Organizing Committee, beg to report as follows:

The Board first met on the 3rd instant for organization purposes, and then again on the 15th and 16th instant, when both parties to the dispute filed briefs and the matter in dispute was capably argued. Mr. H. J. Padget, District Director of the S.W.O.C., spoke for the Union and he was accompanied by Messrs. Arthur Gladstone and Gavin Raeside, President and Vice-President, respectively, of the Union. Mr. John B. Aylesworth, K.C., with the consent of Messrs. Padget, Gladstone and Raeside, represented the employer.

From the beginning of the hearing the Board endeavoured to conciliate the differences between the parties and succeeded in doing so on the afternoon of the 16th. The result has been the agreement which you will find attached to this Report. The agreement comprises the employer's original offer or proposition which has now been amended or supplemented by the addition of paragraph three of the annexed document.

The Board met with the parties and their representatives again on the 17th instant regarding the proposed vote and particularly to agree on the grouping of the departments to be represented by the Committee.

To simplify what was agreed upon by the parties, they have signed a document dated January 17, 1942, which sets out the departments or groups of departments to be represented and the number of committee men to be elected from or for each, which is also attached.

All of which we respectfully submit.

Yours faithfully,
(Sgd.) A. J. Gordon, chairman.
(Sgd.) G. M. A. Grube, member.
(Sgd.) W. H. Furlong, member.

MEMORANDA OF SETTLEMENT

On the 22nd of September, 1941, the Canadian Bridge Company, Limited, filed with the Industrial Disputes Inquiry Commission an offer in the form of an undertaking for the purpose of affording its employees in its Walkerville plants an opportunity to negotiate with the Company with a view to the conclusion of a collective bargaining agreement. During the sittings of the Board of Conciliation and Investigation appointed herein a suggestion was made in clarification and amendment of the Company's offer. The

Company's offer clarified and amended in accordance with the suggestion made, which suggestion appears as clause number 3 of the offer, is hereinafter set out in full.

The Canadian Bridge Company, Limited,

Walkerville, Ontario.

Certain of the employees of the Canadian Bridge Company, Limited, having alleged that the employees of the Company other than foremen and office staff in its structural and tower shops, Walkerville, Ontario, are dissatisfied with the present arrangement of dealing directly with the management on questions affecting said employees of both shops, the Company undertakes as follows:

(1) Without undue delay to negotiate with a committee representative of, and to be elected from among said employees, with a view to the entering into of an agreement governing their rates of pay and working conditions; any such agreement to be between the Company and its said employees as represented by such a committee.

(2) To ensure the authorization of such a committee by said employees, nominations for committee men and their election to be arranged for and conducted by secret ballot under the direction and supervision of the Department of Labour of the Dominion Government. Employees in each department in each of the two shops to nominate one or more of their number to run for committee man in that department; and thereafter from their nominees to elect their committee man for that department.

(3) Mr. H. J. Padget, District Director, S.W.O.C., may be present with and assist the Committee of the Company's employees elected as above in that Committee's negotiations with the Company with a view to the conclusion of a collective bargaining agreement as mentioned in 1 above.

For the Canadian Bridge Company, Limited,

(Sgd.) A. St. C. Ryley,
General Manager.

Windsor, Ontario, 16th January, 1942.

The applicants for the Board of Conciliation and Investigation herein accept the Company's offer as above set out.

(Sgd.) Gavin Raeside,
(Sgd.) Arthur Gladstone,
(Sgd.) H. J. Padget.

Windsor, Ontario, 17th January, 1942.

With reference to the acceptance dated 16th January, 1942, by the applicants for the Board of Conciliation and Investigation herein of the offer of the Canadian Bridge Company, Limited, as clarified and amended, it is agreed that the nominations for, and the election of, committee men from among the company's employees in its Walkerville plants shall be by the following departments or groups of departments:

PLANT 1.

Departments	Approximate Number of Employees	Number of Committee Men to be Elected
Machinists .. .. 50 Bolt and Rivet— Smith Shop 18	68	1
Punch Shop .. .. 50 Unloaders .. .. .. 20 Pattern and Templet 12	82	1
Assembling .. .. .. Finish	87	1
Painters .. .. .. 13 Riveters .. .. .. 27 Loaders .. .. .. 12 Carpenters and Maintenance 20	72	1
Crane operators Electricians Welders .. .. .. 38 General Expense Inspector 32	70	1
PLANT 2.		
Presently employed 55 (with excepted increase to approximately .. 25)	80	1
	459	6

Canadian Bridge Company, Limited,

(Sgd.) A. St. C. Ryley,
General Manager.

On behalf of the applicants for the Board of Conciliation and Investigation herein.

(Sgd.) H. J. Padget,
(Sgd.) Arthur Gladstone,
(Sgd.) Gavin Raeside.

Report of Board in Dispute Between Saguenay Terminals Limited, and Its Employees

On January 12 the Minister of Labour received the findings of the Board of Conciliation and Investigation which dealt with a dispute between Saguenay Terminals, Limited, Port Alfred, P.Q., and its stevedores, warehousemen, etc., members of the National Catholic Union of Longshoremen of Ha Ha Bay (LABOUR GAZETTE, September, 1941, page 1041).

The personnel of the Board was as follows: The Honourable Mr. Justice Alfred Savard, of the Quebec Superior Court, chairman, appointed on the joint recommendation of the other two members; Mr. Gerard Picard, appointed on the nomination of the employees; and Mr. Bernard Devlin, K.C., appointed on the nomination of the employer. All three reside in Quebec, P.Q.

The report of the board is signed by the chairman and Mr. Devlin. A minority report was submitted by Mr. Picard.

The text of the Board's report and a translation of Mr. Picard's minority report are printed below.

Report of Board

To the Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Ontario.

In the matter of the Industrial Disputes Investigation Act and of a dispute between Saguenay Terminals, Limited, and its employees, being members of the National Catholic Union of Longshore-

Sir:—

The Board of Conciliation and Investigation appointed by you to deal with the dispute between Saguenay Terminals, Limited, and its employees, being members of the National Catholic Union of Longshoremen of Ha Ha Bay, composed of Mr. Justice Alfred Savard as Chairman, Mr. Gerard Picard, nominated by the employees, and Mr. Bernard Devlin, K.C., nominated by the employer, after holding public sittings in the town of Port Alfred and private sittings in the City of Quebec, has terminated its deliberations and regrets to report that it is unable to submit a unanimous report, as Mr. Gerard Picard does not agree with all of the conclusions of this report, which is submitted by the chairman and by Mr. Bernard Devlin, K.C., being the majority of the Board.

The employees had asked for an increase of 5 cents per hour plus 7 per cent of their present wage rate, which is 60 cents per hour, and they also requested an increase of 20 per cent for the employees whose salary is less than $175 per month.

In the brief submitted on behalf of the employees it was *inter alia* stated that the salaries paid were exceptionally low and that the cost of living in the Saguenay region was higher than the figures given by the Federal statistics would indicate, and that accordingly they were entitled to the increase which was asked for, which increase, according to the brief, comprised the cost-of-living bonus or at least part thereof. Some witnesses were brought to say that the cost of living in that district was higher than elsewhere but we feel that in establishing the cost-of-living bonus, we have to be governed by the standards fixed by the Department of Labour. A considerable number of employees came before us and all agreed, of course, that they felt they should be given the increase asked for. When questioned by members of the Board they admitted, however, that they were well treated by their employer and the Board was told by spokesmen for the employees that relations between the company and its employees had always been very cordial and harmonious.

The company, however, through its officers, testified that in the course of the last twelve months the employees had been given two increases which had brought the basic rate up from 50 cents to 60 cents per hour.

The Company also submitted that the rates presently paid were not only not exceptionally low, but that they were fair and reasonable as compared with the rates paid in the vicinity and in similar ports. As a matter of fact, owing to the nature of the work, the men can only work about seven months per year and from the evidence adduced before the Board, we find that when the same men worked on other jobs during the other five months, they received lower rates of pay.

It is true there are some ports in Canada, such as for instance the ports of Vancouver and Montreal and Quebec, where the rates are higher, but the Board does not think that these ports should be used as a basis of comparison as the conditions are not at all the same at Port Alfred.

In the ports of Vancouver, Montreal and Quebec there are various groups of longshoremen who are given occasional work during certain periods, whilst at Port Alfred we find that for a period of seven months during which the port is open, the men who work regularly can earn anywhere from $1,100 to over $2,000 exclusive of other work that they may have done for others during the slack periods.

It would be more rational, when comparing ports, to compare with ports as that of Sorel, where the rate is 60 cents, and that of Three Rivers, where the rate is 50 cents, or even with the port of Chicoutimi, where the rate is even lower. Conditions at these ports are substantially the same as those which prevail in the port of Port Alfred.

We find, therefore, that we cannot accede to the suggestion made by the employees as we must come to the conclusion that the wages presently paid are fair and reasonable.

As to the matter of the cost-of-living bonus, the company has started to pay a bonus of $2.70 per week, which would seem to be the amount of bonus due, under the Department of Labour's regulations.

As to the increase of twenty per cent asked for by the employees who work in the offices and whose salary is less than $175 per month,

the evidence shows that it is the custom of the company to gradually increase its office men, even before such increases are asked for, as their experience and ability augment, and the officers of the company stated that some of the men were in line for increases.

We recomend that the company continue its policy, provided, of course, it is permissible for it to do so under the regulations of the Department of Labour.

A certain amount of dissatisfaction may have been caused by the fact that certain men were given a salary of 80 cents per hour for operating an electric crane and were paid only 75 cents per hours when operating a steam crane. We would recommend, subject to approval under the regulations of the Department of Labour, that the 80-cent rate be given to crane operators whether they are operating an electric or a steam crane.

In closing this report, we would like to express our appreciation of the whole-hearted co-operation which we received from both the officers of the company and from the officers of the National Catholic Union, who did everything they could to facilitate our work and to give us all the information we required.

Humbly submitted,

Quebec, January 10, 1942.

(Sgd.) Alfred Savard, Chairman.
(Sgd.) Bernard Devlin, Member.

Minority Report

(Translation)

Quebec, January 9, 1942.

Mr. the Minister:

The Board of Conciliation and Investigation established under Chapter 112, R.S.C. 1927, to settle differences between Saguenay Terminals, Limited, and its employees, represented by "Le Syndicat national catholique des débardeurs de Bai des Ha! Ha!" (The National Catholic Union of Longshoremen of Ha Ha Bay), has completed its proceedings.

In the above-mentioned matter, only the wages question was involved. No request concerning working conditions was contained in the Union's application.

Following a few public meetings held at the town hall of Port Alfred, Chicoutimi County, P.Q., the Board had many other meetings for the purpose of dealing with the merits of the arguments submitted, on the one hand by the Company and, on the other, by the Union, and the evidence adduced.

Both parties expressed their respective viewpoints in an atmosphere of friendliness and cordiality.

There are in the majority report two points on which I agree with the Chairman of the Board and the Company's nominee. With them, I believe the Company should continue its policy of periodical increases of the office employees' salaries, as established by practice, in so far as such policy is not contrary to P.C. 8253, of October 24, 1941, and I also feel compelled to recommend that the salary increases for said group of office employees decided upon prior to the proceedings of the Board be made effective without delay. The other recommendation in the majority report which I endorse relates to the payment of the same hourly rates to the operators of both electrical and steam cranes. The rates here mentioned refer to the highest rates now paid

It is in connection with the longshoremen that the Board is divided. After extensive deliberations, comparison of tonnage in various ports, comparison of rates paid here and there, and examination of official statistics, it was found impossible to come to a unanimous finding. I do not consider it necessary to give here in detail the arguments advanced by both parties. It should be pointed out, however, that opinions differed mainly on the ports acceptable as a basis of comparison in connection with the determination of the hourly wages for longshoremen of Ha Ha Bay, Furthermore, I felt that the question was not so much one of comparison between ports as of comparison of the work performed by the longshoremen in the various ports, whichever they may be. It has been shown that in many important ports of Eastern and Western Canada, the rates paid are substantially higher than those received by the longshoremen of Ha Ha Bay. With the Union, I recognize, however, that in recent years the position of the longshoremen employed by Saguenay Terminals, Limited, has improved considerably, their rates increasing from 35 cents per hour to 60 cents per hour.

I believe these points, on which the Conciliation Board has been unable to agree, should be submitted to the Quebec Regional War Labour Board for the purpose of determining, in accordance with P.C. 8253, of October 24, 1941 (Section 11, paragraph 2), which ports should serve as a basis of comparison in the determination of the rates of wages for the longshoremen of Ha Ha Bay, Chicoutimi County, P.Q.

All of which is respectfully submitted.

(Sgd.) Gerard Picard, Employees' Nominee.

Report of Board in Dispute Between Speirs Parnell Baking Company, Limited, and Canada Bread Company, Limited, and Their Employees

On January 8 the Minister of Labour received the findings of the Board of Conciliation and Investigation established to deal with a dispute between the Speirs Parnell Baking Company, Limited, and the Canada Bread Company, Limited, Winnipeg, Man., and their employees, members of the Legislative Council of Bakery Salesmen and Inside Bakery Employees' Unit, One Big Union (Labour Gazette, October, 1941, pages 1186-1187).

The Personnel of the board was as follows: the Honourable Mr. Justice W. J. Major, of the Manitoba Court of King's Bench, chairman, appointed on the joint recommendation of the other two members; Mr. Edward Armstrong, appointed on the nomination of the employees; and Mr. G. S. Halter, appointed on the nomination of the employers. All three reside in Winnipeg.

The report of the board is signed by the chairman and Mr. Halter. A minority report was submitted by Mr. Armstrong.

The text of the board's report and of Mr. Armstrong's minority report are printed below. The various exhibits referred to in the reports are on file in the Department of Labour.

Report of Board

To the Honourable the Minister of Labour, Ottawa.

Re Industrial Disputes Investigation Act and re differences between Speirs Parnell Baking Company, Limited, and Canada Bread Company, Limited, and their employees, members of the Legislative Council of Bakery Salesmen and Inside Bakery Employees' Unit, One Big Union.

Sir:—

On the 22nd day of August, 1941, the Legislative Council of Bakery Salesmen and Inside Bakery Employees Unit, One Big Union, on behalf of all salesmen employed by Speirs Parnell Baking Company, Limited, and Canada Bread Company, Limited, made application to you for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, and Mr. Edward Armstrong was nominated by them as their representative. The Companies named gave their consent to the setting-up of such a Board and nominated Mr. G. S. Halter as their representative. These two gentlemen agreed upon Mr. Justice Major as the third member and Chairman of the Board, and on the 10th day of October, 1941, you caused to be issued a certificate of appointment and in due course the Department of Labour supplied the necessary material to enable the Board to commence its hearing.

A short delay was experienced by reason of certain doubts having arisen as to the eligibility of Mr. Halter to act as a member of the Board; particularly in view of the amendments passed to the Industrial Disputes Investigation Act in April of 1941. Mr. Halter submitted the matter to you for consideration and on the 4th day of November, 1941, the Assistant Deputy Minister of Labour duly advised that in the opinion of the Justice Department Mr. Halter was eligible to act as a Board member, and accordingly the Board was convened and had its first meeting on that day.

The employees were represented by Mr. W. T. White, Mr. Stewart S. Park and Mr. Harold V. Kelly. The employers were represented by Mr. Frank Hannibal of Canada Bread Company, Limited, Mr. A. E. Longstaffe of the Speirs Parnell Baking Company, Limited, and for the first two meetings of the Board, by Mr. Ross Kennedy. Mr. Kennedy was subsequently replaced by Mr. Enright, a chartered accountant and member of the staff of Canada Bread Company.

Various meetings have been held, at each of which written submissions have been made on behalf of the employers and employees, and discussions and arguments have been had thereon. The condensed balance sheets of the Companies have been produced for examination and copies thereof have been filed with the employees and with the Board. Every opportunity has been afforded the Members of the Board, and also representatives of the employees, to examine these statements and to discuss with the officers of the Companies any and every item appearing in these statements. Every request for information, whether by the Board or by the employees, has been cheerfully met by the Companies, and offers have been made by their representatives to discuss their financial affairs with any chartered accountant or auditor named by the employees, or with a committee of the employees. The Board is advised that while the employees' representatives were unable to have a chartered accountant or auditor enter into such a discussion, their committee has spent several hours in separate session with Mr. Enright, Chartered Accountant, of the Canada Bread Company, Ltd. (see Exhibit 29).

The Board has made every possible effort to have the representatives of the parties arrive at an adjustment satisfactory to all, but these efforts have not met with success, although the employers did make an offer, without prejudice,

to pay a portion of the cost-of-living bonus. This will be further discussed in another section of this report.

It is to be noted that the claim made by the employees is as expressed in their first submission (Exhibit 2, page 2): "The basis of the men's claim is for a cost-of-living bonus payable as at July index figures published in the August edition of the LABOUR GAZETTE, the bonus to be payable as from August 1, 1941."

In the early stages of our inquiry we were made aware of further consideration having been given by the Government to P.C. 7440, as amended, and had before us copies of the proposed order P.C. 8253. The employees' representatives took the position that "the new legislation can have no effect or bearing on the dispute under consideration". (Exhibit 2, page 2.)

The Board agrees with this position and has proceeded with its enquiry under P.C. 7440, as amended.

The position taken by the employees can be briefly stated as follows:—

> "There has been no increase in basic wage rates since August, 1939, and no bonus has been paid as distinct from the cost-of-living bonus since the war began" (Exhibit 31, p. 6); therefore the bonus as prescribed by the Government under P.C. 7440, as amended, should be ordered to be paid.

Section 5 of the Order in Council is the section particularly applicable in this case. It reads as follows:—

> "5. A wartime cost-of-living bonus separate from and in addition to basic wage rates shall be paid except for good cause shown to the contrary to all employees as follows."

The employees' representatives urged that the words in section 5, "except for good cause shown to the contrary", when read with the context of the amendment to P.C. 7440, limited the employers to the proof that they had either increased wages or had provided the bonus since August, 1939.

The employees' representatives also took the position at the beginning, and maintained it throughout the inquiry, that the Board had no jurisdiction to carry this inquiry beyond the question of non-increase in wages or non-payment of bonus (Exhibit 2, p. 4, Ex. 31, p. 6), and if the Board found that no increase in wages or bonus had been granted, that it had no other option but to recommend payment of the cost-of-living bonus. On the other hand, the employers took the position that the words, "except for good cause shown to the contrary", permit them to advance any and every reason which may be applicable to their business, if such will show their inability to meet the demands made upon them.

If the limited interpretation of the employees' representatives is the correct one, then the work of this Board, or any other Board appointed to consider a similar question, would be simple indeed. In fact, we can see no reason for the appointment of such a Board to determine the question as to whether or not wages had been increased, or bonuses had been paid, since August, 1939. If, however, such is the proper interpretation of section 5, then the Board hereby reports that the Companies in question have not increased the wages of their salesmen since August, 1939; nor have they paid any additional bonus or commission, or cost-of-living bonus, to their employees since that date, and therefore the cost-of-living bonus as required by Order in Council P.C. 7440, as amended, should be paid.

It is the opinion of the majority of the Board, however, that the words "except for good cause shown to the contrary" should have a much wider interpretation than that given by the employees' representatives. An examination of P.C. 7440 and the subsequent amendment thereto, and the latter P.C. 8253, indicates the policy of the Government as one which permits Boards of Conciliation appointed under the Industrial Disputes Investigation Act, and the National Board named under P.C. 8253, to give consideration to reasons advanced for the deferring or ordering of partial payment of the cost-of-living bonus; and we have proceeded on that principle. Our colleague, Mr. Edward Armstrong, nominated by the employees, cannot agree with this interpretation.

The employers' representations are as follows:—

1. Financial inability of the employers to pay;
2. That the demand for the cost-of-living bonus made upon the two employers is unjust and discriminatory, and amounts to an unfair imposition in view of the situation existing in the baking industry in Greater Winnipeg;
3. That the present level of the employees' earnings is such that the bonus is not required by them. (Exhibit 5, p. 1.)

So far as item No. 2 is concerned, the Board is of the opinion that the situation in the baking industry in Greater Winnipeg can only be considered as to the effect it has on the earning powers of the Companies, and not from the point of view as to whether the claims of the employees are unjust or discriminatory as alleged.

Item No. 3 alleges that the present level of the employees' earnings is such that the bonus is not required by them. The Board has given no consideration to such contention.

The Board recognizes the policy of the Government to be that the wage-rate levels paid during the period 1926-1929, or higher levels established thereafter, shall be considered generally fair and reasonable unless it is clearly shown that such wage rate level is unduly low or sub-normal, and as the employees made no representations to us that such level is unduly low or sub-normal, the Board considers that it is bound by the policy of the Government as pronounced and that the present wage-rate level is fair and reasonable.

The Board is clearly of the opinion that item No. 1 of the employers' submission is the only one that can be considered, and upon that the employers' claim succeeds or fails.

In order to give an idea as to the number of establishments and employees engaged in the baking industry in Greater Winnipeg, we quote from a report made by a Board of Inquiry set up by the Government of Manitoba in the year 1935: (Exhibit 32, p. 6).

"The Board as a result of a special survey finds that 1,044 employees are engaged in the baking industry in the Winnipeg area. The number of establishments in which these persons are employed is 82 in Greater Winnipeg; one in St. Charles; one in St. Norbert; one in Transcona and one in Selkirk, a total of 86 establishments.

"The classification of employees is as follows:

Bakers, including helpers	418
Miscellaneous	98
Salesmen (outside)	353
Salesmen (inside)	26
Salesgirls	93
Office help	56
Total	1,044

"The three large baking companies employ 41 per cent of the above total, the distribution of these being:

Canada Bread Company	178	employees
Speirs Parnell Company	151	"
Bryce Bakeries, Ltd	103	"
Total	432	

"The only chain store groups who operate their own bakeries are Neal Brothers, Limited, and Safeway Stores, Limited, the latter under the name of the Maximum Bakery. These two concerns employ 3·4 per cent of the total number employed in the baking industry in the Winnipeg area:

Maximum Bakery (Safeway)	27	employees
Neal Brothers, Limited	9	"
Total	36	

"The above figures relate only to employees exclusively engaged in the baking industry by Neal Brothers, Limited, and Safeway Stores, Limited."

The Board is advised that but little change has taken place in regard to establishments and employees since that year. It will be noted that the three large bread-baking establishments are Canada Bread Company, Ltd., Speirs Parnell Baking Company, Ltd., and Bryce Bakeries, Ltd. The total number of employees of the Canada Bread Company and Speirs Parnell Baking Company, now occupying positions below the rank of foreman, is 348. Of this number 145 are salesmen and are the petitioners, through their organization, in this enquiry. (Exhibits 6 and 7.)

On page 2 of the booklet, "Canada's Wartime Wages Policy," issued as a guide to boards of conciliation, is the following: "It is obvious that no class in Canada should be given preferred treatment in shouldering the war burden. . ." We take it that not only no class should be given preferred treatment, but also that no one section of employees in any particular industry should be given preferred treatment over any other section or sections in the same industry. Accordingly, in dealing with this application, we have taken into consideration not only those for whom this application is made, but also the remainder of their fellow employees in both employer organizations. This we believe is fully in accordance with the policy of the government. The principle is also endorsed by the employees herein represented, for in their first submission, in discussing the provisions of P.C. 8253, we find the following expression: (Exhibit 2, p. 1.)

"I am instructed to place on record the attitude of the council towards the new legislation at present being considered and promulgated by the Dominion Government with respect to matters of this kind. . . and while there would appear to be one or two clauses in which we are not in complete agreement, we are fully convinced in principle with the necessity of blanket legislation of this nature to cover all employees."

The existing method of payment of wages to salesmen employed by the employers is as follows:—

(1) Canada Bread Company, Ltd.—Exhibit 8.—"A standing wage of $18 per week, plus commission on all sales made by each salesman of 7 per cent on retail sales of bread and sweet goods, and 10 per cent on all retail sales of cake.

"On all bread and sweet goods sold wholesale the commission is 3 per cent, and 5 per cent on all cake sold wholesale.

"There is a guaranteed minimum wage to each salesman of $24, irrespective of the sales made."

(2) SPEIRS PARNELL BAKING COMPANY, LTD. —Exhibit 18.—"A standing wage of $15 per week, plus a commission of 10 per cent on bread, cake and sweet goods sold retail, and a commission of 6 per cent on bread, cake and sweet goods sold wholesale.

"There is a guaranteed minimum of $24 per week, irrespective of the sales made."

Exhibits 19 and 20 indicate how these methods of payment of wages to salesmen work out. These exhibits are those of Speirs Parnell Baking Company and can be summarized as follows:—

For the week of	Average earnings per man
July 26, 1941	$28.13
Aug. 5, "	30.07
Sept. 13, "	28.88
Nov. 1, "	30.15
Nov. 8, "	30.06

The employers claim (and the evidence submitted supports that claim) that in spite of the great drop in retail sales during the past eleven years (as shown hereafter), the wage levels of the employees of both employers have been subject to six increases on the part of one employer (see Exhibit 8) and three on the part of the other employer (see Exhibit 18) from the years 1929 to 1939, as well as the granting of other benefits, such as two weeks' holiday with pay, sick benefits, etc. The employers also claim that their wage levels are the highest paid in the industry in Winnipeg, being equalled by only one other of their competitors, and that as the wage rate is a standing one, plus commission, with a guaranteed minimum of $24.00 per week, there is no "top" to the amount a salesman may earn; that the way is open to a salesman to increase his earnings by putting forth a little greater effort and by displaying a little more zeal on his route. None of these representations met with any contradiction from the employees' representatives.

In dealing with the employers' contention that they are unable to pay the cost-of-living bonus, it is necessary to briefly review the bread situation as it has existed in Greater Winnipeg for the past eleven years.

Exhibit 32, filed by the employers, is a report of the Board of Inquiry hereinbefore mentioned. This enquiry was ordered by the Government of Manitoba in September, 1935, to inquire into and report on conditions respecting the bread industry in the area named, and to answer certain questions propounded therein. The inquiry was ordered by reason of recurring price wars, cut prices, loss-leaders and unfair competition, and wholly inadequate wage conditions in certain sections of the bread industry. At page 10 the report deals with bread prices during the 10-year period 1926-1935, as follows:—

> "In this ten-year period the highest price charged in Winnipeg for a one-pound loaf of bread was 6c (six cents) unwrapped and 7c (seven cents) wrapped. As has already been indicated, the general price in retail stores in Winnipeg had touched a low point of three cents (3c) per pound through the recurring price wars in the business.
>
> "It is abundantly evident that in the last decade the consuming public of the Winnipeg area has enjoyed lower prices on bread purchases than the reported average price for the Dominion of Canada."

The effect of these low prices and unfair practices is commented upon on page 15, and on the following page the opinion is expressed that it " . . . is disastrous to the industry as a whole and the ultimate result can only be unemployment to a large group of workers, a lowering of the scale of wages in the industry, also financial embarrassment to bakers and dealers large and small". The employers report that certain aspects of the situation outlined in the above-mentioned report have been remedied to a small degree, but many of the then existing situations have been further aggravated. (Exhibit 5, page 3.) The employers also report that the Province of Manitoba has established a minimum wage for the baking industry, but the rate thereby specified is well below that paid to their employees.

There can be no doubt that, as contended by the employers, many of the causes existing at the time of the Whitla Inquiry still exist, and still continue to have a prejudicial effect on that portion of their business in which the salesmen are wholly interested, namely, the retail sale of bread. This appears to the Board to be convincingly shown in the statements submitted by the employers (Exhibit 33, p. 2), in which it appears that the volume of retail sale of bread by the Canada Bread Company is as follows:—

Year 1930. Average number of customers	18,000
Year 1941. Average number of customers	12,000
Year 1930. Weekly average of retail sales	138,000 loaves
Year 1941. Weekly average of retail sales	59,000 "
Year 1930. Percentage of retail sales to total sales	70%
Year 1941. Percentage of retail sales to total sales	32%

This exhibit is signed by the representatives of both employers, and the Board is assured that a similar condition exists in the Speirs Parnell Baking Company's organization. Exhibits 9 and 17 can be examined in support of this in so far as the latter firm is concerned.

The wholesale sales of bread (that is, to grocery and other such stores) have correspondingly increased (Exhibit 25); but, as pointed out by the employers that the difference in price obtained by them between wholesale and retail is 2 cents per loaf, the seriousness of their loss of retail business is at once apparent. The Board's attention was particularly directed to Exhibits 11 and 15, the first showing an average annual return on capital invested in the Winnipeg plant of the Canada Bread Company to be 2·1 per cent for the past ten years, the second showing an average loss by the Speirs Parnell Company of $6,059.01 during the past seven years. From the audited Profit and Loss account of Speirs Parnell Baking Company, the net profit for the year ended December 28, 1940, amounted to $30,974.52. (Exhibit 14, p. 2.) From the audited Profit and Loss account of Canada Bread Company, the net profit for the year ended June 30, 1941, amounted to $25,346.49. (Exhibits 11 and 12.)

The Speirs Parnell Company claims that the cost-of-living bonus, if paid to their employees, based on the index figure 115, would entail an expenditure of $30,255. It is to be noted, however, that the employees claim this amount should be reduced by $4,832. (Exhibit 6.) The Canada Bread Company claims that the cost of the bonus if paid to their employees would be $34,281, and would be some $9,000 in excess of their entire net earnings. (Exhibit 7.)

So far as the net earnings of the Companies for the year 1941 are concerned, the Board was presented with a statement from Speirs Parnell Baking Company (Exhibit 16) showing the net monthly earnings for an 8-month period as compared with a like period for 1940. Over this period the profits for 1941 are less than one-half of the amount made in the same period for 1940. It is to be noted, however, that this Company did not benefit from the removal of the Processing Tax on flour for the three periods from August to October, by reason of having previously contracted for flour over a long-term period. As the benefit from the removal of this tax would amount to some $1,500 per period, there should be added the sum of $4,500 to the estimated net earnings. This would then amount to a decline in the earnings for 1941 of some 41 per cent of the amount earned in 1940. The reason for this decline is summarized in Exhibit 27.

The Canada Bread Company presented to the Board a forecast of that company's prospective earnings for the fiscal year ending June, 1942. (Exhibit 21.) If this proves to be a correct forecast of the earnings of the company, they will amount to some $9,000 less than 1940; although a portion of this decline will be overcome by reason of the saving on certain material in stock before the increases in cost became effective.

An examination of Exhibit 21 is of interest. It shows that while the Processing Tax on flour (introduced August 1, 1940, and abolished July 31, 1941) was 70 cents per barrel, yet there will be a saving to the Company of only 25 cents per barrel by reason of the price of flour being increased in the meantime by 45 cents per barrel. The Company will, however, benefit from certain new regulations regarding wrapping and slicing. On the basis of the Company's business in the Winnipeg area during the previous twelve months, it will benefit to the extent of $11,456 by reason of the removal of the tax, and the regulations regarding wrapping and slicing. As regards this, however, the statement shows that the increased prices of shortening, sugar and milk; increased expense by reason of additional costs of gasoline, hay and oats; and payments required for unemployment insurance, will entail increased expenditure on these items of $22,880.

Assuming that the volume of business and the prices of material remain stationary in the future, it would appear that the employers will not earn sufficient to pay the bonus pursuant to Order in Council P.C. 7440, as amended, to say nothing of making any profit on their investments; a matter which the employers advance they are entitled to, and with which the employees cannot disagree. (See Exhibit 10, p. 5.)

The employees represented to the Board that Bryce Bakeries, Limited, one of the employers' competitors, was paying to its employees a limited bonus on a temporary arrangement, and the continuation thereof depended on its competitors, Speirs Parnell Baking Company and Canada Bread Company being ordered to pay a like bonus. (Exhibit 4, p. 2.) It was urged by the employees that this offered a reason for the employers here concerned making payment of the bonus. The Board was unable to obtain any evidence from the local management of Bryce Bakeries, Limited, as to its financial position or its ability to pay a bonus. On the other hand, the employers presented evidence to show that Bryce Bakeries, Limited, is a subsidiary of Purity Baking Company, Limited, which is wholly owned by a milling company, and from which it has received large sums of money to

meet its obligations and to pay its deficits. This evidence is found in Exhibit 28, and from it we extract the following:—

> "As of July 31, 1939, Purity Baking Company had received advances from the parent (milling) company amounting to $1,026,973, which amount was written off or fully reserved in the books of the parent company. During the fiscal period 1939-1940, the Purity Baking Company received advances from the parent company to the amount of $217,137 to enable it to meet bank interest and to pay for improvements to fixed assets and provide working capital. A special advance of $550,000 was also authorized to enable the baking company to reduce its bank loans. The parent company also considered it desirable to release the baking company from its liability in respect to $488,407, which enabled the baking company to write off its accumulated deficit to July 31, 1940. During the fiscal year 1940-1941 the Purity Baking Company received advances of $221,712 to enable it to finance expenditures on plant and equipment, and to provide for operating losses and interest on loans. The Purity Baking Company suffered a net loss of $263,084 in 1940-1941, full provision for which was made in the parent company's books."

Bryce Bakeries, Limited, is a subsidiary of Purity Baking Company and appears to have a most benevolent parent. It has no apparent worry over operating expenses or deficits: it has no shareholders to satisfy, no dividends to meet, no investments to protect. The parent baking company and Bryce Bakeries, Limited, appear to be merely an avenue for the disposal of the products of the milling company. Canada Bread Company and Speirs Parnell Baking Company, the employers involved in this application, claim to be public companies; that they have a responsibility to the public and to their shareholders; and while other milling companies may own stock in their organizations, yet both claim that they do not receive any of the benevolences from these organizations which their competitor, Bryce Bakeries, Limited, receives from its parent.

The Board is of the opinion that the position of Bryce Bakeries, Limited, is not comparable to the two companies named herein.

Every effort was made, prior to and during the course of the hearing herein, to have the employers and employees reach a compromise. A meeting was arranged between the various representatives of the employers and employees, which resulted in an offer being made by the employers—without prejudice, and for immediate acceptance—of a bonus of $1.00 (one dollar) per week, which would be paid to each and every employee for the period October 1, 1941, to February 15, 1942; after which, such additional sum would be added as the index rise from October, 1941, to January, 1942, indicated. After a meeting with the men the representatives of the employees stated that the offer had been refused, and no subsequent offer was ever advanced. (Exhibit 33.)

The Board had hoped that the employees, after examination of the employers' financial position, would make some counter-offer, and it was with this in mind that the employers were urged to make full disclosure to the employees' representatives, which they eventually offered to do.

The Board is of the opinion that the financial position of the employers does not permit them to pay the full cost-of-living bonus as prescribed by the amended P. C. 7440. The Board feels, however, that some payment should be made to the employees of the firms involved. The amount should depend upon the annual net earnings, which alone can determine the ability to pay. If these earnings are such as will permit the full bonus to be paid, and provide for a fair return to the investors, then such full bonus should be ordered.

We believe that if the offer made by the employers as above mentioned is amended, so that the payment of $1.00 (one dollar) per week would commence from August 1, 1941, the date from which the employees requested payment, it would be fair and reasonable in view of the existing circumstances surrounding the bread industry in Greater Winnipeg, and also in view of the prospect of a heavy decline in the 1941 earnings.

The Board therefore recommends:

1. Commencing from August 1, 1941, the employers pay a bonus of $1.00 (one dollar) per week in lieu of the cost-of-living bonus prescribed by P. C. 7440, as amended.

2. That such payment be made not only to the salesmen of the employers, but to all employees on the regular payroll of the employers.

3. That such weekly payment continue up to and including the 15th of February, 1942, and thereafter there be added to such sum an additional amount based on the rise in the index number for January, 1942, above the adjusted index number for October, 1941.

Dated at the City of Winnipeg, Province of Manitoba, this 6th day of January, A.D. 1942.

All of which is respectfully submitted.

(Sgd.) W. J. Major,
Chairman.

(Sgd.) G. S. Halter,
Employers' Nominee.

Minority Report

In the matter of the Industrial Disputes Investigation Act and re dispute between Speirs Parnell Baking Company, Ltd., and Canada Bread Company, Ltd., and their employees, members of the Legislative Council of Bakery Salesmen and Inside Bakery Employees' Unit, One Big Union.

To the Honourable the Minister of Labour,
Ottawa, Canada.

The Board of Conciliation and Investigation appointed to inquire into the dispute between the above-named parties has made its investigation. Representatives of the baking companies and the Bakery Salesmen and Inside Bakery Employees have been fully heard, and I now have the honour to present my report.

The dispute arose out of the request of the employees for a cost-of-living bonus in accordance with the Dominion Government Order in Council P.C. 7440 and the amendment thereto, P.C. 4643, *re* bonus to be payable in accordance with the July index figure published in the August edition of the Labour Gazette, such bonus to be payable as from August 1, 1941.

In their application to the Minister for a board the employees claim cost-of-living bonus as enunciated by Order in Council P.C. 7440 and amendment thereto, P.C. 4643. Section (5) of P.C. 7440 reads as follows:—

"To assure the workers that, while they are called upon to share in such sacrifices as the war may make necessary for the whole nation, their basic standard of living will not be impaired by any unavoidable increases in the cost of living, a wartime cost-of-living bonus, independent of basic wage rates, may properly be paid. In the determination of such a bonus, the following points should be observed.

(i) Changes in the cost of living should be measured by the new Cost of Living Index prepared by the Dominion Bureau of Statistics in co-operation with the Department of Labour and the Wartime Prices and Trade Board, with such adjustments as regional requirements might indicate to be justified.

(ii) The bonus should be determined at intervals not more frequently than quarterly and paid in the first instance only if the cost of living has risen by as much as 5 per cent since August, 1939, or since the time of any wage increase subsequent to that date; thereafter the bonus should be adjusted only if the cost of living has risen by 5 per cent or more since the last previous determination of a bonus payment; the bonus should be decreased only in case the cost of living has decreased by 5 per cent or more since the last previous determination of a bonus.

(iii) Bonus should be a flat amount per hour or per week uniform for all workers and calculated to protect the worker against increases in the cost of basic necessaries of life."

The first matter to be determined in (ii) is this: Has there been any increase in wages since August, 1939? The employers admit that there has not been any increase since that date. Therefore the employees claim that they are entitled to twenty-five cents per week for each point of rise in the Cost of Living Index since August, 1939, to the end of July, 1941 (as published in the Labour Gazette, August issue of 1941, which issue shows the increase to be 11 points), which amounts to the sum of $2.75 per week.

Under the heading *Canada's Wartime Wages Policy — Suggestions for the Application of Order in Council P.C. 7440 by Boards of Conciliation and Investigation,* dated March 31, 1941, appears the following:—

"3. (a) A cost-of-living bonus may be given to protect the worker not from increases in the cost of all his purchases, but only from increases in the cost of the basic necessities of life. A flat bonus is therefore suggested because a bonus computed as a percentage of wage rates or earnings would favour the better paid workers, defeat the purpose of the Order by preventing that decline in the consumption of non-essential commodities which is required by war conditions and is necessary to prevent inflation.

(b) In view of the wide variations in the wage rates of individuals and occupational groups, if the bonus were determined independently in each industrial establishment or even each economic area, many arbitrary decisions would be involved and confusion would result. Therefore the following standard formula is suggested on the rough assumption that a wage of $25 per week leaves a family practically no margin for expenditures on anything but the basic necessities of life."

The employees point out that P.C. 7440 sets a ceiling or limit beyond which wages cannot rise. Clause 3 of P.C. 7440 states:

"Wage rate levels established by agreement or practice in any industry or trade, nationally or locally during the period of 1926-1929, or higher levels established thereafter but prior to the date hereof, shall be considered generally fair and reasonable except that where it is clearly shown that exceptional circumstances during that period resulted in depressed and sub-normal, or unduly enhanced or abnormal, wages in a particular industry, trade, or locality, a Board may adjust such rates to what it considers fair and reasonable under such circumstances."

The employers have not produced before this Board any evidence to show that the employees' wages for the foregoing period were unduly enhanced or abnormal in their particular industry or locality. Therefore, they contend that Section (5) of P.C. 7440 clearly shows that for the foregoing sacrifices they will be compensated by receiving a cost-of-living bonus as enunciated in Order in Council P.C. 7440 and

furthermore that P.C. 7440 was amended by P.C. 4643, whereby Clause (5) of the Order was changed to read: "A wartime cost-of-living bonus separate from and in addition to basic wage rates shall be paid except for good cause shown to the contrary." The words "good cause shown to the contrary," the employees contend, make it clear that the purpose and meaning of this clause cannot and should not be taken out of its context, as apart from the Order in Council itself. That it was not, and could not, have been the intention of the Government in passing these Orders in Council to require Board of Conciliation established to deal with applications under these Orders to investigate the financial circumstances of each individual unit of the industry coming within their purview.

The employers' contention before the Board that they should not have to pay a bonus was based upon three points:—

(1) Financial inability of the employers to pay;

(2) That the demand for the cost-of-living bonus made upon the two employers is unjust and discriminatory and amounts to an unfair imposition in view of the situation existing in the baking industry in Greater Winnipeg;

(3) That the present level of the employees' earnings is such that the bonus is not required by them.

In dealing with the first contention of the employers, it was fully established before the Board that Winnipeg is only one unit of both companies, and I believe that it is very difficult, if not impossible, to get a true position of both companies, without having access to the figures, or at least being supplied with the figures, showing the total assets and liabilities, also the volume of business which is done by both companies, as a whole, over Canada. It was argued by the employees, I would point out, that in their opinion work was being done for other units of the companies for points outside Winnipeg, which was being charged up to Winnipeg. This was not refuted to any extent by the employers, while stating the impossibility of separating Winnipeg from the rest of the parent companies. I would also point out that this was borne out very fully by the Chairman who got in touch with Mr. Hance Bryce of Bryce Bakeries of Winnipeg, and asked him if he would mind appearing before this Board to state why his company was able to pay the bonus to employees while the Canada Bread and Speirs Parnell Baking Company found themselves unable to pay, owing to their financial standing.

Mr. Bryce pointed out that the head office of his company was in Toronto, and it was only that office which could give the standing of the Winnipeg unit.

Mr. Enright, chartered accountant of Canada Bread Company from Toronto, presented to the Board a brief wherein he stated that Bryce Bakeries, Ltd., is owned by Purity Baking Co., Ltd., which is wholly owned by and is a subsidiary incorporated to take over the baking investments of Western Canada Flour Mills, Ltd.

The Winnipeg plant of Canada Bread Company, Mr. Enright states, is part of Canada Bread Company, Limited—a public company.

In respect to the last statement of Mr. Enright, the employees took a very strong stand against it, stating that the Canada Bread Company is backed up by the Maple Leaf Milling Company and, furthermore, is controlled by it. In reference to Speirs Parnell Baking Company the employees contend this company is also part of Geo. Weston (Canada) Bread and Cake Co., Ltd., a subsidiary of Geo. Weston, Ltd. The relationship of this company to a milling company was fully established in the Price Spreads Commission Report of 1935, where it was shown the Lake of the Woods Milling Company controlled 20,000 out of 50,0000 shares of Geo. Weston, Ltd.

I contend, this leaves the Board in the position that if Canada Bread and Speirs Parnell Company are not fully owned and backed up by the milling companies, at the very least they have the controlling interest in the bakeries, which enables them to dispose of their flour through these bakeries. The utter futility of a Board trying to decipher figures submitted to it as to the inability of the Winnipeg firms to pay the full cost-of-living bonus, I would say, can be readily seen by the foregoing. In other words, it is impossible to separate the yolk from the white of the egg, and leave the shell whole.

In respect to the second contention of the two companies, I would point out it was clearly cited to the Board and fully established that one of their strongest and largest competitors, Bryce Bakeries, Ltd., in a notice to all of their employees dated July 31, 1941, stated:—

"With the week commencing July 31, 1941, we are putting into effect a cost-of-living bonus. This will apply to all employees. The bonus will start at $1.93 per week, which is in accordance with the latest official figures released. The bonus will be adjusted every three months according to the amount and recommendations of the Department of Labour that is generally accepted by the employers."

The third reason advanced by the companies as to why they cannot pay a bonus was *that the present level of the employees' earnings is such that the bonus is not required by them.*

Clause (3) of P.C. 7440, as quoted previously in this report, in my opinion, fully covers this contention of the companies, in the words "or higher levels established thereafter but prior to the date hereof, (December 16, 1940) *shall* be considered generally fair and reasonable" unless shown to the Board that the wages were enhanced or abnormal, which in this dispute has not been done.

The companies, in their statements before the Board, stated that the guaranteed wage amounts to $24.00 per week. (Exhibit No. 20, submitted by Speirs Parnell, shows the highest average wage including commissions to be $30.51 for the week ending November 1, 1941. Of course, this figure is for only one period and will vary according to the amount of goods sold by the driver on his route. But if the weekly wage of $18.00 plus commissions at Canada Bread Company and $15.00 plus commissions at Speirs Parnell Baking Company does not amount to $24.00 per week, I understand it is brought up to that amount.) In the light of these facts, I could not agree with the companies' contention that the present level of the employees earnings is such that the bonus is not required by them.

Before this Board, Mr. Longstaffe, speaking for Speirs Parnell Baking Company, pointed out that they had their routes reduced from 83 to 65, and further reductions were being contemplated after January 1, 1942, and Mr. Hannibal, of Canada Bread Co., said that reductions of salesmen and routes had taken place in his company and furthermore a triweekly service was being discussed at the present time; all of which goes to show that further savings are being contemplated by both companies, and there is no doubt but extra loads will be placed upon the wagons which are left.

In view of the foregoing contentions put forward both by the employers and the employees, I, as a Member of this Board, find it impossible to arrive at any other decision but that: The bonus be paid in full to all employees, which amounts to $2.75 per week, commencing as from *August 1, 1941*, and based upon the cost of living figures contained within the "Labour Gazette" as of August, 1941, for the July index. *And furthermore* that for the first payroll period beginning on or after November 15, 1941, the employers shall add to this bonus of $2.75 an amount based upon the rise in the index cost of living figures as from August 1, 1941, until November 15, 1941, which amounts to the *full bonus of $3.65* per week.

I do this, feeling that any other decision would undermine the whole recognized principle of the Government's Fair Wage Policy.

All of which I respectfully submit.

(Sgd.) Edward Armstrong.

Dated this Fifth day of
January, A.D. 1942.
Winnipeg, Manitoba.

Report of Board in Dispute Between Canadian Westinghouse Company, Limited, and Its Employees

On January 17 the Minister of Labour received the findings of the Board of Conciliation and Investigation established to deal with a dispute between the Canadian Westinghouse Company, Limited, Hamilton, Ont., and its employees, members of Local 504, United Electrical, Radio and Machine Workers of America (Labour Gazette, October, 1941, page 1187.)

The personnel of the board was as follows: Mr. H. E. Fuller K.C., Sarnia, Ont., chairman appointed in the absence of a joint recommendation from the other two members; Mr. David Goldstick, Toronto, Ont., appointed on the nomination of the employees; and Mr. V. A. Sinclair, K.C., also of Toronto, appointed on the nomination of the employer.

The report of the board is signed by the chairman and Mr. Sinclair. A minority report was submitted by Mr. Goldstick.

The text of the board's report and of Mr. Goldstick's minority report are printed below.

Report of Board

In the Matter of Dispute between Canadian Westinghouse Company, Limited, Employer, and its Employees, Members of Local 504, United Electrical, Radio and Machine Workers of America, Employees.

To: The Honourable the Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation and Investigation established by you on the 25th of October, 1941, to deal with the above dispute has now completed the work assigned to it and begs to submit the following report:

The Board commenced its sittings on October 29, 1941, and public sessions of the Board were held in the Council Chambers in the Courthouse in the City of Hamilton on that date and on November 24, December 3 and 4, 1941. At all sittings, the three members of the Board were present.

The Company was represented by C. H. Mitchell, Vice-President and Works Manager; E. M. Coles, Vice-President; and B. B. Hodge, Personnel Manager.

The Employees were represented by Alfred Ready, President; John Whittaker, Vice-President; and George Harris, District Secretary of the Union involved.

Your Board considered the matter in dispute as set out in the original application on behalf of the Union, sworn to on the 26th of August, 1941, as it affects the employees of the East Plant of the Company and in accordance with the order of the acting Minister of Labour, dated the 25th day of October, 1941, also considered the matters in dispute as they affect the Company and its employees in its West Plant at Hamilton, Ontario. During the sittings efforts were made by the Board to have both parties get together and settle their difficulties without avail and the Company throughout took the position that it would not deal with the Union under the circumstances as they exist in the plants.

The Company is engaged largely in vital war work and employs some 4,887 employees, of which number 3,221 are employed in what is known as the East Plant in the City of Hamilton, Ontario, and 1,666 at what is known as the West Plant of the said company in the City of Hamilton, Ontario.

During the course of the hearing it was stated by Mr. Harris, on behalf of the Union, that the most contentious question was not that of wages, working conditions, etc., in the plants, but was recognition of the union involved. Mr. Harris claimed that in the two plants of the Company, the Union had 2,900 members; that they therefore had a clear majority of all of the employees of the Company and that therefore the Union had a right to be recognized as the sole bargaining agency for the employees. In the brief filed on behalf of the Union it was stated that on the 24th day of June, 1941, the Union had called a one-day conference of all the employees of the Company and the brief stated, "This conference was called on the 24th day of June, and more than 80 per cent of the employees in the East Plant remained away from work in order to attend. This established in an undisputable manner the fact that the Union did represent the overwhelming majority of the employees." On June 24, 1941, the number of employees employed in the East Plant was 2,827 and it was proven to the Board that on that date the total absentees for any cause from the East Plant were 1,034. When this figure was brought to the attention of Mr. Harris he said that the statement contained in the brief was based on an estimate made by certain members of the Union. In view of the importance of the point from the standpoint of the Union, Mr. Harris was asked on more than one occasion if he cared to submit any evidence in support of his contention that the Union did represent a majority of the employees, but he advised the Board that he had no further evidence to offer. On the evidence submitted, the Board is unable to find that the Union either have as members or represent a majority of the employees of the Company.

During the course of the hearings it became apparent that there was another organization active among the employees of this Company and finally at the suggestion of the Board, on the 3rd day of December, 1941, Mr. F. R. McKelvey, secretary of an organization known as the Canadian Westinghouse Employees Association, appeared before the Board and filed a brief. Subsequently on satisfactory evidence it was proven that as of November 29, 1941, this association had 2,082 actual *bona fide* members. This association, which was organized this year, has since its inception bargained with the Company on behalf of the employees through a Works Council representing every department in both plants, and its relationship with the Company to date appears to have been harmonious and satisfactory to both parties. This organization strenuously opposes any collective bargaining agreement between the Company and the Union. This association did not ask for sole bargaining rights on its own behalf nor for any agreement with the Company and it stated that there was no dispute at the present time between the Company and its employees.

Subsequently, Mr. Harris took the position that if there were any question in the mind of the Board regarding the number of employees that the Union did represent, that a vote should be taken under Government supervision to decide the point. This application was pressed very strenuously. If, on the evidence presented, there was any room for doubt on this question, Mr. Harris' request for a vote should be given due consideration. However in the present case there can be no doubt that on the evidence submitted the Union does not represent a majority of the employees of the Company and therefore there is no necessity or reason for any vote. There is not in this plant any union or organization desiring a collective bargaining agreement which does in fact represent a majority of the employees and under the circumstances existing, this Board does not recommend that the Company enter into any collective bargaining agreement.

The Board was asked by Mr. Harris that in any event the other matters said to be in

dispute as set out in the application of the Union should be considered by the Board and on these matters the Board has the following report to make:—

1. *Wage increase of 10 cents per hour.*

It was agreed by all parties that this claim was one which affected the basic scale of wage rates paid by the Company on the 15th day of November, 1941, and that this Board should not deal with the matter in view of the provisions of Order in Council P.C. 8253.

2. *Upward adjustments in the wage rates for various classifications of labour.*

The Company claimed that it is now paying the highest wages in the history of the Company and no satisfactory evidence was submitted to the Board that there should be any upward adjustments in these wage rates. One objection the Union had to the present basis of paying the various classifications of employees was that there was no set scale and that wages in each classification were raised from time to time whenever the Company felt like it and that an employee starting at the lowest wage in any one classification did not know when he was entitled to a raise or to how much he was entitled. The explanation of the Company was that the operations in the plant were so diversified that it would be difficult to divide the different classifications to remedy this situation. While the Board thinks there may be some difficulty, the Board feels that it is desirable that an effort be made by the Company to set up a definite scale of wages for each classification of labour with definite periods of service entitling employees to consideration in moving a step up in their classification.

3. *Vacations with pay.*

It appears that for some years there have been some provisions made by the Company for vacations with pay and in the month of June, after negotiations with the Canadian Westinghouse Employees Association, the Company put into effect a program relating to vacations with pay effective as of July 1, 1941, which provides that female employees with three years' service receive one week's vacation; male employees who have completed five years' service, one week's vacation; and male and female employees who have completed ten years' service, two weeks' vacation per year with pay. Under the present circumstances, the Board does not recommend any change in the existing policy of the Company.

4. *Time and a half pay for all hours worked over eight daily and forty weekly.*

Under the present arrangements, employees work eight hours daily and forty-four hours weekly. Mr. Harris stated that the employees did not object to working forty-four hours weekly, particularly during the present crisis, but the Union thought it desirable to establish a forty-hour week with the time and one-half paid for all time worked in excess of forty hours. In view of the practice in other plants of a similar nature and the present war conditions, the Board does not recommend any change in the present system.

5. *Seniority as to Lay-offs.*

The Company has at present in force a system of seniority as to lay-offs, based primarily on length of service, which appears to be working satisfactorily. The main contention of the Union is that preferential seniority should be given to shop stewards and Union officials. In view of the fact that in the opinion of the Board the Union does not represent the majority of the employees, the Board sees no reason for recommending preferential seniority for shop stewards and Union officials and therefore recommends no change in the present practice.

6. *Guarantee of four hours' work on reporting for duty.*

Under the present system it is claimed that very often working men report for work in pursuance of instructions and are sometimes held at the plant gates for a considerable length of time and then no work is given them. The Union demands a guarantee of four hours' work on reporting for duty. The Company objects to this demand and says that often it is impossible for it to arrange matters so that a situation such as this should not arise. The Board feels that the Company should be able to so arrange its production as to be able to guarantee a reasonable number of hours' work to employees reporting for work on the instructions of the Company. The Board therefore recommends that where the Company's employees are required to report for work that employees so reporting shall be paid a minimum of two hours' pay and if held over two hours, the actual time so held at regular rates.

7. *Ten per cent bonus for second and third shifts.*

This is a matter on which the Board makes no recommendation in view of the provisions of the Order in Council P.C. 8253.

8. *Equal pay for equal work.*

It was stated by the union that in many cases female employees are employed by the Company to do work which other male employees are doing and that such female employees are paid a lower rate than the male employees for the same type of work. The Union suggests, although it does not claim it has happened, that if the Company is allowed to do this, the tendency will be wherever pos-

sible to replace male employees with female employees at a lower rate of pay. There is no suggestion from any source that the Company is making this a practice and the Board makes no recommendation on this matter.

In the opinion of the Board there should be no difficulty in any employee or group of employees in either of the plants of this Company being able to lay before the Company management any grievances they may have. The Company says that it recognizes the right of the employees to form themselves into an organization or to join the Union of their choice, and that the Company has shown a genuine interest in its employees. That the Company has shown a genuine interest in its employees is demonstrated by the fact that since 1920 the Company has maintained a trust fund, known as the Benefit Fund for the payment of disabilities and sickness benefits to employees contributing thereto, that it has had since 1940 a group life insurance plan available to all employees towards which the Company has contributed a substantial sum in premiums, that it has a service pension system to which the Company has already contributed $2,000,000, that there is in this Company, in addition to the organization hereinbefore referred to, a senior veteran employees association which has 889 employees who have been employed for twenty years as members, and a junior veterans employees association composed of employees who have been employed for ten years or over and having a membership of 1,025. There seems to be no reason therefore to believe that the Company's attitude to its employees will now change or that there will be in any way any discrimination against any of its employees who are either members of the Union involved or who participated on behalf of the Union in the hearings of this Board.

All of which is respectfully submitted.

December 23, 1941.

Minority Report

In the Matter of Dispute between Canadian Westinghouse Company, Limited, Employer, and its Employees, Members of Local 504, United Electrical, Radio and Machine Workers of America, Employees.

To the Honourable the Minister of Labour, Ottawa, Ontario.

The member of the Board of Conciliation appointed by you on the nomination of the Union is unable to agree with his colleagues excepting on a few unimportant items, and begs, therefore, to submit a minority report.

In submitting this report I am impelled to indicate in a word or two the chief objectives sought to be attained in the application of the Industrial Disputes Investigation Act under the authority of which the Conciliation Board was created. This legislation was extended to embrace all war industries and from its title is to be an act to aid in the prevention and settlement of strikes and lockouts. It is, therefore, the duty of a Conciliation Board to bear continuously in mind the aims to be achieved and that the circumstance which alone makes the legislation applicable is the existence of war and the need for uninterrupted prosecution of that war on the production front. This legislation is complemented by Order in Council P.C. 2685, which speaks of the establishment and maintenance of good relations between firms engaged in war work and their work people, and goes on to state that in war time the safety of the nation must be the first consideration, and that the best interests of industry and labour are inseparable. This Order in Council directs that employees be free to organize in any trade unions free from any control by the employer, and that employees through such trade unions be free to negotiate with their employers with a view to the conclusion of a collective agreement. The Order in Council stresses particularly the provision of machinery for the settlement of disputes arising between employer and employee.

It can be safely accepted both from the evidence adduced at the hearings and from common knowledge that the United Electrical, Radio and Machine Workers of America, the Union involved in this dispute, is composed of a group of loyal working men and women deeply concerned in furthering the vigorous and victorious war against our enemies. That being so it is only necessary to adopt reasonable precautions against provoking serious labour disputes, and, therefore, having regard to all conditions and circumstances which may exist, it becomes the duty of an employer to avoid creating a situation which could give rise to extreme provocation.

There is at least one circumstance disclosed at the hearing, and for which in my opinion the Company is responsible, which may very conceivably lead to provocation of a kind which must by all means at our disposal be avoided. In attendance at all the sittings of the Board there was a representative of an organization calling itself "The Canadian Westinghouse Employees Association." It was claimed for this association that it embraced

some 2,000 employees and although the representative was invited by the Board on behalf of his Association to participate in the deliberations as a concerned party, the invitation was refused, and the representative remained merely as an "observer." The attitude of the association toward the Conciliation Board is aptly stated by the Chairman in the Majority report:—

> "This organization strenuously opposed any collective bargaining agreement between Company and Union. This Association did not ask for sole bargaining rights on its own behalf nor for any agreement with the Company, and it stated that there was no dispute at the present time between the Company and its employees."

The UE first made its appearance at the Westinghouse plant in the early summer of 1941, and toward the latter part of June had enrolled a substantial number of the Westinghouse East Plant employees into its organization, and at about the same time made its demands upon the Company and proceeded thereafter to apply for the appointment of this Board. The Westinghouse Employees Association came into being shortly after the UE commenced organizational activities, and was immediately accepted by the Company as a bargaining agency for the employees. On the basis of so-called negotiations between the Employees Association and the management numerous adjustments were made relating to wages and conditions; a greatly modified vacation plan was adopted; and generally the status quo contemplated by the Industrial Disputes Investigation Act pending the findings of a Conciliation Board was not observed. It should be added that the changes made in the relationship of the parties were in every case to the advantage of the workers, and probably would be wholly acceptable if there were no other interpretations to be placed on this episode, namely, a bribe to entice the men away from the UE and bring them into the Employees Association, thereby, in contravention of P.C. 2685, creating a bargaining agency of the employer's own choice.

It was quite apparent from what was said at the hearings and from the constitution and by-laws of this Canadian Westinghouse Employees Association that it is substantially what is popularly called a "company union." The charge was made and not denied that the method of enrolling members into the Association was coercive in the sense that a foreman or company official would approach the prospective member, ask him to sign a membership card or application, and deposit 25 cents. It was pointed out that because the canvasser was the foreman or some company official, an employee could not safely refuse the request. The Board was told furthermore of demonstrations in which men who had enrolled in the Association, upon discovering the true character of its aims had, in a more or less formal manner, "torn up" their membership cards. The constitution and by-laws of this Association depart very radically in the manner of conducting its affairs from that employed by trade union organizations; no provision is therein made for membership meetings; the affairs of the Association are in all things transacted by a works council elected by a vote of the membership at the plant and not at a meeting. Contrary to all usual practices the Association was provided with an office within the plant proper, apparently by the Company, and had, it would appear, one full-time employee, a Mr. McKelvey. The true relationship of this Association to the Company is best illustrated by the attitude of Mr. Mitchell, the vice-president and manager of the Company, who, when asked why he refuses to negotiate with representatives of the United Electrical, Radio and Machine Workers of America, replied that he would negotiate with his employees, but would not permit any one not in the Company's employ, to attend any such conference. It was proven that the Company had held conferences and had made agreements with the Canadian Westinghouse Employees Association, which was represented by Mr. McKelvey, and that Mr. McKelvey was not in the Company's employ, thus proving, to the general manager at least, that Mr. McKelvey was a Company employee.

Since the creation of conciliation machinery is an admission that our industrial set-up is one of potential conflict, its primary purpose must be to discover whether there may not be less antagonistic and wasteful means of achieving industrial peace during war time than we are acustomed to have ordinarily. In this consideration the position of a company union must be earnestly studied and if found to be a deterrent to efficient production a pronouncement to that effect ought to be made. There can be no question that the decisions of this Board were greatly influenced by the Employees Association represented by Mr. McKelvey and should it be that the "association" is in fact Company controlled or sponsored, of which I have no doubt, then the influence exerted has been improperly applied, and the value of the hearings has been greatly impaired, and a serious bottleneck of war production has been created.

The main question before the Board was on Union recognition, the contention of the Union being that with such recognition it would be relatively easy for the management and the

Union to confer together and dispose of all questions in dispute between them. Early in the hearing the question of the numerical strength of the Union arose, the point in issue being the Union's right to be regarded as representative of the Company's employees. From evidence submitted by the Company, some 1,034 of its employees in the East Plant were absent from the plant in response to the Union's call for a demonstration on the 24th of June. The Union claimed, and it was not denied, that a considerably larger number responded, and maintained that many employees punched their "in" time before realizing the significance of the demonstration, and very soon after that left the plant. No evidence was made available from the Company's records to show how many of its employees had done this in refutation of the Union's claim that 80 per cent of the employees responded. On the basis of this evidence I am satisfied that Local 504 of the United Electrical, Radio and Machine Workers of America does in fact represent a very large portion, and probably an absolute majority, of the Westinghouse employees.

It must be borne in mind that Order in Council P.C. 2685 is clearly interpretable as encouraging the formation of trade unions for the very vital purpose of speeding war production. It was given in sworn testimony before the Board that the Union in question has an aggregate membership of some 250,000 who work under collective agreements with employers in both Canada and the United States, and that this number embrace some 75,000 employees of the Westinghouse Company in the U.S.A. It was further given in evidence that of this aggregate number of 250,000, during a twelve-months period only 0·2 per cent man days had been lost by reason of trade disputes, also that after four years of operation under a collective agreement with the Westinghouse Company in the U.S.A. no strikes or lockouts had occurred. Thus it will be seen that the Union in question exerts a predominantly harmonious influence within the industry, and although no evidence was given before the Board which would reflect on the character of the Union, there were many statements in the Company's brief and many inferential remarks made on behalf of the Company of a disparaging nature. Having regard to all the circumstances I am convinced that national policy today will be best served if an organization of this size and nature is recognized in relation to a plant as large and as important as the Canadian Westinghouse Company, Limited.

The majority report of this Board of Conciliation indicates that the signers thereof must have accepted one or another of two premises, neither of which it seems to me is valid: the first one being that no ground for discontent existed to warrant the application for a Conciliation Board, and the second, that the Union which made the application was not representative of the Westinghouse employees. The first premise is not tenable because strong evidence was adduced to the contrary, and because also, as a condition precedent to the granting of a Board the complaints were previously investigated by a departmental board of inquiry and found to warrant appointment of a Board of Conciliation. The second premise is not acceptable for the reason previously indicated, that even though no conclusive evidence, such as would be acceptable in a Court, was adduced to prove that the Union represented a majority of the employees, there was ample evidence to show that it represented a very substantial number, and if the object of the conciliation be to eliminate discontent and speed production, it would appear as a clear duty of the Board to make further inquiry, and if as a result of such inquiry it still was undecided, then it should direct a ballot to determine whether the employees desire to delegate the Union in question as the bargaining agency, and I therefore recommend the taking of such a ballot. I recommend further that if the result of such vote be in favour of the Union, then the Board urge the signing of a collective labour agreement providing therein for all matters referred to it by the Minister, and providing therein also grievance machinery for settling disputes which may arise.

Dealing now with the specific demands as tabulated in the application made by the Union:—

1. *Wage increase of 10 cents per hour, etc.*

At the hearing no very satisfactory definition was found for the term "basic scale of wages" used in Order in Council P.C. 8253, and one can readily agree with the majority report that insofar as any demand relates to or affects the "basic scale of wages," the Board ought not to make any recommendations; but until this question is further clarified by departmental or judicial rulings I would not be inclined to assume that every type of wage increase affects the "basic scale of wages." The Board early in its deliberations, through the Chairman, gave an interpretation to this term, and as a result no evidence on that score was brought before the Board, and therefore no recommendation can be made.

2. *Upward adjustments in the wage rates for various classifications of labour.*

I am in full agreement with the majority report that there ought to be set up a definite scale of wages for each classification of labour

with specified periods of service entitling employees to consideration in moving upward in their classification.

3. *Vacations with pay.*

The present vacation program of the Company, effective as of July 1, 1941, although a great improvement over what it was before Local 504 of the United Electrical, Radio and Machine Workers of America came on the scene, is nevertheless not in line with similar programs in the industry. In a recent agreement between the Union in question and the Canadian General Electric Company, a comparable undertaking to Westinghouse, provision was made for one week's vacation with pay after the completion of two years' service, and two weeks' vacation with pay after five years' service. That in my opinion would constitute a minimum arrangement. A fairer plan, however, is according to the Union's demand, namely, one week's vacation with pay after the completion of one year's service, and two weeks' after the completion of five years. I recommend accordingly. It has been reliably demonstrated that the efficiency of a worker is decreased without adequate vacation provisions. This recommendation again, in my opinion, is wholly in line with the views expressed in Order in Council P.C. 2685.

4. *Time and one-half pay for all hours worked over eight daily and forty weekly.*

The general tendency toward a forty-hour week has been discernible in industry for many years, and although I would not at this time recommend any measure which in the result would decrease production, I nevertheless accept this tendency as meritorious, and believe the best interests of the industry will be served by conceding the request of the Union, which in my opinion is both fair and reasonable. The universal custom of paying a premium for overtime and the almost universal custom of paying a premium for second and third shifts, an item more specifically discussed hereafter, are not to be regarded as a penalty against the employer. It can be demonstrated that a worker employed during long hours or working other than normal shifts is actually contributing more of his energies, and that this additional expenditure on his part operates eventually to shorten his normal span of active life, and, therefore, entirely aside from the actual inconvenience of working at other than normal periods, I find that the demand for time and one-half is justified, and it is furthermore justified by the incentive it gives men to work long hours.

5. *Seniority as to lay-offs.*

The evidence brought before the Board was wholly conflicting in this regard. The Union maintained that the Company did not put into operation the principle of seniority as it is commonly understood. The Company on the other hand contended that it was operating on the basis of this principle. There was, therefore, no disagreement between the parties as to what should be done, and had there been grievance machinery all grounds for complaint could easily have been removed. In the majority report the question of preferential seniority for shop stewards is stated to have been the main contention of the Union. With this statement I cannot agree. The question of preferential seniority is one of the Union's demands, and from the evidence submitted it would appear to be a common practice in unionized shops to make provision for preferential seniority as to lay-offs and rehiring for shop stewards. As explained by representatives of the Union, in order to maintain the continuity of the trade union grievance machinery it is necessary that, where possible, the Union representative be retained on the job. This, it was explained, is usually done by a vote taken in the department affected to determine whether the shop steward should and to what extent he should receive preferred seniority. I recommend a system of seniority based upon length of service, with preferred seniority for shop stewards where the same is sanctioned by a vote of the persons working in any department involved.

6. *Guarantee of four hours' work on reporting for duty*

I agree with the majority report that the Company should be able to so arrange its production that a reasonable number of hours' work will be guaranteed to every employee who has not been previously informed that there will be no work for him, but I am unable to agree that the contention of the Union for a guarantee of four hours' work under such circumstances is unreasonable. The evidence presented indicated that in many instances men travelled a considerable distance from their homes to the plant, and I believe some compensation ought to be given for the time and money spent in so travelling and for the preparation of lunches; furthermore, because the rate of pay for unskilled workers is in many cases as low as 38c. per hour, and since it is largely this type of employee who is affected, the equivalent of four hours' pay is not an excessive demand, and I recommend accordingly.

7. *10 per cent Bonus for 2nd and 3rd shifts, etc.*

I am unable to agree with the majority report that Order in Council P.C. 8253 refers to a matter of this kind. The Order in Council talks of the "basic rate of wages".

Had the word "basic" been omitted, then it may be argued that the order refers to all matters of wages. To give meaning to the word "basic" one must assume that it does not refer to every class of wages, and therefore does not affect the specialized item of a 2nd and 3rd shift bonus. Since it is common practice in this and in most allied industries to allow such a bonus, and in view of what I have said above on the question of overtime, I recommend a bonus of 5 cents per hour for these two shifts.

8. *Equal pay for equal work.*

It was contended before the Board by the Union that owing to enlistments male labour was being replaced by female labour and that the latter were receiving a lower wage rate for the identical work previously done by men. Dealing with this contention one can sense the need for retaining the standards existing at a time a man enlists for the time of his return and the serious difficulties to a resumption of these standards if they be allowed to waver in the interim. It was also contended for the Union that because the Company is unable to engage employees in certain classifications it is forced in many instances to pay a higher rate of wages to new employees, and that the situation then arises of two men doing identical work side by side, one with possibly many years of experience in the shop, and the other a recently engaged employee, and despite that the older employee is more efficient, the wages of the new employee are higher. Then also there were said to be cases of favoritism and of discrimination resulting in unequal pay for identical work. It cannot be denied that such conditions create a great deal of friction, and thereby hamper production. To solve this problem I recommend the general principle of equal pay for equal work.

All of which is respectfully submitted.

(Sgd.) D. GOLDSTICK, member.

STRIKES AND LOCKOUTS IN CANADA DURING JANUARY, 1942

THE following table shows the number of disputes, workers involved and time loss for January, 1942, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in man working days
*January, 1942.....	13	2,715	46,606
*December, 1941.....	11	5,718	54,945
*January, 1941.....	10	1,453	3,238

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes".

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

While the number of strikes and lockouts during January was slightly higher than in December there was a great decrease in the number of workers involved with an appreciable decrease in the time loss. The strike of gold miners at Kirkland Lake, Ont., accounted for 75 per cent of the workers and 95 per cent of the time loss during the month. The other 12 disputes involved only 715 men and resulted in time loss of 1,606 days. In December, likewise, most of the time loss was caused by the strike at Kirkland Lake, the other strikes of importance being those of coal miners at Springhill, N.S., and textile workers at Lachute Mills, P.Q. In January, 1941, the noteworthy disputes were those involving coal miners at Sydney Mines, N.S., and hotel waiters at Vancouver, B.C.

Two disputes, involving 2,013 workers, were carried over from December and 11 commenced during January. Of these 13 disputes, 12 were terminated during the month. Three resulted in favour of the employers involved, one in favour of the workers, one was partially successful, five were compromise settlements, and two were indefinite. At the end of the month, therefore, there was one strike recorded as in progress, namely: Gold miners, Kirkland Lake, Ont.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not yet declared terminated. Such disputes are listed in this paragraph for a period up to one year after their removal from the table of current strikes. Information is available as to one dispute of this nature, namely: truck drivers

STRIKES AND LOCKOUTS IN CANADA DURING JANUARY, 1942*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to January, 1942.				
MINING, ETC.—				
Gold miners, Kirkland Lake, Ont.	8	2,000	45,000	Commenced Nov. 18, 1941; for union recognition; unterminated.
SERVICE—				
Business and Personal—				
Beverage room employees, Crow's Nest Pass, Alberta.	7	13	230	Commenced Dec. 20, 1941; for union agreement with increased wages; terminated Jan. 29; negotiations; partially successful (some compromise agreements reached).
(b) Strikes and Lockouts commencing during January, 1942.				
MINING, ETC.—				
Machinists (coal mine), Glace Bay, N.S.	1	50	400	Commenced Jan. 5; against the hours for extra shift; terminated Jan. 13; work resumed pending negotiations; compromise.
Coal miners (pickers), Rosedale, Alberta.	1	(a) 10	10	Commenced Jan. 14; for increased wages; terminated Jan. 14; negotiations; in favour of employer.
Coal miners, Midlandvale, Alta.	1	209	209	Commenced Jan. 20; for employment of extra help to push cars; terminated Jan. 20; negotiations; compromise.
MANUFACTURING—				
Boots and Shoes—				
Shoe factory workers, Toronto, Ont.	1	17	100	Commenced Jan. 12; for union agreement with increased wage rates; terminated Jan. 19; conciliation (federal); compromise.
Textiles, Clothing, etc.—				
Hosiery toppers (girls), Sherbrooke, P.Q.	1	(b) 80	240	Commenced Jan. 21; for an adjustment in wage rates; terminated Jan. 23; conciliation (provincial); compromise.
Printing and Publishing—				
Printing pressmen, Toronto, Ont.	1	28	25	Commenced Jan, 26; for increased wages and cost of living bonus; terminated Jan. 27; conciliation (provincial); in favour of workers.
Metal Products—				
Cable factory workers, St. Johns, P.Q.	1	96	270	Commenced Jan. 14; against dismissal of worker; terminated Jan. 16; return of workers; in favour of employer.
Moulders, etc., St. Boniface, Man.	1	85	25	Commenced Jan. 14; for union recognition, day wages instead of piece rates and reduced hours; terminated Jan. 14; conciliation (provincial), work resumed pending application for I.D.I. Board; indefinite.
TRANSPORTATION—				
Local and Highway—				
Truck drivers, Dolbeau, P.Q.	1	50	50	Commenced Jan. 21; for increased rates per ton; terminated Jan. 21; negotiations, work resumed pending reference to Regional War Labour Board; indefinite.
Truck drivers, Toronto, Ont.	1	17	17	Commenced Jan. 26; against dismissal of official; terminated Jan. 27; replacement and return of workers; in favour of employer.
SERVICE—				
Public Administration—				
Civic garbage collectors, Hamilton, Ont.	1	60	30	Commenced Jan. 19; for payment for overtime work; terminated Jan. 19; negotiations; compromise.

* Preliminary data, based where possible on direct reports from parties involved, in some cases incomplete; subject to revision for the annual review.

† In this table, the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which time was lost to an appreciable extent.

(a) 215 workers indirectly affected. (b) 300 workers indirectly affected.

and helpers, Toronto, Ont., one employer, Oct. 7, 1941, to Dec. 31, 1941.

A stoppage for an hour or so in a shipbuilding establishment at Vancouver, B.C., on January 12 has been reported in the press as a strike. One worker had been dismissed and work ceased during a discussion with the management which resulted in his reinstatement.

A stoppage of work by a small number of coal miners in one mine at North Minto, N.B., about January 27 has been reported in the press, but full particulars have not been received. It appears that the miners contended that 15 men should be employed on the wall instead of 12 and the men were given other work pending a settlement.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to January

GOLD MINERS, KIRKLAND LAKE, ONT.—Following separate meetings with representatives of the mine operators and union representatives in January, the Minister of Labour made proposals that the strike should be called off and the miners taken back without discrimination as required on the basis of their previous service subject to their qualifications; the methods to be adopted for negotiation of agreements as to wages and working conditions to be referred to the National War Labour Board, its decision to be final; the Board to be governed by the provisions of the Industrial Disputes Investigation Act relating to the "Functions, Powers and Procedure of Boards". The union indicated its willingness, subject to certain qualifications, to submit the dispute to the Board, but formal approval of the Minister's proposals had not been received either from the representatives of the mine operators or of the miners by the end of the month. Early in February the union informed the Prime Minister that the miners were willing to resume full operation if assured of protection against discrimination and if returned to work in order of seniority. During January no reports of further disturbances in connection with picketing were reported except that early in the month one man was arrested on a charge of obstructing police and at the end of the month four workers were assaulted, one receiving serious injuries requiring hospital treatment.

BEVERAGE ROOM EMPLOYEES, CROW'S NEST PASS, ALBERTA.—The strike of beverage dispensers in seven hotels in Coleman, Blairmore, Bellevue and Hillcrest, in the Crow's Nest Pass mining area in Alberta, which began on December 20, 1941, to secure union agreements with an increase in wages, was reported terminated on January 29 when four of the hotels signed agreements providing for a minimum rate of $27 per week instead of $24, offered by the employers, or $28.50 desired by the union. One hotel out of the seven originally involved had reached an agreement earlier. In the other two hotels the strikers had returned to work. The increase in wages was reported to be subject to the approval of the Regional War Labour Board in accordance with the Order in Council of October 24, 1941, P.C. 8253.

Disputes Commencing During January

COAL MINE MACHINISTS, GLACE BAY, N.S.—Employees in the machine shop ceased work on January 5 when a new shift was instituted, objecting to the hours proposed and to the change in conditions without negotiations under the agreement. On advice from union officers, work was resumed pending negotiations. An agreement was then reached as to the hours for three shifts, the rates of wages on the night shifts to be referred to the National War Labour Board.

COAL MINERS (PICKERS), ROSEDALE, ALBERTA.—The coal pickers requested an increase in pay over the agreement rates and, when refused, ceased work, involving 215 other workers in the stoppage. On advice from union officials, work was resumed after one day without change in rates.

COAL MINERS, MIDLANDVALE, ALBERTA.—A one-day stoppage of work occurred on January 20 owing to a dispute as to the placing of empty cars at the working face instead of at the nearest cross cut, requiring either extra men as pushers or a reduction in the number of cars placed and in the number of miners employed. The latter was decided upon and work was resumed.

SHOE FACTORY WORKERS, TORONTO, ONT.—A number of employees in one factory ceased work on January 12 to obtain an agreement with an increase in wage rates. From 1936 until December 31, 1941, the factory had been operated under an agreement with the Canadian Shoe Workers' Union & Allied Crafts and the employer was notified that this organization had been replaced by the Shoe & Leather Workers' Organizing Committee, affiliated with the Canadian Congress of Labour. As a result of conciliation by the Department of Labour an agreement was reached providing for a five per cent increase in some of the piece rates, subject to approval by the Regional War Labour Board. Work was resumed on January 19.

HOSIERY TOPPERS (GIRLS), SHERBROOKE, P.Q.—The toppers in a hosiery mill ceased work on January 21 to obtain an increase in the rates of pay owing to a change in the work

resulting from the use of artificial silk instead of real silk. As a result of conciliation by the Quebec Department of Labour new rates were agreed on, subject to the approval of the Regional War Labour Board for the Province of Quebec. Work was resumed on January 26.

Printing Pressmen, Toronto, Ont.—The printing pressmen and assistants in one job printing establishment ceased work on January 26 to obtain an increase in wages of $2 per week with a cost-of-living bonus. As a result of conciliation by the Ontario Department of Labour, increases were agreed to, subject to the approval of the Regional War Labour Board for Ontario, and work was resumed on the next day.

Moulders, St. Boniface, Man.—A three-hour stoppage of work occurred in a foundry on January 14 owing to the failure of negotiations for an agreement with the moulders' union. The workers desired a change in wages from piece rates to day rates and a reduction in hours from 11 to 9 per day. The management offered to institute for trial for six weeks a new method of work which was expected to reduce working time to eight and one-half hours per day, but this was refused. A conciliator from the Manitoba Department of Labour participated in these negotiations. When the stoppage occurred the management made a proposal to refer the dispute to a board under the Industrial Disputes Investigation Act. Work was resumed on the advice of the union representative after a delay in turning on the power.

Garbage Collectors, Hamilton, Ont.—Drivers and helpers refused to work overtime on Saturday afternoon, January 17, and did not work on the following Monday morning, their request for payment for overtime not having been granted. Work was resumed when it was arranged that extra trucks and men would be engaged in order to eliminate overtime work.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the Labour Gazette from month to month, bringing down to date that given in the March, 1941, issue, in the review of "Strikes and Lockouts in Canada and other Countries, 1940." The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is taken for the most part from newspapers.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July 25, 1940, provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the Labour Gazette, August, 1940, page 760.

The number of disputes beginning in November was 111 and 13 were still in progress from the previous month, making a total of 124 disputes in progress during the month; 46,300 workers were involved in the disputes in progress during the month and the time loss was 72,000 working days.

Of the 111 disputes which began during November, 30 arose out of demands for increased wages and 39 were over other wage questions, 4 over working hours, 18 were over questions regarding employment of particular classes or persons, 17 arose out of questions respecting working conditions, 3 on questions of trade union principle. During November final settlements were reached in the case of 93 disputes, of which 13 were settled in favour of workers, 55 in favour of employers and 25 resulted in compromise settlements. In 25 other disputes, work was resumed pending negotiations.

Employees of an engineering firm at Glasgow were on strike over the employment of an allegedly unqualified supervisor. The strike ended after two days, on November 7. The maximum estimated number of workers involved was 12,500.

A strike of 2,000 coal miners in Kent began January 11, over a wage dispute. Three of the labour union officials were convicted and given short jail sentences on a charge of striking without giving previous notice. The strike was settled January 29, the miners winning a wage increase, plus a war bonus.

United States

Preliminary figures show the number of strikes beginning in December as 175, involving 35,000 workers in the new strikes. The time loss for all disputes in progress during the month was 500,000 working days.

CLARIFICATION OF SALARIES ORDER IN RELATION TO WAGES ORDER

Amending Order P.C. 946 Applies to Salary and Wage Earners

ON February 11, the Minister of Finance, Hon. J. L. Ilsley, tabled in the House of Commons, Order in Council P.C. 946 amending the Wartime Salaries Order, P.C. 9298 of November 27, 1941.

The amending order is intended to clarify the application of the original Wartime Salaries Order and to alter certain details of its provisions in regard particularly to promotions, new appointments and the payment of bonuses.

Mr. Ilsley, in his statement made to the House of Commons, drew attention to the fact that in clarifying the definition of salaried official, this amending order definitely places some employees under the wages and cost-of-living bonus order, thereby entitling them to the cost-of-living bonus from their employers.

The statement of the Minister of Finance, made in connection with this clarifying Order in Council, is as follows:

"All persons receiving salaries or wages of less than $175 a month are excluded from the class of salaried official and made subject to the wages and cost-of-living bonus order. All those receiving $250 or more a month are considered to be salaried officials unless their duties or responsibilities show clearly that they are not above the rank of foreman or comparable rank, in which case they are subject to the wages order. The national war labour board, or its regional boards, are made responsible for determining the status of any employee or any class of employees in case of doubt or dispute. The national board has already issued a number of general interpretative rulings on this matter and will be issuing others in due course.

"Another change is intended to remove the source of what is regarded as discrimination within many organizations where highly paid workmen or foremen are entitled to a cost-of-living bonus under the wages order while junior salaried officials earning no more, or even less, are prevented from receiving such a bonus by the provisions of the salaries order. The amending order permits an employer to pay a cost-of-living bonus to salaried officials earning no more than other employees of the same employer who are entitled to such bonus under the wages order. This special permission is not allowed to apply to officials receiving more than $4,200 per year, and the general limit of $3,000 on those permitted to receive the bonus remains applicable where the special circumstances are not present.

"Other provisions of the amending order extend the control to salaries of those hired after the original order went into effect. An employer is not permitted to pay to a newly-appointed salaried official a rate of salary higher than the rate previously paid to another official performing substantially the same services, or if there is no such guide, the employer shall not pay a rate of salary higher than is reasonable and proper, having regard to the rates paid to salaried officials for similar services in like business. This provision is intended, among other things, to check the practice of employers trying to entice employees from one another by the promise of higher salaries.

"To avert any danger of an employer paying a higher initial rate of salary than he otherwise would to a newly-hired or newly-promoted official because that rate must not be subsequently increased under the terms of the order, the amending order provides that an employer may, in accord with his established practice, and by arrangement, pay first a probationary or temporary rate of salary, to be followed by a higher rate, in cases of new appointments or promotions taking place after the order went into effect.

"There are a considerable number of minor changes in wording, and definitions. A specific limitation is put on directors' fees instead of relying upon the general restrictions on salaries being applied. The intent of the original order is made clear by explicitly stating that the amount of any cost-of-living bonus being paid when the order went into effect shall be considered as part of the rate of salary at that time. The definition of employers subject to the order is altered to exclude all public hospitals, and all religious, charitable and educational institutions not carried on for gain. Notification is required of promotions within three months of the first payment of the increased salary, where it is not already required in advance. I will not attempt to go into further detail, as copies of the order are available to all those interested.

"Perhaps I should add that in the administration of this order by the income tax division, it is possible to obtain a close check on what is happening to all salaries by an inspection both of employees' and employers' tax returns. There is one other minor change which it may be necessary to make for administrative reasons, in addition to these amendments, and this may involve another brief order shortly."

AMENDMENT CLARIFYING STATUS OF FIRMS ALREADY PAYING BONUS NOT PURSUANT TO P.C. 7440

IN an amendment to the wages and cost-of-living bonus Order in Council (P.C. 8253), tabled in the House of Commons on February 11, authority is granted for changes in bonus payments that were not previously covered by the order.

The amending Order in Council (P.C. 871 of February 9), authorizes increases and decreases in cost-of-living bonuses, now being paid, but which were not in accordance with the original Order in Council, P.C. 7440. Included in the classes of payments that must be altered are general wage increases paid expressly in lieu of a bonus. Previous to this amendment alterations were required only in bonuses which conformed with P.C. 7440.

The amendment does not require upward adjustment in the amount of any bonuses now being paid. Increases and decreases are to be made with rises and falls in the cost-of-living index as announced quarterly by the National War Labour Board.

No increase may be made in bonuses of excessive amounts until future rises, if any, in the cost-of-living index warrant an additional amount, the new Order in Council specifies.

The text of the amending Order (P.C. 871) is as follows:—

Whereas by the Wartime Wages and Cost-of-Living Bonus Order (Order in Council P.C. 8253, dated October 24, 1941) provision was made for the payment by employers of a cost-of-living bonus to be adjusted in accordance with the rise or fall of the cost-of-living index;

And whereas provision was made in the said Wartime Wages and Cost-of-Living Bonus Order for the adjustment of cost-of-living bonuses previously paid pursuant to Order in Council P.C. 7440, dated December 16, 1940, to bring them into conformity with the cost-of-living bonuses required to be paid by the Wartime Wages and Cost-of-Living Bonus Order;

And whereas the Minister of Labour reports that certain employers, not subject to the provisions of Order in Council P.C. 7440 of December 16, 1940 had been paying cost-of-living bonuses or increases granted expressly in lieu of cost-of-living bonuses; and

That it is desirable to provide, insofar as it is possible, that such cost-of-living bonuses be adjusted in conformity with the provisions of the Wartime Wages and Cost-of-Living Bonus Order;

Now, Therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, and under the authority of the War Measures Act, Chapter 206, Revised Statutes of Canada, 1927, is pleased to amend the Wartime Wages and Cost-of-Living Bonus Order (Order in Council P.C. 8253, dated October 24, 1941) and it is hereby amended by adding thereto after paragraph (*a*) of section 12 the following paragraph as (*aa*) of section 12:—

(*aa*) Effective for the first payroll period beginning on or after February 15, 1942, each employer who has been paying a cost-of-living bonus otherwise than pursuant to P.C. 7440 of December 16, 1940, or who has been paying an increase in wages granted expressly in lieu of cost-of-living bonus, shall, if the amount of such cost-of-living bonus or increase was not, in respect of the last payroll period beginning before February 15, 1942, adjusted to equal the amount of the cost-of-living bonus calculated in accordance with the provisions of this Order based on the rise in the index number for the month in respect of which such adjustment was made above the index number for the month at the beginning of the period in the rise of the cost of living in respect of which such cost-of-living bonus or increase was paid, notwithstanding anything contained in section 18 hereof, increase or decrease the amount of such cost-of-living bonus or such increase in conformity with paragraphs (*c*), (*d*) and (*e*) of this section but he shall not increase the amount of such cost-of-living bonus or such increase so long as it is in excess of the amount of a cost-of-living bonus calculated in accordance with the provisions of this Order on an announced rise in the index number above the index number for the month at the beginning of the period of the rise in the cost of living in respect of which such cost-of-living bonus or increase was paid.

Hours of Hospital Employees in New South Wales

A 44-hour week for certain classes of hospital employees has been fixed by the Industrial Commission of New South Wales which was empowered in 1932 to determine, after public inquiry, standard hours for industries within its jurisdiction. Clerical officers, telephone operators, laboratory technicians, dispensers, wardsmen, storekeepers, porters, cleaners, cooks, laundry hands, maids of various descriptions, seamstresses, gardeners, engineers, firemen and handymen are covered by the judgment delivered September 1, 1941. For reasons of health, a work-week of five seven-hour days was fixed for X-ray technicians. To permit reorganization of hospital staffs in accordance with the ruling, it will not be effective until July 1, 1942, but after January 1, 1942, ordinary working hours for each four-week period must not exceed 192.

The Commission refused to accept arguments that the limitation of hours would cause a rise in costs and necessitate an increase in staff which was difficult to secure. It contended that, since the work was of a light nature, the amount done by each employee could be increased, and that if it was necessary to increase staffs, the shorter hours would attract more workers.

OPERATION OF PRICE CONTROL IN CANADA

Recent Regulations of Wartime Prices and Trade Board — Rationing of Sugar — Standardization and Reduction in Styles and Types of Goods, Etc.

THE following is a summary of the activities of the Wartime Prices and Trade Board during the second month's operation of the price ceiling policy. During the month the Board has instituted a system of rationing sugar, imposed certain restrictions on the production of farm equipment, machinery, attachments and repair parts; limited the use of certain types of bristles; and restricted the use of elastic rubber products.

Of particular interest will be the effect on styles and types of goods to be brought about by the Board's program of rationalization in manufacturing industries and on the process of distribution. By this program it is intended to eliminate "frills" and unnecessary costs in the manufacture and distribution of goods in order to bring about all possible economies and thereby assist in maintaining the retail price ceiling.

Further progress has been made in securing necessary adjustments of the ceiling structure in providing for increased costs to be absorbed by those engaged in the different sections of the industries concerned and where necessary by Government assistance.

Another recent development is the establishment of a Consumer Representation Branch by which means consumers throughout Canada will be afforded representation in the development of policies and operations of the Board.

Sugar Rationing

In January the Wartime Prices and Trade Board issued its first rationing Order (Order No. 93, subsequently replaced by Board Order 97). Simultaneously with action by the United States Office of Price Administration, the Board imposed limits on the use of sugar with a view to preventing shortages from developing. The loss of supplies to the United States from the Philippines may mean an increased drain on Cuban supplies, which provide a common reservoir for Canada and the United States, but with careful use and no hoarding, supplies will be adequate. By the Order, the household consumption of all types of cane and beetsugar is, therefore, to be restricted to ¾ pound per week per person, including all the members of the household, both adults and children, members of the family and resident servants, and boarders or guests who stay four days or longer. Not more than two weeks' supply may be purchased at one time except by those who live so far from stores that they can only make infrequent purchases. In such cases retailers are to keep a record of the amount purchased and the restriction on consumption must still be observed. As long as a household has two weeks' stocks on hand no more sugar may be purchased. Retailers are entitled to refuse to make a sale or limit the amount sold if they suspect that the order is being contravened. Boardinghouse keepers and persons providing meals for boarders or employees (but not hotels and restaurants) must limit consumption to the rate provided in the ration restrictions. Restaurants and hotels are required to serve sugar only on request, not leaving on tables any sugar containers except those with a device for regulating the flow of sugar. Each of the following industrial users must restrict each quarter's use of sugar to not more than 80 per cent of the quantity of sugar used by him in the corresponding quarter of 1941, (the months of February and March, 1942, being treated as two-thirds of a quarter): (*a*) Canners and preservers of fruits or vegetables; (*b*) manufacturers of chocolate, biscuits, candy or other confectionery; (*c*) Makers of bread, pies or cakes, and (*d*) Makers of wine, aerated waters, soft drinks, ice cream or ice-cream cones.

Other industrial users must limit their use of sugar to what they used for the same purposes in the corresponding quarter of 1941.

Except for wedding cakes all frosting, icing or dusting of bread, cakes, biscuits, pies, etc. with sugar or sugar preparations are to be discontinued by industrial users. It is expected that this provision will provide for more than a twenty per cent cut in use by makers of bread and cakes. There is no intention of cutting down production of such articles. These provisions apply to stocks on hand as well as to new stocks, and no industrial user may lawfully purchase or acquire a quantity of sugar in excess of what is reasonably required by him for the ordinary purposes of his business.

These provisions do not cover goods supplied by industrial users under contracts with the Department of National Defence or the Red Cross, subject to deduction of the amount of sugar so used in calculating the quantity used in each quarter of 1941. Anyone who

does not acquire sugar for resale in the ordinary course of business is forbidden to sell at retail to any employee or any other person. The Sugar Administrator has power to grant exemptions or permits or to control the use of sugar by hospitals and other public institutions. Special provision will be made for home canning and marmalade making.

The system does not involve the use of ration cards or coupons. Consumers are expected to restrict their own purchases and consumption to the generous ration designated and are subject to severe penalties for violation of the order. On the Monday following the Chairman's broadcast announcement of the plan, there was a short run on stores for sugar but this seems to have been due largely to misunderstandings and subsided the next day after a second broadcast and with the co-operation by many stores in refusing to make illegal sales.

Restriction of Manufacture of Farm Machinery and Repair Parts

The need for metals and other scarce materials for munitions and other war supplies has compelled the Board, through its Administrator of Farm Machinery, to restrict the production of farm equipment, machinery, attachments and repair parts in its first Administrator's Order No. A-1 (January 16, 1942), which applies to the period November 1, 1941 to October 31, 1942.

The importance of the industry in relation to food supplies is recognized but as the United States has restricted production, and as Canada imports a large part of its farm equipment requirements and materials for the production of farm equipment from the United States, it has become necessary to co-ordinate the regulations of the two countries. The production and import of farm machinery and the use of materials in the production of attachments and repair parts has been limited to designated percentages of the quantity produced, imported or used by any producer or importer in 1940, as reported to the Dominion Bureau of Statistics. These percentages range from 50 per cent for potato planters and some types of ploughs, to 200 per cent for milking machines and cream separators, and 140 per cent for materials used in attachments and repair parts. Exports of farm machinery are covered by these percentages, though the Order does not authorize any exportation. The Order also provides for the conservation of materials and planning of production with reference to the relative urgency of different needs and a proper assortment of different types of equipment. The Administrator may require the elimination or reduction of the use of certain materials and specify the uses to which they shall be put. He may require the elimination of certain types and sizes of machinery and parts, and allocate certain products to a single manufacturer who would be required to supply those who previously manufactured the product. Farm organizations are to urge farmers to make essential repairs as soon as possible.

Records as to inventory, purchases, production and sales are to be kept and such reports made as may be required including a statement as to production and imports after November 1, 1941.

To confine the purchase of farm equipment to essential requirements and to conserve materials, 40 per cent of the selling price is to be paid in cash on or before delivery on all retail sales of farm implements, and the remainder in instalments over not more than 24 months. Trade-ins are not to be considered in lieu of cash. The amount allowed in such case is to be deducted first from the total selling price, the balance to be paid 40 per cent in cash and the rest in instalments over not more than 24 months.

Repairs and spare parts are to be supplied by companies to dealers on a sold outright basis, payment to be made in cash not later than the 10th of the month following month of shipment.

The order defines farm machinery and equipment as agricultural machinery, mechanical equipment and implements used on a farm for production or care of crops, live stock, poultry or other produce, but excluding track-laying type tractors, irrigation and drainage equipment, hand tools other than those specifically listed, buildings and repairs thereto, fencing, poultry netting and wire, gates and wire fencing, bale ties and straps, well casing and water pipe, nails and sundry hardware except as specifically listed.

Pigs' and Hogs' Bristles

To meet a shortage of imported pigs' and hogs' bristles the Board has made a second Restriction Order No. R2 limiting the use of 3-inch bristles to war uses, and the use of 2¾-inch and shorter bristles, during February, March and April, for civilian purposes to 25 per cent of each buyer's 1940 dollar value purchases. To conserve the supply of bristles, horse hair is to be mixed with them in specified proportions. Reports must be made to the Board of the inventory of stocks on the first day of each month beginning with February 1, 1942.

Rubber

The shortage of rubber has also led to measures to restrict its use in civilian indus-

tries. Manufacturers may no longer put up elastic in packages of more than four yards in length, and an Elastic Allocation Committee has been formed to allocate limited supplies among different industries and manufacturers, and the use of elastic goods in various clothing industries has been limited by 50 per cent.

Standardization and Reduction of Types and Styles of Goods

In accordance with its announced program of cutting out "frills" and introducing all possible economies to allow the retail ceiling to be held without government assistance, and following preparatory work already carried through, the Board has made two substantial advances.

(1) A Board Order No. 82 has authorized Administrators to prescribe or limit, on behalf of the Board, the kinds, models, types, qualities, sizes and quantities of any goods that may be manufactured, bought, sold, supplied or distributed by any person, and to prohibit purchase, sale, supply or distribution except in accordance with such prescription or limitation.

(2) The Board has announced an intensive program of rationalization in manufacturing industries and distribution, to be carried out with the help of advisory committees selected from each industry, under the guidance of a special division to be established at Ottawa for this purpose. The objectives are:—

1. To obtain a greater total amount of civilian production in relation to the human and material resources available after the needs of our armed forces and of our allies have been met.

2. To obtain a greater production of necessary civilian goods through a corresponding reduction in production of unnecessary civilian goods.

3. To reduce substantially the unit costs of operation of manufacturers and merchants and enable subsidies to be avoided or reduced in amount.

4. To ensure continued and orderly civilian supply.

5. To obtain more effective control of prices and costs.

These objectives are to be secured by a reduction in the number of varieties, styles and sizes of articles for sale. Higher priced lines are to be eliminated wherever such action will enable any given amount of labour, materials and power to yield a greater volume of production. Each manufacturer can simplify his own lines and, to a certain extent, there can be uniformity among all manufacturers in an industry. Each industry is to simplify the materials it buys as well as the articles it sells and to economize by long term mass buying, fixed price contracts and pooled purchases. "Frills" in the decoration of goods or fancy packages and wrapping which do not affect consumer value are to be cut out. Costs incurred for reasons of competition, good-will, and prestige involving duplication of sales efforts and overlapping of markets are to be avoided.

These ideas are already being put into piecemeal operation and on a voluntary basis with the help of Administrators. For example umbrellas are being standardized by an agreement with the industry to manufacture products which will fit into three price ranges. Women's stockings are being standardized in four colours, and four instead of forty constructions. Their packaging has been made more practical. The colour ranges of men's socks have been reduced and the manufacture of men's shirts are being simplified. Rubber footwear styles are being cut from some 360 to 65. There has been a further simplification in bread deliveries and a number of retailers have reported simplified practices in the interests of economy, such as zoning deliveries, cutting out special deliveries, etc. The Farm Machinery Order (Limitation Order R-1 described above) includes definite authorization to the Administrator to enforce a program of standardization, simplification and conservation. In other cases steps towards rationalization have been taken independently by the businesses concerned.

Adjustments to Maintain Ceiling

Arrangements already made for sharing out reductions in profits which result from the pressure of increased costs against the rigid retail ceiling, have been completed in the tea trade, the shoe industry, and the primary cotton industry. Adjustments have also been made in the furniture industry, the men's wear industry and in the production and sale of chocolate bars. The case of chocolate bars provides a concrete example of the manner in which this is accomplished. The cost of production has increased by 2 cents a box which is to be absorbed in the proportion of 1 cent by the manufacturers and ½ cent by each of wholesalers and retailers.

Furniture.—In the furniture trade an increase in cost of as much as 12 per cent in Ontario and 8 per cent in Quebec are to be handled by a maximum increase in Ontario prices to retailers of 6 per cent and of Quebec prices to retailers of 4 per cent leaving the manufacturers to absorb the residue themselves. In every case manufacturers' selling prices must be recorded with the Furniture

Administrator with comparative prices for 1941.

Men's Clothing.—In the case of men's ready-to-wear clothing, on which there has been an advance of 5 per cent to 10 per cent on men's clothing for the Spring of 1942 as compared with prices charged to retailers for the substantially similar goods which determined the basic period price to consumers, the manufacturer and retailer are to share the advance in prices subject to the following limitations:—

"(*a*) In no case is the advance to the retailer to be more than 5 per cent over the cost of similar merchandise sold for Fall 1941.

(*b*) Seasonal merchandise of a class not sold during the basic period is to be put as nearly as possible "into the same price selling ranges as for Spring and Summer, 1941, but in no case may the manufacturer offer these goods for sale at more than 10 per cent over the prices he charged the retailer in the Spring and Summer of 1941, for similar goods."

Millinery.—The millinery industry has volunteered to absorb itself increases in the cost of imported materials without subsidy.

Tea.—It has been necessary to supplement such measures by Government assistance in a number of cases. In the case of tea, packers held heavy stocks which had been imported during the summer in anticipation of difficulties in ocean transport across the Pacific. To prevent heavy losses the Board has approved a subsidy to cover the difference in the cost of these stocks of tea and the cost of tea sold to retailers in July, upon which retail selling prices in the basic period were based. A part of the additional cost is to be absorbed by the retailers, wholesalers and packers.

Shoes.—In the shoe industry an increased manufacturing cost of 15 per cent has been absorbed to the extent of 4 per cent by retailers and wholesalers, and 4 per cent by manufacturers. The remaining 7 per cent will be met for the time being by a subsidy. An intensive program for the reduction of costs is being undertaken. Increased import costs of hides are to be covered by an additional subsidy.

Cotton Yarns and Fabrics.—Further adjustments have been made in the prices of cotton yarns and fabrics, with a view to enabling all secondary manufacturers using cottons to produce cotton goods and clothing for eventual sale at retail under the ceiling price. The Board has found, after investigation, that retail ceiling prices were for most part based on the level of cotton prices prevailing in February, 1941. All primary cotton manufacturers and converters will issue immediately price lists for their goods at the same level as that prevailing in February, 1941, and the Commodity Prices Stabilization Corporation will provide a subsidy to offset the major part of the increase in raw cotton prices imported from abroad.

A special subsidy has also been provided on imports of grapefruit juice as the Board received no assurance that domestic supplies of substitute products would be adequate to meet the deficiency which would be caused by the elimination of this product.

Import Subsidies

The program of providing subsidies in order to maintain supplies of imports, the cost of which has risen above the cost of stocks which were being sold by retailers during the basic period, has now been put into effect. The Commodity Prices Stabilization Corporation has been formally established and has opened its offices at 69 Rideau Street, Ottawa. H. B. McKinnon is president of the corporation and S. R. Noble vice-president. The other directors of the corporation are: W. Lockhart Gordon, Hugh D. Scully and David Sim. O. B. Thornton is Comptroller, W. Williamson, C.A., Treasurer, H. D. Anger, K.C., Secretary.

Claim forms for the use of importers are now available, one for retailers who import directly (C-1) and another for the use of importers other than retailers (C-2).

The range of imports on which a subsidy is payable has been reduced as was intimated in the Labour Gazette for January (p. 57), by the specific exclusion of thirty-seven items from subsidy payments as well as the exclusion announced in the Board's earlier statement on Import Policy, of goods used in war production, capital goods, goods for re-export and goods exempt from the retail ceiling.

One new step which has been taken to ease the import problem is the exclusion of import and excise duties and taxes paid in the country of origin from the calculation for custom purposes, of the value of imports into Canada.

Adjustment of Price Ceiling in Special Cases

Progress has been made in adjusting the price ceiling to meet the special problems of a number of industries and trades, though without any relaxation of the system of price control as a whole. As one class of imports excluded from subsidy, a wide range of imported goods and printed music are exempt from the ceiling (Board Order No. 88), as are live animals (Board Order No. 80), hay outside Montreal, Toronto and Ottawa

(Board Order No. 79), and flower seeds and bulbs, herb seeds, seed potatoes and registered and certified seeds of vegetable, field root, forage, lawn grasses, cereals and other field seeds (Board Order No. 86).

The Administrator of Retail Trade has been empowered (Board Order No. 91) to "grant written authority for increases in maximum prices on sales at retail in specific cases in which he is satisfied that an individual retailer was, during the basic period, selling specified goods at a price which was abnormally low in relation to the prices charged by other retailers for goods of the same or substantially similar kind and quality." The same order empowers other administrators to authorize "increases in prices on sales at retail as established by the Maximum Prices Regulations and establish new maximum prices in lieu thereof, in such circumstances and subject to such terms and conditions as may be specified in a written Order issued by such Administrator and countersigned by the Chairman of the Board."

Tea.—Board Order No. 83 sanctions increases of not more than 5 cents per pound in the price of tea in the Maritimes and in the Western Provinces, with a view to equalizing throughout Canada the general level of prices. A schedule of permitted maximum prices is given.

Railway Rates.—In some cases it has been necessary to allow variations in ceiling prices to cover seasonal variations and variations in quality. In the case of railroads for example, Board No. 92 permits seasonal variations in rates (and prohibits other rate advances), unless they are specially sanctioned, as follows: "Unless with the approval of the Board of Transport Commissioners for Canada and the written concurrence of the Wartime Prices and Trade Board, no person shall during any period of the year charge any rate higher than the corresponding rate charged by him during the same period of the year 1941."

Meats.—"Due to seasonal difference in general character, quality and production practices, certain grades of beef, veal and lamb have become scarce and in some cases have entirely disappeared. Because of this condition retailers are finding it increasingly difficult to procure meat of the same quality handled during the basic period. While the retailer must maintain the ceiling he created during the basic period on similar grades and qualities of beef, veal and lamb, he may now sell higher grades and qualities than those he sold during the basic period at prices which reflect these differences in quality, provided he does not increase his mark-up margin beyond that used during the basic period on grades and qualities then sold. Similarly if he handles beef, veal and lamb of a lower quality he must reduce his selling price accordingly" (Retailers' Bulletin No. 2). Board Order No. 90 sets forth the amounts by which maximum prices for certain types of lamb carcasses may at certain seasons, exceed the prices at which sales were made in the basic period, all prices to return to the basic period prices between August 16 and December 15.

Seeds and Grains.—The Canadian Wheat Board acting as an Administrator of the Wartime Prices and Trade Board has made twelve "Announcements *re* Maximum Prices", establishing maximum prices and making provision for transport costs and handling charges and premiums to cover diversion and selection for special uses, on wheat, barley, rye, oats, flax seed, corn and screenings. Board Order No. 84 sets maximum prices for grains "as established by market prices during the basic period and declared for specific points by the Canadian Wheat Board" subject to the usual price differentials due to transportation and delivery costs and processing and handling charges. For Alfalfa meal the price is set as the cost of hay plus a maximum of $6 per ton for processing and plus transport and handling charges.

The Seeds Administrator has issued a schedule of maximum prices on vegetable, field root, field and lawn seeds, and on seed grain and corn. A maximum price of 35 cents has been set on standard cheese boxes, and of 71 cents a gallon f.o.b. mills on linseed oil, and $40 a ton f.o.b. mills on linseed oil cake meal.

Onions and Potatoes.—Onions have been brought back under a price ceiling (fresh fruits and vegetables had been exempt) with a new basic period, January 5-10, 1942 (Board Order No. 89). This was made necessary by speculative price advances. Export restrictions have been placed on potatoes to ensure an adequate domestic supply and check undue price increases.

Miscellaneous.—Secondhand goods have been specifically declared to be subject to the Maximum Prices Regulations and a special Administrator appointed to supervise them; glass bottles and used tires have also been particularly mentioned as subject to price control.

Seasonal Goods.—Further steps have been taken in setting maximum prices for seasonal goods which were not being sold during the basic period and a list of nearly a hundred such goods issued (Wholesalers' Bulletin No. 1, January 20, 1942). "Prices charged by manufacturers and wholesalers for goods of

this character must be approved by an Administrator of the Board. This is done in consultation with the Administrator of Retail Trade. Retailers may then price such goods for sale at a markup (percentage on cost) not greater than the markup (percentage on cost) used in pricing similar goods during the last season in which they were sold." (Retailers' Bulletin No. 1).

Rents.—In the Rentals Administration provision has been made for variation at different periods of the year in the rental charged, where this has been the custom. The rent structure throughout the year is frozen and not the specific rental charge at the basic date. The only circumstances which justify a landlord in applying for permission to increase the rent are as follows:—

(1) There is a substantial increase in the municipal tax levied on the property. In such cases landlords may apply to local rental committees for variation of the maximum rental. Application forms are now available at the Board's local rentals offices.

(2) The landlord gives an additional service not formerly given such as heating, or hot water.

(3) A substantial enlargement or alteration to the building is made (excluding ordinary repairs and decorating).

(4) An abnormally low rental given to relatives or for charitable reasons.

A number of rentals prosecutions have been instituted, the largest number of complaints as to violations of the Maximum Prices Regulations having reference to violations of the rentals orders.

Consumer Credit.—Adjustments have been made in the Consumer Credit Regulations. In the case of furniture the required down payment has been reduced to 10 per cent. Provision has been made for special permission to be given to merchants, who normally conduct their business on a cash basis, to charge more than their ceiling price for credit sales by the amount of the required carrying charge.

Licences

Licence application forms have now been distributed to all Post Offices where they are obtainable as well as at the regional and regional sub-offices of the Board. The licensing program is particularly important to provide mailing lists of retailers, wholesalers and other business men to whom the Board wishes to send directly information as to its rulings and other important material. In accordance with this program three Business Bulletins have now been issued, two issues of a Retailers' Bulletin, one of a Wholesalers' Bulletin and one of the Seeds Administrators' Bulletin. It is proposed to issue further bulletins in the future.

Consumer Representation

One development of major importance during the month has been the creation by the Board of a Consumer Representation Branch. This Branch will afford consumers throughout Canada a representation in the development of policies and operations. It will clear matters between the Board and consumers in connection with the compliance with the price ceiling. Miss Byrne Hope Sanders, (Mrs. Frank M. Sperry) has been appointed Director. She is on loan to the Board from the Maclean Publishing Company with whom she has served for twelve years as editor of *Chatelaine*. In connection with the work of this branch, a number of Women's Regional Advisory Committees have been established throughout Canada.

The Administrative machinery of the Board is now almost complete. Notable among the advances made during the month have been the establishment of a Metals Administration, the appointment of an Administrator of Printing, Publishing and Allied Trades, and of an Administrator of Used Goods. In addition sub-regional offices are being set up under the Boards' regional offices to provide closer contact with regional problems.

(The Quarterly Summary of the Board covering the last quarter of 1941 is now available for distribution on application to the Distribution Office, Birks Building, Ottawa.)

Welfare Work in New South Wales Factories

A Factory Welfare Board has been provided for in New South Wales by an amendment to the Factories and Shops Act assented to last October. The Chief Inspector of Factories, an employers' representative and a workers' representative constitute the Board which is to promote the safety, health and welfare of workers by making recommendations to the Minister of Labour and Industry, and by studying particular questions referred to it by the Minister. It is expected to collaborate with employers' organizations, trade unions and authorities engaged in technical research on such matters as rest, recreation, meals, clothing, washing facilities, housing, accident prevention, and the provision of first aid.

The Act also provides for the appointment of factory welfare officers and for the establishment of welfare committees in individual factories. The Factory Welfare Board is to encourage the formation and supervise the activities of these committees.

44998—4½

RECENT EXPANSION OF INDUSTRIAL EMPLOYMENT AND SOURCES OF LABOUR SUPPLY

IN the October issue of the LABOUR GAZETTE, pp. 1228-31, a detailed summary was made of a bulletin entitled "Statistics Relating to Labour Supply Under War Conditions," published by the Social Analysis Branch, Dominion Bureau of Statistics.

This bulletin drew attention to the wartime expansion in industrial employment and the man-power needs of the fighting forces. The sources of labour supply were indicated and discussed, but, in the absence of factual data, the extent to which the individual sources had already being tapped or were currently being drawn upon, was not assessed. Subsequently this phase of the problem was given further study and another bulletin entitled *Recent Expansion of Industrial Employment and Sources of Labour Supply* has been published in which an attempt is made to throw light on this subject by means of a comparison of a small statistical sample of the persons coming under the Unemployment Insurance Act with data available in respect of the same persons from the National Registration.

Before entering directly upon a discussion of the problem studied, reference is made in this latest bulletin to the continued increase in employment during the six months April 1 to October 1, 1941, when the Dominion Bureau of Statistics index number rose by 17·3 per cent from 141·3 to 165·8. It is pointed out that this gain in the wage-earning group is due in part to seasonal factors, but is additional to those enlisted in the Armed Forces. The investigation upon which the bulletin is based serves to indicate the sources from which new entrants into industrial employment have been drawn.

Labour Mobility

A statistical sample of 3,835 persons insured under the Unemployment Insurance Act was utilized and of this total sample, 3,218 were wage-earners in August, 1940 (the date of the National Registration) and 617 had by July 1, 1941, changed to that status. Of the 2,478 men included in the sample taken who were wage-earners with a stated employer in August, 1940, 789 showed a different employer in July, 1941, just over 10 months later. An extension to 12 months indicates that more than one person in three changes his job at least once a year. This statistical fact is qualified in the report to the effect that "a certain element of overstatement may exist in the figures of change of employer, due to cases where an employer is referred to by a corporate name on the one form and by his family name or some other different name on the other. Some cases of this were eliminated but others no doubt remain."

An attempt is also made to indicate the numbers acquiring wage-earner status in the 10½ months under survey on the basis of the statistical sample taken. "The number of wage-earners in Canada in July, 1941, was about three millions, but the sample represents only the insured among these, and employees in uninsured trades may move in a different direction to those in manufacturing. However, allowance must also be made for expansion in certain uninsured industries (public service, for example), so that the population whose movement is represented by the sample may be taken as greater than the 2·4 million or so insured wage-earners."

Changes of industry and occupation between the National Registration and July 1, 1941, are also indicated in the sample used. The largest increases are to be found in iron and its products and retail trade, and considerable declines in the various services and in agriculture. (Unfortunately, since these industries are largely uninsured, the sample cannot measure their decline.) However, the bulletin states that the smallness of the sample makes the results for the industry groups individually of very doubtful reliability.

Unemployed Persons

Persons in the sample recorded as unemployed at the registration date and who had jobs in insured industry on July 1, 1941, numbered 133. Comparing the occupation given as "regular" at the registration date by these persons with their occupation July 1, 1941, it appears that 73 persons changed to another occupation group when they found a job; 6 changed to another class within their group, and 58 remained in the same group; 2 gave no occupation at the registration date. In so far as this small sample offers an indication, the bulletin declares, there is a tendency for the unemployed to be drawn into new types of work in war industries rather than return to the type in which they were engaged in previous employment.

NOTE:—Since the data from the Unemployment Insurance Commission from which the sample was selected represented entirely wage-earners in insurable employment, the sample is capable of showing movement into that category but not out of it, any other employment status recorded at the time of the National Registration indicating a change.

WAR EMERGENCY TRAINING PROGRAM
Statistical Summary for January, 1942

CONTINUED expansion in Canada's War Emergency Training Program is indicated by the reports for January from the 112 technical and vocational schools and training centres in which training was carried on during that month. The total number in training at the end of January was 15,120. The highest previous total was that of the preceding month when 14,059 were reported in the classes. Placements in January also exceeded those of any previous month. From the industrial pre-employment classes 2,324 graduates were placed in Employment and from the R.C.A.F. classes 1,096 were enlisted in the Air Force.

Of the total in training at the end of January 5,052 were in the industrial pre-employment classes and 1,484 were receiving instruction in the part-time evening classes provided by the program for employees selected by Industry. These classes in which instruction is given in such subjects as blueprint reading, mathematics, use of micrometers, Verniers, etc., are proving increasingly popular.

There were 4,705 in the pre-enlistment classes for the R.C.A.F. at the end of January. These classes are now providing for the Air Force all basic training in aero-engine and airframe mechanics and wireless operators (ground). Classes in radio mechanics are also conducted and there was a marked expansion in the numbers in training in Educational Refresher classes for Air Crew personnel. Increased accommodation has recently been provided in the 9 schools in which these classes are conducted.

In the classes where trade training is provided for enlisted men of the Navy and Army there were 3,879 at the end of January. There was a reduction in the number of trainees in these classes as compared with the previous month due to National Defence Headquarters having made other arrangements for some of the tradesmen who had been in training under the program.

Training in Industry

Mr. F. H. Horton has recently been appointed as Assistant Supervisor of Training with particular responsibility for developing training programs in industrial establishments. To assist in this part of the program, officials experienced in personnel training plans in representative industries have agreed to act as local consultative advisers. A series of bulletins on Training for War Industries is being issued by the Dominion Department of Labour for the information of Employers. The first two bulletins in the series dealing with Pre-employment Training and Apprenticeship Programs were issued in January and February. The third bulletin dealing with Plant Schools will be distributed in March. Copies of the bulletins may be obtained by writing to the Supervisor of Training, Department of Labour, Ottawa.

To promote training in the aircraft industry, arrangements have been completed by which 100 Key men are being sent to a school in California for three months special training, and 1,000 more will be enrolled in a home study course drawn up by the same school. The men to participate are to be selected by the companies concerned and the Dominion Department of Labour is to bear about half the expenditure involved.

During the past month provision has been made by which the War Emergency Training Program may assist any war industry wishing to carry on a plant school. Regulations have been drafted embodying the general principles that must be observed for any plant school approved by the Department of Labour. Trainees in such schools will be selected by the industry and may be drawn from outside sources or may be selected from present employees whom the company wishes to upgrade. The War Emergency Training Program will furnish technical advice and assist in supervision. Financial assistance will take the form of payment of salaries of instructors and allowances to trainees. Full details may be obtained from any of the Regional Directors of the Program or from the Supervisor of Training, Department of Labour, Ottawa.

Explanation of Tables

The numbers in training at January 1, 1942, the numbers enrolled in January and the placements and enlistments, etc., during the month are shown by provinces in Table 1.

The numbers in training at the end of January are shown by schools in Table 2 with the main trade categories of training provided in the industrial classes. The numbers who were placed, enlisted or who withdrew from the pre-employment and R.C.A.F. classes are also shown for each school.

Table 3 is an age classification of new trainees enrolled in pre-employment classes since April 1, 1941, and in January, 1942. Veterans of the 1914-18 War and discharged soldiers of the present war are included in Table 3 but these are also shown separately in Table 4. In Table 5 the numbers in the Navy and Army classes at the end of January are separated into main trade categories.

These tables apply only to training being given in technical and vocational schools or in training centres where school facilities were not available, and do not include those being trained in plant schools.

OLD AGE AND BLIND PENSIONERS IN CANADA

Financial and Statistical Summary as at December 31, 1941

IN the accompanying tables, which have been prepared by the Department of Finance, information is given concerning the Old Age Pensions Act and the amendment to that Act providing for the payment of pensions to blind persons.

Old Age Pensions

In the first of the tables appearing with this article, particulars are given dealing with operations under the Old Age Pensions Act (Revised Statutes of Canada, 1927, Chapter 156; as amended by Statutes of 1931, Chapter 42), and under the various provincial concurrent acts, as at December 31, 1941. (The text of the Old Age Pensions Act was given in the LABOUR GAZETTE for April, 1927, page 375, and the new regulations were reviewed in the issue for March, 1938, pages 286-288.)

The Act made provision for the establishment of a Dominion-provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating.

Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as $365 a year and who has resided in Canada for the 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is $240 yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds $125 a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

In order to avoid duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937 (LABOUR GAZETTE, May, 1937, page 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is $240 per annum. If however, a blind person marries another blind person after March 31, 1937, the maximum pension is reduced to $120. If a pensioner is unmarried, the maximum pension is reduced by the amount of his income from earnings or other sources in excess of $200 a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of $165, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $400. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $200.

Under agreements negotiated between the Dominion and the provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

Regulations governing the payment of pensions to the blind were published in the *Canada Gazette* of August 28, 1937.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

WARTIME RECOMMENDATIONS OF TRADES AND LABOUR CONGRESS

Annual Presentation to Dominion Government in Regard to War and Post-War Measures—Reply of Prime Minister

ACCOMPANIED by a representative delegation of executive officers and officials of affiliated National and International Unions, Mr. Tom Moore, president of the Trades and Labour Congress of Canada, presented that organization's annual Memorandum to the Dominion Government on February 12.

The delegation was received by the Prime Minister, Rt. Hon. W. L. Mackenzie King, and the following members of the Cabinet: Hon. Norman A. McLarty, Secretary of State, and Acting Minister of Labour (owing to the illness of the Hon. Humphrey Mitchell); Hon. Louis St. Laurent, Minister of Justice; Hon. James G. Gardiner, Minister of Agriculture; Hon. W. T. Mulock, Postmaster-General; Hon. Ian A. Mackenzie, Minister of Pensions and National Health; Hon. W. G. Gibson, Minister of National Revenue; and Hon. J. E. Michaud, Minister of Fisheries.

In his welcome to the delegation, the Prime Minister remarked that he had noted the Memorandum of the Congress has always been presented in a way to facilitate the various members of the Cabinet concerned, and he emphasized that under exacting war conditions the number of members of the Cabinet present at the meeting must not be taken as a measure of the Government's interest in the representations made. Expressing the sincere appreciation of the Government in the "magnificent co-operation and contribution toward the winning of the war" received from the officers and membership of the Trades and Labour Congress, the Prime Minister declared: "No one can understand more what that means to a Government in time of war than I do myself."

Expressing his gratitude for the recent election of Mr. Humphrey Mitchell as Minister of Labour, the Prime Minister stated: "I have always felt it necessary, where possible, to have as Minister of Labour one who not only enjoys the confidence of Labour, but who has risen from the ranks of Labour, and has had practical experience in dealing with problems affecting the workers. I believe we now have such a man in the person of Mr. Humphrey Mitchell." He regretted the unavoidable absence through illness of the newly elected Minister, and hoped he would soon be sufficiently well to undertake his new duties.

The Prime Minister also introduced the Hon. Mr. St. Laurent, the new Minister of Justice, as one "who has strong sympathy in the cause of the people."

Prefacing his presentation of the Memorandum, Mr. Moore also regretted the illness of the Minister of Labour, and in expressing the approval of Labour in the selection and election of Mr. Mitchell, he referred to him as "one of our own" and stated that his election was not only a personal tribute, "but a tribute to the cause which he has served for the greater part of his life."

Indicating that the delegation represented approximately 200,000 organized Canadian workers, Mr. Moore proceeded to the reading of the Memorandum, interjecting throughout the presentation additional emphasis on various subjects.

In the introduction it was recognized that "only by the vigorous prosecution of total war" could victory be assured. In such a war, it was pointed out, two armies must be maintained—one comprised of armed forces and the other of those engaged in the production and distribution of essential material.

Labour Representation

That part of the Memorandum dealing with labour representation on Government war bodies, together with Mr. Moore's additional observations, is as follows:—

Many past misunderstandings and mistakes could have been avoided had Labour's request for recognition as an equal partner in industry been more generally accepted. While the principle has been on numerous occasions agreed to by the Government, actual practice has fallen far short of making it effective. It is true that in some instances Labour has been accorded representation but so far, with only two exceptions (Wartime Housing Limited and Toronto Shipbuilding Company Limited), no such recognition has been given to Labour on the numerous directorates administering the war-time production industries financed, controlled or operated by the Government or on a number of other bodies established to initiate and formulate policies which vitally affect the interests of industrial workers both as wage earners and consumers.

Mr. Moore here referred to what he regarded as conflicting control in that barbers might be granted an increase under P.C. 8253 but that under price control regulations such an increase is forbidden because of the application of a price ceiling.

We appreciate that in the enactment of the Unemployment Insurance legislation provision was made for Labour representation both in the Commission charged with the administration of this Act and in the advisory committees already set up or to be later established in connection with the administration of unemployment insurance and the employment service. Again, we are not unmindful that Labour has been accorded equal representation with employers on the National and Regional Boards charged with the administration of the wage pegging Order in Council P.C. 8253. We accepted this responsibility even though of the firm opinion that this particular measure is socially and economically unsound. Labour, likewise, was given representation on the 'National Labour Supply Council', but whatever use this Council might have been was largely nullified by creating and assigning to the 'Inter-departmental Committee on Labour Co-ordination' the functions of initiating and formulating policies on matters that it had been expected the National Labour Supply Council would deal with.

The broad powers now given to the National and Regional War Labour Boards has almost completely taken away any further useful functions that the National Labour Supply Council might have performed. To rectify these conditions we urge:—

(1) That Order in Council P.C. 2686 of June, 1940, establishing the National Labour Supply Council, be repealed and that small consultative committee of labour representatives and, if thought advisable, a similar committee of employer representatives, be set up by the Minister of Labour with whom he could more intimately discuss proposed new laws or regulations affecting labour and industrial conditions, and seek advice on the same while they were being formulated.

The Trades and Labour Congress' president advocated the establishment of small committees representative of employers and employees, as in Great Britain and the United States, to discuss problems in advance of regulations.

(2) That previous requests be complied with for recognition of Labour as an equal partner in industry and for appointment of representatives after consultation with Organized Labour on directorates, boards, commissions, etc., already established or which may in future be created to deal with matters affecting the economic or social conditions of wage earners.

It was considered by Mr. Moore that the personnel of some of these directorates, boards, etc., were antagonistic to Labour.

Government Operation of Industrial Undertakings

In regard to Government operation of commercial and industrial undertakings, the Memorandum continued:—

Profiteering in the production of essential war materials can best be prevented when these are made by the Government in plants owned and controlled by it and we note with some gratification the large extent to which this policy has been adopted by the Government. The satisfactory functioning of such industries is made almost impossible, however, when workers are not only denied representation on boards of directors charged with the administration of the affairs of these Government companies, but in addition, policies are enforced which prohibit the recognition or proper functioning of trade unions in direct contravention of the provisions of Order in Council P.C. 2685.

The assertion that such companies are 'Emanations of the Crown' is a subterfuge that should be promptly abolished. It is only by doing so that confidence can be created that the Government believes in the justice and fairness of the policies laid down in Order in Council P.C. 2685.

Workers look to the Government to use such companies and also such other Government commercial corporations as the Canadian Broadcasting Corporation to set an exampe of what can be accomplished through frank co-operation with Organized Labour and not for the purpose of frustrating workers in their efforts to organize or to act collectively through the trade union organizations of their own choice. This is the only basis on which Government ownership and operation of corporations engaged in industrial and commercial activities can be accepted as satisfactory by Organized Labour.

Where war-time needs call for production in privately owned or operated plants, then they should be controlled in such a manner as to prevent the possibility of profiteering and ensure compliance with the terms of Order in Council P.C. 2685.

Control of Prices and Wages

Dealing with the Government's policy of price and wage control, the Memorandum set forth the views of the Trades and Labour Congress as follows:—

The widening of the powers of the Wartime Prices and Trade Board is an action that gives effect to a resolution adopted at our recent convention and we desire to commend the Government for taking this step. We believe, however, that a too rigid adherence to the terms of the Order in Council might result in creating conditions more serious than failure to completely prevent inflation would be. The Order should, therefore, in our opinion, be applied in such manner as not to place an unjust burden on producers by denying to them a fair return for their labour.

In this respect Mr. Moore observed that farmers should have a fair return for their wheat in order to maintain production even if it meant a slight rise in the cost of living.

Further, we strongly dissent from the doctrine that reasonable increases in wages would inevitably result in inflation. Even were that partially true, it would provide no justification for the drastic regulations incorporated in Order in Council P.C. 8253. This Order in Council, should be modified if the growth of discontent among large bodies of workers is to be avoided. The freezing of wages at unfair levels and the denial of the

use of the machinery of collective bargaining, conciliation and arbitration is an injustice that stifles enthusiasm and inspiration to greater effort.

Mr. Moore considered that there was a 12 per cent difference in production between contented and discontented workers. He also queried the position of the Fair Wages Act in the new set-up.

Our objections to Order in Council P.C. 8253 and suggestions for its modification have already been submitted in detail and, without reiterating all of these, we would particularly ask immediate action on the following:—

(1) That no workers earning less than $25 per week or 50 cents per hour should be restricted in any effort made by them to negotiate and secure an increase in their wages to these levels, which have been accepted by the Government as necessary to maintain a decent standard of living;

(2) That amendments should be made to permit the adjustment of wages and cost of living bonus of female workers to the same level as those paid male workers for similar work;

Mr. Moore charged that in some instances female workers were being exploited in being hired at lower wages than male workers in similar work.

(3) That in seasonal occupations and those where irregular employment is customary, cost-of-living bonuses should be paid on overtime worked so as to compensate for the reduction in the cost of living bonus made for short time or unemployed periods;

The position of longshoremen under the Wage Control Order was cited as only one example of where the cost-of-living bonus was not fair in compensation unless overtime was paid. In this occupation, because of the operation of the convoy system, it was pointed out that the hours were often excessively long in some days and weeks, while in others only part time was worked. Yet, he stated, longshoremen received a cost-of-living bonus only for regular hours even when overtime is worked, while the cost-of-living bonus was deducted when they worked part-time. Meanwhile, he added, the cost of living remains the same for the period when they are not required to work regular hours.

(4) That to compensate for the ceiling on wages being fixed, a floor to wages should also be established and made equally applicable to adult male and female workers, and that this be at least the minimum rate of 35 cents per hour provided for adult male employees by Order in Council P.C. 7679;

(5) That the National and Regional War Labour Boards be empowered to liberally interpret the provisions of this Order in Council where, in their judgment, circumstances warrant such action.

It was recommended that the Order in Council should be amended to provide for appeals from the decisions of the Regional War Labour Boards.

Fair Wages and Union Conditions

The Memorandum dealt with the subject of fair wages and union conditions as follows:—

The most effective way to ensure observance of fair conditions of employment is to encourage the policy laid down in Order in Council P.C. 2685 of the right of the workers to organize into unions of their own choice and to negotiate collective agreements. Events which have transpired since the promulgation of this Order in Council have demonstrated the necessity for further action on the part of the Government to compel employers to recognize and deal with a trade union if there is one organized of their employees.

It should further be made Government policy in placing contracts or orders for work that preference should at all times be given to those employers who have labour agreements with their employees, employ union workers and observe union conditions.

Mr. Moore stated that owing to the Priorities System, many union workers had lost their jobs through lack of materials, and had been forced to accept employment with firms having war contracts but which did not observe union conditions. To check violations of fair wage regulations on Government contracts, the inspector appointed by the Government to supervise these jobs should be assigned the duty of inspecting all wages paid and hours worked and of reporting all violations of the fair wages regulations to the Department of Labour.

Industrial Disputes Investigation Act

Definition of the present status of the Industrial Disputes Investigation Act was requested as follows:—

While at the suggestion of Organized Labour the Industrial Disputes Investigation Act was extended shortly after the outbreak of war to cover all war industries, it was never allowed to freely function as an agency of conciliation and arbitration. The powers given in subsequent Orders in Council to deal by other means with wage fixing and adjustment of industrial disputes has resulted in creating uncertainty as to the extent to which the Industrial Disputes Investigation Act can now function. It therefore appears necessary that the status of this Act be reviewed and the extent, if any, to which it may still be used by workers clearly defined.

In this respect we would particularly direct attention to Order in Council P.C. 629 of January 26, 1942, arbitrarily establishing basic wage rates for shipyard employees contrary to the recommendations both of boards established under the Industrial Disputes Investigation Act and of the report of a Royal Commission. We strongly protest this new procedure which appears to abrogate all rights workers previously had in respect to fixing of wage

rates under previous legislation or Orders in Council and urge immediate action to restore these.

The president of the Trades and Labour Congress regarded this action as "most serious" and one which could be "imposed upon workers in any industry." He asked if this "abolished the right to negotiate, and failing satisfactory settlement, to strike?"

National Health

The Memorandum pointed out that reports of investigation in Great Britain and the United States had demonstrated that maximum production cannot be maintained where unduly long hours are worked; and that poor health is responsible for more lost time than all other causes combined. Continuing, the Memorandum stated:—

Statements made in the House of Commons in respect to the numbers found unfit for military service demonstrate the need for prompt action to counteract these unfavourable conditions. It is well known that workers and others with moderate incomes cannot afford proper medical attention and we therefore suggest that early consideration should be given to the enactment of a national health insurance scheme on a contributory basis.

We would also ask that aid be given in co-ordinating and supporting educational and sports organizations providing physical culture and sports facilities which increase the fitness of our youth to meet the demands of the war and post-war periods.

We would also direct attention to the need for stricter supervision of war production plants in respect to the provision of adequate sanitary conditions and the enforcement of measures for the protection of health of the employees.

Defence of Canada Regulations

The Memorandum contained a number of recommendations regarding the Defence of Canada Regulations. These were:—

We welcome the amendments to the Defence of Canada Regulations made in accordance with the recommendations of the Special Parliamentary Committee of the 1941 session, which increase the membership of advisory committees from one to three persons and facilitate the presenting of defence by the interned person and also the further amendments which clarify the right to take part in, or peacefully persuade other persons to take part in a strike.

We are also gratified with the action of the Minister of Justice in releasing several interned persons on the recommendation of the advisory committee and we would suggest that in all cases where release is recommended by these committees, that the Minister of Justice should give immediate effect to such recommendations.

We strongly protest, however, the further amendment to the Defence of Canada Regulations made by Order in Council P.C. 5830 of August, last, providing for the immediate use of the military forces in the event of strikes and register our opposition to this method of settling labour disputes. We would therefore ask that the Defence of Canada Regulations be further amended by repealing this particular provision, believing that the law as it previously existed provided ample protection.

Referring to this Order in Council, passed to deal with the situation at Arvida, Mr. Moore said: "This is the sort of thing that stirs up unnecessary trouble, a fact which I think the Prime Minister will readily admit." He also urged more adequate provision for the wives and families of internees.

Financing the War

Under this heading, the following recommendations were made:—

Notwithstanding the heavy burdens which the mass of people with small incomes are called upon to carry, we reiterate our concurrence in the policy adopted by the Government that the cost of the war should be met to the greatest possible extent by taxation. This should not be carried out, however, beyond the point where it does not permit workers to retain sufficient net income to maintain themselves in decency and health. This is a situation that exists to-day among the lowest income groups and we would therefore urge either some modification for them of the 7 per cent National Defence Tax on single persons and 5 per cent on others, or, alternately, that the exemptions from payment of this tax should be brought into harmony with those provided in the Income Tax Act.

As compulsory military service has been made effective under the provisions of the National Resources Mobilization Act, steps should be taken to exercise the further powers given in this Act to mobilize the wealth and industries of this country for national service. In this respect we would point out that while any increases in wages and salaries are now prohibited by Orders in Council P.C. 8253 and P.C. 9298, increased incomes from dividends or excess profits are still allowed. We would ask, therefore, that action should be taken to eliminate these existing inequalities to give effect to the policy that there should be equality of sacrifice and that taxes should be imposed in proportion to ability to bear them.

Speaking to this recommendation, Mr. Moore observed: "Statistics show that last year corporation dividends were $5,000,000 higher than the year before and God knows how much was salted away under depreciation."

Relations with Russia

The Trades and Labour Congress was in complete agreement with the action taken by the Government in establishing diplomatic and trade relations with Russia, and believed that this would facilitate full co-operation between Canada and Russia in the conduct of the war.

Unemployment Insurance

The Congress recommended that the Unemployment Insurance Act be amended to bring

within its scope those earning over $2,000 by raising this amount to $3,000, or, alternately, eliminating entirely the provisions exempting those earning over any fixed amount. It also urged that steps should be taken to reduce as quickly as possible the number of excepted employments as set out in Part II of the first schedule of the Act.

Old Age Pensions

In view of the increase in the cost of living, the Congress considered that there is immediate need to raise the amount of pensions now paid. It was pointed out that several provincial Governments have acquiesced in this proposal.

Canadian Armed Forces

Free transportation to visit their homes at regular intervals while in Canada was requested for all enlisted men. Commending the Government's action in providing for reinstatement in employment of enlisted workers, the Congress asked for extension of this provision to protect the civilian pension rights of enlisted employees.

Seamen

The Congress asked that it be made compulsory for all ships sailing on what may be classed as salt-water runs, to adopt the three-watch system; that all Canadian ships, regardless of tonnage, should carry ship-to-shore communication for the purpose of safeguarding the life of the crews; and that shipping legislation be amended to incorporate the conventions and recommendations of the International Labour Organization covering coastal and inland-water boats.

Civil Service

In regard to the Civil Service, the Congress recommended:—

That necessary legislation be passed to enable Civil Servants now under the Retirement Act to transfer to the Civil Service Superannuation Act; that as the Postal Service is a commercial undertaking, letter carriers and postal clerks and all employees performing manipulative duties should be paid overtime rates for work done beyond the normal hours of service and that the restrictions prohibiting more than 90 per cent of the Post Office staff being classed as permanent employees should be rescinded and all full-time postal employees who are required to furnish an efficient service be given permanent appointments.

Forest Conservation

To conserve timber areas, the Congress urged that it be made compulsory to burn all slash in seasons when fires are controllable and that a constructive reforestation plan be inaugurated.

Prohibition

The Government was commended "for refusing to be stampeded into the enactment of prohibition legislation," and deplored any action which would "lead to the transference of national revenue to bootleggers". . . .

Post-War Period

The Congress welcomed the declarations contained in the Atlantic Charter as the basis on which the post-war world can be built and recommended that when the time arrives for the holding of a peace conference, a representative of The Trades and Labour Congress of Canada be included in the Canadian delegation to the same. The Government was commended for having established a national committee to study and report to the Cabinet on reconstruction policies. It was considered essential that even in the midst of war, the fullest possible consideration should be given to this all important matter. The Congress also requested that full support be given to the International Labour Organization to enable it to proceed with the studies of this subject decided upon at its conference held in New York, October 27th to November 6th last.

Prime Minister's Reply

Replying to the proposals of the Congress, the Prime Minister expressed his appreciation of the manner and spirit of the presentation. He admitted frankly that some of the criticisms "are wholly justified and fair." In particular, he emphasized that it was his wish that on every Board or Commission dealing with human relations there should be a greater representation of Labour than exists on some bodies at the present time. While every Minister was master in his own house, he asked his Cabinet colleagues "to take up in detail the matters brought up this morning" with the various Departments concerned. He also stated that he would ask the Minister of Labour to take up with the various Ministers concerned the matter of adequate Labour representation as well as other pertinent sections of the Memorandum.

The Prime Minister regretted "that there are still men who seem to feel that Labour should not be organized", and in conclusion declared: "The Trades and Labour Congress is a body that has been cautious and prudent in the direction of its affairs, and thereby has

gained recognition for itself by Governments and the people of Canada. This is one of the most stabilizing things in time of war. I give you the assurance that we are most anxious not only to have your co-operation but to be worthy of it."

Hon. Mr. McLarty, Secretary of State and Acting Minister of Labour, stated that "this splendid brief is something which I have learned to expect from the Trades and Labour Congress."

In expressing his thanks to the Government for the courteous reception, Mr. Moore hoped that Hon. Mr. Mitchell's proposals in regard to Labour be accorded sympathetic consideration by the Cabinet.

LEGISLATIVE PROPOSALS OF LABOUR ORGANIZATIONS

Confederation of Catholic Workers Meets Quebec Government—Trades and Labour Congress Presents Memorandum to Ontario Government

DURING the past month the Confederation of Catholic Workers presented its annual memorandum of legislative proposals to the Quebec Government and the Ontario Provincial Executive of the Trades and Labour Congress of Canada met the Ontario Government to lay before it certain legislative requests.

The proposals contained in both of the submissions of these two labour bodies reflect some of the problems concerning labour as a direct result of the wartime trends in industrial relations and working conditions brought about by the ever-increasing demands upon industry for the machines and tools of war. A summary of the memoranda presented by these two labour organizations follows:—

Confederation of Catholic Workers of Canada

On January 29, the Confederation of Catholic Workers of Canada presented its annual memorandum of proposed legislation to the Quebec Government.

In opening its memorandum the Confederation drew attention to various Orders in Council controlling wages and prices passed under the War Measures Act, and requested that the provincial Government pay particular attention to those matters which under peace time conditions would come under the jurisdiction of the provinces.

Superior Labour Council

The Confederation expressed its appreciation of the provincial Government's recent action in establishing the Quebec Superior Council of Labour (LABOUR GAZETTE, January, 1942, page 7) and for having named to the Council three representatives of the Catholic trade union movement. Among the subjects suggested for study and consideration by the Superior Labour Council were: labour code; labour tribunals; compulsory arbitration machinery; vocational organizations; free trade union movement; unfair practices; apprenticeship; instalment buying; family allowances; industrial rationalization; industrial diseases; co-operation; housing of workmen; professional corporations, etc.

Professional Syndicates Act

The Confederation suggested that the Minister of Labour recommend to the Superior Labour Council that a study be made of the Professional Syndicates Act. It was particularly suggested that the Act be revised in respect to the provision accorded unions to make wage claims on behalf of their members; and that the Act be clarified in respect of special organization funds, such as funeral benefit funds, thereby preventing the utilization of the Act by certain employers and employees to form such associations, which, in the opinion of the Confederation "constitutes a new form of enslavement under the cloak of an Act which is excellent in principle."

Apprenticeship

Dealing with the subject of apprenticeship, it was recommended that a uniform national scheme of apprenticeship be established, as well as the establishment of national minimum wages and hours of labour. In this connection the Confederation favoured the holding of regular federal-provincial conferences between representatives of associations of employers and employees. Each province, the Confederation contended, could then incorporate in its legislation the recommendations of these conferences and "social legislation would not develop in our country to the detriment of the autonomy of the provinces."

Education

The Confederation's memorandum contained a lengthy section dealing with educational matters and the problem of school attendance.

It was pointed out that the Confederation had given considerable attention lately to the problem of reduced school attendance in the primary schools. It was maintained that this situation was brought about by the overcrowding of classes; the poverty of a large number of families; negligence of parents; and in certain instances because school boards cannot obtain the services of teachers on account of the low salaries which they have to offer them.

As a solution it was suggested that a substantial increase in the estimates for education and the increasing of scholarship subsidies would personally affect the school attendance of poor children particularly in the 6th, 7th and 8th grades.

Public Health and Industrial Hygiene

Dealing with the subject of public health, the Confederation suggested that particular attention be paid to the problem of slum clearance and to the construction of suitable working class houses. It was contended that the institution of inexpensive hospitalization for poor families was closely connected with the problem of public health and requested that the provincial authorities give this matter close attention.

The Confederation requested a closer enforcement of health regulations in industrial and commercial establishments and that, to this end, there be close co-operation between the Industrial and Commercial Establishments Branch of the Department of Labour and the Industrial Hygiene Service of the Department of Health.

Particular mention was made of conditions prevailing in garages which, it was stated, had given rise to numerous complaints from various centres. Among the chief causes of complaint was that of the lack of proper ventilation in winter, and the danger of carbon monoxide poisoning. Another source of complaint was that of drafts, from open doors in garages when work under cars was being carried out exposing workmen to serious health hazards.

Finally, the Confederation contended that public health was being seriously affected by methods of production employed in certain industries in the application of systems of industrial rationalization. These systems, it was stated, have a particularly disastrous effect on plants where the employment of women is an established custom.

Collective Agreement Act

The Confederation requested that the exemptions of municipalities from the provisions of the Collective Agreement Act be rescinded, it being pointed out that municipalities are presently exempt from collective agreements covering the construction industry and carry out their own construction and repair work.

It was also requested that the powers of inspectors of Parity Committees be placed on the same basis as inspectors of plumbers and steamfitters and that it be made illegal to violate the regulation conceiving certificates of classification in the same manner as it is illegal to violate a regulation relative to a certificate of qualification.

Minimum Wages

It was recommended that the Minimum Wages Act be amended to permit the representation of official workmen's organizations on committees established to prepare special orders. The institution of a textile industry bureau within the Minimum Wage Commission was also urged.

Workmen's Compensation

The following changes in the Workmen's Compensation Act were requested: The inclusion of all employers under the Workmen's Compensation Act, the increasing of compensation payment from 66⅔ per cent to 75 per cent; that the determination of compensation be established on the basis of wages at the time of the accident and if the wages were below 30 cents at the time of the accident 30 cents be accepted on the basic rate; the addition of asbestosis, asbestosis-tuberculosis and general silicosis to the industrial diseases covered by Act; the exclusion of Montreal news agencies from the definition of contractor; that silicosis contracted in terrazzo and marble polishing be added to the test of compensable industrial diseases, as well as diseases contracted in the textile industry notably in the manufacture of cotton prints and that employers be required to post notices in suitable places, dealing with the employees choice of physician under the Act.

Other Requests

The Confederation also made the following other requests: That a provincial cost-of-living office be established and that it be charged with the responsibility of determining the index of the cost-of-living for the province in general and for each principal city and region; that a system of urban credit be established in favour of the small business man and that a provincial civil service commission be set up.

Ontario Executive of Trades and Labour Congress

Expressing its desire to avoid "every controversy during the critical period", the Ontario Provincial Executive of the Trades and Labour Congress of Canada presented its memorandum concerning proposed legislation to the Ontario Government on February 2, 1942.

Freedom of Association

The Congress requested the enactment of a measure based on a draft bill submitted and discussed on previous occasions by the Congress, to prohibit interference by employers with workers in exercising their right to form or join a Labour Union, and to make it compulsory that the employer recognizes and deals with a trade union if there is one organized of his employees.

It was urged that Labour be given increased representation on Boards and Commissions where its interests are particularly affected.

Injunctions

The memorandum reiterated the Congress' "firm opposition to the use of court injunctions in labour disputes and condemn them as fundamentally wrong and an unjust interference with the lawful conduct of strikes inasmuch as the issuing of temporary or interim injunctions prevents peaceful picketing and communication of information." It was therefore requested that legislation be enacted to prohibit the issuance of injunctions in labour disputes by local judges before both parties to the dispute have been afforded an equal opportunity to be heard.

Cost-of-Living Bonus

The Congress requested that the Provincial Government enact legislation to provide for the payment of an "increased cost-of-living bonus to all workers in the Province of Ontario, not included in the Federal Order in Council P.C. 8253." Those not included under P.C. 8253 are employees of all municipal and provincial governments, and hospitals, and institutions not operated for gain.

Lord's Day Act

The attention of the Provincial Government was again drawn "to the fact that a great number of industries are permitted to produce seven days a week under the pretence of war urgency thus transgressing the Lord's Day Act" and as such violations are a "direct attack" on the principle of one day's rest in seven, the Congress requested that immediate action be taken "to put a stop to the practice of employing workers seven days a week and of infringing the Lord's Day Act in the industries not directly related to war production." It was also asked that the sub-section of the One Day's Rest in Seven Act of Ontario be deleted which presently "eliminates the right of 90 per cent of the employees in eating establishments, where there are not more than two employees of each class, from receiving one day off in seven. The establishment of efficient enforcement machinery was also requested.

Minimum Wages

Dealing with the subject of minimum wages the Congress' memorandum declared:

"Despite the fact that the productivity of women workers has increased and to-day they are doing many tasks formerly performed by men, there has been no change in the minimum wage rates during the last twenty years. We are asking at this time, an increased minimum rate, an amendment to the Act, bringing domestic help employed in commercial establishments, such as rooming and boarding houses and other publicly controlled places, and employees in establishments located on the outskirts of industrial centres, within its scope. We also ask that workers seeking the aid of the Minimum Wage Board be accorded legal protection and guaranteed all back wages without having to go to court to obtain the same, and that organized labour be given direct representation on the Board administering this legislation."

Clothing Industry

The Congress again drew the attention of the Provincial Government to the fact that "certain manufacturers and contractors, especially in the needle trades, have all or part of their work done in private homes, where wages are degrading, and the most elementary hygiene is totally ignored. This constitutes unfair competition with shops and plants which are strictly obeying our established laws. We request that legislation be adopted to eliminate this unfair source of competition, which is detrimental to the working class in general and to organized labour in particular."

Old Age Pensions

Reiterating the Congress' statement of policy presented last year that a retirement scheme should be incorporated into the Old Age Pensions Act, whereby all who withdraw from industry or commerce at the age of sixty or over be entitled to receive benefits, other amendments sought were: that there be no reduction in the amount of benefits where

the recipient's income is less than $1,000 per year; that the practice of counting as income an amount equal to 5 per cent of the assessed value of a home owned and occupied by a pensioner be discontinued where it is shown that the pensioner has paid local taxes on the property; that the present scale of benefits be substantially increased and that the clauses respecting provincial residence qualifications and the signing over of property be eliminated. It was further urged that undue stress should not be placed on the enforcement of the practice of reducing benefits where the pensioner resides with a member of a family or where two pensioners live together, and that organized labour be given direct representation on the Old Age Pension Commission.

Workmen's Compensation

A number of changes in the Workmen's Compensation Act were requested among which were: Compensation for all workers incapacitated while following their employment whether by accident or by occupational disease, the inclusion in industrial diseases of silicosis and tuberculosis where such is traceable to the occupation; that the rate of compensation be increased from 66⅔ per cent to 100 per cent of earnings at the time of incapacity and that all workers, male and female be covered by the Act; provision of artificial limbs be extended for such periods as may be necessary and that provisions relating to first-aid equipment be rigidly enforced; that appointment to the Workmen's Compensation Board be for a period of ten years and subject to removal only for cause, and that Labour be represented on the Board.

Emergency Training Plan

Dealing with the War Emergency Training Program the Congress memorandum stated:

"As the training of young people for positions in industry under the Emergency Training Plan reflects the demand which the labour movement has made for years for adequate training for young people, and as the training as at present provided is very far from any true conception of industrial training, leaving the trainees almost totally unskilled, and as the trainees under this plan are in many instances being used as a form of cheap labour, especially in the war industries, therefore, we request that the training be extended to provide more than a mere superficial knowledge of the particular industry in question, and that the trainees, when they are introduced into industry, be paid the standard trade union rates as established by the union in that industry, and that a qualified representative of the trade union in the industry concerned be included in the administration of the training plan for that industry."

Lowering School Leaving Age

The Congress strongly protested the lowering of the school leaving age in the Province of Ontario. The opinion was expressed that it was "more important than ever that boys of to-day should receive all the education possible, to equip them for the period of readjustment which must inevitably follow the return of the men in uniform to the fields of industry. We also feel that the present School Act, which makes it possible for special permission to be granted, takes care of any emergency.

Other Requests

Among other legislative requests made by the Congress were the following: Compulsory registration of barbers; consultation with the union of workers concerned before special permits are issued to allow a youth, girl, or woman to be employed in a restaurant later than 11 p.m.; that protective legislation be enacted for those engaged in the construction industry against unscrupulous contractors who accept money's on behalf of contracts and fail to meet their legitimate obligations to sub-contractors, supply men and workers; abolition of the Picture Operators' School operated in the Parliament Buildings, Toronto; enactment of legislation establishing a maximum 48 hour week for all restaurant employees; that working hours should not be increased in other industries without mutual consent, and that where possible holidays with pay be granted; etc.

The Industrial Relations Section of the Department of Economics and Social Institutions, Princeton University, Princeton, New Jersey, recently issued a pamphlet containing a list of selected references on the subject of *Problems and Policies in Industrial Relations in a War Economy*. The list is divided into three broad divisions—United States, Foreign and Additional Sources of Information. The Foreign section is subdivided under the following headings: General; supply of labour; hours, health and productivity; wage problems, cost-of-living and employee savings; group relations; and social insurance.

LABOUR AND INDUSTRY IN ONTARIO, 1941

Twenty-second Report of Provincial Department of Labour

IN the twenty-second report of the Ontario Department of Labour, for the fiscal year ending March 31, 1941, reports of all branches indicate the great increase in industrial employment and activity which has taken place in the province as a result of the national war effort. The unprecedented expansion in employment in Ontario is reflected in the index number of employment for the fiscal year 1941 which stood at 135·0, the highest point in twenty years, and 17·8 points above the index number of 117·2 for 1940, the year 1926 being taken as 100. There was a concurrent decrease in unemployment among trade union members in Ontario, the average percentage over the year being 5·1 compared with 9·6 in 1940.

This general expansion in industrial employment was reflected in the index numbers of employment in all thirteen industrial divisions. Indexes for each classification were higher than in the preceding year, and for each month were higher than the corresponding month in 1940. Expansion in the manufacturing industry as a whole was indicated by an advance of 23·0 points in the index number, in iron and steel by an advance of 47·2 points, in the textile industry by an advance of 17·8 points and in logging by an advance of 25·0 points. Advances in other divisions ranged from 5·0 to 14·7 points.

Industrial Disputes.—During the fiscal year 1941 there were 55 strikes reported in Ontario, in which 9,188 workers were involved, the time-loss amounting to 36,318 man-working days. This was the smallest time-loss due to strikes since 1925; it was 28 per cent less than in 1940 and 58 per cent less than in 1939. The total time-loss for the three years, 1939 to 1941, was 41 per cent less than that for the year 1938. In only four of these 55 strikes were 500 or more workers involved and these four lasted only two days or less. In 32 strikes less than 100 workers were involved.

Sixteen strikes in the manufacture of metal products caused 42 per cent of the total time-loss and 10 in the textile industry caused 13 per cent of the loss.

Seventeen strikes involving 27 per cent of the total number of workers on strike were settled by compromise; 7 strikes involving 27 per cent of the workers terminated pending negotiations or application for an I.D.I. Board; 13 involving 15 per cent of the workers were settled in favour of the workers; 14 employing 9 per cent of the workers were settled in favour of employers; 3 were indefinite as to outcome or were partially successful and one was not terminated till after the close of the fiscal year.

Industrial Training Program.—Under the Dominion-Provincial Youth Training Program, 4,097 persons in Ontario received training in various trades during the year, of whom 1,899 were placed in civilian employment, 877 enlisted in the Royal Canadian Air Force, 182 did not complete their courses and 1,139 were still in training at the end of the fiscal year. In addition 75 men were given refresher courses and 59 of them were placed in employment in industry.

Early in the year at the request of the Department of National Defence the classes at the Aircraft Training School at Galt were enlarged from 200 to 300 trainees, and again almost immediately to 600. The results of the training were gratifying as approximately 96 per cent of the young men were successful in passing their standard trade tests for enlistment in the Royal Canadian Air Force.

Under the War Emergency Training Program 18,395 trainees were enrolled in industrial classes and 1,159 in army classes during the fiscal year. Of the students in the industrial classes, 8,984 were placed in employment, 118 enlisted, 2,490 did not complete their courses, 1,986 completed their courses but did not report themselves as placed, and 4,817 were still in training at the end of the year.

Employment Service.—As a result of increased industrial activities the Employment Service of Canada in Ontario was called upon to assist employers more than ever before in the filling of their labour requirements. The number of placements made by the Employment Offices, 183,796, was approximately 50,000 more than the previous year, and the placements made since the opening of the offices in 1919 totalled 3,311,126. Applications during 1941 numbered 348,562 and vacancies 196,261. Greater use was made of the Employment Clearance System in obtaining sufficient workers for firms engaged in the production of munitions and other essential war equipment.

The Employment Offices assisted in directing applicants for training under the War Emergency Training Program to the proper authorities, in arranging for transportation to and from the training centres, and later in placing trainees in jobs.

Applications from ex-soldiers numbered 6,456, and 2,311 placements were made.

Factory Inspection.—During the fiscal year the great expansion in industry gave rise to new problems for the Factory Inspection Branch. With the increase in the numbers

employed, including many who were unaccustomed to operating machinery, and with the introduction of new machinery and the speeding-up process, the need for effective safeguarding and other accident prevention measures was greater than ever before. In spite of all efforts the number of accidents during the fiscal year was almost double that of the previous year, although not all were lost-time accidents. Special precautions against industrial diseases were also necessary in connection with new chemical processes in the production of the weapons of war, and in this work the Department was greatly assisted by the Industrial Hygiene Division of the Department of Health.

The special committee within the Department continued to deal with requests for night shifts for women, and concessions were granted only in connection with work that was definitely for the prosecution of the war. The three-shift system is favoured wherever possible, and in no case is approval given for shifts in excess of ten hours.

Accidents reported to the Factory Inspection Branch during the fiscal year totalled 6,365 compared with 3,481 in the fiscal year 1941. Fifty-five of these accidents were fatal compared with 22 in the previous year.

Complaints received by the Factory Inspection Branch during the fiscal year totalled 199 compared with 118 in the previous year. The chief cause of complaint was registered as "long hours", 67 complaints being classified as resulting from this cause.

Boiler Inspection.—During the fiscal year there were 1,804 inspections by the Boiler Inspection Branch of new pressure vessels, an increase of 103 per cent as compared with the previous year. The number of surveys of design and plans increased by 42 per cent, a total of 561 such surveys being made. Inspections of used pressure vessels numbered 966, and annual inspections of uninsured boilers and pressure vessels totalled 6,264 for the year, an increase of 90 per cent. Certificates issued numbered 8,140 compared with 5,562 in the previous year.

Operating Engineers.—The Board of Examiners of Operating Engineers also reported increased activities in all phases of its work during the year.

Candidates examined by the Board totalled 1,897, an increase of 167 as compared with the previous year, and the certificates issued numbered 16,954, or 35 more than in 1940. The Board made satisfactory adjustments in connection with 447 cases of breaches of the Act, and 65 cases were in process of adjustment at the end of the fiscal year. The net revenue amounted to $28,225.91, an increase of $2,102.79 as compared with the previous year.

Industry and Labour Board

The Ontario Industry and Labour Board administers the following: The Industrial Standards Act; the Apprenticeship Act and the Minimum Wage Act.

Industrial Standards Act.—Thirteen conferences were held during the fiscal year pursuant to the Industrial Standards Act. Twelve of the conferences resulted in six new schedules and six renewals, all of which were approved and are now in effect. One hundred schedules were in effect at the close of the fiscal year.

During the year the sum of $7,997.21 arrears of wages affecting 468 employees was collected from 120 employers through the trust account. Of this amount, the sum of $556.25 was diverted to the Crown with the approval of the Industry and Labour Board. After investigation by the Industrial Standards Branch arrears of wages to the extent of $1,396.82 were paid directly to 78 employees by 11 employers.

One hundred and fifty-five prosecutions resulted in 107 convictions, 25 cases withdrawn, 13 dismissed and 10 were still in Court at the end of the fiscal year. Fines imposed amounted to $1,261.

Apprenticeship Act.—During the fiscal year 404 apprentices were registered pursuant to the Apprenticeship Act, as follows: 131 in the building trades, 125 in the motor vehicle repair trade and 148 in the barbering and hairdressing trades. The total was lower than in 1940 because of enlistment and the many opportunities for young persons in munitions and other lines of work for which higher wages were paid. Contracts of apprenticeship completed numbered 421, an increase of 127, and at the close of the fiscal year active apprentices totalled 1,320. The net revenue amounted to $17,975.44, an increase of $537.04 as compared with the previous year.

Since the outbreak of war 155 apprentices in all of the designated trades have enlisted and 441 holders of certificates of qualification in the motor vehicle repair trade and 70 in the barbering and hairdressing trades are now on active service. There is no record of enlistment among journeymen in the building trades since certificates of qualification are not issued in this industry.

According to the report, employers in trades not coming within the scope of the Apprenticeship Act have recognized the value of training under this system. Many such employers have consulted the Apprenticeship Branch and have been assisted in entering contracts of appren-

ticeship outside of the designated trades, in order to provide training for young employees to take care of their needs for skilled mechanics.

Minimum Wage Act.—During the year 1941 wage sheets were submitted to the Minimum Wage Branch by 16,967 employers covering 535,906 employees, of whom 151,278 were females. The corresponding figures for the previous year were 14,954 employers covering 432,892 employees, of whom 129,111 were females. The decided increases in these figures for 1941 are indicative of the great industrial expansion, though not the complete extent of this expansion, as employers in certain categories are required to submit wage sheets only every second year.

As a result of the checking of these wage sheets, increases in wage rates were ordered for 1,504 employees in 869 establishments, as compared with 1,674 employees in 929 establishments in 1940.

Fewer complaints were received, the number being 312 for this year, 392 for 1940 and 462 for 1939. This is accounted for in the report in the fact that jobs were more plentiful and female employees were less timid about demanding the rates due them and employers were more ready to comply because of the difficulty of replacing good workers.

Arrears of wages to the extent of $15,332.19 were collected from 372 employers on behalf of 738 employees, as compared with $12,946.17 from 337 employers on behalf of 463 employees the previous year. Court action was necessary in 22 cases against 17 employers affecting 37 employees. Five cases were withdrawn after the employers concerned paid arrears of wages and adjusted their records, 16 convictions were registered, none of which were appealed, and one case was dismissed by the Court. The amount of arrears collected as a result of Court action totalled $1,403.81 and fines amounted to $730.

BRITISH GOVERNMENT STATEMENT ON PRODUCTION

Hours, Sunday Work, Personnel Officers, Industrial Relations, Canteens, Training, Small Plants

THE Select Committee appointed by the British House of Commons to examine expenditure for the Defence Services and other services directly connected with the war devoted its Twenty-first Report to special problems connected with the output of labour. The Government Departments concerned with the matters dealt with have commented on the recommendations made in the Report in a Statement Relating to Production which the Committee has published as its Twenty-fifth Report. The Twenty-first Report was arranged under the following heads:—Hours of Work, Wages, Management, Discipline, Industrial Relations, Transport, Feeding, Lighting and Ventilation, and Incentives to Output.

Hours of Work

As regards hours of work, the Select Committee on National Expenditure recommended that the Government Departments "should, after consultation, with employers and employed decide the maximum number of hours which should be regularly worked in the interests of production and give definite instructions to contractors accordingly"; that the Industrial Health Research Board should carry out investigations to determine the optimum working week for different kinds of work and for men, women and juveniles; that workpeople should have one day's rest in seven but that factories and plants should, wherever possible, be kept working seven days a week.

The Government in its Statement endorsed the view that, under war conditions, the Government Departments should assume more responsibility for the hours of work on Government contracts, particularly in advising or instructing their contractors to avoid excessive hours and to give proper rest periods. Such instructions should be issued in agreement with the Ministry of Labour and National Service. On the question of the optimum length of a working week for different occupations and different classes of workers, the Statement draws attention to investigations by the Industrial Health Research Board which "indicate that, over an extended period, weekly hours of work should not exceed 60 for men and 55 for women" and advances the opinion that it is unlikely that further investigations would produce any different results. It appeared more useful to take all possible steps to restrict weekly hours within these limits. It is proposed, however, to secure information concerning particular kinds of work or certain sections of industry, conditions of which make some special enquiry as to the hours desirable.

As regards a six-day week for workers and a seven-day week for plant, the Statement indicates that, although it is possible to arrange such a system in some factories, it

appears "that in very many, if not most, cases, 5½ or 6 days of production (with or without two-day shifts or day-and-night shifts) will continue to be the best system that can be arranged". In addition to the necessity in some cases of closing the factory one day a week for maintenance purposes, the Statement draws attention to other factors which have to be taken into account:—the additional labour force required for a rota system and the question whether it would add sufficiently to volume and efficiency of production at the particular factory to make its use at that factory in that way the right course; difficulties of organizing rota systems; the nature of the work, the amount of supervision required and the strain on supervisory staff; and the general preference for Sunday as the day off. All Government Departments agree that in the interest of maintaining production at the maximum level, "Sunday work (except for the beginning or end of night shifts or when the workers get a break of at least 24 hours under a rota or relief system) should be restricted to such essential maintenance or repair work as cannot well be done at other times, and to special occasions to meet exceptional emergencies, such as rush jobs or a temporary lack of balance in production. . . . Many aircraft firms have reported that Sunday work has ceased and evidence is to hand that beneficial results on production are being obtained."

The Government's policy is to use plants for as much of the 24 hours as possible and in an increasing number of factories two long shifts are being worked (10 to 12 hours) or three shorter shifts (7½ to 8 hours). Where possible, three 7½ or 8 hour shifts are worked but where complicated machinery is used, it is found necessary to have a short break between the shifts for maintenance purposes. Moreover, the supply of labour is often the factor which determines how far it is possible to introduce double shifts.

The Statement deals with the necessity of adapting women's working hours so as to allow them time for shopping and points out that this difficulty does not arise at Royal Ordnance Factories and other places where a three-shift system is in operation and where the individuals work only six shifts a week.

Management

The Committee recommended that whenever lack of work was unavoidable, workers should, as far as possible, be temporarily transferred to other factories to be returned to their own factory as soon as work becomes available again; that employers should be instructed to report temporary surpluses of labour; that when "lack of work is unavoidable and temporary transfer is not possible, managements should explain, as far as is possible, the cause to their workpeople". The Government endorses this latter policy, except where the need for secrecy makes explanation impossible. Steps have been taken to impress on employers the need for economy in the use of skilled labour and recently arrangements have been made by the Ministry of Labour and National Service to arrange the temporary transfer of workers.

The recommendation of the Committee that "all large firms should have a central personnel department" was endorsed by the Statement and also the recommendation that men appointed to positions of authority in industry, particularly as charge hands and foremen, should be appointed because of their "qualities of leadership, tact and organizing ability". The Ministry of Labour and National Service is conducting training courses for personnel managers and welfare supervisors and courses in foremanship are being given at Technical Colleges.

Industrial Relations

The Committee recommended "that publicity should be given to the work of the Conciliation Officers of the Ministry of Labour, so that all cases of impending stoppages of work are brought early to their notice." The Government's Statement points out that over large sections of industry there is well-established procedure for the avoidance and settlement of disputes but "it, nevertheless, remains the case that industrial relations are human relations" and that "spontaneous reactions to sudden or arbitrary changes are unavoidable". Where there is organized procedure for dealing with disputes "the function of a Conciliator must be to ensure that the procedure is used. Any publicity which created an impression that the services of Conciliation Officers were immediately available to settle disputes by direct intervention would tend to be subversive of the constitutional authority of the employers' organizations and trade unions and of the very machinery of voluntary collective arrangements for settling industrial relations which has been responsible for the high degree of industrial peace in the present war". The Statement points out that "very few working days are being lost by trade disputes at the present time" and that "the prevention of stoppages of work is a problem of psychology and of securing a proper understanding and a right outlook. The Ministry of Labour for its own part must be sure that there is no grit in the machinery for the settlement of genuine difficulties and grievances, but the real remedy lies in doing everything that is possible to

44998—5½

prevent difficulties and grievances, both imaginary and real, arising."

To the Committee's remark that the loss of 940,000 working days in 1940 due to industrial disputes "is equivalent to the loss of a year's work by 3,000 men, the Government replies that this comment ignores the relativity of these figures to the total number of workers employed and the aggregate number of days worked by them. In order to appreciate fully the significance of these figures it should be borne in mind that the loss of 940,000 working days a year is a rate of about one day per worker in every 15 years."

Food Questions

As regards the recommendation that provision for canteens in factories should be extended, the Statement indicates that while the Ministry of Labour has power to empower an employer to provide a canteen or to make some suitable alternative provision, in the case of relatively small factories it appears to be less economical to establish a large number of factory canteens for the smaller factories than to establish, where necessary, a smaller number of British Restaurants or similar establishments to supplement existing facilities (if any) for obtaining meals near the factories. British restaurants are established and administered not by employers but by Local Authorities and others under the auspices of the Ministry of Food. Meals are served in the restaurant or sent to the factory. The Ministry of Labour endorses the view of the Committee that the "workpeople or their representatives should be definitely associated with the running of the canteen or canteens at their factory . . . but experience shows that to make such a committee actually responsible for the management of the canteen is not always the most satisfactory arrangement."

Lighting

Factory inspectors have been reminded of the importance of improving lighting with a view, in part at least, to the prevention of accidents.

Supply and Training of Labour

The second part of the Statement deals with some matters not considered in the Committee's report. It describes briefly the principal measures in force "for providing and training the additional labour force, skilled and unskilled, which is required at the present stage of our war production programme." These measures are concerned with the concentration of production, the contraction of particular industries by the compulsory withdrawal of labour, the co-ordination of Government contracts so that they may be placed where they are most advantageous from the labour supply point of view, and the Registration for Employment Order enabling the interviewing and placement, where they can be most useful, of men and women coming within the scope of the Order.

An interesting experiment is the creation of the Mobile Skilled Corps consisting of skilled men who are prepared to go from one Royal Ordnance Factory to another for short or long periods to meet special urgent demands, to start up new production, to train unskilled staff, etc. Special pay conditions have been approved for this Corps and steps are being taken to recruit a similar Mobile Corps for the Machine Tool Industry, for use in any factory where there are machine tools but a lack of skilled labour.

Between June, 1940, and April, 1941, 43,000 persons were trained in Government Training Centres and emergency training establishments and placed in the engineering industry. During the same period employers trained about four or five times as many workers.

"There is now far more realistic appreciation amongst employers of the need for training in industry than there was in 1940, and firms have in general undertaken the necessary amount of training, particularly of the semi-skilled grades, and have provided the necessary facilities. Many aircraft firms have set up special training sections, if necessary with Government financial assistance. In munition firms of all types most training is being done on the floor of the factory, and except where women are being employed for the first time, special facilities are not required. Some of these firms are successfully training female labour for many jobs previously considered too strenuous for women, e.g., hammerdriving, process work in certain chemical industries, etc. In the Royal Ordnance Factories training arrangements have been greatly expanded, and trained operatives are now proceeding to the production "lines" at a rate consistent with the capacity of the factories to absorb them. In filling and explosives factories training in the production processes must be carried out on the actual production "lines" within the establishments.

The Statement adds that the Training Centres "must be more and more turned over to the training of women, and the necessary increase in the numbers of women recruits has not yet been achieved."

In order to increase the number of men with necessary technical qualifications State bursaries are being provided for University training in physics, engineering and chemistry. Some of the bursars will be available in 1942 but most of them in 1943. It is estimated that these will cover from 2,000 to 3,000 persons. Intensive training courses in electrical and mechanical engineering for about 1,000 persons are also being provided.

Small Production Units

"All three Production Departments have for a long time recognized that it is necessary to harness the small firms no less than the larger firms to the war effort". The Ministry of Aircraft Production set up a Directorate of sub-contracting before the war which has now been expanded and contains a number of representatives in each region whose duty it is to maintain a record of small capacity available and to bring together the small firms and larger firms which need capacity. This is to be used to increase further the decentralization of the Department's functions in the production field. The Ministry of Supply and the Admiralty have also taken special steps to encourage sub-contracting and the spreading of small orders.

MAN-POWER POLICY AND NATIONAL SERVICE IN GREAT BRITAIN

Extension of Compulsory Liability for National Service—System of Individual Deferments—Registration of Women for Employment

IN a memorandum presented to Parliament by the Minister of Labour and National Service, early in December, particulars were given of new measures to be introduced by H.M. Government in pursuance of their man-power policy.

A summary of these measures appeared in the December issue of the British *Ministry of Labour Gazette* from which the following extracts have been taken:

National Service (No. 2) Act, 1941

The National Service (No. 2) Act, 1941, declares that all persons of either sex for the time being in Great Britain are liable to undertake some form of national service, whether under the Crown, or not, and whether in the Armed Forces of the Crown, in Civil Defence, in industry or otherwise. This liability is subject to the limitation that the service to be undertaken must be, as regards whole-time service in the Armed Forces of the Crown or in Civil Defence, such service as may be imposed under the National Service Acts, 1939 to 1941, and as regards any other form of national service (including part-time service in the Armed Forces of the Crown or in Civil Defence), such service as may be imposed under Defence Regulations. These Regulations are being amended to make it clear that the power vested in the Minister of Labour and National Service by the Regulations to direct any person to specified services includes the power of direction to undertake Civil Defence duties.

For the purposes of the compulsory liability for service under the National Service Acts, the new Act amends the principal Act so as to raise the upper age limit for such service from 41 to 51 years. It is contemplated, however, that men above the age of 40 shall be posted only for static and sedentary duties.

Inclusion of Women.—The Act also extends the National Service Acts to women, and enables women to be recruited under those Acts for the Women's Royal Naval Service, the Auxiliary Territorial Service, and Women's Auxiliary Air Force and any Civil Defence Force. The women will have the statutory safeguards of the National Service Acts, including those relating to conscientious objection and exceptional hardship. Exemption from the liability to be called up for national service is provided by the Act for married women not living apart from their husbands under decrees or orders of any Court, and any woman who has living with her a child of hers under the age of 14 (including a stepchild, an illegitimate child, and if the adoption took place before this Act, an adopted child).

A Royal Proclamation, on December 18, made liable women who by that date had reached the age of 20 but had not yet reached 31. Women between those ages will be called up in age classes, beginning with those born in 1921 and 1920. Women will not be required to use lethal weapons unless they volunteer to do so, and, so far as practicable, they will be posted for service near their homes. When women are called up, they will be given an option to serve in the Auxiliary Forces, in Civil Defence or in certain specified vacancies in industry. If they do not express a preference, they will be posted for service in one or other of these capacities, as required. Women engaged in vital war work or service will be reserved from calling up. Other women may have their calling up deferred if it is in the National interest that they should not be moved from their present work.

Apprentices and Students.—Special arrangements will be made, as on the occasion of the registration of the 1921 and 1922 age classes, to defer the calling up of industrial apprentices, to enable students who are acquiring scientific and technical qualifications of great value to the war effort to complete their

courses, to enable boys at school studying for a Higher Certificate or a comparable examination in the summer to take such examination, and to enable men in their first year at the University to attest into the Forces and complete their first year course while undergoing military training in the Senior Training Corps or University Air Squadron. For medical and dental students no special arrangements are required.

System of Individual Deferments for Industry

It has been decided that the system of block reservation under the Schedule of Reserved Occupations must, in general, be replaced gradually by a system of individual deferments under which each individual case will come under review. This transition will be effected by raising the age of reservation, as shown in the December, 1941 revise of the Schedule of Reserved Occupations, by one year steps at monthly intervals beginning at January 1. Where necessary men below the ages of reservation for their occupations, including men who have ceased to be reserved as a result of the monthly raising of ages of reservation, will be retained in industry by means of individual deferment of their calling-up. The arrangement for progressive de-reservation will not apply to merchant seamen, full-time members of the Royal Observer Corps, reserved occupations in Civil Defence, students, lay evangelists, veterinary surgeons, and occupations covered by special schemes of deferment dealing with men in agriculture, the Civil Service and allied services, building and civil engineering, and coal mining.

Men who are de-reserved under the new scheme will be given a notice, which they will be asked to hand to their employer, and an opportunity will be given for application for deferment of calling-up in the case of those men who are engaged in work of vital national importance for whom substitutes cannot be obtained. Men for whom deferment applications are not granted will be transferred to other civilian vacancies if they belong to certain scarcity occupations in which men are urgently required in industry; otherwise, they will be called up for the Forces. If the employer does not apply for a man's deferment, that man will have an opportunity of applying for deferment when he is called up for a medical examination. Decisions upon applications for deferment will be given by newly constituted district Man-Power Boards. The Boards consist of a Labour Supply Officer (generally the Chairman or a member of the existing Labour Supply Committee), a Military Recruiting Officer in charge of the local Military Recruiting Branch of the Ministry of Labour and National Service, a Deferment Officer, a Woman-Power Officer, and a Chairman.

Steps have already been taken to cancel the deferment of calling up of all men under the age of 25, except those employed in certain occupations of the first importance. Other deferments will be reviewed by the new district Boards.

An unreserved man who changes from an unreserved into a reserved occupation will not, in future, become reserved by the change, even though he is above the age of reservation for the new occupation. His retention in the new occupation can be secured only by means of an application for the deferment of his calling-up.

Registration of Women

Women aged 21 to 31 had already, by December 6, been registered under the Registration for Employment Order, and these and future registrations under the Order will be used as necessary for the purpose of the National Service Acts. Women aged 20 (i.e. the 1921 class) were to be registered on January 10, 1942, and those aged 32-40 were to be registered at fortnightly intervals thereafter.

Women who, for the time being, are not being considered for calling up, but who are being dealt with under the Registration for Employment Order, will ordinarily be regarded as available to be moved to important employment, unless they have special qualifications which are already being properly used in the national effort or occupy a pivotal position. A woman will generally be regarded as available for employment away from her home unless she is the wife of a man serving in the Armed Forces or in the Merchant Navy, or is a married woman with household responsibilities. Cases of doubt will be referred to the Women's Panels, and, if any woman is thought to refuse such employment unreasonably, directions for her employment will be issued. In that case she will be given an opportunity to appeal to a Local Appeal Board.

Before any woman is transferred to other employment, her employer will have an opportunity of making representations.

Registration of Boys and Girls

Boys and girls between the ages of 16 and 18 will be required to register and will be interviewed by the Youth Service Committee of the Education Authority, with a view to their being encouraged to join appropriate organizations. The minimum age of entry into the Home Guard will be reduced to 16 for certain duties.

WOMEN IN SERVICES AND INDUSTRY IN BRITAIN INCREASED BY RECENT MEASURES

TO fill the large number of vacancies in the Auxiliary Territorial Service, conscription of women was introduced in Britain on December 18 by a Royal Proclamation. The Proclamation issued under authority of the amended National Service Act which now covers "persons of either sex" designated women between the ages of 20 and 31 as liable to be called up. Women in this age group have already been registered under the Registration for Employment Order (LABOUR GAZETTE, May, 1941, pp. 500-501). When called up they can choose between the A.T.S., Civil Defence, or certain jobs in war industry, but may be compelled to join the A.T.S. if sufficient do not select this form of service. Women already occupied in vital war work in munitions, transport, agriculture, hospitals, teaching and in the Naval, Army and Air Force Institutes will not be called up or transferred. Married women not separated from their husbands, mothers with children under 14 and members of the services or their medical branches are exempt from conscription but the first group can be directed into industrial employment.

The direction of women into war industry was begun last spring under the Registration for Employment Order of March 15, 1941. Ample opportunity was provided for every woman to state her circumstances in the selection interview which followed registration. (LABOUR GAZETTE, July, 1941, pp. 733-34).

Since September, the Ministry of Labour and National Service has been withdrawing women in specified age groups from certain industries and occupations to increase the supply for the services and for war work. Women between the ages of 20 and 25 at the time of their registration under the Registration for Employment Order are affected by the withdrawal orders. Arrangements for withdrawal, which were worked out after consultation with employers and trade unions for the industries concerned, have already been made in the retail distribution trades except the food trades, both the light and heavy sections of the clothing industry, the woollen and worsted industry, certain grades of the Postal Service and among employees of Local Authorities.

Hereafter the Post Office will not recruit women under 30 for postwomen on non-motor-driving duties or for sorters; nor will they accept anyone between 20 and 25 for telephone, telegraph and counter work. Postwomen and sorters falling within the age group of the withdrawal orders will be released if their circumstances permit transfer to war work. Telephone, telegraph and counter workers, if engaged after August 1, 1941, will be released when suitable substitutes have been obtained.

All Local Authorities will be consulted before women are withdrawn from their service and the following categories of employees are exempt: (1) Women employed in a professional, technical or administrative capacity; (2) shorthand-typists and machine operators employed on such work for 50 per cent or more of their time; (3) staffs employed in hospitals and other institutions, including day nurseries and maternity and child welfare centres; (4) mental deficiency staffs; (5) nursing staffs, including probationers.

Women from 20 to 30 years of age are being withdrawn from voluntary war work organizations. They may be exempt from this order if they are regularly employed on work deemed essential to the war effort for at least 44 hours a week by a voluntary organization recognized by the Ministry as competent to issue certificates for full-time workers registered under the Registration for Employment Order. This exemption applies only if they cannot be replaced by older women. Women employed in these organizations on work, the continuance of which is in the national interest and which requires special knowledge and qualifications, are also exempt. Full-time workers in the Civil Defence Services are not affected by the order.

Government Departments have been requested to release as many mobile women of the clerical and sub-clerical classes between 20 and 30 years of age as possible. Women in the executive, administrative and technical grades, shorthand-typists and machine operators will not be released.

The arrangements for withdrawing these women from their employment are those laid down under the Registration for Employment Order, 1941, and a central advisory panel of employers and employees has been established to assist in the work. Special provision has been made to avoid inconvenience to employers affected by the withdrawal orders. The employment exchanges are given power to time withdrawals in accordance with agreements made with particular employers where a considerable number of women are involved. To provide machinery for consultation between the Regional and Local Offices of the Ministry and the trade concerned, Regional panels and sub-committees of the Local Employment Committees have been set up, composed of equal numbers of employers and employees and headed by independent chairmen. A Women's Panel of the Local Employment Committee will consider cases of personal hardship to women in the designated age group who run their own retail trade businesses.

NATIONAL CONFERENCE ON LABOUR LEGISLATION IN U.S.A.

REPRESENTATIVES from thirty-nine States, the District of Columbia and Alaska met with representatives from the Federal Department of Labour in the eighth National Conference on Labour Legislation, in Washington, November 12-14. Reports were approved from committees on State labour laws and national defence, safety and health program and national defence, education and training, industrial relations and on labour supply, training and unemployment arising from the necessity of giving priority to war production.

Labour Standards in Wartime

The Committee on State Labour Laws and National Defence did not consider that the needs of national defence warranted a general relaxation of labour standards. In States where discretionary power was provided in the laws, relaxation of certain standards for limited periods might be permissible in individual cases considered on their merits after investigation. No exceptions to labour standards governing child labour, industrial home work or safety and health regulations should be granted. Nor did the Committee see any need for relaxing the 8-hour day standard for women. The conference would approve alterations in night work regulations to permit industries to work on a shift basis if this seems necessary for national defence. It was suggested that the Federal Government might write into its contracts labour standards comparable to those established in the most progressive States.

Workmen's Compensation

General standards for workmen's compensation laws were drawn up by the Committee on Safety and Health Program and National Defence. These specified that such Acts should be compulsory, apply to all employment, cover occupational diseases and set no limits to the amount of medical and hospital care provided. Administration should be informal and non-technical and be financed by prorating costs among insurance carriers and self-insurers. Operating costs of State funds should come out of premium funds. Adequate protection for claimants should be provided if agreement settlements are permitted. No appeals to the Courts from awards or decisions should be permitted except on points of law.

Safety and Health

In regard to national defence, the Committee urged the continuance of the federal safety promotion program in defence industries and suggested that safety devices be placed on the priorities list. It also proposed that State factory inspection facilities be expanded and that industrial hygiene units be established in State Departments of Labour.

The conference went on record as opposed to pre-employment physical examinations "unless the employer first has proved to the State that he has installed proper safeguards to protect the employees' health and safety, and unless the State has adopted laws to prevent discrimination against workers resulting from physical examinations." It considered, however, that the defence emergeny, a period of high employment, was an opportune time to gather information on the work records of employees with physical defects. When the Federal Department of Labour had made a study of such data, the conference would reconsider its stand on the physical examination question.

Education and Training

The Committee on Education and Training recommended the supplementing of State educational funds by Federal grants to equalize educational opportunity, the provision of vocational guidance for pupils, adult education and the use of schools as community centres. Public assistance should be furnished to enable children to attend high school up to 16 years of age but aid to students must not be in return for work. Funds should be immediately available to meet the educational needs of communities suddenly expanded by the defence program.

Two committees dealt with the training of workers. Both agreed "that training for specific industrial occupations be given on the job," and that the schools should provide general educational background and courses related to various trades and occupations. They should stress versatility and adaptability to meet changing employment conditions. All training programs must conform to State and Federal labour and apprentice standards and should be under the supervision of joint committees of management and labour in each industry.

While the conference "again emphasizes that the training of apprentices must be extended," it also approved a set of standards for in-plant training below the level of apprenticeship. These demanded a definition of each job and the type of workers required by it, a record system covering the progress of the trainee, adequate supervision and instruction, provision

of related technical courses if necessary, payment of the minimum rate for each job classification throughout the training period, and length of training sufficient to develop "competent skill" in a process.

Labour Supply and Conversion of Industry to War Basis

Measures to minimize unemployment and the dislocation of industry resulting from giving priority to certain war materials and industries were proposed by the Committee on Labour Supply, Training and Priorities. It suggested revision of unemployment benefit schemes, the location of new plants in communities with large numbers of unemployed, and a debt moratorium for workers thrown out of work because of priorities. Relaxation of the law insisting that Government contracts go to the lowest bidder was proposed in order that the facilities of small plants might be used and migration of labour and undue concentration of defence industry avoided. Industry councils equally representative of labour and management with a Government representative as chairman were suggested to enable their knowledge to be utilized in converting industry to wartime production. Regional agencies should also be created to handle local situations arising out of priority ratings. For efficient mobilization of labour supply, the Committee urged that all defence industries recruit their workers through the public employment offices working in co-operation with labour organizations. Strong opposition to private employment agencies was expressed by the Conference, which urged Federal and State legislation to restrict them.

Industrial Relations

The Committee on Industrial Relations emphasized that "stable industrial relations can be achieved in any industry or plant in which employers and workers are educated to the advantages of collective bargaining and conscientiously practice genuine collective bargaining procedures." They urged an educational campaign through means such as labour-employer conferences to overcome resistance to collective bargaining and suggested that unions train business agents and negotiators for efficient collective bargaining. To prevent work stoppages, the Committee strongly urged the inclusion in all agreements of provisions for adjusting disputes, renewing agreements, and referring deadlocked disputes to arbitration. Ample Government mediation facilities should be provided and care taken to avoid overlap between Federal and State services.

Other Resolutions

Resolutions of the conference urged: (1) that the United States Department of Labour draw up a budget for an adequate American standard of living and publish the cost of this budget for all important cities at least quarterly; (2) that the Department of Labour publish, either monthly or quarterly, information as to wages in different localities; (3) that homework be prohibited under the Fair Labour Standards Act; (4) that the U.S. Public Health Service allocate grants under the Social Security Act to State departments of labour for the operation of divisions of industrial hygiene; (5) that the Department of Labour co-operate fully with the International Labour Organization in the planning and executing of measures of post-war reconstruction.

New York Apprenticeship Council

A State apprenticeship council representing the public, employers, and employees, has recently been set up in New York under a 1941 statute. Its duties are to establish standards for apprenticeship agreements, to terminate or cancel agreements, to compile data necessary to determine the trends of employment in various trades and to adopt regulations for carrying out the Act. The council, consisting of three representatives of employers, three of organized labour including one from the C.I.O., one from the A.F. of L. and an official of the State Federation of Labor, and a chairman drawn from the general public, were appointed by the Governor on the recommendation of the Commissioner of Education and the Industrial Commissioner.

The apprenticeship council may approve the formation of local and state joint apprenticeship committees in any trade or group of trades in cities or trade areas where provision for the training of apprentices is needed. In their respective trades and localities the committees will have power to devise standards for apprenticeship agreements and to assist in their operation. Decisions of the committees are subject to review by the council.

The law also provides for two supervisors of apprentice training to co-ordinate the activities of the Departments of Labor and Education in this field. One supervisor, a member of the Department of Labor, will have charge of training in industry; the other, for the Department of Education, will develop and supervise related technical courses provided by the public schools.

ACTIVITIES OF UNEMPLOYMENT INSURANCE COMMISSION

Summary of Unemployment Insurance Benefit Regulations—Training Schools on Claims Procedure—Report of Employment and Claims Offices—Employment Conditions at the end of January

UNEMPLOYMENT Insurance Benefit may now be obtained under the Unemployment Insurance Act. Regulations covering the payment of benefit were approved by Order in Council on January 13 last. These regulations were drafted after careful consideration and cover a wide field.

Part I of the Unemployment Insurance Benefit Regulations covers the interpretation of various terms such as "claimant", "local office", "insurance officer", etc. By the regulations, a claimant is any insured person who applies for, or is in receipt of, benefits under the terms of the Unemployment Insurance Act. "Local office" refers to the Employment and Claims Offices of the Unemployment Insurance Commission. "Insurance officers" are those officers of the Unemployment Insurance Commission who are authorized by the Commission pursuant to the provisions of Section 52 of the Unemployment Insurance Act to carry out duties as Insurance officers.

Part II of the Regulations deals with application for benefit. Any person desiring to obtain benefit must make a claim in the manner which, from time to time, the Commission prescribes. He must lodge his insurance book at the local office where he makes his claim, and furnish any evidence required by the Commission in support of his claim.

Persons with dependents are also required to fill out an additional form, which must be accompanied by the declaration of a responsible person if the dependent is a husband or a wife residing with the claimant or by two responsible persons if the dependent is a husband or wife who does not reside with the claimant, or is a dependent child; and also by a declaration by the dependent husband or wife as the case may be.

Included in the list of responsible persons who may make the declaration are a previous employer, a manager of a local office, a minister or priest who is authorized to perform the marriage ceremony, a mayor, or reeve or police officer (not below the rank of sergeant), a postmaster, physician, bank manager, barrister, solicitor or notary public, or a magistrate, etc.

Information relative to the claim may be requested from any employer, while a claimant must report at a local office on certain days specified by the Commission to prove unemployment and must furnish in addition any proof of unemployment required by the Commission.

When a delay occurs in making application for benefit, if good cause is shown for such a delay, the day on which unemployment actually began may be substituted for the date on which the application was made.

The last two sections of Part II deal with benefit and contributions paid in error, and payments in respect of deceased persons or persons of unsound mind. The regulations state that days for which the claimant has been paid benefit to which he was not entitled will be taken into account in determining his benefit rights unless the Commission has recovered the amount paid, and days on which contribution has been paid in error will not be considered in determining benefit rights, unless in any particular case the Commission decides otherwise.

In the case of a person who is in receipt of benefit at the time of his death and neither Letters Probate of his will nor Letters of Administration of his estate are produced, the Commission by resolution may authorize the payment of the money or any part of it to any person whom the Commission believes is entitled to it. The same regulation respecting the payment of money applies when any person of unsound mind is in receipt of benefit.

Part III of the Benefit Regulations relates to adjudication. For the purpose of adjudication there is a Court of Referees consisting of a chairman appointed by the Governor General in Council and representatives from an "employers' panel" and an "insured persons' panel".

Members of panels are chosen by the Commission and the length of time of membership is such as the Commission may determine.

Under the provisions of the Act and of these regulations, a Court is selected by the Commission and is normally to consist of a chairman and one member from an employers' panel and one member from an employees' panel. In any particular case more than one member from each panel may be chosen, provided always that an equal number is chosen from each panel. In the case of absence of one member of a Court, the Court may conduct its business if the consent of the claimant, or the person or association whose case is being considered, is obtained.

Claims for benefit are submitted to the insurance officer for examination. If he disallows a claim a written appeal may be filed by the claimant at the local office within 21

days from the time he has received notice of disallowance. He may make application for a hearing before a Court at the same time as he appeals against the disallowance.

He may make application for a hearing before a Court also if his case has been referred to a Court. He must file his application for hearing at the local office for submission to the chairman within 7 days from the time he was notified of the reference. It lies within the power of the chairman to decide whether such a hearing is to be granted.

If a hearing is granted the claimant is given the opportunity to present his case, and when no hearing is granted he may present his case in writing. When a decision is reached by the Court, it will be filed with the insurance officer, and written notice of the decision will be sent to the claimant.

If a Court is unanimous in its decision in disallowing a case, application for leave to appeal to an umpire must be made within 21 days of the receipt by the claimant of the notice of disallowance. In any case in which the decision of the Court of Referees is not unanimous, the claimant may appeal the case within six months of the date of the decision of the Court of Referees, and does not have to make application for leave to appeal.

If permission is granted to appeal, a written statement containing the grounds of appeal must be filed at the local office. Provision is also made for any person or association having an immediate interest in the decision to file with the local office within 10 days after notice of appeal has been filed, a statement of his case for consideration by the umpire when he is making a decision on the appeal.

If a hearing before the umpire is desired, a notice of application to the umpire for such a hearing must be filed at the local office within 10 days after the appeal is filed. The power of granting or refusing the hearing lies with the Umpire. If a hearing is granted the person concerned will be notified of the time, date and place.

The umpire's decision must be sent to the Unemployment Insurance Commission and a copy will be forwarded to the claimant and any others having an immediate interest in the decision.

The power to authorize the publication of a decision lies with the Unemployment Insurance Commission.

Training Schools on Claims Procedure

In preparation for the payment of unemployment insurance benefits, staff training schools were held at the five regional centres —Vancouver, Winnipeg, Toronto, Montreal, and Moncton—from January 12 to January 17. The Regional Superintendents and key members of their staff who spent four days at Ottawa receiving instructions on benefit procedures returned to their respective regions to conduct and act as instructors at these training schools. They were accompanied by members of the Head Office staff at Ottawa.

Since contributions under the unemployment insurance plan are payable after January 27 to eligible insured workers, who become unemployed, it was necessary to train the Commission's staffs across Canada in the new procedures which had been drawn up for the taking of claims for benefit. Those present at the regional schools were senior officers of the five regional offices and the hundred Local Employment and Claims Offices of the Commission. The taking of claims at the Employment and Claims Office, the use of forms, the adjudication of claims at Insurance Offices, appeals to Courts of Referees and to the Umpire were some of the topics which received special attention at the training schools.

J. H. McVety, Regional Superintendent for the Pacific region, was in charge of the school at Vancouver, assisted by D. J. Stephenson and T. Parkinson, Regional Insurance Officer and Travelling Supervisor for British Columbia, and H. S. Relph, Chief Reviewing Officer from the Head Office at Ottawa.

In the Prairie region, F. J. White, Regional Superintendent, conducted the school assisted by C. B. Howden, Regional Insurance Officer, J. E. Rettie and W. Smitten, Travelling Supervisors, S. G. Martin, M. R. McKellar and H. H. Valens. Messrs. A. A. Heaps and T. R. Walsh were instructors from Ottawa.

Dr. Allon Peebles, Executive Director, R. G. Barclay, Chief Insurance Officer, V. C. Phelan, Chief Employment Officer, and E. Stangroom, Chief Inspector of Insurance Revenue, spent some time at both the Ontario and Quebec Staff Training Schools.

The Ontario Regional School was under the direction of B. G. Sullivan, Regional Superintendent. Mr. Sullivan was assisted by J. H. Mulholland, Regional Insurance Officer, J. Angus, Assistant Regional Superintendent, G. L. Ord and D. D. Wilson, Travelling Supervisors, R. J. Dallard and H. C. Hudson, Supervisor of Placement Operations, Ottawa.

Regional Superintendent E. A. Dionne was in charge of the Quebec Regional School at Montreal. L. Prefontaine, Regional Insurance Officer, J. P. Cote and O. Deschamps, Travelling Supervisors, H. T. Dauth and J. H. Tellier, Dr. E. P. Laberge, Supervising Inspector of Employment Offices, and J. E. Beauvais, Insurance Officer from the Head Office, assisted Mr. Dionne with the school.

R. P. Hartley, Regional Superintendent for the Maritimes, assisted by H. Baird, Regional Insurance Officer, and J. P. Keating, Travelling Supervisor, conducted the Maritime Regional

Training School. W. K. Rutherford, Employment Advisor, R. V. Sladen, Insurance Inspector and J. W. Willard of the Head Office staff were instructors from Ottawa.

Insurance Registration

Reports received from the district offices of the Unemployment Insurance Commission show that 149,306 employers have registered throughout Canada and that they have requisitioned 2,981,199 insurance books for their employees. A progress report of registration of employers on January 31, 1942, contained the following figures:—

Region	Employers registered	Books requisitioned
British Columbia ...	12,838	236,256
Prairies	29,522	424,049
Ontario	57,331	1,213,857
Quebec	38,261	877,543
Maritimes	11,354	229,494
Total.....	149,306	2,981,199

Unemployment Insurance Fund

On January 31, 1942, the Unemployment Insurance Fund had received a total of $29,385,498.54 from contributions made since July 1, 1941, when the Unemployment Insurance Act went into effect, and from interest on reserves invested in Government bonds. Employer and employee contributions were made by bulk payments, meter credits and the purchase of Unemployment Insurance stamps. The Dominion Government adds its share of 20 per cent to the total employer-employee contributions.

Statement of Receipts to January 31, 1942

Unemployment Insurance Stamps.....	$14,968,079 77
Meter Credits.....	4,241,002 96
Bulk Payments.....	5,132,543 18
Government's Contribution	4,866,061 50
Interest on Investments...	177,720 00
Miscellaneous Receipts...	91 13
Total Receipts.....	$29,385,498 54

Up to January 31, 1942, the Unemployment Insurance Commission, with the authorization of the Investment Committee, has invested $28,236,847.28 in bonds of the Dominion of Canada.

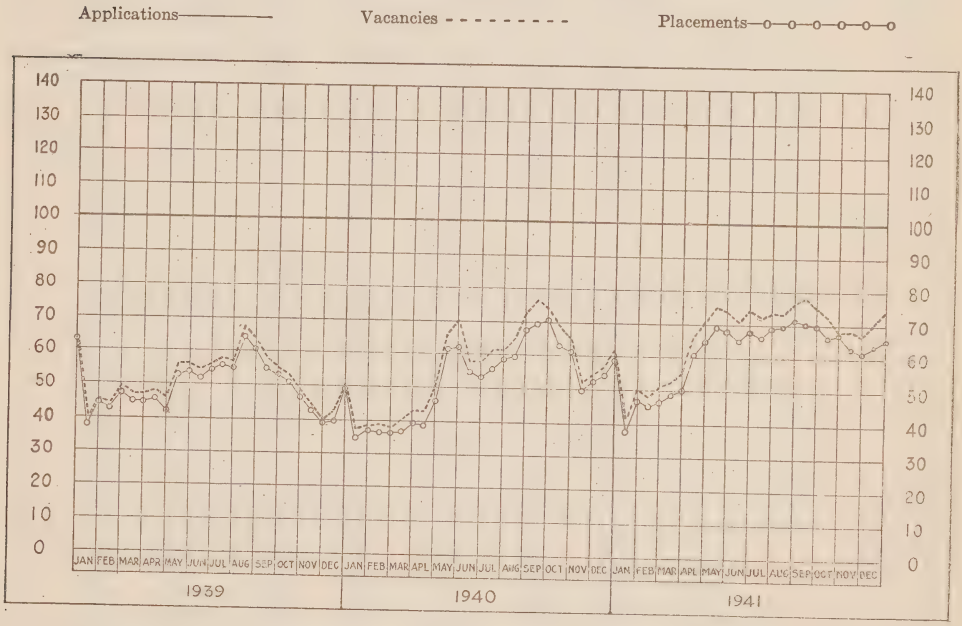
Report of Employment and Claims Offices for December, 1941

The records of the Employment and Claims Offices of the Unemployment Insurance Commission for the month of December, 1941, showed a decline of more than 12 per cent in the average daily placements when compared with those of November, 1941, but a minor gain over those reported by employment Offices in December a year ago. Under the former comparison, substantial losses were registered in manufacturing and construction and maintenance, followed by others of lesser degree in transportation and farming, and a nominal decrease in mining. A marked gain was reported in services, but advances in logging and trade were quite small. When compared with December, 1940, nearly all groups recorded increases, the largest being in manufacturing, services and logging, but this improvement was almost entirely offset by a very heavy loss in construction and maintenance and a moderate decline in farming.

The accompanying chart shows the trend of employment since January, 1939, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the curves of vacancies and placements in relation to applications for the month of December were 74·4 and 65·4 respectively, in comparison with ratios of 62·1 and 59·1 recorded at the close of December a year ago.

The average number of vacancies reported daily by employers to the offices of the Commission throughout Canada during December, 1941, was 1,661, as compared with 1,810 during the preceding month and with 1,519 in December a year ago.

The average number of applications for employment received daily by the offices during the month under review was 2,232, in comparison with 2,681 in November, 1941, and with 2,554 during December of the previous year.



The average number of placements made daily by the offices of the Commission during December, 1941, was 1,460, of which 895 were in regular employment and 565 in work of one week's duration or less, as compared with a total daily average of 1,667 during the preceding month. Placements in December a year ago averaged 1,449 daily, consisting of 864 placements in regular and 585 in casual employment.

During the month of December, 1941, the offices of the Commission referred 38,655 persons to vacancies and effected a total of 37,943 placements. Of these, the placements in regular employment were 23,266, of which 18,205 were of men and 5,061 of women, while placements in casual work totalled 14,677. The number of vacancies reported by employers was 24,650 for men and 18,531 for women, a total of 43,181, while applications for work numbered 58,020, of which 38,249 were from men and 19,771 from women. Reports for November, 1941, showed 43,439

positions available, 64,324 applications made and 39,997 placements effected, while in December, 1940, there were recorded 37,953 vacancies, 63,847 applications for work and 36,209 placements in regular and casual employment.

During the year 1941, the offices of the Service throughout Canada reported 551,704 vacancies, 831,462 applications and 507,763 placements in regular and casual employment. Vacancies and placements were higher than those of the previous year, but applications for employment considerably lower, the totals for the year 1940 being 511,876 vacancies, 888,595 applications for work and 475,106 placements in regular and casual employment.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

The following table gives the placements effected by Employment offices, each year, from January, 1931, to date:—

Year	Placements		
	Regular	Casual	Totals
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939	242,962	141,920	384,882
1940	320,090	155,016	475,106
1941	316,168	191,595	507,763

Nova Scotia

Orders listed at Employment and Claims Offices in Nova Scotia during December were nearly 19 per cent higher than in the preceding month, but over one per cent fewer than in December a year ago. There was an increase of almost 17 per cent in placements when compared with November, but a decline of nearly 5 per cent in comparison with December of the previous year. The largest decrease in placements from December, 1940, was in construction and maintenance, but this was partly offset by gains in services, manufacturing and logging, changes in other groups being negligible. Industrial divisions in which most of the placements were effected included:—manufacturing, 242; logging, 151; construction and maintenance, 951, and services, 1,520, of which 1,164 were of household workers. During the month, 1,305 men and 134 women were placed in regular employment.

New Brunswick

Opportunities for employment, as shown by calls received at Employment and Claims offices in New Brunswick during December, were about 4 per cent greater than in November, but over 9 per cent below those of December, 1940. Placements showed only a

* 33 placements effected by offices now closed.

nominal loss from the previous month, but were 24 per cent fewer than in the corresponding period a year ago. With the exception of a moderate loss in services from December, 1940, changes in placements in other groups were small, the largest of which were a decline in manufacturing and an increase in transportation. Industries in which employment was found for more than 100 workers included:—construction and maintenance, 111, and services, 534, of which 263 were for household workers. Regular placements numbered 244 of men and 59 of women.

QUEBEC

There was a decrease of nearly 14 per cent in the number of positions offered through Employment and Claims offices in Quebec province during December, when compared with 1941, but a gain of 12 per cent in comparison with the corresponding period a year ago. Placements were nearly 10 per cent fewer than in the preceding month, but more than 14 per cent above those of December, 1940. A fairly large increase in services and moderate advances in manufacturing and transportation accounted for the improvement shown in placements over December a year ago. A substantial loss, however, was reported in construction and maintenance. Changes in other groups were nominal only. Industrial groups in which most of the placements were effected included:—manufacturing, 1,282; logging, 2,591; transportation, 670; construction and maintenance, 1,487; trade, 235, and services, 5,755, of which 5,074 were of household workers. There were 5,576 men and 1,775 women placed in regular employment.

ONTARIO

During the month of December, positions offered in Ontario were 8 per cent lower than those of the preceding month, but 2 per cent above the number recorded in December, 1940. There was also a decrease of almost 14 per cent in placements, when compared with November and of 11 per cent in comparison with the corresponding month a year ago. The most marked reduction in placements from December of the previous year occurred in construction and maintenance, although moderate losses were also reported in services and farming. Manufacturing showned a substantial gain, while that in logging was only moderate. Small increases also took place in trade and transportation. Placements by industrial divisions included:—manufacturing 3,065; logging, 1,516; farming, 236; transportation, 255; construction and maintenance, 1,712; trade, 579, and services, 3,984, of which 2,660 were of household workers. During the month, 5,342 men and 2,117 women were placed in regular employment.

MANITOBA

The demand for workers, as shown by orders listed at Employment and Claims offices in

Manitoba during December, 1941, was 96 per cent greater than in November and over 78 per cent higher than in December a year ago. Placements, however, were more than 22 per cent fewer than in the preceding month and 8 per cent below those of the corresponding period of the preceding year. Moderate declines in placements from December, 1940, which took place in construction and maintenance and farming, were largely offset by gains in logging and manufacturing, slight changes being recorded in all other groups. Industrial divisions, in which the majority of placements were effected, were:—manufacturing, 231; logging, 967; farming, 121, and services, 868, of which 612 were of household workers. There were 1,426 men and 202 women placed in regular employment.

SASKATCHEWAN

Employment offices in Saskatchewan were notified in December of over 17 per cent fewer vacancies than in the preceding month, but 11 per cent more than in December, 1940. Placements were more than 24 per cent in excess of those of November and nearly 81 per cent above the corresponding month a year ago. The large gain in placements over December of the previous year was due to a substantial increase in logging, minor improvement being noted also in construction and maintenance and trade, and nominal decreases in farming, manufacturing and services. Placements by industrial groups included:—Logging, 1,070; farming, 124; construction and maintenance, 196, and services, 769, of which 463 were of household workers. During the month, 1,428 men and 229 women were placed in regular employment.

ALBERTA

During December, vacancies offered through Employment and Claims offices in Alberta were 16 per cent below those of November, 1941, but 10 per cent higher than in the corresponding month last year. Placements likewise showed 16 per cent reduction from the preceding month, but were nearly 5 per cent in advance of December, 1940. Moderate gains were recorded in logging, manufacturing and trade, which were partly offset by losses in farming, construction and maintenance and services. The majority of placements recorded during the month were in the following industries:—Manufacturing, 196; logging, 660; farming, 225; construction and maintenance, 132, and services, 671, of which 466 were of household workers. Placements in regular employment numbered 1,265 of men and 236 of women.

BRITISH COLUMBIA

Employment opportunities, as indicated by orders received at Employment and Claims offices in British Columbia during December, were 37 per cent better than in the preceding month and almost 53 per cent above those of the corresponding period a year ago. Placements were 46 per cent in excess of November, 1941, and almost 41 per cent higher than in December, 1940. A fairly large increase in services and a moderate gain in manufacturing accounted for the advance in placements over December a year ago, although this improvement was somewhat modified by an appreciable decline in construction and maintenance and a small decrease in farming. Placements by industrial groups numbered:—manufacturing, 682; construction and maintenance, 482; transportation, 61; trade, 74, and services, 2,601, of which 805 were of household workers. During the month, 1,619 men and 309 women were placed in regular employment.

Movement of Labour

During the month of December, 1941, the offices of the Unemployment Insurance Commission effected 23,266 placements in regular employment, 2,903 of which were of persons to whom was granted the reduced transportation rate, 1,053 proceeding to centres within the same province as the despatching office and 1,850 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the employment offices who may desire to travel to distant employment for which no workers are available locally.

In the Province of Quebec there were issued 292 certificates at the reduced rate, 174 provincial and 118 interprovincial, the majority of which was for bush labour. In the provincial group, Montreal transferred 139 bushmen to La Tuque; Rouyn, 4 bushmen to Val d'Or; and Thetford Mines, 2 to La Tuque. In addition, Joliette sent 26 building labourers to Chicoutimi and Quebec 3 electricians to Matane. Interprovincially, besides one engine fitter shipped from Montreal to Halifax, bushmen were despatched as follows: By Hull, 33 to Pembroke, 16 to Sudbury and 4 to Sault Ste. Marie and by Montreal, 64 to Sault Ste. Marie. The movement in Ontario, which was entirely provincial, consisted of the transfer of 548 persons to points within the same zone as the despatching office. Fort William sent 88 bushmen and one watchman; Sudbury, 57 bushmen and one cookee and Port Arthur, 304 bushmen, 3 barn bosses, 3 blacksmiths, 4 cookees, 4 truck drivers, 2 jackhammermen, 2 cooks, 2 clerks, one watchman, one miner and 60 labourers for Hydro Electric Power construction. From North Bay proceeded 12 bushmen and 2 cooks to Timmins and from Pembroke one truck driver to Sudbury. The Manitoba offices assisted in

the forwarding of 938 workers at the reduced rate, 16 provincially and 922 interprovincially. Of these sent to points within the jurisdiction of the despatching office, 5 bushmen travelled from Dauphin and 7 bushmen, 2 cooks, one hotel porter and one farm hand from Winnipeg. With the exception of one bushman sent from Winnipeg to Yorkton, the Port Arthur district was the destination of all remaining persons sent out, 24 bushmen going from Dauphin, and from Winnipeg 842 bushmen, 25 cookees, 13 truck drivers, 2 carpenters, 3 mechanics, one of which was a diesel mechanic, 2 blacksmiths, one bulldozer operator, one watchman, one cook, one clerk, one miner and 5 building labourers. Vouchers for reduced transportation were granted in Saskatchewan for 12 persons going to provincial employment and 758 to interprovincial. Of the former, 2 bushmen journeyed from Regina to points within the zone covered by that office and 10 bushmen from Regina to Saskatoon. Of the persons transferred to interprovincial points, one ship's plater went from North Battleford to Vancouver, 436 bushmen from Regina to Port Arthur, 313 bushmen from Regina to Timmins and 8 from Saskatoon to Sault Ste. Marie. Alberta certificates were 355 in number, 303 provincial and 52 interprovincial, all of the former being for men travelling from Edmonton to points within that zone. These consisted of 261 bushmen, 13 mill hands, 7 cookees, 6 cooks, 5 miners, 3 waitresses, one timekeeper and 7 labourers, 6 of whom were for the mining industry. Interprovincially, from Calgary 2 riveters went to Vancouver and one sawyer to Winnipeg. In addition, 43 bushmen, 5 truck drivers and one hoisting engineer were directed from Edmonton to Prince Rupert.

Of the 2,903 workers who profited by the reduced transportation rate during December, 2,525 were conveyed by the Canadian National Railways, 369 by the Canadian Pacific Railway and 9 by the Temiskaming and Northern Ontario Railway.

Employment Conditions at the end of January

The placement activities as reported by the Employment and Claims Offices during the month of December, 1941, together with statistical summaries for that period, are covered by an earlier section of this report. Further reports received from these offices revealed conditions at the end of January to be as follows:—

Farm operations in the Maritime Provinces were chiefly of a routine nature with no calls for help. Good catches of smelts, cod, haddock and gaspereaux were reported from various points but there was no demand for workers. Logging operations were impeded by heavy snow storms in the New Glasgow and Sydney areas; sawmills were reported working overtime in the Chatham area. New Brunswick reported favourable conditions in almost all parts of the Province, resulting in increased logging activity and requiring additional choppers and sled loaders. Coal mines in the Cape Breton area operated 3½ to 6 days in the week and those in the New Glasgow vicinity worked 3½ to 5 days. All manufacturing plants operated at full time except in New Glasgow where heavy storms prevented many workers reaching their places of employment. The adverse weather also affected outside construction. Work on a wireless station at the Chatham Airport has been commenced. Passenger and freight traffic, both incoming and outgoing, continued to be heavy with bus and automobile traffic comparatively less. Both wholesale and retail trade were reported to be seasonally good. Placements of domestics were reported by most offices and a scarcity of workers continues.

Farming in Ontario continued to show little activity with orders for farm hands received and insufficient applicants available. Logging and pulp operations showed increased activity over the previous month; most types of workers continued to be required and any available could be readily placed. There was no demand for miners although some placements were made in the Sudbury area. Most manufacturing firms continued at full capacity with regular staffs; skilled tradesmen are still required but unskilled and semi-skilled labour were being generally supplied. Restrictions on crude rubber have reduced operations in this industry; delayed deliveries of steel have affected production in certain plants; one aircraft firm reported a small lay-off due to lack of contracts. While there were not many new projects reported, construction activity was fairly general but no lack of workmen was indicated; several military projects were being rushed to completion. Needs of casual employment were quite brisk and most orders were filled. The demand for capable female domestics continued but few applicants registered were seeking such work. War industries have taken on numerous female workers; such needs were readily filled.

In the Prairie Provinces farming was quiet with a scarcity of applicants tending to reduce orders for help. A considerable loss in the Manitoba Government's reclamation project was anticipated owing to adverse weather which had prevented the erection of large numbers of muskrat houses. Several transfers of pulp workers were made from Saskatchewan to Northern Ontario. Coal

mining operators continued to be busy, reporting a shortage of miners for collieries; oil drilling was steady. Manufacturing was fairly stable with some increases to staffs. Construction continued fairly steadily, chiefly on airport projects. Some road construction had commenced in Alberta. A shortage of household help continued with farm domestics difficult to obtain as many female applicants prefer military service to domestic work.

Farming in British Columbia showed little activity; experienced farmhands arriving from the Prairie Provinces were reported to be unwilling to go on farms, preferring industrial work. Lay-offs of workers were anticipated with the closing down of cold storage plants since their fruit stocks were being exhausted. Herring canning was in full operation. Logging was becoming more active and requests for workers continued; most sawmills were working full time. Mines were operating on full time and no additional help was required. Manufacturing was steady, skilled workmen only being required. Placements in shipyards were restricted by the lack of highly skilled tradesmen. Shipping was quiet and little work for longshoremen was available. Casual workers were sufficiently plentiful. Applicants were secured for a ground school course for aircraftsmen at Vancouver. Female workers were available for munition industries, many of whom came from the Prairies. As in other provinces, a scarcity of domestics existed generally.

UNEMPLOYMENT IN CANADA AS REPORTED BY TRADE UNIONS FOR THE YEAR 1941

THE Department of Labour receives monthly reports from local trade unions throughout the country, indicating their membership and the number of members unemployed on the last day of each month, the tabulation of these data furnishing a continuous record of the employment situation of organized workers during the year. The average number of local unions reporting during 1941 was 2,067, with an average membership of 299,168 persons, 4·5 per cent of whom, were on an average unemployed. This percentage for 1941 was the lowest in trade union records for any year since 1928. Each month during 1941 reflected a substantially lower percentage of unemployment than the corresponding month in 1940. In February, 1941, 6·9 per cent of the membership was without work, the largest percentage of unemployment recorded during the year. The highest employment level was attained during August, when only 2·4 per cent of the trade union membership was unemployed.

In the manufacturing industries expansion of noteworthy proportions was shown when compared with corresponding months of 1940. The heavy demand for skilled labour brought about by the war was especially reflected in the improvement indicated by unions in the iron and steel trades. The unions in these industries showed a much higher employment level in practically every month of 1941 than that reflected in returns for the previous year. With the exception of December, much better employment conditions were indicated, on the whole, among members in the garment trades. In each month of 1941 substantial increases in work afforded were apparent among unions in the pulp and paper industry. In comparison with the previous year, members in the wood products division indicated much quieter conditions in the months of January, February and March but from that point to the close of December, the employment level was, for the most part, substantially higher. Impressive advances in work afforded members in the building and construction trades were shown in returns tabulated from January to August, while in September the percentage was identical with that of September, 1940. From that point to the end of the year the employment level was higher than that of the previous year, but the gains were not so pronounced.

Employment for union members in the transportation industries was generally much better during the year under review. Steam railway operations continued at a very high level; conditions, generally, were much better than those reported during 1940. With the exception of the months of May and December employment among navigation workers, showed substantial improvement. Communication workers were better engaged in every month of 1941 than in the corresponding month in 1940.

Employment in retail trade remained very good, October alone, reflecting a nominal decline from October of the previous year. With the exception of nominal decreases in work during February and April, employment in the services division was uniformly better during the past year. The division includes civic employees, hotel and restaurant employees, stationary engineers and firemen, etc. Higher employment levels prevailed for miners in most months of the year 1941, the only

exceptions being in January, February and October, and in these, the decreases were not pronounced. In June, the percentage of unemployment was identical with that of June, of the preceding year

The situation among fishermen reflected seasonal contractions in the first quarter, and in July and September, likewise, the recessions were quite noteworthy; in the other months, however, the employment level was generally substantially higher than that reported in 1940.

For the first nine months of the year, lumber workers and loggers reflected noteworthy improvement; in October and November the increases in work afforded over the 1940 levels were but moderate, while the percentage of unemployment in December was slightly higher than that shown in the corresponding month of the previous year.

A slight increase in work was shown in January, 1941 over that afforded at the close of December, 1940. Pronounced expansion for lumber workers and loggers, in addition to extensive recovery for garment workers was mainly responsible for this betterment. There was a nominal decline in February and in March there was a fractional increase in available work. Owing to substantial employment expansion for union members in the building trades, an appreciable improvement in the transportation industries and advances of somewhat lesser degree in the manufacturing industries, conditions in April continued to improve and there was expansion in each month to the end of August, when the percentage of unemployment stood at 2·4, which was the highest employment level attained during the year 1941. This August unemployment percentage was the lowest in trade union records since September, 1928. For the first month since February the returns tabulated in September showed a recession, although this was fractional. Further nominal declines took place in October and November, followed by a moderate contraction in December. The latter decrease was due principally to marked employment recessions among lumber workers and loggers and moderate reductions in employment in the manufacturing and transportation industries, and in the building and construction trades. This December unemployment percentage was the lowest, however, for any corresponding months since 1919.

Tables showing percentages of unemployment among union members by industries and provinces by months during 1941 and for earlier dates appear in the section on Unemployment in Trade Unions.

REPORT OF THE EMPLOYMENT AND CLAIMS OFFICES FOR THE PERIOD OCTOBER TO DECEMBER, 1941

THE work of the Employment and Claims Offices during the quarter October to December, 1941, was somewhat less in volume than that reported by offices of the Employment Service of Canada in the corresponding quarter of 1940, as there was shown a decline of under one per cent in vacancies offered and of three per cent in placements effected. An analysis of the different industries shows a very heavy decline in placements in construction and maintenance, particularly in the building section, where many large contracts were under way in 1940. This recession almost entirely accounted for the total loss shown, although a smaller decrease was reported in farming. Remaining industrial divisions recorded gains, the most noteworthy being in manufacturing, services and logging. Provincially, Quebec, Manitoba, Saskatchewan and British Columbia registered more vacancies and placements, while Alberta registered an increase in the former, but a decrease in the latter. Losses in all remaining provinces, however, more than offset these advances, the declines recorded in Ontario and Nova Scotia being the largest.

From the chart which accompanies the article on the work of the Employment and Claims Offices for the month of December, it will be seen that the curve of vacancies in relation to applications was downward throughout the first two months, except for a very slight upward variation the first half of November, but during December the trend was decidedly upward. A slight rise in the curve of placements took place also during the latter part of October, otherwise, the course followed was downward throughout October and November, followed by a marked upward trend throughout December and at the close of the quarter, the levels reached by both curves were considerably higher than those attained at the end of December a year ago. During the period October to December, 1941, there was a ratio of 70·5 vacancies and 64·8 placements for each 100 applications for employment, as compared with 60·0 vacancies and 56·6 placements during the corresponding period of 1940.

The average number of positions offered daily during the quarter under review was

1,813, of applications registered, 2,569, and of placements effected, 1,665, in contrast with the daily average of 1,820 vacancies, 3,031 applications and 1,715 placements in regular and casual employment during the last quarter of 1940.

During the three months, October to December, 1941, the offices reported that they had made 128,554 references of persons to positions and had effected a total of 126,539 placements, of which 80,132 were in regular employment and 46,407 in casual work. Of the placements in regular employment, 62,735 were of men and 17,397 of women. Comparison with the corresponding quarter in 1940 showed that 130,324 placements were then made, of

which 85,013 were in regular employment and 45,311 in casual work. Applications for employment during the period under review were received from 128,485 men and 66,756 women, a total of 195,241, in contrast with the registration of 230,345 persons during the last quarter of 1940. Employers notified the Commission during October to December, 1941, of 137,718 vacancies, of which 83,744 were for men and 53,974 for women, as compared with 138,299 opportunities for work during the corresponding period of 1940.

A report in detail of the transactions of the Employment and Claims Offices for the month of December, 1941, will be found elsewhere in this issue.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA

Industrial Situation as Indicated in Reports of Employers, Trade Unions and Value of Building Permits

IN view of the transference of the functions of the Employment Service of Canada to the Unemployment Insurance Commission, information formerly presented in this article concerning applications, vacancies and placements made by the offices of the Employment Service will now be found in the preceding article entitled "Activities of Unemployment Insurance Commission", under the heading "Report of Employment and Claims Offices for December, 1941". In this section information is given concerning the number of applications for work, existing vacancies and the number of placements made through the Employment Claims Offices of the Unemployment Insurance Commission. The latest available information concerning the employment situation in Canada is also given in another section, under the heading "Employment Conditions at the end of January".

The accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting December 1, was 12,795, the employees on their payrolls numbering 1,688,005, compared with 1,675,645 (revised) in the preceding month.

The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for December was 2,100 having an aggregate membership of 321,314 persons, 5·2 per cent of whom were without employment on January 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

Recorded in the concluding section of this article and indicative of the employment situation in the building trades are the detailed statistics compiled by the Dominion Bureau of Statistics each month showing the value of building permits granted and the value of building materials.

During December the total value of building permits granted in 55 of the larger municipalities was $5,427,347 compared with a total of $5,994,478, the value of building permits granted in 57 municipalities during December, 1940.

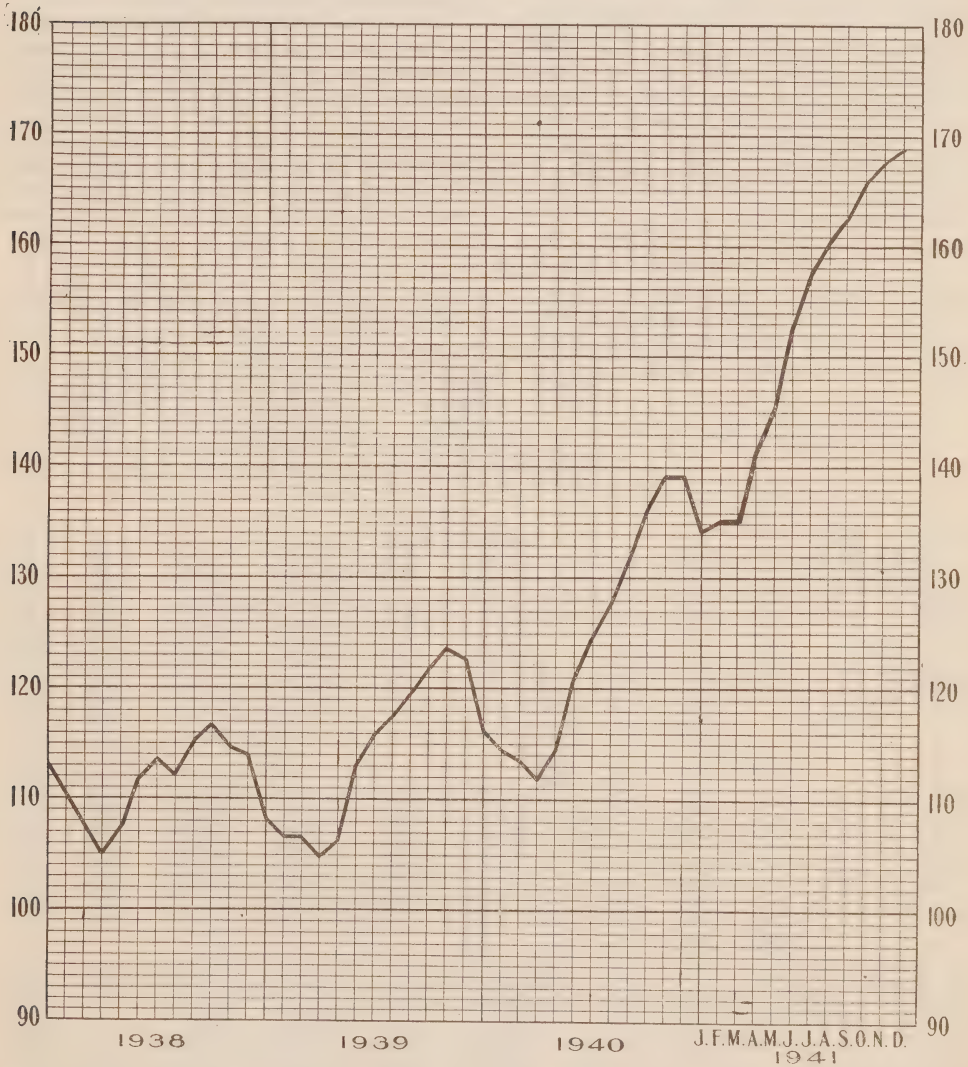
The Employment Situation at the Beginning of December, 1941, as Reported by Employers

Industrial employment showed further expansion at the beginning of December, continuing the steadily upward movement indicated since January, 1941. The gain, which was smaller than any recorded in immediately preceding months, was contra-seasonal in character, the trend at December 1 in nineteen of the twenty earlier years of the record having been retrogressive. In this period, the average decline at the beginning of December was almost two per cent.

Returns were received by the Dominion Bureau of Statistics from 12,795 employers whose staffs aggregated 1,688,005 at December 1, an increase of 12,360 persons, or 0·7 per cent over their working forces at the beginning of November. As a result of this advance, new all-time highs were recorded by both crude and seasonally-adjusted index numbers. The unadjusted figure, based on the 1926 average as 100, rose from 167·6 at November 1, to 168·8 at the beginning of December; this was over 21 per cent higher than the December 1, 1940, index of 139·1, previously the highest for December in the period since 1920. The seasonally-corrected index advanced from 160·4 at November 1, to 164·8 at the date under review.

In recent years, the crude index, based on the 1926 average as 100, has been as follows at December 1:—1941, 168·8; 1940, 139·1; 1939, 122·7; 1938, 144·0 and 1937, 121·6. In 1929, when industrial employment was, on the whole, at a higher level than in any other pre-war year, the December 1 index had been 119·1.

In the last twenty years, employment at the beginning of January has invariably showed a decline, due to the closing of establishments over the holiday season and for inventory, repairs, etc. The average reduction in personnel has approximated 6½ per cent.



Manufacturing establishments at December 1, 1941, reported their eleventh consecutive

monthly gain. There was further important expansion in the number employed in the iron and steel and chemical industries, while seasonal losses were recorded in the food and lumber divisions. On the whole, the number added to the working forces in manufacturing this period was exceedingly small, while that reported at December 1, 1931, approximated the latest gain.

Among the non-manufacturing classes, logging, communications, transportation and trade showed considerable improvement. The

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

Note.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

was not large, amounting only to some 4,600 persons; it is, however, of particular significance in that it is contra-seasonal. In sixteen of the preceding years since 1920 the trend at December 1 has been downward; the advances indicated in three of the other four years in

largest of these increases was in logging, in which it was rather below normal according to the experience of past years. This was probably due to the difficulty in securing labour, reported in some areas. The additions in trade were also on a somewhat smaller scale

than in December in any recent year. The trend of employment in the remaining industries was downward; mining, services and construction and maintenance released employees. The decline in construction was largest; it was, however, considerably below average.

A fuller analysis of the situation in the various industrial groups as at December 1, 1941, is given following the text dealing with conditions in the economic areas and the leading cities.

The staffs of the 12,444 firms making returns for December 1, 1940, had aggregated 1,364,348, a reduction of 798 persons from the preceding month. Mining, transportation, communications, services and construction had then recorded seasonal curtailment, while manufacturing had shown a small advance, and logging and trade had afforded decidedly more employment.

The Course of Wartime Employment

Industrial employment in the first twenty-seven months of the war has shown almost continuous expansion, on a scale unparalleled in any earlier period. From September 1, 1939, to December 1, 1941, the index has risen by 41 per cent, a gain whose magnitude is emphasized by comparison with that of about 14½ per cent in the five years ending in 1939, while in the period from 1921 to 1939, the general index rose by approximately 28 per cent.

It is estimated that the firms co-operating in the monthly surveys of employment have enlarged their working forces by 492,000 persons from the outbreak of hostilities to December 1. This figure tells only part of the story, since the smaller firms which are not covered by the monthly returns must certainly also have added considerably to their personnel. The armed and the auxiliary forces

TABLE I—EMPLOYMENT AND EARNINGS

Number of Persons Employed at December 1 and at November 1, 1941, by Establishments furnishing Statistics, and Earnings of these Employees in One Week in November and One Week in October.

(The payroll figures are preliminary and are subject to revision.)

Eight Leading Industries	**1,688,005**	**1,675,645**	**46,128,842**	**45,272,064**	**27·33**	**27·02**

have likewise absorbed large numbers of men of working ages. The growth in industrial employment and the withdrawals from civilian life have undoubtedly brought about far-reaching changes in the pre-war industrial, occupational, sex and age distributions of workers in the Dominion. At present, no information is available respecting the last three of these distributions, while changes in the industrial pattern are only partially indicated in the statistics now on record.

The advance in employment in manufacturing in recent months has of course been greater than that in the other industries. From September 1, 1939, to December 1, 1941, the staffs of manufacturers furnishing current statistics to the Bureau were increased by approximately 380,300. As a result, the index number of employment in factories rose by over 63 per cent in the twenty-seven months. This gain greatly exceeds that of 41 per cent given above for all industries; it is also substantially larger than the increase of not quite 39 per cent indicated in the period from the low point of the depression, in 1933, to 1939.

The expansion in the durable goods industries has been of particular significance. From 100·4 at the outbreak of hostilities, the index number in this class has risen to 212·1 at the latest date, or by some 111 per cent. The number of persons employed in this category constituted 51 per cent of all those reported in manufacturing at December 1, 1941, a proportion substantially in excess of that of 40 per cent engaged in the durable goods industries at the outbreak of hostilities.

The increase in employment in the production of non-durable goods has also been impressive, the index rising by 34·6 per cent in the first twenty-seven months of warfare, to 170·4 at the latest date. The effect of recent events upon this class is minimized in the present comparison by the fact that there is normally a seasonal falling-off in activity in this class between September 1 and December 1. Within the durable and the non-durable goods groups, the increases have been of varying importance, but every branch of manufacturing has shared to some degree in the general expansion. In the former class, the outstanding advance has been in iron and steel and other metal divisions, and in the latter, in chemical plants. In both cases, the gain is directly a result of wartime production.

Relative weight of Employment by Provinces and Economic Areas as at Dec. 1, 1941	100·0	8·3	·0·1	4·9	3·3	31·1	41·8	10·9	5·0	2·2	3·6	7·9

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

The improvement in the non-manufacturing industries in the first twenty-seven months of war has been considerable, although it has not been comparable in extent with that in manufacturing. In these divisions, the comparison between the situation at the outbreak of war and that at the beginning of December is also complicated by seasonal movements in industry. This factor partly accounts for the particularly large gain shown in logging, as well as for a decline of nearly six per cent in construction at December 1, as compared with September 1, 1939. In mining, employment in the twenty-seven months has increased by nine per cent, in communications by 15·2 per cent, in trans-

[1] The relative weight shows the proportion of employees reported in the indicated industry, to the total number of employees reported in Canada by the firms making returns at the date under review.

portation by 15·7 per cent, in services by 12·3 per cent, and in trade by 23·9 per cent. The falling-off already mentioned in construction took place in highway and railway work, while building showed a substantial increase. The gain of 111·8 per cent in the last-named is largely due to construction of buildings required in the conduct of the war.

All provinces have shared in the expansion recorded in the first twenty-seven months of war, the gains varying from about 20 per cent in the Prairie Provinces, to 61·6 per cent in the Maritimes; in Quebec, the index number in this period rose by almost 40 per cent, while that in Ontario was 49·7 per cent higher at December 1, 1941, than when war was declared.

Each of the eight cities for which data are segregated has shown substantial increases, exceeding those indicated in the various provinces to which the municipalities belong. The greatest advances have been in Hamilton and Windsor, as a result of the concentration of the heavy manufacturing industries in those centres; the gains therein amounted to 75 per cent and 112 per cent, respectively. In Montreal, there has been an increase of 46 per cent, in Quebec City, of 52 per cent, in Toronto, of 55 per cent, in Ottawa, of 51½ per cent, in Winnipeg, of 35 per cent and in Vancouver, of 41 per cent.

Statistics of Earnings

The results of the ninth tabulation of statistics of weekly earnings as reported by establishments ordinarily employing 15 persons and over, are contained in the present report. The figures are preliminary.

The 1,688,005 men and women employed at December 1 by the 12,795 establishments furnishing information to the Dominion Bureau of Statistics were paid $46,128,842 for services they rendered in the final week in November. In their last report, these establishments had indicated a staff of 1,675,645 employees, whose earnings in the period of observation in October had amounted to $45,272,064. An increase of 12,360 or 0·7 per cent, in the number of employees was accompanied by a gain of $856,778, or 1·9 per cent in the aggregate payrolls. These advances follow those of 1·1 per cent in the personnel, and 3·6 per cent in the earnings shown in the last bulletin.

There was a further advance in the per capita earnings, which rose by 31 cents to $27.33 in the last week in November. Despite the continued dilution of labour, the weekly earnings of the average wage-earner have recently shown steady gains. In the last week in August, the per capita was $26.03, in September, $26.36, and in October, $27.02.

Th earnings of the 1,676,193 employees reported by the 12,775 establishments whose returns were then tabulated in the last report had amounted to $45,279,584 in the last week in October, a per capita average of $27.02. The present report shows slight revisions in some of the figures previously issued, due to the inclusion of late returns and to the correction of errors in the reported data which became apparent only by comparison with the statistics for pay periods in the succeeding months.

Index numbers of earnings.—Pending the establishment of a more satisfactory basic period for an index number of earnings, the data furnished for the last week in May have been revised to serve as a starting point from which may be measured the current changes in the purchasing power distributed in payrolls by the establishments co-operating in the current surveys of employment and earnings. The employees of such firms constitute a large proportion of the total working forces engaged in industries other than agriculture in the Dominion. The presentation of the figures of earnings in the form of an index number gives a clearer picture of the situation than can be obtained from the use of the current aggregate or average capita figures. The latter especially are affected very considerably by the dilution of labour which has been a marked feature of the situation in recent months.

The firms furnishing information for the first of December, as already stated, reported the disbursement of $46,128,842 in salaries and wages for the final week in November, as compared with $45,272,064 in the last week, in October, while the payrolls that the same employers distributed to those on their staffs at June 1 for services rendered in the last week in May amounted to $38,584,139. An index number based upon this figure had, therefore, risen to 117·3 in the last week in October, and to 119·6 in the last week in November. The upward movement has been steadily maintained during the summer, the revised index numbers of earnings in the period of observation in June being 103·9 in July, 106·8, in August, 109·7 and in September, 113·2. Meanwhile, an index number of employment recalculated on the comparable base, rose to 102·9 at July 1, 105·0 at August 1, 106·5 at September 1, 108·4 at October 1, 109·7 at November 1 and 110·4 at December 1. The reported payrolls in the last seven months have, therefore, increased at a higher rate than the numbers on the payrolls, notwithstanding the employment of growing numbers of inexperienced workers whose earnings are usually lower than those having longer service. Among the factors contri-

buting to this situation may be mentioned the growing concentration of workers in the highly-paid heavy industries, the payment of wartime cost-of-living allowances, frequently at rising rates, and the extensive use of overtime work.

Manufacturing.—In manufacturing, preliminary index numbers of payrolls show even more pronounced gains than those in all industries, although large numbers of inexperienced workers are still being added to the personnel. From 100 in the last week in May, the earnings of those employed in factories rose to 103·7 in June, 107·3 in July, 110·9 in August, 115·5 in September, to 120·4 in October and 123·5 in the period of observation in November. Meanwhile, the index of employment on a comparable base, has risen to 112·1 at December 1. A comparison of these data with those prepared by the United States Bureau of Labor Statistics shows similar movements; from May 15 to December 15, the American index of payrolls in manufacturing advanced by 17·9 per cent and that of employment by 7·4 per cent.

The 979,881 persons employed at December 1 by the co-operating manufacturers throughout the Dominion were paid $27,585,494 for their services in the preceding week. The same firms had employed 975,246 persons at the beginning of November, and had disbursed $26,909,158 in earnings in the last week in October. The increase of 0·5 per cent in the number of employees was accompanied by that of 2·5 per cent in their aggregate earnings. The per capita average accordingly also showed a gain, rising from $27.59 in the last week in October, to $28.15 in the last week in November.

There was a further important advance in the employment afforded in the durable goods division of manufacturing, and the earnings in this class also rose steeply; the increase in the former was 2·1 per cent, and that in the reported payrolls, 4·6 per cent. In the non-durable class, on the other hand, a reduction of 1·1 per cent in employment was accompanied by an increase of 0·3 per cent in the reported earnings. This disparity in these figures is partly due to the fact that many of those laid off were seasonal employees, whose work was irregular, their earnings consequently being relatively low; however, the payment of higher cost-of-living allowances, together with other factors, contributed to the discrepancy shown in the number of employees and the reported earnings in the non-durable goods group.

The highest earnings in the manufacturing classes were again those reported in the production of miscellaneous non-metallic mineral products, largely petroleum products; those in the iron and steel, non-ferrous metal and pulp and paper industries were also unusually high. These classes employ a large proportion of males, and require many highly skilled and experienced workers.

In general, the lowest per capita averages were reported in the tobacco, leather and textile groups, in which considerable numbers of females are employed; not only are the earnings in these categories affected by the sex distribution, but also by the age distribution of workers therein, since the women workers tend, in the main, to belong to the younger age groups. In considering the relative earnings, it must also be noted that the existence or the absence of overtime work is also a factor, while the employment of any considerable number of casual workers greatly affects the per capita earnings in any industry.

Logging.—In logging, there was a substantial increase in the number of employees reported, accompanied by a smaller gain in the aggregate earnings; the disparity is due in general to the fact that those added to the working forces are usually taken on at the lower rates of pay, while it is also probable that many of the additional workers were not employed throughout the pay period reported. The per capita average showed a decline, falling from $18.66 in the last week in October, to $17.85 in the last week in November. It must again be mentioned that the figures of earnings given in this report make no allowance for the value of board and lodging, frequently, a part of the remuneration of employees in logging camps.

Mining.—Employment in mining showed a decline of 0·8 per cent and there was a decrease of 4·2 per cent in the aggregate earnings, most of which was in the metallic ore division. The statistics show that 86,283 persons were paid $2,924,207 for their services in the last week in November, a per capita figure of $33.89. The average per employee in the last week in October had been $35.08. The difference largely results from an industrial dispute.

Communications.—In communications, there was a gain of 0·6 per cent in the number employed, and of 1·4 per cent in the weekly earnings. The average pay envelope contained $27.51 in the period of observation in November, compared with $27.30 in the same week in October.

Transportation.—The transportation industries reported at December 1 an aggregate working force of 131,177 men and women, whose earnings in the preceding week amounted to $4,594,147. The former figure was higher

by 1·2 per cent than that at November 1 and the reported earnings in the last week in November were higher by 4·6 per cent than those disbursed by the same employers in the final week in October. There was accordingly a large increase in the average earnings of the individual, which rose from $33.90 in the last week in October to $35.02 in the same period in November. Part of the increase was due to the payment of retroactive cost-of-living allowances to certain classes of steam railway employees.

Construction.—Construction, on the whole, was quieter, there being a loss of 2·9 per cent in the number of workers, and 2·4 per cent in the reported earnings. There were reductions in employment in building, railway and highway construction and maintenance. In building the payrolls were also lower, but those reported in the railway and highway divisions were higher. The per capita earnings in the group as a whole rose from $24.01 in the last week in October, to $24.14 in the period of observation in November.

Services.—The service establishments furnishing returns showed a seasonal decline in the number of their employees, together with a reduction of the same proportion in the aggregate earnings reported. The contents of the average pay envelope were therefore unchanged, being $16.75 in the final week in both October and November. These averages are lower than in any other industrial group, partly because of considerable proportions of female and part-time workers, and partly because the earnings quoted exclude the value of board and lodging, in many cases a part of the remuneration of employees in hotels and restaurants. This group accounts for some 61 per cent of those in the service industry.

Trade.—In trade, there was a gain of 2·2 per cent in the number of persons on the staffs, accompanied by an advance of 2·7 per cent in the aggregate payrolls distributed. The reported per capita earnings, therefore, slightly increased, being $23.19 in the last week in November as compared with $23.08 in the last week in October.

Finance.—In the financial group, 62,947 men and women were reported to have earned $1,855,591 in the last week in November, a per capita average of $29.48. In the last return, their employees had aggregated 63,252, and their earnings, $1,850,450, an average of $29.26 per employee. The inclusion of the data for the financial organizations raises the general per capita figure of earnings in the Dominion to $27.40 in the last week in November, as compared with $27.10 in the same period in October.

Provincially.—A review of the data for the various areas shows generally increased employment in six of the provinces, Manitoba, Saskatchewan and British Columbia being the exceptions. Of these three, Manitoba and British Columbia also reported declines in the aggregate payrolls disbursed by the co-operating establishments. In Prince Edward Island also, the total earnings were lower in the last week in November than in the same period in October. In the remaining six provinces, the aggregate earnings reported for the one week in November were greater than in October. The average per capita earnings were generally higher except in Prince Edward Island and New Brunswick; the falling-off in the latter is due to the fact that most of the gain in employment in that province took place in logging, where, as already stated, the earnings are usually below the average.

Employment and Earnings.—Table 1 at the end of this report gives preliminary data on employment and earnings for various industries in each of the five economic areas. The industrial groups included are those employing considerable numbers of persons; in those which appear in each of the economic areas, it is interesting to note that similarity in the levels of the average earnings, in relation to each other and also in relation to the general average in the same area. Thus, in pulp and paper and iron and steel, which are important in the industrial distribution in most of the areas, the reported earnings in each case were considerably above the average for the majority of manufacturing classes, as well as being higher than in manufacturing as a whole; they also exceeded the all-industries figure in the same area. The variation in the earnings of those employed in iron and steel manufacturing was from $29.95 in the Maritime Provinces in the last week in November and $30.91 in the Prairie Provinces to $32.14 in Quebec, $33.30 in British Columbia and $33.50 in Ontario. In the pulp and paper division, the range was from $29.95 in the Maritime Provinces as a unit, to $32.67 in British Columbia. The extent of overtime work contributed largely to the differences in many of the figures shown in the various areas.

Among the non-manufacturing industries, the lowest figures in most provinces are those reported in logging and services, in both of which board and lodging frequently constitute part of the remuneration of employees; allowance is not made in these statistics for earnings in this form. In British Columbia, however, the earnings reported in bush work are above the provincial average. In trade, the earnings in the last week in November

varied from $20.91 in the Maritime Provinces to $24.28 in the Prairie Provinces, where the wholesale group employs an unusually large proportion of those engaged in trading establishments. In general, the earnings in the wholesale division are higher than those in retail establishments, in which the proportion of women workers is higher, as is also the proportion of part-time employees. In all cases, the earnings of those engaged in transportation are considerably above the average, and in most provinces, the earnings of those in mining are also relatively high.

Six Leading Cities.—Increases in the number of employees and in the aggregate payrolls were reported in six of the eight centres for which data are segregated. The following showed improvement in both cases; Montreal, Quebec City, Toronto, Ottawa, Hamilton and Vancouver. In Windsor and Winnipeg, the trend of employment was downward. In the former, however, the reported payrolls were higher, while in the latter, the earnings decreased moderately, but nevertheless by a rather larger proportion than was shown in the number of employees. As a result, the per capita average earnings in Winnipeg were slightly lower, falling from $26.17 in the last week in October, to $26.11 in the last week in November. The average in Vancouver, at $27.86, was also lower, by two cents. In the other cities above enumerated, the per capita weekly earnings were higher in November.

Employment by Economic Areas

In Prince Edward Island, Nova Scotia, New Brunswick, Quebec, Ontario and Alberta, the trend of employment at December 1 was upward, the largest of the gains being in Quebec. In Manitoba, Saskatchewan and British Columbia, however, there was a seasonal contraction, that in British Columbia being most pronounced. Industrial activity in the various provinces generally was set at a higher level than in December of any other year for which information is available.

Maritime Provinces.—In this area, improvement was indicated in textile and iron and steel manufacturing, and in logging, mining, transportation and trade. The seasonal increases in transportation and logging were greatest. On the other hand, construction was quieter, and there was a minor decline in services. Returns were furnished by 924 firms in the Maritime Provinces employing 140,767 workers, as against 134,256 at Novermber 1. This advance of 6.511 persons was contra-seasonal in character, the movement having been downward in sixteen of the twenty preceding Decembers for which data are available. The index at the latest date, standing at 188·1, was the highest figure in the record.

At December 1, 1940, the 874 reporting establishments had 99,157 employees, as compared with 99,554 in the preceding month.

Quebec.—Employment in Quebec showed further substantial improvement, continuing the uninterruptedly favourable movement indicated since March; the latest gain was contrary to the usual seasonal movement at December 1. Statements were received from 3,198 employers of 524,467 persons, or 7,547 more than at the first of November. The index rose from 177·1 in the preceding month, to a new maximum of 179·8 at December 1, 1941, when it was some 30 per cent higher than at the same date in 1940.

Manufacturing showed moderate, contra-seasonal improvement as compared with November 1, 1941. Large gains were reported in iron and steel plants and there was improvement on a smaller scale in the non-ferrous metal, chemical and rubber division. Pulp and paper, lumber, textile, food and a few other classes were slacker, the losses in some cases being seasonal. Transportation and services also released employees, but the reductions were not pronounced. On the other hand, logging, construction and maintenance and trade afforded more employment; the increase in logging was greatest. It was, however, on a smaller scale than that recorded at December 1 in 1940.

Statistics for the same date in 1940 had been tabulated from 3,125 firms in Quebec with a combined payroll of 429,149 persons; this was a contra-seasonal increase of 2,756 from their staffs in the preceding month.

Ontario.—Employment in Ontario showed a further moderate advance at December 1, 1941; the trend at that date in other years of the record has usually been downward. Improvement was noted, on the whole, in manufacturing, largely in chemical and iron and steel plants, although there were also gains in leather, non-ferrous metal and electrical apparatus factories. On the other hand, contractions were reported in lumber, food and pulp and paper. Among the non-manufacturing industries, logging and trade afforded increased employment. Mining, transportation and construction, however, showed seasonal curtailment, that in construction being considerable. The 5,532 employers making returns for December 1, 1941, had a staff of 705,857, compared with 702,193 at the beginning of November. The index, at 174·0, compared favourably with that of 142·7 at the same date in 1940. The 5,373 establishments whose statistics were then compiled had 570,326 persons on their paylists.

Prairie Provinces.—Seasonal declines were indicated in Manitoba and Saskatchewan, but there was moderate improvement in Alberta at the date under review, the 1,802 co-operating firms reported that they had released 770 workers, reducing their staffs to 183,389. This decrease was below the average for the beginning of December in the period, 1921-1940. Manufacturing, mining, logging and retail trade showed improvement, while there were seasonal losses in transportation and construction; the decline in the latter was considerable. Within the manufacturing division, increased activity was indicated in iron and steel, chemical and animal food factories; the gains in these were partly offset by seasonal curtailment in the lumber, textile and vegetable food divisions. Industrial activity generally at the beginning of December was at a higher level than at the same date in any other year for which data are available; the November 1 and December 1 index numbers of 136·1 and 135·5, respectively, were the highest indicated in any month of the record.

Data for December 1, 1940, were received from 1,771 establishments with 155,996 employees, compared with 157,214 at the first of November, 1940.

British Columbia.—Contractions were reported in British Columbia, in accordance with the movement almost invariably noted at the beginning of December. There were moderate gains in shipping and retail trade, and, within the manufacturing division, in iron and steel factories. However, the trend in manufacturing as a whole was downward, due to seasonal losses in the animal and vegetable food, lumber and non-ferrous metal groups. Logging and construction were also quieter. A rather smaller decrease had been noted at December 1, 1940, when the index was many points below the latest figure, which is higher than in any other December for which information is available. The 1,339 firms making returns for the date under review had 133,525 employees, as compared with 138,117 in their preceding statement. At December 1, 1940, 1,300 employers had reported a staff of 109,720 persons.

Table II gives index numbers by provinces and economic areas.

Employment by Cities

Lessened activity was indicated in Windsor and Winnipeg. In Ottawa, there was little general change in the situation, while the trend was upward in Quebec City, Montreal, Toronto, Hamilton and Vancouver, these gains ranged from 0·1 per cent in Ottawa, to 2·4 per cent in Toronto. Employment in each of these eight cities was decidedly more active than in any other December in the record.

Montreal.—There was a considerable increase in the employment afforded in Montreal by the 1,848 co-operating firms, whose staffs were enlarged by 2,422 persons to 242,327 at the beginning of December. Manufacturing on the whole reported improvement, mainly in iron and steel, but also in non-ferrous metals and a number of other classes. Textile plants, on the other hand, released employees. Construction and maintenance and trade afforded more employment, while services were quieter, and other non-manufacturing divisions showed little general change. Expansion had also been noted at the same date of last year, but the index of employment was then decidedly below that of 159·8 at the latest date, when it was at its high point for this record of twenty-one years.

The 1,804 establishments furnishing returns for December 1, 1940, had reported 197,680 men and women on their paylists.

Quebec.—Industrial activity in Quebec City showed a further upward movement, according to the 219 employers whose returns were received, and who had 26,985 employees at December 1. There was continued improvement in manufacturing, mainly in the chemical, iron and steel and textile groups; trade and construction were also busier. No general change had been noted at the beginning of December in 1940, when the index was much lower than the latest figure of 194·6; this was the highest to date. The previous maximum was that of 190·7 at November 1, 1941. Statements for December 1, 1940, had been received from 218 concerns with 20,753 persons on their payrolls.

Toronto.—Increases in personnel were recorded in Toronto by the 1,912 co-operating firms, who employed 220,245 workers, as compared with 215,150 at the beginning of November. Manufacturing showed noteworthy improvement, the greatest gains being in iron and steel and chemical plants. Among the non-manufacturing industries, construction and trade were also busier, while transportation released some employees. An increase had been registered at December 1, of the year before, but the index of employment then was many points lower than that of 171·6 at the latest date. For December 1, 1940, 1,843 establishments had made returns, showing that they employed 177,350 men and women compared with 175,858 at November 1.

Ottawa.—No general change in industrial activity was indicated in Ottawa, where manufacturing showed moderate curtailment; trade, however, was seasonally busier. Within the manufacturing division, there were losses in

lumber, pulp and paper and iron and steel plants. Two hundred and forty-three firms recorded a combined payroll of 21,675 workers, as against 21,655 in their last report. Employment was at a much higher level than at the beginning of December, 1940, when a decline had been indicated by 239 employers, with 17,655 persons on their paylists.

Hamilton.—A further gain was made in Hamilton. An aggregate force of 58,287 employees was reported by the 343 firms furnishing data, being an increase of 1,069 over their staffs at November 1. Manufacturing as a whole was more active, the improvement taking place largely in electrical apparatus and iron and steel plants. Construction released employees, while trade showed a seasonal gain. The index, at 178·6 was decidedly higher than at the same date a year ago, when greater expansion had been reported by the 333 co-operating establishments, whose payrolls had aggregated 45,072 men and women.

Windsor.—There was a further slight decline in Windsor, mainly in construction works, while other divisions showed little change on the whole. Statements were tabulated from 199 employers with 33,179 workers at the beginning of December, compared with 33,255 in the preceding month. A small gain had been recorded at December 1, 1940, when information had been received from 196 firms with 26,136 employees. The index then was many points lower than that of 244·1 at the date under review.

Winnipeg.—Following eight months of uninterrupted gains, employment in Winnipeg showed a small decline, according to data received from 561 establishments employing 55,418 persons, or 131 fewer than at November 1. Improvement was recorded in trade, but construction and services were not so active, while there was little general change in manufacturing. The general index, at 132·9, was nearly 23 points higher than at the same date of last year, when an increase had been reported by the 540 employees furnishing data, whose working forces had aggregated 48,245.

Vancouver.—Employment in Vancouver continued to expand, according to 586 employers of 58,414 workers, as compared with 57,464 in the preceding month. Manufacturing showed a further advance, mainly in iron and steel products, and transportation and trade also afforded more employment. Construction, however, was quieter. A small gain, on the whole, had been indicated at the beginning of December, 1940, when the 571 co-operating firms had employed 44,145 men and women; the index then was 36 points lower than that of 165·7 at the latest date.

Employment by Industries

Manufacturing.—A slightly upward movement was reported at December 1 in manufacturing establishments, 7,055 of which employed 979,881 operatives, compared with 975,246 at November 1. Reflecting this moderate gain, the index (1926=100) rose from its previous maximum of 187·6 at November 1 to 188·4 at the date under review. As compared with the December 1, 1940, index of 144·7, there was an increase of over 30 per cent, representing employment for some 227,400 additional workers over the twelve months.

As already stated, an advance in manufacturing at December 1 is contra-seasonal, the trend having been downward in sixteen of the twenty preceding Decembers for which statistics are available. After correction for seasonal movement, the index therefore continued its upward movement (the twenty-third in succession), rising from 185·9 at November 1 to 190·6 at the beginning of December. Like the crude index, the seasonally-adjusted figure was then at its maximum in the period since 1920.

Curtailment, largely seasonal in character, was indicated in the food, lumber, textile, pulp and paper, electric light and power and miscellaneous non-metallic mineral product industries. On the other hand, improvement was reported in the tobacco, chemical, electrical apparatus, non-ferrous metal and iron and steel divisions. The greatest expansion was in iron and steel factories, whose staffs were enlarged by over 12,400 persons, bringing them to the highest figure ever recorded.

The unadjusted indexes of factory employment (based on the 1926 average as 100), have been as follows at December 1 in recent years, 1941, 188·4; 1940, 144·7; 1939, 122·2; 1938, 100·1 and 1937, 116·3.

For December 1, 1940, 6,794 establishments had furnished statistics showing that they employed a force of 744,885 men and women, compared with 744,394 in the preceding month. The index, at 144·7, was then decidedly lower than that of 188·4 at December 1, 1941.

Logging.—There were continued advances in logging, according to 456 companies with 74,264 persons in their employ, or 9,107 more than in the preceding month. The increase was below the average at December 1 in the experience of the years since 1920, being also smaller than that noted at the same date in 1940. This probably resulted to a considerable extent from the difficulty experienced by some camps in obtaining the required labour. The index at the latest date was 250·3; this was considerably lower than that of 303·6 at December 1, 1940, when employment in the bush was exceptionally active. The largest

gains at the date under review were in Quebec, but there were also important increases in New Brunswick, Ontario and the Prairie Provinces.

Mining.—Coal-mining was seasonally brisker, and the mining of other non-metallic minerals also showed slight improvement. The extraction of metallic ores, however, afforded less employment, On the whole, there was a moderate decrease in employment in the mining group. This falling-off slightly exceeded the small reduction which has been the average change in mining at December 1 in the last twenty years. Returns for the date under review were compiled from 420 mine operators, whose forces included 86,283 workers, or 706 fewer than at November 1. A slight loss had also been registered at December 1 of a year ago, but the index was then nearly eleven points lower than that of 183·5 at the latest date.

Communications.—A small increase in personnel was noted in communications, in which 164 additional persons were reported. The co-operating companies and branches had 26,879 employees at the date under review. The latest index was several points higher than in the early winter of 1940, when there had been a moderate reduction in the group as a whole.

Transportation.—Transportation afforded more employment according to returns from 554 employers of 131,177 workers, compared with 129,594 in the preceding month. Local transportation and storage reported curtailment, but employment on steam railways and in shipping and stevedoring was more active. Curtailment had been indicated at the beginning of December, 1940, and the index then was nearly 12 points lower than that of 104·1 at the latest date. The general increase at December 1, 1941, was contra-seasonal, according to the experience of the years, 1921-1940.

Construction and Maintenance.—There were seasonal reductions in construction and maintenance, losses being shown in the building, railway and highway divisions. The general decline was below the average for December 1. The forces of the 1,440 contractors furnishing date aggregated 180,125 employees, as compared with 185,531 at November 1. Employment in this group as a whole was in much greater volume than at December 1, 1940, the contraction then reported having been much larger.

Services.—Employment in hotels and restaurants and in laundries and dry-cleaning plants was quieter. Returns were compiled from 614 establishments with 37,968 men and women on their payrolls, or 738 fewer than at the beginning of November. A falling-off on a smaller scale had been shown at December 1, 1940, but the index then was lower than at the beginning of December, 1941.

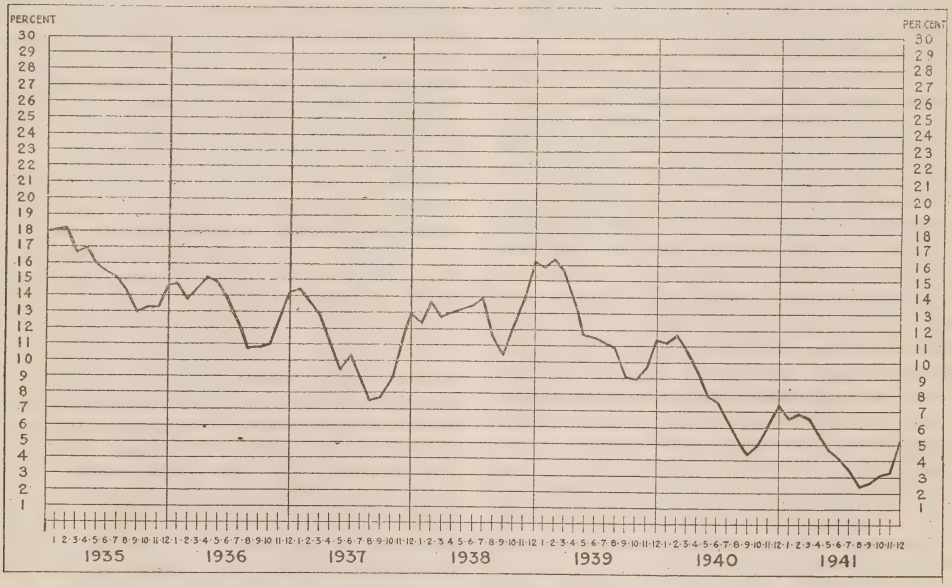
Trade.—Important additions to staffs were recorded in retail trade, while wholesale houses made seasonal reductions in their forces; the general gain in trade was smaller than that indicated at December 1, 1940, but employment then was not so active. The 2,195 co-operating wholesalers and retailers had 171,428 persons in their employ at December 1, 1941, or 3,721 more than in the preceding month.

Finance.—The 761 financial institutions and branches furnishing data for December 1 employed 62,947 men and women, as compared with 63,252 in their last report. The index stood at 121·9; in the preceding month it was 122·5, while at December 1, 1940, the figure had been 112·7. The addition of the returns for this group to those already given for the manufacturing, logging, mining, transportation, communications, construction, service and trade industries brings to 1,750,952 the number of persons in recorded employment in 13,556 establishments, and lowers the general index of 168·8 in the eight industries just enumerated, to 166·5. When the employees of financial organizations are added to the statistics for November 1, 1941, the general index was lowered from 167·6 to 165·4. The index at December 1, 1940, had stood at 139·1 without the figures for the finance group, and 137·8 when they were included.

Index numbers in industries are given in Table 111.

Unemployment in Trade Unions at the Close of December, 1941

Unemployment in the following report has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades, or who are involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.



Reports were tabulated at the end of December from 2,100 labour organizations having a total membership of 321,314 persons, of whom 16,660 or a percentage of 5·2, were unemployed, in contrast with percentages of 3·3 at the close of November and 7·4 at the

end of December, 1940. The December percentage of unemployment was the lowest in trade union records for any corresponding month since 1919.

The moderate employment contraction shown in December from the preceding month was due principally to marked decreases in work afforded lumber workers and to the moderate reductions in employment in manufacturing, transportation and in the building and construction trades. A fractional advance over November was reflected in Nova Scotia returns. On the other hand, there were nominal reductions in employment of union members in New Brunswick, Quebec, Manitoba and Saskatchewan. Slight recessions were indicated in reports received from Alberta and British Columbia unions. In Ontario there was a substantial contraction in work afforded, due principally to seasonal influences. In contrast with reports received at the close of December, 1940, advances of noteworthy proportions occurred in Quebec and appreciable increases were apparent in Saskatchewan and British Columbia. Advances of lesser degree were reflected in returns received from unions in Nova Scotia and Alberta; nominal increases, only, were noted in New Brunswick and Manitoba. On the other hand, in Ontario, there was a fractional recession.

A separate compilation is made each month of unemployment among trade union members in the largest city in each province, with the exception of Prince Edward Island. Improvement on a moderate scale over the November returns was observed in Halifax, while in Saint John and Winnipeg there were nominal contractions. A tendency toward slightly reduced employment was apparent in Montreal, Regina and Vancouver and in Edmonton there was an appreciable decrease in available work; in Toronto there was a pronounced contraction due chiefly to between season lay-offs. In comparison with the returns tabulated at the close of December, 1940, employment rose substantially among Montreal and Vancouver union members. Nominal improvement only, was apparent in Halifax, Saint John and Regina; in Winnipeg the percentage of unemployment remained unchanged. On the other hand, unions in Edmonton indicated a slight decrease and in Toronto there was a moderate contraction.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

The chart which accompanies this article illustrates the trend of unemployment by months from January, 1935, to date. The curve of unemployment in January, 1941, was at a slightly lower level than at the end of December, 1940, thus indicating a slight improvement in employment. In February, the curve showed a nominal incline from January, thus manifesting a fractional contraction in employment. During March, the level of the curve declined slightly from February and from that month to the close of August pursued a downward course. The

level reached by the curve at the end of August proved to be the lowest point attained during the year, thus reflecting in that period, the most favourable employment conditions. During September, October and November the curve continued to incline slightly each month, and in December there was a further moderate rise, thus manifesting during these months continued contractions in the volume of work available; recessions which were due mainly to seasonal influences.

Reports were tabulated from 663 unions in the manufacturing industries. These organizations had a total membership of 145,612 persons, of whom 6,844, or a percentage of 4·7 were without work, in contrast with percentages of 2·7 at the end of the previous month and 6·8 at the end of December, 1940. In comparison with November, bakers and confectioners and leather workers were slightly better engaged; among woodworkers and clay, glass and stone, and soft drink workers conditions were fractionally improved. Electric current employees, textile and carpet workers, tailors, butchers, meat and fish packers, rubber, jewellery, mine, mill and drillermen and gas workers, were reported as being fully employed; the percentage who were without work among metal polishers remained identical with that reported in the preceding month. On the other hand, nominal contractions were apparent in reports received from unions of papermakers, printing pressmen and hat, cap and glove workers. Slightly lower employment levels were observed among cigar and tobacco workers and general labourers. A contraction although on a small scale only, was in evidence likewise, among members in the iron and steel trades and marked recessions were indicated by garment and fur workers; these were due principally to the usual seasonal lull. A large majority of the trades participated in the upward movement over December, 1940. Employment for woodworkers and hat, cap and glove workers rose substantially; a much higher employment level was noted, likewise, for members in the iron and steel trades. On the other hand, unions of garment workers indicated an appreciable contraction in available work; among fur workers, especially when viewed from the percentage standpoint, the recessions were quite pronounced.

Reports were tabulated from 56 unions of coal miners, whose total membership was 22,463 persons. Of these, 234, or a percentage of 1·0 were without work, in contrast with percentages of 0·9 in the previous month and 2·9 at the close of December, 1940. In New Brunswick union members were again reported as having adequate work. On the other hand, nominal decreases were manifested in returns received from Nova Scotia, Alberta and British Columbia. In comparison with the situation at the end of December, 1940, conditions in Nova Scotia and British Columbia were moderately improved; in Alberta the increase was nominal, only. As in the previous comparison, New Brunswick members were reported as fully employed.

Returns were tabulated from 243 unions in the building and construction trades. These organizations had a combined membership of 36,044 persons, of whom 3,809 or a percentage of 10·6 were unemployed, in comparison with percentages of 8·6 at the end of November, and 15·6 at the close of December, 1940. In contrast with November, minor advances were in evidence among bridge and structural iron workers; among electrical workers and hod carriers and building labourers there were nominal increases, only. The percentage of unemployed members among unions of tile layers, lathers and roofers remained identical with that of the preceding month. On the contrary, a fractional decline was manifested by plumbers and steamfitters. Retarded activity although on a small scale,

TABLE I.—PERCENTAGE OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1931.....	8·5	9·2	19·3	17·2	15·7	15·6	19·4	17·6	16·8
Average 1932.....	9·6	14·4	26·4	23·7	20·0	15·8	22·6	21·6	22·0

was observed among granite and stonecutters and painters, decorators and paper-hangers; a moderate contraction was noted for bricklayers, masons and plasterers and carpenters and joiners. Viewed from the percentage standpoint, although involving comparatively few members, steam shovelmen indicated rather marked recessions. A large majority of the trades participated in the upward movement over December, 1940. Much higher employment levels were in evidence among carpenters and joiners and advances, to a lesser degree, were observed in returns received from unions of bricklayers, masons and plasterers. Hod carriers and building labourers and plumbers and steamfitters reported heightened activity, although on a small scale. From the percentage viewpoint, bridge and structural ironworkers were much better employed, but as their membership is comparatively small, this change did not involve many members. On the contrary, conditions among granite and stone-cutters showed a moderate contraction; a fractional decrease only was apparent among steam shovelmen.

Reports were tabulated from 846 organizations in the transportation industries, whose total membership was 75,496 persons. Of these 3,669, or a percentage of 4·9 were without work, in contrast with 2·6 per cent at the end of November and 5·4 per cent at the close of December, 1940. The percentage of unemployment among teamsters and chauffeurs remained unchanged from November; among street and electric railway employees there was a fractional decrease in work provided. Owing to the closing of navigation on the Great Lakes reports from unions of navigation workers reflected some contractions, while among steam railway employees there were moderately lower employment levels. In comparison with the situation at the close of December, 1940, teamsters and chauffeurs indicated a minor advance. A slightly higher employment level prevailed among steam railway men, while fractional declines were noted for navigation workers and street and electric railway employees.

Returns were received from 11 unions of retail shop clerks, whose aggregate membership was 4,121 persons. Of these, 4, or a percentage of 0·1 were unemployed. This was the same percentage, as that shown, both in the previous month and at the close of December, 1940.

Reports were tabulated from 94 unions of civic employees, comprising a total of 9,552 members, of whom 50, or a percentage of 0·5 were without work, in contrast with percentages of 0·1 at the end of November and 1·3 at the close of December, 1940.

In the miscellaneous group of trades, there were 144 reports tabulated in December. The total membership included in these returns was 11,807, of whom 268, or a percentage of 2·3 were without work, in contrast with percentages of 2·4 at the end of the previous month and 4·0 at the close of December, 1940. Contrasted with November, unclassified workers manifested an appreciable increase in employment; among theatre and stage employees there was a fractional advance only. On the other hand, nominal declines were in evidence among hotel and restaurant employees, barbers and stationary engineers and firemen. In comparison with conditions at the close of December, 1940, moderate improvement was reflected in reports received from unions of stationary engineers and firemen and theatre and stage employees. Slightly higher levels prevailed, likewise, for hotel and restaurant employees; among barbers there was a fractional advance only. Unclassified workers were the only unions in this comparison to manifest a contraction, and this was not pronounced.

Returns were received from 5 unions of fishermen, whose total membership was 1,981. Of these, 350, or a percentage of 17·7 were without work at the close of December, in contrast with percentages of 14·5 at the end of the preceding month and 22·9 at the close of December, 1940.

There were 4 returns received from unions of lumber workers and loggers. The combined membership of these organizations was 2,835 persons, of whom 858, or a percentage of 30·3, were unemployed, in contrast with percentages of 6·9 in November and 28·5 at the close of December, 1940.

Table 1 shows by provinces the percentage of members, who were on an average unemployed, each year from 1931 to 1941, inclusive, and also, the percentage of unemployment for December of each year from 1930 to 1939, inclusive, and for each month from December, 1940, to date. Table 11 summarizes the returns in the various groups of industries for the same months as table 1.

Building Permits Issued in Canada During December, 1941

The December report of building permits, compiled by the Dominion Bureau of Statistics, includes returns from 175 of the 204 municipalities in Canada which have systems for issuing such permits and of this number 137 reported detailed operations. The remaining 38 advised that no permits had been issued during the month of December while 29 municipalities had failed to report at the close of January 12.

The total value of permits reported as issued in the month of December is $7,097,628. Revised values for the month of November include returns from 201 municipalities and aggregate $11,244,334. Reports were received from 55 of the 58 original municipalities and show a value of $5,427,347 for December. The corresponding revised value for November includes 58 returns and is $8,575,989, while the December, 1940 value was $6,067,993.

The total value of permits issued by all municipalities during the twelve elapsed months of the current year is $133,986,074. The value of the 58 municipalities for the same period is $99,897,086, while their corresponding value in 1940 was $80,274,350.

During the month of December new construction of all types amounted to 72·9 per cent of the total value, while the percentage of new residential construction was 34·6.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

OCTOBER-NOVEMBER RECORD

THE British *Ministry of Labour Gazette* for December, 1941, summarizes the October-November employment situation in Great Britain as follows:—

The number of men and boys registered at Employment Exchanges in Great Britain as wholly unemployed at November 17 was 95,335, a decrease of 1,699 as compared with October 13. Of this total, 27,821 had been classified by interviewing panels as unsuitable for ordinary industrial employment.

Those registered as on short time or otherwise temporarily suspended from work on the understanding that they were shortly to return to their former employment numbered 5,914, a decrease of 706 as compared with October 13. Those registered as unemployed casual workers (being persons who normally seek their livelihood by jobs of short duration) numbered 10,784, an increase of 1,364 as compared with October 13.

The corresponding figures for women and girls on the register at November 17 were 76,649 wholly unemployed, 10,098 temporarily stopped, and 322 unemployed casual workers. Of those wholly unemployed 3,076 had been classified by interviewing panels as unsuitable for normal full-time employment, and 3,311 had been classified as unable for good cause to transfer to another area. As compared with October 13, the numbers wholly unemployed showed a decrease of 12,167, those temporarily stopped a decrease of 3,734, and unemployed casual workers a decrease of 155.

The number of applicants for unemployment benefit or allowances on the registers at November 17 was 138,229, as compared with 147,541 at October 13, and 669,428 at November 11, 1940.

United States

Total civil non-agricultural employment rose to a new all-time peak of 40,940,000 in December, according to a report issued by the United States Secretary of Labor, Miss Frances Perkins. This represented a gain of 2,800,000 non-agricultural workers over the preceding year and 5,000,000 since December, 1929. The increase does not include the growth of the armed forces. The gain in non-agricultural employment from mid-November to mid-December resulted largely from the seasonal rise in trade.

The gain of 357,000 in trade employment over the month represented about the usual seasonal change from the high November level and reflected the hiring of temporary personnel to handle the holiday trade. Government employment rose by 73,000 in large part, due to temporary expansion of post-office personnel.

Manufacturing employment in December showed a decline of less than the usual seasonal proportions for the third successive month. The decline of 53,000 factory workers was caused largely by a sharp reduction in employment in automobile plants as passenger car production was cut during the latter part of December, and by a greater than seasonal drop in the canning and preserving industry. These losses were partly offset by gains in war industries and by a sharp rise in employment in slaughtering and meat packing. Establishments in many industries continued to report employment reductions because of inability to secure raw materials. Employment in mining declined by 4,000 from November to December, while the transportation and public utilities group showed a decrease of 35,000. Non-federal construction declined by 77,000 while Federal construction declined 64,000, resulting in a decrease of 141,000 for total construction. Finance and service employment declined 6,000.

The greater part of the gain of 2,800,000 in non-agricultural employment over the year occurred in manufacturing with an increase of 1,600,000 workers. Federal, State, and local government services increased 423,000; trade increased 256,000; transportation and public utilities, 248,000; finance and service, 124,000; construction, 100,000; and mining, 52,000.

The employment index for all manufacturing industries combined in December stood at 134·0 per cent of the 1923-25 average, and the payroll index at 169·8. Compared with December, 1940, factory employment increased 15·3 per cent and payrolls 38·7 per cent. The considerably greater increase in payrolls reflects expansion in working hours, overtime payments, and wage-rate increases. The rise in employment in slaughtering and meat packing from mid-November to mid-December amounted to 10,700, and carried employment in that industry to a new all-time peak. Other industries not directly related to the defence effort showing substantial increases over the month were leather boots and shoes (7,000), newspapers and periodicals (4,800), and book and job printing (2,900). Substantial decreases over the month occurred in automobiles (55,600), canning and preserving (32,900), beet sugar (3,600), and furniture

(3,100). Industries directly connected with defence, like airplanes, engines and shipbuilding of course continued to increase in employment.

The decline in mining employment between November and December occurred in anthracite coal mines and in quarrying and non-metallic mines. Virtually no change took place in bituminous coal, metal mines, and crude petroleum. The largest employment gains over the year were shown in quarrying and non-metallic mining (12 per cent) and in metal mines (10 per cent). Bituminous coal mines showed an increase of 5·9 per cent, while employment in anthracite mines fell 3·5 per cent over the year. Wholesale trade employment showed only a slightly greater-than-seasonal increase from November to December but was 4·4 per cent higher than December, 1940.

In retail trade, employment increased by about the usual seasonal amount (9·5 per cent) from November to December to reach the highest December level on record, exceeding the 1929 yearly average by 12·8 per cent. The largest gains over the month occurred in stores selling general merchandise and apparel, with moderate gains in furniture and food stores. The only types of retail establishments reporting decreased employment over the month were automotive (-0·3 per cent), and lumber and building materials (-1·8 per cent). Over the year interval all divisions of retail trade showed increases except furniture (-1·5 per cent) and automobile dealers (-2·5 per cent).

Decreased activity in residential and non-residential building construction was largely responsible for the decline in employment of 80,600 during the month ending December 15 on construction projects financed from regular Federal appropriations. Partially offsetting the losses on building construction were increases in the construction of airports and of naval and other vessels. Construction projects of the U.S.H.A., P.W.A., and R.F.C. employed 14,400 fewer persons in December, and road projects financed wholly by State and local funds dropped 30,000 employees during the month.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wage Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by Orders in Council of April 9, 1924, and of December 31, 1934. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On May 30, 1941, an Order in Council, P.C. 3884, was passed rescinding the schedule of minimum wage rates set out in the "B" conditions which had been in effect since December, 1934, and establishing increased rates of 35 cents and 25 cents respectively for male and female workers over eighteen years of age. It also made provision for a system of permits to employ beginners and handicapped workers at sub-standard rates, and provided penalties for non-compliance with the prescribed rates.

On October 4, 1941, P.C. 3884 was revoked by the passage of Order in Council P.C. 7679 and minimum rates were prescribed for all employees of Government contractors and sub-contractors. (The full text of this Order in Council appears at pages 1226 and 1227 of the Labour Gazette for October.)

The four major changes made by the new Order are: (1) the application of the minimum rates to *all* employees of contractors and sub-contractors throughout an establishment of which any part may be engaged on Government orders, and not only as previously to those employees actually engaged on Government work; (2) the addition of a new minimum wage rate of 20 cents an hour for employees under 18 years of age whose rates previously had been set by provincial regulation; (3) the authorization of special beginners' rates; and (4) the exemption from the necessity of obtaining beginners' permits unless the number of beginners exceeds a quota of 20 per cent of the total number of employees in any establishment.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight-Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. This

clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontrator, or any other persons doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages. The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide or except in cases of emergency as may be approved by the Minister."

This Act, like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance, or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, and certain other works being carried out under agreements with the provinces which are also assisted by grant of federal funds, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours, on contracts for governmental supplies and equipment the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and alsso of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has field a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair the Minister of Labour for this purpose, and empower the Minister of Labour to deal with any dispute which may arise.

War Contracts

All contracts awarded by the Department of Munitions and Supply are subject to labour conditions for the protection of the work-people concerned.

In the case of building and construction contracts, the labour conditions include fair wages schedules based on the rates current in the particular district where the work is being performed, and provide that the working hours shall not exceed eight per day and forty-four per week.

In the case of contracts for the manufacture and overhaul of aircraft, the labour conditions include one scale of minimum wage rates which has been approved for all work of this nature undertaken in Eastern Canada (Ontario, Quebec and the Maritime Provinces), and a separate and higher scale for all such contracts undertaken in Western Canada (comprising the area from Fort William to the Pacific Coast). These contracts are subject also to a working week of not more than forty-eight hours, provision being made that any necessary and authorized overtime work shall be paid for at a rate of not less than one and one-half times the regular rate.

Contracts for shipbuilding and repair are all subject to labour conditions, including fair wages schedules based on the rates current in the district where the work is being executed. Provision is made for the observance of working hours of not more than forty-eight per week and for a wage rate of not less than one and one-half times the regular rate for any overtime that is necessary and authorized by the Dominion Government inspector in the plant.

Contracts for the manufacture of equipment and supplies for the defence forces are subject to the "B" labour conditions of the Fair Wages Order in Council referred to in the introduction to this article.

As complete lists of the contracts awarded by the Department of Munitions and Supply are being issued weekly through the office of the Director of Public Information, and are being published in the press, this information will not be duplicated here.

Schedules Prepared and Contracts Awarded During January

During the month of January, the Department of Labour prepared, on request, 125 fair wages schedules for inclusion in building and construction contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

Particulars of the contracts which have been entered into recently by the various Government departments (other than the Department of Munitions and Supply referred to above) appear hereunder:—

Group "A" Contracts

(1) *Works of Construction, Remodelling, Repair or Demolition*

Note: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work, and also specify that the rates of wages set out therein are '*minimum* rates only' and that 'nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instances where such higher rates are fixed by provincial legislation'."

Department of Public Works

Construction of an extension to the Lancaster Hospital, Saint John, N.B. Name of contractors, R. A. Corbett & Co., Ltd., Saint John, N.B. Date of contract, January 31, 1942. Amount of contract, $121,680 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers	0 45
Carpenters and joiners	0 70
Cement finishers	0 70
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 65
Elevator constructors	0 90
Elevator constructors' helpers	0 63
Engineers, operating steam:	
Single or double drums	0 65
Three or more drums	0 75
Engineers on steel erection	0 75
Enginemen, stationary	0 50
Hoist operators (gasoline or electric)	0 50
Labourers	0 40
Lathers—metal	0 60
Linoleum layers	0 55
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Ornamental iron workers	0 60
Painters and glaziers	0 60
Plasterers	0 90
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 80
Roofers, felt and gravel: patent: comp	0 45
Roofers, sheet metal	0 65
Sheet metal workers	0 65

	Per hour
Stonecutters	0 70
Stonemasons	0 90
Stonemasons' helpers	0 45
Structural steel workers	0 75
Terrazzo layers	0 70
Terrazzo layers' finishers and helpers	0 55
Tile setters, asphalt	0 70
Tile setters, helpers	0 45
Watchman	0 35
Waxers and polishers	0 45
Welders and burners on steel erection	0 75

Construction of a protection wall at Capilano River Estuary, B.C. Name of contractors, Horie-Latimer Construction Co., Ltd., Vancouver, B.C. Date of contract, January 15, 1942. Amount of contract, $4,955. A fair wages schedule was included in the contract as follows:—

	Per hour
Piledriver foremen	$ 1 32½
Piledriver engineers	1 20
Piledriver men (boommen, bridgemen and derrickmen)	1 07½
Piledriver firemen	0 76½
Labourers	0 45

Department of Transport

Road improvements at Edenvale, Ontario. Name of contractor, Law Construction Ltd., Toronto, Ont. Date of contract, January 9, 1942. Amount of contract, $6,550. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Labourers	0 35
Motor truck drivers	0 40
Motor truck driver and truck	1 40
Road grader operators:	
Horsedrawn	0 40
Including team	0 70
Gasoline	0 45
Road roller operators (steam or gasoline)	0 65
Tractor operators (small)	0 45
Tractor operators (LeTourneau, etc.)	0 55
Watchmen	0 30

Road improvements at Dewinton, Alta. Name of contractor, Mr. F. R. Gibbs, Medicine Hat, Alta. Date of contract, January 20, 1942. Amount of contract, $12,968.25. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 70
Blacksmiths' helpers	0 50
Drivers	0 45
Driver, team and wagon	0 75
Labourers	0 45
Motor truck drivers	0 50
Motor truck driver and truck	1 50
Road grader operators:	
Horsedrawn	0 50
Including team	0 80
Gasoline	0 60
Tractor operators (small)	0 67½
Tractor operators (LeTourneau, etc.)	0 70
Watchmen	0 40

Additional development at Stanley, N.S. Name of contractors, Municipal Spraying and Contracting Co., Ltd., Halifax, N.S. Date of contract, January 28, 1942. Amount of contract, $16,845.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers	$0 50
Asphalt tampers, smoothers and spreaders	0 40
Blacksmiths	0 55
Blacksmiths' helpers	0 40
Carpenters and joiners	0 55
Cement finishers	0 50
Cement and concrete mixer operators:	
Steam	0 60
Gasoline or electric	0 45
Compressor operators (gasoline or electric)	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Drill runners	0 45
Electricians (inside wiremen)	0 60
Enginemen, stationary	0 45
Labourers	0 35
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Pipefitters (surface—temp work)	0 50
Pipelayers, caulkers and solderers	0 45
Plumbers and steamfitters	0 60
Powdermen	0 45
Pumpmen	0 45
Riggers (general)	0 50
Road grader operators:	
Horsedrawn	0 40
Including team	0 60
Gasoline	0 45
Road roller operators (steam or gasoline)	0 60
Rodmen, reinforced steel	0 45
Steam shovel engineers	0 90
Steam shovel cranemen	0 70
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Shovel operators (gasoline)	0 90
Tractor operators (small)	0 45
Tractor operators (LeTourneau, etc.)	0 55
Watchmen	0 30

Erection of buildings at Earlton Junction, Ont. Name of contractors, Hill-Clark-Francis Ltd., New Liskeard, Ont. Date of contract, January 22, 1942. Amount of contract, $6,765. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 80
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 40
Carpenters and joiners	0 60

	Per hour
Cement finishers	0 55
Cement and concrete mixer operators—steam	0 65
—Gas or electric	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Electricians (inside wiremen)	0 65
Labourers	0 35
Lathers—wood	0 55
Motor truck drivers	0 40
Motor truck driver and truck	1 40
Painters and glaziers	0 55
Plasterers	0 75
Plasterers' helpers (mixing and tempering material)	0 40
Plumbers and steamfitters	0 65
Sheet metal workers	0 65
Shinglers (wood, asbestos)	0 60
Watchmen	0 30
Waxers and polishers (floor)	0 40

GROUP "B" CONTRACTS

Manufacture and Supply of Equipment, Supplies, Interior Fittings, etc.

NOTE.—Each of the contracts noted under this heading contains the "B" Labour Conditions referred to in the introduction of this article.

Royal Canadian Mounted Police

Nature of Contract	Contractor
Arm bands	S. S. Holden, Ltd. Ottawa, Ont.
Gymnasium Jerseys	Penman's Ltd. Montreal, P.Q.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Agreements made obligatory under the Collective Agreement Act in Quebec and schedules of wages and hours of labour made binding under Industrial Standards Acts, etc., in certain provinces are summarized in separate articles following this.

Manufacturing: Metal Products

TORONTO, ONTARIO.—CANADIAN GENERAL ELECTRIC COMPANY LIMITED AND THE GENERAL COMMITTEE REPRESENTING THE EMPLOYEES OF THE DAVENPORT WORKS OF THE COMPANY, OTHER THAN SUPERVISORS, FOREMEN, OFFICE AND CLERICAL STAFF.

Agreement reached following report of board under the Industrial Disputes Investigation Act (LABOUR GAZETTE, November, 1941, page 1344) and further negotiations. Agreement to be in effect from December 20, 1941, to December 31, 1942, and thereafter from year to year, subject to notice.

This agreement is the same as the draft agreement published in the LABOUR GAZETTE, November, 1941, page 1346, with the exception of Article VIII (2) which in the signed agreement reads:

"(2) The rules for upgrading, increase and decrease of forces shall only apply to an employee after he has had six months of continuous service."

Transportation and Public Utilities: Local and Highway Transportation

OTTAWA, TORONTO, HAMILTON AND OTHER CENTRES IN ONTARIO.—CERTAIN AUTOMOTIVE TRANSPORT OPERATORS ENGAGED IN LOCAL AND LONG DISTANCE TRUCKING AND THE CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES AND OTHER TRANSPORT WORKERS (TRUCK DRIVERS, WAREHOUSEMEN, MECHANICS, CHECKERS AND LOADERS).

Agreements similar to those summarized in the LABOUR GAZETTE, May, 1938, page 574, were made later in 1938, and in one case 1939, with other employers with certain differences as to conditions of hours and wage rates.

Amendments were later made to some agreements: for two firms in Toronto, closed shop and union check-off and provisions for adjustment in wage rates became effective in August, 1940 and October, 1940, respectively (In the first of these cases the wage rates were so revised in October, 1940); for a firm at Kitchener the agreement was amended August 27, 1941, to provide for closed shop and union check-off.

WINDSOR, ONTARIO.—A TAXICAB COMPANY AND THE CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES AND OTHER TRANSPORT WORKERS (TAXICAB DRIVERS).

Agreement in effect from August 15, 1941, to August 14, 1942, and thereafter from year to year, subject to notice. All employees to be union members and the union check-off is provided for.

Hours: 10 per day, with one day off on alternate weeks and one half day the other weeks. Wages: 33⅓ per cent commission on all fares collected, and in addition, 15 per cent of the earnings of each employee providing the employee has complied with all the qualifying rules mutually agreed on. Seniority rights to be observed. One week's vacation with pay. Provision is made for the settlement of disputes.

WINNIPEG, MANITOBA.—NATIONAL CARTAGE AND STORAGE LIMITED AND THEIR EMPLOYEES, MEMBERS OF CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES AND OTHER TRANSPORT WORKERS, DIVISION 253.

This agreement amends the previous one which was summarized in the LABOUR GAZETTE, April, 1939, page 433, such amendment being reached after the report of the board under the Industrial Disputes Investigation Act (LABOUR GAZETTE, September, 1941, page 1043). This amendment is effective from January 1, 1942, and provides for an increase in wages from 45 to 50 cents per hour for chauffeurs and from 45 to 47½ cents for helpers; the weekly wage rate for stockkeepers is $24.69. A cost-of-living bonus is provided for, effective from July 1, 1941.

WINNIPEG, MANITOBA.—MANITOBA CARTAGE AND WAREHOUSING COMPANY LTD. AND EMPLOYEES.

The agreement which came into effect November 1, 1938, is similar to the one for the National Cartage and Storage Company noted above except that hours are 8½ per day, 5½ on Saturdays, and overtime is payable at straight time. The wage rate for chauffeurs is the same (45 cents per hour) but this agreement also includes teamsters and warehousemen at $21.20 per week. This agreement was amended November 24, 1941, to provide for a cost-of living bonus following the report of the board under the Industrial Disputes Investigation Act (LABOUR GAZETTE, September, 1941, page 1048).

VANCOUVER, B.C.—CERTAIN TRANSFER AND STORAGE FIRMS AND THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, STABLEMEN AND HELPERS, LOCAL 31 (TRUCK DRIVERS).

The agreement which came into effect June 15, 1940, and was summarized in the LABOUR GAZETTE, June, 1941, page 700 and June, 1937, page 689, was amended June 15, 1941, to provide for increases in wage rates of 5 cents per hour and for a cost-of-living bonus.

VANCOUVER, B.C.—CERTAIN TRANSFER FIRMS AND CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES AND OTHER TRANSPORT WORKERS (TRUCK DRIVERS).

Agreements in effect from January 2, 1942, to January 2, 1943, and thereafter from year to year, subject to notice.

All employees to be union members. Hours: 9 per day, 54 per week; overtime at time and one half. A cost-of-living bonus is provided for. Provision is made for seniority rights and for settlement of disputes.

VICTORIA, B.C.—TWO TRANSFER FIRMS AND THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, WAREHOUSEMEN AND HELPERS, LOCAL 31 (TRUCK DRIVERS).

Agreement in effect from August 1, 1941, to June 15, 1943, and thereafter from year to year, subject to notice.

All employees to be union members, and union check-off is provided for. Hours: 9 per day. Overtime; time and one half after 10 hours' work, or 50 hours in a week and for all work on Sundays and holidays. Minimum wage rates: operators of trucks 2,000 pounds and under 50 cents per hour, of trucks over 2,000 pounds 55 cents, swampers 50 cents, furniture drivers 60 cents, furniture swampers 55 cents; for men employed by the month, $110. A cost-of-living bonus is also provided for when the union can show three employers have signed the agreement. Seniority rights are recognized. One week's vacation with pay. Arrangements are made for the settlement of disputes.

VICTORIA, B.C.—ONE TRANSFER FIRM AND THE TRUCK DRIVERS AND HELPERS' UNION, LOCAL 101.

Agreement in effect from August 15, 1941 to August 15, 1943.

All employees to be union members and union check-off is provided for. Hours: 9 per day, 54 per week. Overtime: time and one half. Wages: light and medium cars $100 per month, heavy trucks and one type of moving van $110, large moving vans $120; steady swampers 45 cents per hour. A cost-of-living bonus is provided for. One week's vacation with pay. Senority rights are recognized. Provision is made for the settlement of disputes.

Trade

VANCOUVER, B.C.—CERTAIN DAIRIES AND THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, WAREHOUSEMEN AND HELPERS, LOCAL 464 (MILK DRIVERS AND DAIRY EMPLOYEES).

Agreement in effect January 1, 1941, to December 31, 1941, and thereafter from year to year, subject to notice.

All employees to be union members and the union check-off is provided for. Hours: 8 per day for other than salesmen and checkers. One day off in seven or one week off in seven

weeks. Time and one half for overtime. Wage rates per 28 day period: salesmen (retail) $100 plus commission; salesmen (wholesale) $110 to $120 plus commission on sales over a certain amount; truck drivers $117.50, relief men $130, trouble shooters $105, other employees, $102.50 and $107.50. Seniority rules are specified. One week's vacation with pay. Provision is made for the settlement of disputes.

Transportation and Public Utilities: Electricity and Gas

Winnipeg, Manitoba.—Winnipeg Electric Company and Gas Works Employees.

Agreement in effect May 1, 1941, to April 30, 1942, and thereafter from year to year, subject to notice. Previous agreements were summarized in the Labour Gazette, December, 1938, page 1418, and March, 1937, page 361. This agreement is similar, with these exceptions: weekly hours for yard men, labourers and other like employees on a 9-hour day are 50 per week, except pipefitter and helper and coal unloading men whose hours are still 54 per week. Wage rates, retroactive to April 1, 1941, are increased from 2½ cents per hour for lowest paid employees to 6½ cents for highest paid. Some hourly wage rates are: shift engineers 68 cents, producer operators 62½ cents, other operators 52 to 62½ cents, repairmen 63½ cents, helpers 47½ cents, yard men and labourers 45 cents, boilermen 53½ cents, coal unloaders 51 cents.

COLLECTIVE AGREEMENT ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Agreement Act was assented to June 22, 1940, and was summarized in the Labour Gazette, August, 1940, page 812. It replaces the Collective Labour Agreements Act, 1938. Agreements and regulations under the "Collective Labour Agreements Act," the "Act respecting Workmen's Wages" and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Agreement Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act made obligatory on all employers and employees in the trade, industry, commerce or occupation throughout the province or within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date the Order in Council is adopted. The Order in Council may be amended or revoked by a further Order in Council on the recommendation of the Minister of Labour after consulting the parties to the agreement and after the required notice has been published in the *Quebec Official Gazette*. A parity committee (formerly called a joint committee) must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and noted in the *Quebec Official Gazette*, the committee is constituted a corporation. A parity committee may require certificates of competency from workers within the scope of the agreement and such by-laws must be approved by Order in Council and published in the *Quebec Official Gazette*. Proceedings under the Collective Labour Agreements Extension Act were summarized in the Labour Gazette from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues from May, 1938, to July, 1940. Proceedings under the Collective Agreement Act are noted in the issues beginning August, 1940.

Recent proceedings under the Act include the amendment of three agreements, as noted below. A request for the extension of a new agreement for the paper box (corrugated paper) manufacturing industry throughout the province was published in the *Quebec Official Gazette*, January 17. Requests for the amendment of the following agreements were published in the *Quebec Official Gazette*: for the shoe manufacturing industry throughout the province in the issue of January 10; for bakers at Montreal, in the issue of January 17; for tavern employees at Quebec, in the issue of

January 24; for retail stores at Quebec, hardware stores at Quebec, garages and service stations at Montreal, clerks and accountants at Jonquière and Kenogami, building trades at Three Rivers, in the issue of January 31. In addition, Orders in Council were published in the *Quebec Official Gazette* during January, amending the constitution and by-laws of one parity committee and others approving the levying of assessments by certain parity committees.

Manufacturing: Textiles and Clothing

WOMEN'S AND CHILDREN'S MILLINERY MANUFACTURING INDUSTRY, MONTREAL.

An Order in Council, dated January 3, and published in the *Quebec Official Gazette*, January 10, corrects the previous Order in Council (LABOUR GAZETTE, June, 1941, page 704) for this industry (LABOUR GAZETTE, August, 1935, page 732; March, 1936, page 275; June, 1937, page 695; June, 1938, page 691; April, 1940, page 390; June, 1941, page 704). Instead of the last sentence shown in the summary to the last amendment, the following is substituted: "All other employees of the industry, mentioned in the above classifications, shall also receive, in addition to the actual wages, an increase of 5 per cent thereof."

Transportation and Public Utilities: Water Transportation

LONGSHOREMEN (INLAND NAVIGATION), MONTREAL.

An Order in Council, dated January 3, and published in the *Quebec Official Gazette*, January 10, amends the previous Orders in Council (LABOUR GAZETTE, June, 1939, page 629; February, 1940, page 173; April, page 391; June, page 610; February, 1941, page 184, April, page 473, June, page 705; July, page 854; August, page 1013; September, page 1162; November, page 1425) by extending the term of the agreement to March 1, 1942.

Service: Business and Personal

BARBERS, SHERBROOKE.

An Order in Council, dated January 9, and published in the *Quebec Official Gazette*, January 17, amends the previous Order in Council for this trade (LABOUR GAZETTE, October, 1941, page 1315) by a change in the arrangement of hours in one locality.

INDUSTRIAL STANDARDS ACT

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario

IN six provinces—Ontario, Alberta, Nova Scotia, Saskatchewan, New Brunswick and Manitoba—legislation provides that, following a petition from representatives of employers or employees in any (or specified) industries, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. References to the summaries of these Acts and of amendments to them are given in the LABOUR GAZETTE, October, 1940, page 1077. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Ontario

Manufacturing: Miscellaneous Wood Products

HARD FURNITURE INDUSTRY, PROVINCE OF ONTARIO

An Order in Council, dated December 1, and published in *The Ontario Gazette*, December 6, amends the previous Orders in Council for this industry (LABOUR GAZETTE, December, 1940, page 1313, March, 1940, page 285, November, 1941, page 1427). Effective from December 16, 1941, the cost of living bonus for class B employees is increased to 14 per cent of the minimum rates for this class; the cost of living bonus for class A employees is increased to 7 cents per hour over the minimum rates for this class.

PRICES, RETAIL AND WHOLESALE, IN CANADA, JANUARY, 1942

Cost of Living, Prices of Staple Articles and Index Numbers

THE official index number of the cost of living in Canada, calculated by the Dominion Bureau of Statistics on the base period 1935 to 1939 as 100 declined from 115·8 at the beginning of December, 1941, to 115·4 at the beginning of January, 1942, due to a decline in the food group, which more than offset minor advances in three groups, namely, fuel and lighting, housefurnishings and services, and in the miscellaneous group. The decline in the food group, 1·1 per cent, was due to lower prices for eggs, certain fresh fruits, dairy products, and groceries. Increases were recorded in the prices of potatoes, onions and certain meats. Comparative figures for the total index at certain dates are 115·4 for January, 1942; 115·8 for December, 1941; 116·3 for November; 115·5 for October; 108·3 for January, 1941; 103·8 for January, 1940, and 100·8 for August, 1939.

After adjustment to the base 100·0 for August, 1939, as required by Order in Council P.C. 8253, the index was 114·5 at January 2, 1942, as compared with 114·6 at October 1, 1941, thus showing a decline of one-tenth of one point between October and January and a wartime increase in the cost of living of 14·5 points down to January 2.

On page 128 of this issue reference is made to a statement by the National War Labour Board as to any adjustment in the cost of living bonus to be made for the three-month period February 15 to May 15.

Foods advanced 23·2 per cent between August, 1939, and January, 1942; clothing 19·8 per cent; home furnishings and services 16·9 per cent; fuel and light 14·0 per cent; rent 7·1 per cent; and miscellaneous 5·4 per cent.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941, the Order having been amended to change the effective date from November 17 to December 1. The text of P.C. 8527 which appeared in the Labour Gazette for November on page 1371 provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, except under the regulations of the Wartime Prices and Trade Board. In the Labour Gazette for December on pages 1498 to 1501 under the title "Stabilization of Prices in Canada" there appears an outline of the measures taken by the Board. Prices of fresh fruits and vegetables, furs and certain kinds of fresh, cured and canned fish were exempted by the Board from the provisions of the maximum prices regulations on January 10. On January 20 the Board re-established the price ceiling on onions, the basic period being the week ended January 10, 1942. The order does not apply to sales by farmers and fishermen to dealers or processors of live stock, poultry, eggs, milk, cream, dairy butter, farm made cheese, honey, maple syrup and fish but does apply to sales by such dealers and processors and to sales by farmers and fishermen to consumers. On December 19, 1941, the Board announced that an increase in the price of milk by one cent per quart might be authorized in certain areas and under specified conditions. Authorization for similarly limited increases in retail prices of some kinds of tea in certain provinces, by amounts up to five cents per pound, was announced on January 16.

The index number of the cost of living was constructed on the basis of a survey of expenditure of 1,439 families of wage-earners and salaried workers with earnings between $450 and $2,500 in 1938. The average expenditure was $1,453.90 divided as follows: food (31·3 per cent), $443; shelter (19·1 per cent), $269.50; fuel and light (6·4 per cent), $90.50; clothing (11·7 per cent), $165.80; home furnishings (8·9 per cent), $125.70; miscellaneous (22·6 per cent), $319.40.

The last named group includes health (4·3 per cent), $60.80; personal care (1·7 per cent), $23.90; transportation (5·6 per cent), $79.30; recreation (5·8 per cent), $82.10; life insurance (5·2 per cent), $73.30. Other expenditure not directly represented in the index was $40.

The Dominion Bureau of Statistics has issued an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. The figures at certain dates since August, 1939, are: August, 1939, 100·0; September, 100·0; October, 103·8; November, 104·3; December, 104·3; January, 1940, 104·2; February, 104·3; March, 105·5; April, 105·5; May, 105·3; June, 105·3; July, 106·4; August, 106·8; September, 107·9; October, 108·4; November, 109·7; December, 110·0; January, 1941, 110·4; February, 110·1; March, 110·2; April, 110·7; May, 110·9; June, 112·7; July, 114·9; August, 117·7; September, 119·4; October, 120·1; November, 121·4; December, 120·6; January, 1942, 119·9.

DOMINION BUREAU OF STATISTICS INDEX NUMBERS OF THE COST OF LIVING IN CANADA

PRICES AS AT THE BEGINNING OF EACH MONTH

—	Adjusted to base 1000 for August, 1939	On base of average prices in 1935–1939 as 100*

*** For the period 1913 to 1934 the former series on the base 1926=100 was converted to the base 1935-1939=100.**

The cost of living bonus provided for by P.C. 8253 must be based on the index shown in the left-hand column. For each rise of one point in the index the amount of the bonus or its increase shall be:—(1) twenty-five cents per week for all adult male employees, and for all other employees employed at basic wage rates of twenty-five dollars or more per week, and (2) one per cent of their basic weekly wage rates for male employees under twenty-one years of age and female workers employed at basic wage rates of less than twenty-five dollars per week.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of January of seventy-six staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except the following are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers; milk, bread, shoulder of veal, leg roast of pork, unsliced bacon, dairy butter, evaporated apples, vinegar and coal oil. Information as to the prices of the foregoing with the exception of milk and bread is obtained by the correspondents of the LABOUR GAZETTE. The prices of milk, bread, fuel and the rates for rent are obtained by

the Bureau of Statistics and by the correspondents of the LABOUR GAZETTE.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

By Order in Council P.C. 8965, dated November 21, 1941 (LABOUR GAZETTE, December, 1941, page 1462) the price ceiling established by P.C. 8527 (LABOUR GAZETTE, November, 1941, page 1371) was extended to rentals charged for all real property, the order to be administered by the Wartime Prices and Trade Board. Under authority conferred by Order in Council P.C. 5003 (LABOUR GAZETTE, October, 1940, page 995), the Board from time to time fixed maximum rentals for housing accommodation in certain of the cities in the list on page 244. In these cities the maximum rentals already fixed continue unchanged, based in some cases on those in effect on January 2, 1940, and in the others on those in effect on January 2, 1941. The former are Halifax, New Glasgow, Sydney, Thetford Mines, Kingston, Ottawa, Windsor, Brandon, Calgary, Nanaimo, New Westminster, Prince Rupert, Vancouver and Victoria; the latter are Truro, Moncton, Brockville, Belleville, Fort William, Hamilton, Niagara Falls, Oshawa, Peterborough, Port Arthur, St. Catharines, Sault Ste. Marie, Regina, Edmonton, Medicine Hat, and Lethbridge. In all the other cities in the list the maximum rental for any housing accommodation is the rental which was in effect on October 11, 1941. Provision is made under the orders of the Board for variation of the maximum rentals for any accommodation under certain special circumstances affecting the accommodation.

Retail Prices

Meat prices at the beginning of January, 1942, were not materially changed from the levels of the previous month some averaging fractionally higher and some lower. Considerable increase was recorded however as compared with January, 1941. Sirloin steak averaged 33·7 cents at January 2, 33·8 cents for December 1, 1941, and 30·3 cents for January, 1941. Rib roast averaged 29·1 cents

modern houses, $25–$35 per month, semi-modern, $10–$15. s. Delivered from mines. v. Workingmen's houses are mostly of four and five rooms, modern $24–$28, semi-modern, $20–$24.

* In the province of Quebec a provincial sales tax of 2 per cent and in the cities of Montreal and Quebec an additional municipal tax of 2 per cent are not included in the prices for fuel.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices, in Great Britain and certain of the principal industrial and commercial countries appeared in the October, 1941, issue of the LABOUR GAZETTE. Since these monthly notes are all compiled from British and foreign sources, the information contained therein usually deals with conditions prevailing some months previous to the date of publication in the LABOUR GAZETTE. In Great Britain both wholesale and retail trade are now subject to government control, the main objects of which are to conserve supplies of vital materials and to protect the public from unwarranted increases in prices. In order to achieve these ends the government of the United Kingdom has fixed retail and wholesale prices of some articles and is controlling the entire trade in some commodities, including importation and exportation.

Great Britain

WHOLESALE PRICES.—The *Statist* index number, on the base 1867-1877=100, was 145·5 at the end of November, an increase of 1·3 per cent for the month. Food prices rose 1·3 per cent due chiefly to higher prices for English barley. Among industrial materials the principal changes are substantial increases in hides, leather and timber.

COST OF LIVING.—The index number of the *Ministry of Labour Gazette*, on the base July, 1914=100, was 201 at December 1, an increase of ½ of one per cent for the month. Food prices and rent were unchanged, but there were small increases in the prices of clothing, fuel and light and sundries.

United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number, on the base 1926=100, was 93·6 for December, an increase of 1·2 per cent for the month. There was a fractional decrease in fuel and lighting materials, no change in the metals group, while the eight other groups all recorded some increase, the greatest being one of 4·5 per cent in farm products.

COST OF LIVING.—The Bureau of Labor Statistics index number, on the base 1935-1939=100, was 110·5 at December 15, an increase of 0·3 per cent for the month. There was no change in food prices, as a whole, but all other prices showed slight advances, the largest being one of one per cent in house-furnishings.

The index number of the National Industrial Conference Board, on the base 1923=100, was 93·4 for December, an increase of 0·5 per cent for the month. Small advances were recorded in all five groups.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE FOURTH QUARTER OF 1941

DURING the fourth quarter of 1941 there were 364 fatal industrial accidents, including deaths from industrial diseases reported by workmen's compensation boards, etc., as well as fatalities incidental to occupational pursuits, as compared with 373 fatal accidents in the fourth quarter of 1940. Of the 364 fatalities in the period under review, 145 occurred in October, 129 in November and 90 in December. Fatal accidents during each year are recorded by quarterly periods in the issues of the LABOUR GAZETTE for May, August and November of that year, and in February of the following year.

The supplementary lists of accidents not reported in time for inclusion in the reports covering the periods in which they occurred, contain three fatalities for 1940 and 35 for the first three quarters of 1941.

In this series of reports it is customary to record industrial accidents under the dates of their occurrence, and fatal industrial diseases under the dates on which they prove fatal.

Information concerning accidents was received from the provincial Workmen's Compensation Boards, the Board of Transport Commissioners of Canada, certain other official sources, as well as from the correspondents of the LABOUR GAZETTE, and newspaper reports.

Classified by groups of industries, the fatalities occurring during the fourth quarter of 1941 were as follows: Agriculture, 24; Logging, 49; Fishing and Trapping, 7; Mining, Non-ferrous Smelting and Quarrying, 75; Manufacturing, 44; Construction, 51; Electric Light and Power, 6; Transportation and Public Utilities, 79; Trade, 12; Service, 17.

Of the mining accidents, 28 were in "metalliferous mining", 39 in "coal mining", seven in "non-metallic mineral mining and quarrying, n.e.s.", and one in "structural materials."

Of the accidents in manufacturing, one was

in "animal foods", two in "textiles and clothing", one in "rubber products", nine in "saw and planing mill products", three in "wood products", three in "pulp, paper and paper products', 16 in "iron, steel and products", three in "non-ferrous metal products", two in "non-metallic mineral products", and four in "chemical and allied products."

In construction there were 25 fatalities in "buildings and structures", one in "railway", eight in "shipbuilding", 11 in "highway and bridge", and six in "miscellaneous".

In transportation and public utilities there were 42 fatalities in "steam railways", five in "street and electric railways", 19 in "water transportation", four in "air transportation", eight in "local and highway transportation", and one in "telegraphs and telephones".

There were seven fatalities in "wholesale", and five in "retail" trade.

Of the fatalities in service, 11 were in "public administration", one in "laundering, dyeing and cleaning", and five in "personal, domestic and business".

There was one serious disaster during the period under review which occurred on October 31, when 29 miners were killed by carbon monoxide poisoning following an explosion of fire damp in a coal mine at Nordegg, Alberta. A commission of inquiry was appointed to make investigations into the cause of the disaster.

On December 16, the collision of a freight train with a snow train at Mont Joli, Quebec, caused another serious accident when nine labourers were killed and 20 others were injured. Other accidents involving the loss of two more lives were as follows: A tug was lost while on a voyage from Melgrove, N.S., to Halifax and the crew of six members were drowned about October 10.

On December 10, a section foreman and three section labourers were killed when a freight train struck their hand car, in a fog, near Vancouver, B.C.

Three men engaged in ferrying aircraft from Canada to Britain lost their lives when the plane was lost en route on October 11.

A logging contractor and a labourer were drowned near Sheet Harbour, N.S., on December 4, when their sled broke through the ice as they were bringing supplies to camp.

A fishing tug owner and a helper were drowned on October 23 when a tug sank in a storm off Kingsville, Ontario.

Two miners were killed during blasting operations at St. Anthony mine, Ontario, on October 9; and another two lost their lives in a similar accident, at Geraldton, Ontario, on October 16.

A driller and a valveman were killed when overcome by fumes in an oil well, in Turner Valley, Alberta, on October 23.

When a train crashed into a standing freight train, near Linton, Quebec, on December 13, an engineer and conductor were killed.

Supplementary List of Accidents

A supplementary list of accidents occurring during the first three quarters of 1941 has been

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE FOURTH QUARTER OF 1941 BY GROUPS OF INDUSTRIES AND CAUSES

compiled which contains 35 fatalities, of which one was in agriculture, six in logging, five in mining, non-ferrous smelting and quarrying, four in manufacturing, five in construction, one in electric light and power, seven in transportation and public utilities, two in trade, and four in service. Two of these accidents occurred in January, one in May, four in June, three in July, seven in August and 18 in September.

A further supplementary list of accidents occurring in 1940 has been made. This includes three fatalities, one of which was in construction and two in transportation and public utilities. One of these accidents occurred in September and the other two in December.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Contract in Quebec for Yearly Salary Payable Weekly Which is Tacitly Renewed May Be Terminated on One Week's Notice

On April 26, Chief Justice Greenshields in Montreal Superior Court awarded damages of $20 and costs to an employee who had been dismissed without notice. The action was for $500, this sum being claimed in lieu of three months' notice. The plaintiff rested his case on a contract for his services to the defendant for one year from January 7, 1939, for an annual salary of $1,170, payable in 52 weekly payments of $20, with a final payment of $130 at the end of the year. This contract, he alleged, was tacitly renewed for another year.

The judgment was based on a decision of the Supreme Court of Canada in a similar case under Quebec law *(Stewart* v. *Hanover Fire Insurance Company)* in 1936. Under art. 1657 of the Civil Code three months' notice is required to terminate a contract prolonged by tacit renewal, but if payment is at intervals of less than three months, then under art. 1642 notice need not be longer than the period of payment. The plaintiff was therefore entitled to one week's notice or to $20 instead of notice. *Packer* v. *Gurberg* (1941) 79 Rapports Judiciaires de Québec, Cour Supérieure, 447.

Quebec Agreement for Construction Covers Government Bridges and Supersedes Fair Wage Rates

On June 25, Chief Magistrate Roy in Quebec Superior Court granted the claim of a carpenter for $76.75, the difference between the wages he had actually received and those to which he claimed he was entitled under the collective agreement made binding on the construction industry under the Collective Agreement Act. He had been employed in connection with the construction and repair of bridges for which the defendant company had a contract with the provincial Government.

The collective agreement in question applies to "all works pertaining to construction, building and civil engineering, including the operations of skilled and unskilled workers employed in public buildings or doing installation, repair, maintenance and demolition work". The defendant company claimed that this refers only to the construction of buildings and that the plaintiff had received the wages he was entitled to under the order in council relating to fair wages on provincial public works.

The Court held, however, that it was a violence to language to refuse to include the construction of bridges in the terms "construction" and "civil engineering". At the same time, the fact that the fair wages order in council prescribed lower rates could not be interpreted as depriving the plaintiff of the benefits conferred by the collective agreement. *Blanchet* v. *Page Construction (Quebec) Ltd.* (1941) 79 Rapports Judiciaires de Québec, Cour Supérieure, 486.

Contract for Logs to be Cut is Contract for Jobs and Not Contract of Sale

On May 21, Mr. Justice Duranleau in Superior Court for the District of Terrebonne dismissed an action for recovery of $200.80 which was brought against the owner of a saw mill by the plaintiff who was under contract to supply him with logs. The money had been withheld in accordance with the provision of the Workmen's Compensation Act which requires the "principal" who contracts with any person for some work which is within the scope of the Act to see that any sum which the contractor is liable to contribute to the accident fund is paid and to withhold the sum from any amount due the contractor. The plaintiff contended that he was not a contractor as defined in the Act but a merchant selling logs and the defendant, therefore, was not a principal and had no right to withhold the money. The Court, however, rejected this argument as the contract set out where and under what conditions the logs were to be cut. *Gaudet* v. *Carson et Commission des Accidents du Travail de Québec* (1941) 79 Rapports Judiciaires de Québec, Cour Supérieure, 443.

Quebec Court Dismisses Action Under Minimum Wage Act

On June 27, Mr. Justice Duranleau of Montreal Superior Court dismissed an action for $172.80 brought by a messenger who claimed that he had received only $3.50 per week instead of the legal minimum of 10 cents per hour. The Court held that even if the plaintiff's claim was justified, it had been proved that his mother had received an amount which brought the total up to 10 cents per hour. In any case, it was necessary for the plaintiff to cite the act and regulation on which his action was based and the number of the Gazette in which the regulation was published; and he had failed to do this. *Letendre* v. *Rodioux* (1941) 79 Rapports Judiciaires de Québec, Cour Supérieure, 438.

Sailors Detained Under Merchant Seamen Order, 1941, Denied Writ of Habeas Corpus

On July 4, Mr. Justice Boulanger in Quebec Superior Court dismissed an application for a writ of *habeas corpus* which had been entered on behalf of 12 Greek sailors who had been detained under the Merchant Seamen Order, 1941. (LABOUR GAZETTE, 1941, p. 650). The Committee of Investigation and, later, the Board of Inquiry set up under this Order had established that the sailors had refused to sail on their ship on its return journey to England from Quebec, and in so doing had delayed its departure. Both these bodies are composed of representatives of Government Departments. The former is authorized to make a preliminary inquiry and to detain temporarily any person charged under the Order while the Board of Inquiry has full powers to investigate, to order detention for a maximum of three months and, subject to a review of the case, for further periods of six months each.

The petitioners claimed that they had refused to sail because the captain had not paid them their full wages nor made an advance to them on their future wages. Under the custom of the sea, however, full wages are not paid at a port of call such as Quebec.

The Judge rejected the contention of the defendant that the right to apply for a writ of *habeas corpus* had been suspended by art. 24 of the Order which permits no appeal from the decision of a Board. He held that the right was not expressly suspended, and that it was too important for the protection of liberty to be suppressed by inference. He also rejected, however, the plaintiffs' contention that the Order was *ultra vires* since the War Measures Act did not give authority for the creation of a Committee of Investigation or Board of Inquiry, and that to give such powers would be unconstitutional since it would enable special courts to be set up by order in council. The Committee and Board could not properly be called courts, the Judge stated. They were rather administrative bodies created to carry out the provisions of an Order which was designed to prevent delays in the sailing of ships. The detention of the plaintiffs was therefore legal. *Maragos et Autres* v. *Deguise,* (1941) Rapports Judiciaires de Québec, Cour Supérieure, 431.

VOLUME XLII] MARCH, 1942 [NUMBER 3

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

IN accordance with the movement invariably indicated at the opening of the year, there was a contraction in employment at January 1, 1942. The decline, however, was the smallest ever recorded for the date. The firms furnishing data laid off some 30,300 workers, a decline of 1·8 per cent from December 1; the average reduction indicated at January 1 in the period, 1921-1941, is 6·6 per cent. Returns were tablulated by the Dominion Bureau of Statistics from 12,833 employers whose staffs aggregated 1,657,990, as compared with 1,688,298 in the preceding month.

The index (average 1926=100) stood at 165·8, compared with 168·8 at December 1, 1941, and 134·2 at January 1, 1941, previously the maximum for that date in the period since 1920. The crude indexes for the beginning of January in recent years were as follows:—1940, 116·2; 1939, 108·1; 1938, 113·4; 1937, 103·8 and 1936, 99·1.

After correction for seasonal influences, the January 1, 1942, index was 172·3, as compared with 164·8 at December 1, 1941; these two seasonally-adjusted index numbers are the highest on record.

The seasonal curtailment in industrial activity and the loss in working time over the holidays was reflected in a considerable falling-off in the weekly payrolls distributed on or about January 1 by the co-operating establishments. As already stated, the personnel declined by 1·8 per cent, while the loss in reported earnings was 6·1 per cent. The employees included in the latest survey were paid $43,314,727 for services rendered in the final week in December. The per capita earnings amounted to $26.12; the payrolls disbursed on or about December 1 for services in the preceding week had represented a per capita average of $27.32.

Unemployment in Trade Unions.—At the beginning of February, 1942, the percentage of unemployment among local trade unions stood at 4·3 in contrast with percentages of 5·2 the beginning of January and 6·6 at the beginning of February, 1941. The percentage for February was based on returns compiled from 2,116 labour organizations with a total membership of 323,598 persons.

Report of the Employment and Claims Offices.—Reports received by the Unemployment Insurance Commission from Employment and Claims Offices during the month of January, 1942, showed substantial declines from December and also from January a year ago, reduced placements in services, construction and logging being chiefly responsible for the total decrease in each case. Vacancies in January, 1942, numbered 26,823, applications 50,250 and there were 21,801 placements in regular and casual employment.

Prices and the Cost of Living.—The official index of the cost of living in Canada calculated by the Dominion Bureau of Statistics and based upon average prices in the period 1935 to 1939 as 100 was 115·7 at the beginning of February as compared with 115·4 at the beginning of January; 108·2 for February, 1941; 103·8 for February, 1940; and 100·8 for August, 1939, the last prewar month. The advance between August, 1939, and January, 1942, was 14·8 per cent as compared with an increase of 24·1 per cent between July, 1914, and January, 1917, an equal period in the last war. In wholesale prices the Dominion Bureau of Statistics index number on the base of 1926 as 100 was 94·6 for February, 1942, as compared with 94·3 for January; 93·6 for December, 1941; 85·2 for February, 1941; and 72·3 for August, 1939, the last prewar month. The increase in the index between August, 1939, and February, 1942, was 30·8 per cent.

Business Statistics.—The most recent statistics available reflecting industrial conditions in Canada are shown in the table on page 252.

MONTHLY STATISTICS REFLECTING INDUSTRIAL CONDITIONS IN CANADA*

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† Week ended February 26, 1942. § Revised.

(1) Base, 1926=100. (2) Base, 1935-1939=100. (3) Figures are for the end of the preceding month. (5) Tentative computation. (6) Adjusted where necessary for seasonal variation. (7) Excluding gold. (8) Notes in hands of the public. (9) Figures for four weeks ended February 28, 1942, and corresponding previous period. (10) MacLean's Building Review. (11) Sugar production given in periods of 4 weeks ending January 28, 1942; December 31, February 22, and January 25, 1941; December 31, 1940.

The index of the physical volume of business, reflecting activity in mining, manufacturing, construction, electric power production and in the distribution of goods, was higher in January than in any other month with the exception of September, 1941. The increase as compared with January, 1941, was about 9 per cent. A slight decline was indicated in the trend of mineral production but the output of coal was higher in January than in the preceding month and higher also than in January, 1941. Manufacturing production was about 15 per cent higher than for January, 1941, and about three per cent higher than for December, 1941. In the former comparison advances in a number of the principal factors in this group were, cattle slaughterings 16 per cent, newsprint production 19 per cent, and steel ingot production 23 per cent. The production of automobiles and trucks was 6 per cent lower than in January, 1941.

In the construction industry decline in activity was indicated by the figures for the value of contracts awarded which were substantially lower in January, 1942, than in December, 1941, and only about 50 per cent of the value in January, 1941. The output of electric power in January was the greatest on record and was 22·5 per cent greater than for January, 1941. The figures for carloadings imports and exports all indicated greater activity in January than in the preceding month and greater also than in January, 1941.

Strikes and Lockouts.—In February the number of strikes and lockouts recorded was 16, involving 2,901 workers and causing time loss of 23,997 man working days, as compared with 13 disputes in January, involving 2,715 workers with time loss of 46,606 days. In February most of the time loss was due to a strike of gold miners at Kirkland Lake, Ont., and a strike of textile workers at Lachute Mills, P.Q., while in January nearly all of the time loss was due to the Kirkland Lake strike. During February, 1941, there were eight disputes, involving 1,787 workers with time loss of 7,514 days, due chiefly to three strikes of coal miners in Nova Scotia.

Of the 16 disputes during February of this year, 13 were terminated, three in favour of the employers, five in compromise settlements, while five were indefinite in result. Three disputes, involving 331 workers, were recorded as unterminated at the end of the month.

These figures do not include those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or declared terminated by the unions concerned.

Industrial Disputes Investigation Act

Six applications for the establishment of Boards of Conciliation and Investigation were received during the month of February. Three boards were established and the constitution of a board established in January was completed. Two boards submitted their reports. Industrial Disputes Inquiry Commissioners were authorized to investigate three disputes in connection with which board applications had been received, as well as two cases of alleged discrimination. During the month, Commissioners submitted their reports on the investigation of four disputes. One strike occurred following receipt of the findings of a Board of Conciliation and Investigation, but this was terminated before the end of the month. Six disputes were recorded as settled.

Full particulars with regard to recent proceedings under the Industrial Disputes Investigation Act will be found in the section beginning on page 261.

Inventory of employable persons to be maintained

By Order in Council, P.C. 1445 of March 2, the Minister of Labour was authorized to "maintain an inventory of employable persons" as a necessary requirement in the "effective utilization of Canada's labour supply in the war effort, through improvement of industrial recruiting, training, transfer and placements."

In the Order in Council reference is made to an experiment conducted by the Department of Labour in co-operation with the Unemployment Insurance Commission and the Dominion Bureau of Statistics, in establishing a partial inventory of over two million employees insured under the Unemployment Insurance Act, classified according to location, occupation, employer, sex and age. As a result of this experimental inventory, it was decided that it was feasible to establish and maintain such an inventory "on any necessary scale."

The specific terms of the Order are as follows:—

1. The Minister of Labour is hereby authorized and directed to establish and maintain an inventory of employable persons and for this purpose is hereby empowered:—

(*a*) by public notice or otherwise to direct any person or class of persons to register in such manner and at such times and places as he may prescribe and to direct any employer or class of employers to maintain such records about their employees and to furnish such reports thereon as he may prescribe; and

(*b*) to direct the Unemployment Insurance Commission to obtain and furnish such information about employers subject to

the Unemployment Insurance Act and such information about their employees, whether or not insurable, as he may prescribe.

2. Any person who refuses, fails or neglects to comply with any direction given by the Minister of Labour or his duly authorized representative pursuant to the provisions of this order shall be guilty of an offence and liable on summary conviction to a fine not exceeding two hundred dollars or to imprisonment for a term not exceeding three months or to both such fine and such imprisonment.

3. The Dominion Bureau of Statistics and all other departments and agencies of the Government of Canada are hereby authorized and directed to furnish such assistance to the Minister of Labour in the establishment and maintenance of the aforesaid inventory of employable persons and in estimating and forecasting the labour requirements of the armed services and industry, as he may require.

Evacuation of Japanese nationals from protected areas in B.C.

Reference was made in the February issue of the LABOUR GAZETTE (page 128) to the policy of the Government in regard to Japanese nationals in Canada, particularly with respect to their withdrawal from designated defence areas and their placement elsewhere through arrangements to be effected by the Department of Labour.

Recent developments in this situation are centered in two Orders in Council—P.C. 1665 and P.C. 1666, both of March 4. The first provides for the establishment of an organization known as the British Columbia Security Commission, which is authorized to supervise and direct the evacuation from the protected defence areas of British Columbia of all persons of the Japanese race and to provide for the housing, feeding, care, and protection of such persons. The second of these Orders provides for the appointment of the personnel comprising the Commission.

In addition to defining the duties and powers of the Commission and providing for the custody of Japanese property, P.C. 1665 authorizes certain Departments and agencies of the Government to assist the Commission by lending personnel and by furnishing "such medical aid, hospitalization, food, clothing, transportation, use of land, buildings, equipment, utilities and other supplies and services as are available, and may be required."

The allocation of this assistance is set forth as follows:—

(*a*) assistance by the Royal Canadian Mounted Police in the compiling of information concerning the persons to be evacuated under these Regulations in the segregation and concentration of such persons and in the maintenance of public security in respect thereof.

(*b*) assistance by the Department of Transport in the transportation of persons evacuated under these Regulations.

(*c*) assistance by the Department of National Defence by furnishing personnel to advise on and assist in the housing, feeding and clothing of persons evacuated under these Regulations.

(*d*) assistance by the Department of Munitions and Supply in advising upon and entering into contracts or other arrangements to provide housing, food, supplies and services for such persons.

(*e*) assistance by the Royal Canadian Mounted Police and/or the Department of National Defence in the protection of persons evacuated under these Regulations and in the maintenance of public security in respect thereof.

(*f*) assistance by the Department of Labour in establishment of work camps and in providing employment, and in particular in the absorption of evacuated persons in the Canadian Japanese Construction Corps constituted by Order in Council P.C. 1271 of February 17, 1942, or in the work camps established under Order in Council P.C. 1348 of February 19, 1942, or in any other activity in which such persons can be employed without prejudice to the public safety or the safety of the State, outside the protected areas in British Columbia.

The members of the Commission, appointed by P.C. 1666, are:—

Austin C. Taylor, Chairman;

Assistant Commissioner J. N. Mead, Royal Canadian Mounted Police;

Assistant Commissioner John Shirras, B.C. Provincial Police.

There is also an Advisory Committee of twenty British Columbia citizens, headed by:

Hon. R. L. Maitland, Attorney General of B.C., Victoria;

Hon. George Pearson, Minister of Labour, Victoria;

Harold E. Winch, Leader of the Opposition in B.C., Victoria.

As this issue is in process of publication, the Minister of Labour, Hon. Humphrey Mitchell, and the Associate Deputy Minister, Mr. A. MacNamara, are on a special mission to the Pacific coast to facilitate the evacuation of Japanese nationals.

Courses in personnel management to be established in Canadian universities

In view of the growing importance of personnel administration in war industries, and as a factor in "the removal of misunderstanding" and the development of "fuller co-operation between employers and employees", leading to "more efficient prosecution of the war effort", the Government has authorized,

by Order in Council P.C. 1840 of March 10, the putting into effect of a training program in personnel management, through the medium of short, practical courses in Canadian universities.

By this Order, the Department of Labour is authorized to enter into agreements with the universities whereby the Department will pay all "reasonable costs" in connection with any such training course it approves. It is further planned that the Department shall pay the travelling expenses of applicants who successfully complete the courses.

The new program is a direct attack on the many labour administration problems arising in new and rapidly expanding war industries. The Minister has advocated the establishment of effective personnel departments in these plants and his plan is in line with that adopted by the Minister of Labour in Great Britain to facilitate the training of qualified personnel managers.

While designed primarily to aid the war industries, the plan is not necessarily confined to them. In addition to the university courses, the Minister is empowered to appoint a Director of Personnel Training in the Department of Labour to supervise the development and administration of the program. Another step will be to name experienced personnel managers to act as consultants to less experienced men or to newly established departments in other plants. These consultants will be paid only the travelling expenses they incur in the work.

Canadian workers displaced by rubber shortage

The question of the employment of rubber workers displaced as a result of the rubber shortage, was emphasized by a delegation of workers which was received by the Prime Minister, Rt. Hon. W. L. Mackenzie King and the Minister of Labour, Hon. Humphrey Mitchell on February 28.

The members of the United Rubber Workers of America in making their rerpresentations reported that 2,000 of the 14,000 workers employed in Ontario and Quebec plants have been displaced and a warning of further layoffs has been given by some plants.

The union asked that seniority rights of displaced workers be protected and that they be given preference in new industries. They also asked that unemployed workers be allowed to receive both unemployment insurance and a training allowance while they are being trained for new jobs. Many of those affected were home owners who would find it difficult to move to new communities, it was said.

The Minister of Labour assigned to the appropriate departmental officials the duty of making immediate surveys in the localities where the plants are located.

Vocational training—financial agreements with provinces

The Minister of Labour, Hon. Humphrey Mitchell, introduced a resolution in the House of Commons on March 4, "to bring in a measure to provide for the promotion of vocational training projects, the entering into financial assistance agreements with the provinces in connection therewith, the appointment of a vocational training advisory council and of such officers, clerks and other employees necessary for the administration of the Act."

Subsequently, on March 5, the Minister moved the appointment of a Special Committee to consider a Bill entitled: "An Act to assist in the carrying on and co-ordination of vocational training."

Reinstatement in civil employment of enlisted men

The Minister of Labour, Hon. Humphrey Mitchell, introduced in the House of Commons on March 6, Bill No. 5 to provide for the reinstatement of individuals who enlist for service in His Majesty's Forces or who perform essential war employment.

The Bill as introduced, followed the same general lines as the Order in Council P.C. 4758 (LABOUR GAZETTE, July 1941, page 803).

As the Bill is being amended in its progress through the House, further reference will be made to it in a later issue.

National Labour Supply Council abolished

Following representations made by organized labour, the National Labour Supply Council, established by Order in Council P.C. 2686 of June 19, 1940 (LABOUR GAZETTE, July 1940, pages 630-31) was abolished by Order in Council P.C. 1426 of February 24, 1942.

The new Order revoking the Order establishing the National Labour Supply Council, indicated the allocation of the former duties of the Council as follows:

The staff, space, equipment and supplies of, and the unencumbered balance of any appropriation to the National Labour Supply Council shall be transferred to the Department of Labour and assigned to or used for the work of the Department or of the National War Labour Board, as the Minister of Labour may direct.

The representatives of the National Labour Supply Council appointed to make necessary representations at hearings of the National War Services Administrative Boards pursuant to section 16 (1) of the National War Services' Regulations, 1940 (Recruits) (Consolidation 1941), shall be entitled to continue to make such representations but as representatives of the National War Labour Board, and any vacancy in any such position as representative shall be filled by the National War Labour Board.

The administrative arrangements for the release of key men from His Majesty's Forces shall be continued except that representations to the officials of the service concerned shall be made through the Chairman, Vice Chairman, or Executive Director of the National War Labour Board, instead of through the Chairman of the National Labour Supply Council.

Conference on Dominion-Provincial war emergency training program

Attended by some thirty-five Dominion and Provincial officials, a conference was held March 16 to 18 on the Dominion-Provincial War Emergency Training Program.

The delegates to the conference were welcomed by Dr. Bryce M. Stewart, Deputy Minister of Labour.

The accomplishments achieved under the War Emergency Training Program during 1941 were reviewed by R. F. Thompson, Dominion Supervisor, and short reports were presented by Regional Directors on the program in their own areas in which special references were made to new developments in the problem of supplying war industries with trained labour.

The conference considered in detail the various aspects of the War Emergency Training Program under the following section headings: Pre-employment Training; Training in Industry; Army Tradesmen's Classes; R.C.A.F. Classes; and Rehabilitation of Discharged Persons.

Re-distribution of manpower in Canada and United States discussed by I.L.O.

Problems of labour supply and labour re-distribution, and particularly the most effective allocation of manpower to war production, was discussed by employers, employees and government representatives of the United States and Canada at an all-day session of the International Labour Office, held at McGill University, Montreal, on February 28.

Convened by E. J. Phelan, Acting Director of the I.L.O. to consolidate the views of the two countries on the prime question of labour re-distribution, the meeting generated a discussion that may give direction to the framing of legislation dealing with manpower allocation that may soon be presented on either side of the border.

Two important reports, prepared by the International Labour Office, were submitted to the tripartite representation. One was a general statement of the problem of redistributing labour under the "abnormal conditions of a developing war economy." The other was a survey of the methods and procedures that have been evolved in Great Britain to cope with the situation. The Canadian and United States representatives studied these two reports in relation to manpower distribution for war purposes in their two countries. They compared notes on the principles and procedures developed and in process of development in Canada and the United States, and discussed further measures necessary to formulate a well-rounded manpower program for the prosecution of the war.

A feature of the closing session was the participation in the discussions by the Dominion Minister of Labour, Hon. Humphrey Mitchell.

United States priorities unemployment measure rejected

In the February issue of the LABOUR GAZETTE (page 129) reference was made to the proposed program in the United States of assistance to workers displaced by war priorities.

For the purpose of this program, President Roosevelt had approved a budget estimate of $300,000,000 for weekly unemployment-benefit payments to workers displaced in private industry while the plants were being adapted to war production. A maximum of $24 a week for 26 weeks was to be paid to an estimated 4,000,000 persons, the Federal Government contributing the whole amount in instances in which workers were not receiving state unemployment compensation, and in the event workers were receiving such aid the Federal Government was to make up the difference to $24. Displaced workers were going to be required to enter a 26-week training course for war industry under the proposed plan.

On February 19, the Ways and Means Committee of the House of Representatives voted 16 to 8 against the proposed bill giving effect to this program. Members of the Committee stated that they had decided against sending the bill to the House because the proposed program probably involved the question of states' rights and state officials had claimed they could handle the problem independently.

Trend of war industrial employment in U.S.A.

The trend of war employment in United States industry was indicated recently in two press reports.

The first dealt with the suggestion made on March 4 by Miss Mary Anderson, Director of the Women's Bureau of the United States Department of Labour that there was a possibility that 6,000,000 women could be recruited for war industries and other essential services by the end of 1942. She said housewives without small children were a potential source for about 2,000,000 workers. Although an addition of 6,000,000 women would mean a tripling of the number of women at work in the country's manufacturing establishments compared with December, the month of the United States entry into the war, when there were about 3,000,000, Miss Anderson said she saw no reason for suspending protective legislation governing the employment of women at night. The Women's Bureau, she said, has formulated a war policy of approving relaxation of labour standards where a critical labour situation exists and an employer can prove before State labour authorities that he needs to employ women at night to achieve maximum war production.

In another report dealing with the possibility of manpower shifts, Colonel Joseph F. Battley, Chief of the Manpower and Liaison Division of the Office of the Under Secretary of War, declared that if the deficiency of manpower in the coming 12 months is as crucial as is now expected, it will have to be made up by removing men from occupations which do not contribute directly to the war effort. "There has been talk and serious talk of drafting labour in order that none of the Nation's manpower resources will be wasted," Colonel Battley said. "Regardless of the outcome of such proposals, the very fact that they have been made points to the urgency of the problem."

Deferment of "key men" in maintenance of U.S. labour relations

In response to inquiries concerning a report to the effect that Brigadier General Hershey, Director of Selective Service in the United States, had authorized local draft boards to exempt labour leaders from the draft, Selective Service Headquarters recently released for publication a copy of the memorandum to local United States draft boards that gave rise to the report. The memorandum read in part as follows:

1. It is considered in the national interest and essential to the war production program that a harmonious relationship be maintained between labour and industry. To accomplish this purpose it is desirable that there continue to be duly authorized and competent representatives of government, labour and industry, who will, in considering and disposing of questions of mutual interest, expedite the successful prosecution of the war.

2. Registrants who are key men in the maintenance of such harmonious relations and who are employed for that activity by the government, by industrial organizations or by local, national or international labour organizations may be given serious consideration for deferment.

In response to inquiries about deferment for trained defense workers, General Hershey said that it was not merely the privilege, but the patriotic duty of employers to seek deferment for necessary workers, but he then went on to say: "Occupational deferments are temporary—usually for 6 month periods. They are granted when a man is a 'necessary man' in the sense that he is impossible or difficult to replace at the time the deferment is granted. This is essentially a temporary consideration and the Selective Service System will be sympathetic to nothing less than a maximum effort by employers to train substitutes for all such men."

Experience of Ford Motor (Detroit Plant) in wartime working hours.

The Labour Division of the United States War Production Board in its press service, deals with the relationship between wartime working hours and production.

On this subject, the Division reports as follows on the recent experience at the Ford Motor Plant in Detroit:

"A 70-hour work week does not increase either efficiency or production. On the contrary it materially reduces production rates on vitally needed war materials.

"This was the lesson recently learned by officials at the Ford Motor Company Detroit plants which instituted a 70-hour week in their tool and die shop and airplane plant. Instead of an increase in production, the company's engineers discovered that an efficiency drop of from 500 to 700 man-hours per unit occurred, according to the iron and steel industry's monthly magazine, "Steel". The Ford company stated that because of these findings the engine plant has ceased Sunday work and will go on a work week of six ten-hour days, and the tool and die shop will close Sundays and work five ten-hour days and 8 hours on Saturday."

Mr. Sidney Hillman, Labour Director, War Production Board, emphasized the dangers of industrial fatigue in a statement which helped to defeat the amendment to the War Powers Bill, proposed by Representative Howard

Smith of Virginia, to nullify overtime payment for more than a 40-hour work week. The amendment was defeated by Congress 226-62.

Reduction in wage differential in U.S. aluminum industry

The differential between wage rates in northern and southern plants of the Aluminum Company of America was scaled down by a seven to four decision issued late in January by the U.S. National War Labor Board.

The dispute between the Aluminum Workers of America, a union affiliated with the Congress of Industrial Organizations, and the Aluminium Company of America, involved over 18,000 employees in one northern and two southern plants. The union demanded the abolition of the 18 to 20-cent differential in the beginners' wage which existed between the north and south plants, and also asked for a bonus of 10 cents an hour for night shift workers in the northern plant.

On the first question the Board decided to reduce the wage differential by a seven-cent increase in the hourly wages for beginners in the two southern plants, with corresponding adjustments for other grades of workers. In the majority opinion of the Board it was declared that—

> a complete elimination of the wage differential involved in this case would have an undesirable disrupting effect at this time on the general economy of the areas in which the plants in question are located.

In this decision, the four labour representatives lined up with three public members of the Board against four employer representatives who were willing to reduce the differential by only three cents or at most by five cents as a compromise with the final decision.

The arguments of the company that the differential was justified by prevailing practices, differences in plant earnings and cost of living between north and south, and by the fact that the company's differential was less than the national average differential were held to be offset by two major considerations. One was the ability of the employer to pay wages above the level prevailing in the community where he operates and the second was the basic right of labour to wages high enough to maintain civilian morale, a decent standard of living and to pay taxes.

On the question of a bonus for night workers, the Board divided, with four employers and three public members opposing four labour representatives and one public member. The majority voted for a bonus of three cents an hour for the 3 p.m. to 11 p.m. shift and a five-cent bonus for the 11 p.m. to 7 a.m. shift at the Pennsylvania plant. Again it rejected the argument of prevailing practice in the community, and declared in support of its decision:—

> Night work tends to disrupt normal living—The worker during the night shifts has to sacrifice many of the values and satisfactions of social, family and personal life.

The minority believed the bonuses should be two cents higher and asked for a 10-cent bonus for all workers continuously employed on night shifts.

Settlement of Coal Miners' illegal strike in Great Britain

A strike at a Kent colliery on January 9 involved about 1,600 men who were demanding the county rate of pay and were protesting specifically against a wage-cut which had recently been imposed. The management justified the cut on the ground that the men had resorted to a slowdown after an official arbitrator had, on December 19, made an award for less than the county rate. The company took action against the strikers for breach of contract. This charge was withdrawn when the Ministry of Labour instituted proceedings for failure to give the 21 days' notice prescribed in the Conditions of Employment and National Arbitration Order, 1940. It was stated that the prosecution had nothing to do with the merits of the dispute but that it was instituted because the men had broken a law which was fundamental to the Labour Ministry's policy for the settlement of disputes. For the men it was admitted that they had broken the law, but the plea was put forth that they felt they had a just grievance and their infraction of the law was due to ignorance. Three officials of the union were sentenced on January 23 to imprisonment, the branch secretary of the union to two months and the president and a member of the branch committee to one month each. It was held that they were "really responsible" for the strike. Over 1,000 members of the union were fined from £1 to £3 each.

After the sentences were passed, the men unanimously voted to remain on strike. On January 29, however, they returned to work after the management had met their terms regarding wages. The Minister of Mines and the secretary of the Mineworkers' Federation promised at the time to intercede with the Home Secretary for the release of the imprisoned men but the release was not a condition of the return to work. On February 3 the remainder of the sentences imposed on the trade union officials were remitted on the recommendation of the Home Secretary.

Extended employment of women in British Ordnance factories

On November 28, an agreement was reached by the Ministry of Supply of the United Kingdom and the Amalgamated Engineering Union "to provide for the extended employment of women in Ministry of Supply industrial establishments to meet wartime emergencies and the need for increased output." It was signed on behalf of the Ministry of Supply by the Director General of Ordnance Factories and a representative of the Secretary of the Ministry, and on the other side, by the President and Secretary of the Union.

Women may now be employed on "certain work which has hitherto formed part of a skilled mechanic's job." It is stipulated, however, that such employment will be temporary for the duration of the war, that an agreed record will be kept of all substitutions, and that substitution will take place only to enable men to be employed on other work and by agreement with the Union representatives. The wages of the women workers will be the basic rate and bonus of the mechanic in the grade concerned in cases where the women can carry on the entire job without assistance. Where special assistance or supervision is required or where the job has been broken down, the woman's rate will be between 75 and 85 per cent of the man's rate according to the degree of capacity shown. This agreement does not affect the employment of women on work commonly performed by them in Ministry of Supply establishments or other engineering establishments, or on suitable work hitherto performed by boys and youths under 21 years of age.

Registration of boys and girls in Britain

The Registration of Boys and Girls Order issued December 22 is designed to furnish the authorities with a complete picture of the activities of the 16 to 18 age-group. The population over 18 years of age is already required to register either under the National Service Acts or under the Registration for Employment Order of March 15, 1941.

In announcing the registration of boys and girls the Prime Minister stated in the House of Commons:—

"We must be careful particularly that our boys do not run loose during this time of stress. Their education, their well-being, their discipline, and the service they can render must all be carefully supervised. . . We have to think of the future citizens as well as of the business of carrying on the defence of the country. . . "

47645—2½

The order applies to all young persons between the ages of 16 and 18 except whole time members of a Civil Defence force and the classes of persons exempted from the National Service Acts. These include cadets at a military or air force college, lunatics, mental defectives, blind persons, and Dominions subjects not ordinarily resident in Britain. When registering, the boys and girls will be asked to state their occupation, if any, the full-time educational courses or evening classes which they are attending, and to furnish particulars about any youth organization or cadet unit to which they may belong.

To the Board of Education for England and Wales and the Scottish Education Department has been given the administration of the plan under the supervision of the Ministry of Labour and National Service. At registration, the young people are given a letter from the Minister of Labour suggesting that if they are not already a member of some approved youth organization, they should have an interview with the Youth Committee of the local education authority to discuss what form of national service they should undertake. The interview is not compulsory.

Young people devoting full-time to education will not be interviewed but will be asked to undertake some form of national service in the schools. No extra duties will be suggested for those working under strain in industry or whose hours after work are fully occupied by domestic work or studies. All others will be encouraged, but not compelled, to join some youth organization, either civil or military. Boys will be particularly urged to join one of the pre-service units such as the air, army or sea cadets. The entrance age of the last two is 14. Fifteen year old youths will be admitted to the Air Training Corps but may not become full members until they are 16. Boys under 16, although not covered by the Registration Order will be encouraged to continue their education as a preparation for further technical training when they enter the services. In certain areas the age limit for entrance into the Home Guard has been reduced from 17 to 16 to permit boys to undertake anti-aircraft and home defence duties. Elsewhere there are provisions for affiliating cadet units with Home Guard units. The National Association of Boys' Clubs and the British National Cadet Association are co-operating in these arrangements.

Excessive overtime work and war production

In the October 1941 issue of *The New South Wales Industrial Gazette* recently received, there is published a summary of the conclusions of a British Ministry of Supply Mission to Australia.

Dealing with the Australian wartime labour situation and especially in regard to the continuous working of excessive overtime, the Mission expressed its conclusions as follows:

> "In our opinion excessive continuous overtime is being worked in many shops. It has been found in England that such excessive overtime results, in a comparatively short time, in a considerable loss of efficiency. There is no doubt also that it has an adverse effect on the nerves of the men and that they become fertile ground on which the agitator may now sow his seed."

Referring to the Mission's conclusion in regard to excessive overtime work, the Australian Minister for Munitions stated that he agreed with the opinions of the British Supply Mission, but there were not enough skilled workers to enable shift work to be introduced in all munition factories. When shift work had been inaugurated in some Government factories, there was a marked tendency for men to secure work in private factories, where they could increase their earnings by overtime.

War and Post-War Social Security

Social security is termed "one of the great purposes of the nations fighting for freedom and for a civilization based on respect for human personality," in an international survey of recent developments entitled *Approaches to Social Security,* which has just been issued by the International Labour Office in Montreal.

"The idea of social security springs from the deep desire of men to free themselves from the fear of want. To realise this idea the causes of insecurity must be removed wherever possible, and the individual must be assured of that protection against the common risks of life which his own efforts do not avail to provide", states the I.L.O. in the survey.

The study describes the various social security schemes that have proved their practicability. In order to give a broad view and show up the essentials, the exposition has been highly condensed and simplified. Thus the picture gains in intelligibility and guidance is afforded for immediate action as well as for long-range planning of the post-war social economy.

The abundant material, which includes the most recent developments, is grouped under three headings. The principal types of social assistance are first passed in review. Then comes social insurance, that is to say, compulsory mutual aid. It is pointed out that "the strength of compulsory insurance resides in the association of the prospective beneficiaries and their employers in financial responsibility, in the non-lucrative and permanent character of its institutions, and in the specialisation of the latter for the services of benefits in cash and in kind and for preventive action." The branches of social insurance—workmen's compensation, sickness insurance, pension insurance, unemployment insurance—are considered with respect to their organization, scope, benefits and finance. "Deeply rooted in most of Continental Europe and in Great Britain, compulsory insurance has, in the interval between two World Wars, made rapid progress, though on somewhat different lines, in North and South America. Social insurance has made the principal contribution to the social security."

The progress toward comprehensive social security results from co-ordination and integration of social insurance and assistance. The unity of all the social risks is clearly realised. Those risks are essentially contingencies that imperil the ability of the working man to support himself and his dependants in health and decency. Social security responds to the deep-seated desire of mankind for freedom from fear in guaranteeing protection adequate in quality and quantity. For security is a state of mind as well as an objective fact.

The essence of social security is the genuine and rational economy of manpower. Prevention of time lost in production and adequate medical care to the workers and their families represent a vital war measure as it speeds up the output of armaments and the launching of ships. A comprehensive programme of social security is of momentous importance to the nations united for victory against aggression and for post-war reconstruction.

War and brutal aggression have driven home the recognition that it is the ineluctable obligation of the nations to consolidate their structure and to eliminate the causes of social insecurity. In releasing its study the International Labour Office purports to show what has been achieved and what still must be done to afford reasonable security for all who need it.

The study is preliminary to the reports on different branches of social insurance which are being prepared for the Inter-American Committee on Social Security for its next meeting to be held in Santiago-de-Chile.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

REPORTS were received during the past month from the Boards of Conciliation and Investigation established to deal with the following disputes:—

1. Between Martin Transports, Limited, Toronto, Ont., and its employees, members of the Canadian Brotherhood of Railway Employees and Other Transport Workers (supplementary report); and

2. Between the Dominion Textile Company, Limited, and certain of its employees, at St. Gregoire de Montmorency, P.Q., members of the National Catholic Union of Textile Workers of St. Gregoire.

The texts of the aforementioned reports will be found at the end of this statement.

Applications Received

In the month of February six applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour, as follows:—

1. From employees of Gar Wood Industries of Canada, Limited, Windsor, Ont., members of Local 195, United Automobile Workers of America. Approximately 175 workers were said to be directly affected by the dispute, which arose out of the employees' request for union recognition and a collective agreement providing for grievance procedure, seniority rights, wage adjustments, vacations with pay, etc. On February 27 Mr. Louis Fine, Chief Conciliation Officer of the Ontario Department of Labour, Toronto, was authorized to investigate the dispute in pursuance of powers vested in him as Industrial Disputes Inquiry Commissioner.

2. From employees of Irvin Air Chute, Limited, Fort Erie, Ont., members of the Irvin Air Chute Workers' Association, affiliated with the Canadian Congress of Labour. The dispute, relating solely to the amount of wartime cost-of-living bonus to which the employees are entitled, was said to affect 146 workers directly and 8 indirectly. The interested parties were immediately advised to refer the question to the Ontario Regional War Labour Board for decision.

3. From employees of the following six bakeries in Montreal, P.Q.: Dent Harrison and Sons, Limited; Jas. Strachan, Limited; A. and L. Strachan, Limited; Strachan Bros., Limited; Pain Supreme, Limited; and Pain Moderne Canadian, Limited. The applicants are members of Local 55, Bakery and Confectionery Workers' International Union of America, and the employers concerned are members of the Montreal Bakers' Association. The dispute was said to have arisen out of the employees' request for union recognition, increased wages, a 54-hour week, improved working conditions, and the reinstatement of four union members, who were alleged to have been unjustly dismissed. It was stated that 2,300 workers were directly affected by the dispute and 600 indirectly. Particulars concerning strikes which occurred in connection with this dispute prior to the submission of the application will be found in the article entitled "Strikes and Lockouts in Canada during February, 1942", appearing elsewhere in this issue. The baking industry being one to which the provisions of the Industrial Disputes Investigation Act do not apply, a Board of Conciliation and Investigation can be established to deal with a dispute between employers and employees in this industry only with the joint consent of both parties. The consent of the employers concerned was not given in this instance and accordingly a board was not established.

4. From employees of the Champion Spark Plug Company of Canada, Limited, Windsor, Ont., members of Local 195, United Automobile Workers of America. The dispute, arising out of the employees' request for a union agreement providing for grievance proredure, seniority rights, wage adjustments, vacations with pay, etc., was said to affect approximately 100 workers directly and an equal number indirectly.

5. From employees of the City Dray Company, Limited, Winnipeg, Man., members of Division 205, Canadian Brotherhood of Railway Employees and Other Transport Workers. The dispute, arising out of the employees' request for union recognition and revision of the existing agreement in regard to wages, hours of labour, and other working conditions, was said to affect 55 workers directly.

6. From employees of the Security Storage Company, Limited, Winnipeg, Man., members of Division 205, Canadian Brotherhood of Railway Employees and Other Transport Workers. The dispute, arising out of the employees' request for a union agreement in regard to wages, hours of labour and other working conditions, was said to affect 60 workers directly.

Boards Established

On February 13 the Minister of Labour established Boards of Conciliation and Investigation to deal with disputes between the Granby Consolidated Mining, Smelting and Power Company, Limited, the Princeton Tulameen Coal Company, Limited, and Tulameen Collieries, Limited, all of Princeton, B.C., and their respective employees, members of Local 7875, United Mine Workers of America. The boards were established on the recommendation of Mr. F. E. Harrison, Western Representative of the Department of Labour, Vancouver, B.C., who had been authorized to investigate the disputes as Industrial Disputes Inquiry Commissioner (LABOUR GAZETTE, February, 1942, page 133). On the nomination of the employees and the employers, respectively, Messrs. Clarence E. Smith, K.C., Calgary, Alta., and F. W. Guernsey, Vancouver, were appointed members of the boards and were requested to confer with a view to their making a joint recommendation of a person for appointment as third member and chairman of the boards.

Board Fully Constituted

The constitution of the Board of Conciliation and Investigation established to deal with a dispute between the Chrysler Corporation of Canada, Limited, Windsor, Ont., and its employees, members of Local 195, United Automobile Workers of America (LABOUR GAZETTE, February, 1942, pages 133-134) has been completed. The personnel of the board is as follows: the Honourable Mr. Justice J. G. Gillanders of the Supreme Court of Ontario, Toronto, chairman, appointed on the joint recommendation of the other two members; Mr. Drummond Wren, Toronto, appointed on the nomination of the employees; and Mr. W. G. Thomson, Windsor, appointed by the Minister of Labour on behalf of the employing company in the absence of a nomination from the company.

Other Disputes Referred to Industrial Disputes Inquiry Commissioners

On February 12 Mr. F. E. Harrison, Western Representative of the Department of Labour, Vancouver, B.C., was authorized, as Industrial Disputes Inquiry Commissioner, to investigate a dispute between Lakeside Coals, Limited, Wabamun, Alta., and its employees, members of Local 7894, United Mine Workers of America, in connection with which an application had been received in January for the establishment of a Board of Conciliation and Investigation (LABOUR GAZETTE, February, 1942, page 133). The report of the Commissioner, received on February 20, stated that he had succeeded in effecting an adjustment of the dispute. As a result of joint conferences with the Commissioner, the interested parties agreed to enter into negotiations with a view to the execution of a collective agreement, the agreement to be submitted to the National War Labour Board for approval in respect to the provisions concerning the basic wage scale and the payment of wartime cost-of-living bonuses.

On February 15, pursuant to the provisions of Section 5 of Order in Council P.C. 4020, as amended, Mr. F. E. Harrison, Western Representative of the Department of Labour, Vancouver, B.C., was authorized, as Industrial Disputes Inquiry Commissioner, to investigate the allegation by an official of the Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, that Western Canadian Greyhound Lines, Limited, Calgary, Alta., had practised intimidation for the purpose of interfering with the right of its employees to organize and to belong to the trade union of their choice. The report of the Commissioner had not been received at the end of the month.

On February 25, Mr. Gilbert Jackson, Toronto, Ont., was authorized, as Industrial Disputes Inquiry Commissioner, to investigate a dispute between Noranda Mines, Limited, Noranda, P.Q., and its employees, members of Federal Miners' Union 22834, American Federation of Labor, in connection with which an application for the establishment of a Board of Conciliation and Investigation had been received in November, 1941 (LABOUR GAZETTE, December, 1941, page 1467). Shortly after the receipt of the application, Mr. J. S. McCullagh of the Department of Labour, Ottawa, had been appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute. Mr. McCullagh's report, received on December 15, 1941, indicated that it would be necessary for the applicants to submit further evidence that the majority of the employees concerned were desirous of being represented by the union for purposes of collective bargaining. Subsequent negotiations between officials of the Department of Labour and representatives of the interested parties were not productive of effective results, and accordingly the dispute was referred to Commissioner Jackson for further investigation.

On February 28, pursuant to the provisions of Section 5 of Order in Council P.C. 4020, as amended, Mr. F. E. Harrison, Western Representative of the Department of Labour,

Vancouver, B.C., was authorized, as Industrial Disputes Inquiry Commissioner, to investigate an allegation by Shipyard Union No. 2, Amalgamated Building Workers of Canada, that the Burrard Dry Dock and Shipbuilding Company, Limited, Vancouver, had practised discrimination in the discharge of a foreman. Particulars concerning a strike in this connection on February 27 will be found in the article entitled "Strikes and Lockouts in Canada during February, 1942" appearing elsewhere in this issue.

Strike after Award

On February 6 a strike occurred of the employees of Ayers, Limited, Lachute Mills, P.Q., members of Local 9, United Textile Workers of Canada, following the failure of negotiations subsequent to the receipt of the findings of a Board of Conciliation and Investigation established to deal with a dispute between these parties. On the direction of the Minister of Labour, pursuant to the provisions of Order in Council P.C. 7307, as amended by Order in Council P.C. 8821, a strike vote was taken among the employees on February 2 under the supervision of Messrs. E. McG. Quirk and Liguori Pepin, officials of the Department of Labour (LABOUR GAZETTE, February, 1942, page 134). The ballot was worded as follows: "Do you intend to go on strike unless your employer, Ayers, Limited, consents to deal with the United Textile Workers of Canada, Local 9, Lachute Mills, Quebec, as the employees' bargaining agency with a view to the conclusion of a collective agreement?" Of 555 employees eligible to vote, 534 cast ballots, the result being as follows: employees voting "yes", 498; employees voting "no", 30; spoiled ballots, 6; total 534. The strike was terminated on February 27 following mediation by officials of the Department of Labour. The settlement provided that the company would enter into an agreement with its employees based on the recommendations of the Board of Conciliation and Investigation (LABOUR GAZETTE, December, 1941, pages 1473-1479) and that remuneration of the employees would be in conformity with existing governmental regulations. Particulars concerning the strike will be found in the article entitled "Strikes and Lockouts in Canada during February, 1942" appearing elsewhere in this issue.

Other Settlements

Early in February the Department of Labour was informed that an agreement had been signed on January 28 by the Chromium Mining and Smelting Corporation, Limited, Sault Ste. Marie, Ont., and a committee of its employees. A dispute between these parties had been dealt with in 1941 by a Board of Conciliation and Investigation (LABOUR GAZETTE, October, 1941, pages 1189-1202). Particulars concerning the agreement will be found in the article entitled "Recent Industrial Agreements and Schedules of Wages" appearing elsewhere in this issue.

On February 11 a strike of the employees of various gold mining companies in the Kirkland Lake district, Ontario, which had been called on November 18, 1941, for the purpose of securing recognition of Local 240, International Union of Mine, Mill and Smelter Workers, as recommended by a Board of Conciliation and Investigation (LABOUR GAZETTE, December, 1941, page 1468) terminated unsuccessfully. Particulars will be found in the article entitled "Strikes and Lockouts in Canada during February, 1942" appearing elsewhere in this issue.

A dispute between the Dominion Textile Company, Limited, and its employees at St. Gregoire de Montmorency, P.Q., members of the National Catholic Union of Textile Workers at St. Gregoire, is now considered to be settled, inasmuch as the interested parties had agreed in advance to be bound by the recommendations of the Board of Conciliation and Investigation established to deal with the dispute. The report of the board is printed below.

Early in February the Department of Labour was informed that an agreement had been signed on January 24 by MacDonald Bros. Aircraft, Limited, Winnipeg, Man., and its employees, members of Lodge 741, International Association of Machinists. The employees' application for the establishment of a Board of Conciliation and Investigation had previously been withdrawn following the reference of a dispute between the parties to an Industrial Disputes Inquiry Commission (LABOUR GAZETTE, December, 1941, pages 1468 and 1488). Particulars concerning the agreement will be found in the article entitled "Recent Industrial Agreements and Schedules of Wages" appearing elsewhere in this issue.

Supplementary Report of Board in Dispute between Martin Transports, Limited, and Its Employees

On February 13 the Minister of Labour received the findings of the reconvened Board of Conciliation and Investigation which dealt with a dispute between Martin Transports, Limited, Toronto, Ont., and its employees, members of the Canadian Brotherhood of Railway Employees and Other Transport Workers (LABOUR GAZETTE, October, 1941, page 1187).

The personnel of the board was as follows: His Honour Judge I. M. Macdonell, chairman, appointed on the joint recommendation of the other two members; Mr. J. D. McNish, K.C., appointed on the nomination of the employees; and Mr. V. A. Sinclair, K.C., appointed on the nomination of the employer. All three reside in Toronto.

The report of the board is signed by all three members, but Mr. Sinclair also submitted a dissenting report in regard to wage rates.

The board's recommendations on wages and cost-of-living bonuses have been referred to the National War Labour Board for decision. The board's recommendation that the question of relief to the motor transportation industry in the matter of prices, price control, freight rates, etc., should be dealt with by the appropriate Government authorities, has been referred to officials of the Wartime Prices and Trade Board for attention.

The texts of the board's report and Mr. Sinclair's minority report are printed below.

Supplementary Report of Board

To the Honourable the Minister of Labour,
Ottawa, Ont.

Re Industrial Disputes Investigation Act and re differences between Martin Transports, Limited, and its truck drivers and helpers, warehousemen, foremen, checkers, clerks, mechanics and helpers, etc., members of the Canadian Brotherhood of Railway Employees and Other Transport Workers.

Sir:

The Board of Conciliation, as re-constituted in the month of October last by the then acting Minister of Labour, has now the honour to submit its report.

The Board as originally constituted consisted of the Honourable Mr. Justice Roach, Chairman, Mr. Victor A. Sinclair, K.C., employer's representative, and Mr. J. L. Cohen, K.C., employees' representative. This Board brought in an Interim Report, dated June 27, 1941. Subsequently Mr. J. L. Cohen resigned from the Board and was replaced as employees' representative by Mr. J. D. McNish, K.C. Later Mr. Justice Roach resigned as Chairman, and upon the recommendation of the employees' and employer's representatives His Honour Judge I. M. Macdonell was appointed Chairman of the Board.

The re-constituted Board first met on the 31st of October, 1941, when it was found that the agreement between the Company and the Union had expired, and that the Interim Report had ceased to be effective, as its terms only provided for the period up to October 1, 1941. It was therefore necessary to go into all questions in dispute.

At the outset difficulty was caused by the fact that P.C. 8253 was passed a few days after the Board was newly constituted, and there was considerable doubt about its effect, as wages and cost-of-living bonus were both involved in the dispute. After consultation with the Department of Labour, however, it was decided that representations and evidence would be heard upon these questions, and a recommendation, which would have to be considered by the National War Labour Board, would be given. Mr. Sinclair expressed his doubt as to the authority of the Board to deal with the question of increased wages or cost-of-living bonus, and registered his objection to representations being heard with regard to these matters.

The Board at first attempted to bring the parties together by direct negotiations, and an attempt was made to take advantage of the negotiations which had occurred in the spring of the year during the sittings of the original Board to modify the existing agreement. It was found that the company contended that all financial questions should be submitted to the Board, and that the company would not agree to the closed shop and check-off which had been in force under the latest agreement between the parties, which terminated on the 1st of October, 1941. As no compromise was possible, it was necessary for the Board to hold numerous meetings, at which briefs were presented, evidence taken and argument heard. It is proposed to divide the Report into Part I, respecting the agreement with the union, and Part II, dealing with wages and cost-of-living bonus.

PART I

Agreement

The Board finds that at least a substantial majority of the employees of the company are members of the union. It was strongly contended by the employees' representatives that as a closed shop and check-up had been in

effect for over a year as a result of a modification of the previous agreement, these should be continued. Quite apart from the desirability or undesirability of union shop conditions generally, the Board for special reasons does not recommend the continuance of a closed shop for this business. It appears by reason of the closed shop agreement with the union the company is precluded from carrying on any business in the United States. This is because an international union affiliated with the American Federation of Labor is in control of the trucking business at certain border points, particularly at Buffalo and Detroit. Evidence was produced before the Board, which it accepted, that upon the abolition of the closed shop the company could employ members of other unions and the difficulty would disappear. It is hoped that business which may be secured through the United States might alleviate the situation to a considerable extent and so put the company in a better financial position to pay the increase in wages hereinafter recommended.

The Board feels that a clause with regard to check-off follows the disposition of the proposed closed shop, and should not be inserted in the agreement. The company might well, however, consider the advisability of honouring orders to pay signed by the men.

The company does not desire to sign any agreement with the union. The Board submits, however, that there has been a course of dealing established over a period of years, and that upon a proper construction of P.C. 2685, the men should be entitled to be represented by the union of their choice, with a view to reaching an agreement. In view of the undoubted strength of the union among the employees, the Board recommends that the agreement should be entered into with the union.

The Board has settled a suggested form of agreement, which is attached hereto as Exhibit I.

PART II

Wages and Cost-of-Living Bonus

In May, 1938, the company entered into an agreement with the union, in which was set out the rates of wages to be paid to the various classes of employees. In May, 1940, the company increased the wages of all classes of employees represented by the union by 2½ cents per hour. The only deviation from the rates of pay set out in the agreement of May, 1938, as altered by the agreement of May, 1940, was that shortly after the agreement had been entered into the method of payment of highway drivers was returned from an hourly basis to a trip rate basis.

By the Interim Report of the previous Board an increase of 1½ cents per hour for all employees was recommended, and this was put into effect by the company. It is not clear whether this increase was to be applied on wages or cost-of-living bonus, but it was agreed that it should be credited to any cost-of-living bonus awarded at any future date.

It is contended by the employees that the wage rates of highway drivers should be changed back to an hourly basis on a predetermined standard or yardstick, as there is no other adequate means of checking the trip rates which may be established in the future by the company. The Board does not consider there was sufficient evidence presented for it to come to the conclusion that an hourly rate basis of 24 miles, the yardstick proposed by the employees, should be adopted. The settlement of new trip rates and the adequacy of existing ones are dealt with in the agreement.

The contentions of the company are, firstly, that its rates of pay are not out of line with other comparable industries, and that it had complied with the provisions of P.C. 7440; secondly, that in any event it is not financially able to pay any increases to its employees, either by way of wages or cost-of-living bonus, and it states that it intends to apply to the National War Labour Board for relief.

The Board is strongly of opinion that conditions in the motor transport industry have never been satisfactory. Wages from the outset have been small for the class of work performed: the employees are mostly skilled labourers. The companies have not been able to do much to better the situation because of the "cut-throat" competition which apparently exists. This situation has been aggravated by regulations passed by the government since the war. The company has met with an enormous increase in gasoline cost, amounting to approximately $50,000 per year, and increased costs are anticipated in the coming year in the purchase of trucks, tires and other equipment. Owing to freight rates having been "frozen," the company cannot recompense itself for these losses, and the employees have to suffer for this.

Conditions in the past have resulted in unprofitable operations by the company. This finally necessitated a composition between the company and its creditors, under the Companies' Creditors Arrangement Act, and the company is now endeavouring to emerge from this situation. No dividends have ever been paid to shareholders, and administration expenses are low. The Board is strongly of the opinion that the general conditions of the

industry have largely contributed to the position in which the company finds itself: lack of profit and low wages for employees. These conditions were exhaustively dealt with by the Chevrier Commission, but apparently little, if any, action was taken. The Board strongly recommends that the motor transportation question should be considered by the proper authorities. It is obvious that unless there is proper control of rates, indiscriminate competition will continue and companies will be unable to charge rates which will provide adequate compensation for their employees or adequate returns on capital investment.

With regard to the company in question, the financial statements are far from strong, and the position with regard to 1942 is problematical. The company contends that it will operate at a loss of approximately $14,000 if present wage rates and present government regulations are continued.

After careful consideration of the evidence, the majority of the Board is of the opinion that the wage rates paid by this company are low within the meaning of Section 11, subsection 2, of P.C. 8253, and thinks that an increase in basic wage rates of 2½ cents an hour should be paid by the company. The Board is of this opinion notwithstanding the contention of the company as to its inability to pay, believing that operations may well be more profitable than estimated because of several factors, viz.: the prospect of increased business in the United States because of the readjustment of union affiliations; the fact that in the year 1941, before the passing of the Order in Council freezing cost of services, the company had increased certain of its freight rates and the benefit of this increase might be greater in 1942 than anticipated by the company; and that apparently owing to more efficient management, or the discontinuance of unprofitable business, or both, the company had bettered its total general position in 1941 over 1940 to the extent of $40,000, while its current position was bettered to the extent of the sum of $80,000. This betterment might well be maintained or improved in the year 1942.

The Board accordingly recommends to the National War Labour Board that the above increase in wages be put into effect. Attached as Exhibit 2 hereto is the schedule of wage rates which would bring into effect the proposed increase. If approved, this should be inserted as Article 24 in the Agreement. As previously indicated, Mr. Sinclair does not concur in the recommendations of the Board with regard to increase of wages, and will submit a Minority Report with regard to this question.

With regard to the question of cost-of-living bonus, the company contends that it comes within the provisions of P.C. 8253, Section 12 (b), and even apart from its inability to pay, in any event is not bound to pay any cost-of-living bonus until after the 15th of February, 1942. The employees, on the other hand, contend that the 1½-cent per hour increase given by the preceding Board was a cost-of-living bonus which the company was bound to pay under the terms of P.C. 4643, and having received this they now come within the provisions of P.C. 8253, Section 12 (a), and ask for the cost-of-living bonus as of the 27th of June, 1941 (the date of the passing of P.C. 4643). The company has not paid any cost-of-living bonus except in so far as the 1½-cent per hour referred to in the report of the previous Board is applicable thereto.

Owing largely, if not solely, to the price control of freight rates, gasoline, rubber, etc., the financial position of the company is such that it does not appear to be able to pay any cost-of-living bonus in addition to the increase in the basic wage rate recommended above.

The employees of this company, who are definitely in the low wage bracket, should not, if at all possible to prevent it, be deprived of a cost-of-living bonus, which it is admitted is necessary to maintain a reasonable standard of living. As previously indicated, we recommend that the question of relief to the industry in the matter of prices, price control, freight rates, etc., should be dealt with by the appropriate government authorities.

In view of the foregoing, the Board is of the opinion that the matter of cost-of-living bonus should be dealt with by the National War Labour Board, and recommends accordingly. For the information of that Board we are attaching, as Exhibit 3, the financial information submitted by the company.* We should point out in this connection, however, that should a cost-of-living bonus be granted by the National War Labour Board, the 1½-cent per hour increase which was granted in June, 1941, should be credited on any sum awarded.

All of which is respectfully submitted.

Dated at Toronto this 11th day of February, 1942.

(Sgd.) I. M. Macdonell, Chairman.
(Sgd.) J. D. McNish, Employees' Nominee.
(Sgd.) V. A. Sinclair, Company's Nominee.
(Dissenting report filed as to wage increase.)

EXHIBIT 1

MARTIN TRANSPORTS, LIMITED

Proposed Agreement to be entered into between the Company and the Canadian Brotherhood of Railway Employees and other Transport Workers as representing those employees.

Article 1

Promotion of Company's Interest

It is agreed by the Brotherhood, in consideration of the mutual covenants herein con-

**Editor's Note.*—Exhibit 3 is on file in the Department of Labour and a copy has been transmitted to the National War Labour Board.

tained, that the employees will be courteous and diligent in the performance of their duties, and will work at all times in the best interests of the Company.

It is further agreed by the Brotherhood that the employees will at all times protect the property of the Company from injury by themselves or others, when in their power to do so; that in the handling of vehicles and in the discharge of their duties generally, they will faithfully comply with the rules of the Company, and Federal, Provincial and Municipal laws, it being understood that none of the rules of the Company shall be in conflict with any of the provisions of this Agreement.

Article 2

Probationary Period of Service

Applicants accepted for employment will be given a probation period of thirty days, in which to demonstrate ability to carry on their respective duties properly, and unless notified to do the contrary within the thirty-day period, it will be understood that their application for employment has been approved, unless it later develops that false information materially affecting the acceptance of the application for employment was given, in which event such employees would be subject to dismissal by the Company. Applicants failing to supply a medical certificate shall be disqualified for service.

Article 3

Employees Defined

The words "Employee" or "Employees" as used in this Agreement shall be understood to mean any employee or employees filling positions enumerated in the wage scale herein.

Article 4

Discrimination and Committees

Employees will not be discriminated against for being members of the Brotherhood, nor for serving on Committees representing the employees. Employees will be granted leave of absence without pay for the purpose of serving on committees and their seniority rights will not be affected thereby, provided such leave of absence does not exceed a reasonable period. Reasonable notice of an employee's intention to serve on committees will be required.

Article 5

Courts and Investigations

Employees called upon to attend court or legal investigations at the request of the Company, shall be paid all time so lost at regular schedule rate of pay, and if required to travel away from home shall be allowed cost of transportation and reasonable expenses, except where such employees are found by the court to be at fault.

Article 6

Relief Work

Employees temporarily assigned to higher-rated positions shall receive the higher rate while occupying such positions; employees temporarily assigned to lower-rated positions shall not have their rates reduced. This rule shall not apply when an employee is demoted as a matter of discipline, or when he is placed in a lower rated position by the exercise of his seniority rights because of reductions in staff.

Article 7

Promotion and Seniority

(*a*) For the purpose of promotion and seniority, employees shall be grouped as follows:—

(1) Highway Transport Drivers, over the entire system.
(2) City Pick-up and Delivery Drivers, over the entire system.
(3) Warehousemen, over the entire system.
(4) Mechanics, over the entire system.

(*b*) An employee with not less than one year's seniority filling a regularly-assigned position, may transfer from one seniority group to another without loss of seniority by making a written application to his superior officer for a transfer, setting forth his qualifications and forwarding a copy of such application to the General Chairman; providing the applicant has the proper qualifications for the position applied for, transfer will be arranged within thirty days from date of his application, and the name of the employee so transferred shall be promptly removed from the seniority list of the group he left and placed on the seniority list of the group to which he is transferred. After the transfer has been effected, the employee will be required to have sixty days' cumulative service as a spare employee to the group to which he transferred before he is eligible to exercise his full seniority in bidding on vacancies or newly-created positions. Under no circumstances will any such employee be allowed to displace any regularly-assigned employee in the group until he has been assigned by a bulletin to a position other than to a temporary position in such group.

(*c*) A separate seniority list of all employees in each seniority group shall be posted in places accessible to the employees affected on January 1 and July 1 of each year, and such lists shall be open for protest for a period of fifteen days from the date they are posted. Upon the presentation of a claim by an employee, or by his authorized representative, that an error was made in his seniority rating, such claim shall be duly investigated by the Brotherhood and the Company, and if found in order, the correction of the seniority list shall be made as proved. Each seniority list shall show the name, the location and the date of entry into the service of all employees in their respective groups.

(*d*) In making promotions or filling vacancies, regard shall first be had to merit and ability, and merit and ability being equal seniority should govern.

(*e*) An employee who fails to report for duty, at the assigned hour without previously having given two hours' notice of his inability to so report, shall, if he does not report within ten days and give a satisfactory explanation, be regarded as having deserted the service and his name shall be removed from the seniority list.

Article 8

Reduction in Staff

(*a*) When forces are reduced, employees shall be laid off in the reverse order of their seniority and employees so laid off shall be given preference of re-employment on the same staff when the force is increased or when vacancies occur, and shall be returned to the service of the company in the order of their seniority. When re-employed within one year,

laid-off employees shall retain their seniority. Employees desiring to avail themselves of the provisions of this rule must file their name and address with the Head Office of the Company and receive a "Service Certificate", a copy of which shall be supplied to the General Chairman by the Company.

(*b*) Any employee who fails to report for duty when he is called, or who, within ten days from the date he is called, fails to give a satisfactory reason for not doing so, shall be considered out of the service.

Article 9

Discipline and Grievances

(*a*) No employee shall be disciplined or dismissed from the service without just cause. When an employee has been disciplined or dismissed, or when he feels that he has been unfairly dealt with, he shall have the right to appeal to his superior officer in the Company for an investigation, and to refer his grievance to the Chairman of his Local Committee or any other authorized representative of the Brotherhood, who may accompany him or represent him at any such investigation. Should a settlement of the grievance not be effected in this manner, it may be submitted to the Arbitration Committee, provided in Article 21.

(*b*) If an employee has been suspended or dismissed and is later found blameless, providing the employee so affected has appealed against the action of the company within three days from date of suspension or dismissal, he shall be reinstated and paid his regular wages for all time lost. In no event shall the company's liability for lost time on account of suspension or dismissal extend beyond a period of thirty days, unless extended by the Arbitration Committee.

Article 10

(*a*) Ten hours shall constitute a day's work for all warehousemen, pick-up and delivery men. An employee engaged in these occupations shall not be required to work beyond a spread of twelve hours in a twenty-four hour period.

(*b*) An employee shall not be required to take more than two hours for his meal period, which he shall be allowed between the fourth and sixth hour after starting duty.

(*c*) Any employee called for duty shall be paid at the schedule rate of pay for all time held, with a minimum of five hours' pay for each call. An employee released from duty for more than one hour and recalled for work shall be paid the minimum call of five hours each time he is so recalled, but if the second call in any one day is not completed within twelve hours from the beginning of the first call, he shall be paid at the overtime rate for all time held in excess of the said twelve hours.

(*d*) All warehousemen, pick-up and delivery men shall be assigned a fixed starting hour for work, and twenty-four hours' notice shall be given them of any change in their starting time, provided that in the event of an emergency condition beyond the Company's control it shall be required to give only one hour's notice of such change.

(*e*) Warehouse employees may rotate on day and night shifts where such an arrangement can be mutually effected between the Management and the Local Committee of the employees, and such arrangement is approved in writing by an authorized General Representative of the Brotherhood, otherwise preference of shifts in accordance with seniority shall prevail.

Article 11

Hours of Employment, etc. Highway Drivers.

(*a*) Highway Drivers shall be classified as follows:—

(1) Regular Drivers.
(2) Spare Drivers.
(3) Extra Drivers.

(1) Regular drivers are employees who by the exercise of their seniority are entitled to be assigned to regular runs which are properly advertised by written notice on the Bulletin Board.

(2) Spare Drivers are employees who do not hold a regular Highway run but are listed on the Spare Board. The number of names of drivers on the Spare Board shall be determined by the ability of the Company to give each Spare Board driver sixty hours' work each week, but this shall not be understood to mean that each Spare Board driver will be guaranteed sixty hours' work each week.

(3) Extra Drivers are employees who are on call, but whose names are not listed on the Spare Board.

(*b*) All vacancies occurring in regular highway runs shall be bulletined for a period of five days and shall be awarded to the senior applicant. The ensuing vacancies shall be bulletined and filled in the same manner and the ultimate vacancy awarded the senior man on the Spare Board who desires to bid for it. Senior highway drivers who do not desire to bid for regular highway runs shall be entitled to have their names placed on the Spare Board.

(*c*) Spare Drivers shall be entitled to fill vacancies which are created by the temporary absence of regular Highway drivers, and all extra trip and special trip runs. Spare Drivers shall be assigned to temporary highway vacancies or special trip duties on the basis of their seniority and shall continue on each such assignment until the regular driver returns to duty or the special trip duties are completed. Extra trip spare drivers shall be assigned thereto in the order of their seniority and their rotation on the Spare Board.

(*d*) Extra men will report for duty as required and shall be paid from the time required to report, unless work is not then available for reasons beyond the company's control.

(*e*) Wherever trip rates are used as the method of paying Highway Drivers, unless otherwise agreed, the rates to be paid during the currency of this agreement shall be the appropriate rate for each particular trip, as at the 1st of January, 1942. Any increase in the hourly rate hereinafter set for Highway Drivers now or hereafter given during the currency of this agreement shall be added to each particular trip rate on the basis that the 1½ cents per hour increase was added to the respective trip rates in June, 1941. In the event that new trip rates are inaugurated for which, as of the 1st of January, 1942, there was no trip rate, then the rate for such new trip shall be set in the manner agreed upon between the Company and the Union, regard being had to the rates then in force for comparable trips.

(*f*) A Highway Interchange Driver shall be paid at the schedule rate of pay for all addi-

tional driving time that may be necessary in an emergency to effect interchange on a scheduled run.

(*g*) A Highway Driver, not on a regular assignment, on a run of less than five hours, who is not returned to his home terminal or placed on another run within eight hours from the time of starting home, shall be paid at the schedule rate of pay for all time so held, as well as for any time which he may accumulate thereafter until he reaches his home or other terminal; the time paid for shall not exceed ten hours in any twenty-four hour period that he is required to remain at such terminal. The driver shall be required to work for all time so paid.

(*h*) A Highway Driver on a run of five hours' or more duration, who is required to remain at a distant terminal for more than fourteen hours, other than on a Sunday, shall be paid the schedule rate of pay for all time held in excess of fourteen hours.

(*i*) A Highway Driver called for work shall be paid the schedule hourly rate for all time held or required to wait after reporting for duty, except when the delay is caused by reasons beyond the control of the company.

(*j*) A Highway Driver delayed on route for more than one hour due to mechanical breakdowns, accidents, extreme weather conditions or other similar causes for which the driver is in no way responsible, shall be paid the schedule rate of pay for Highway Drivers for all time engaged while watching and waiting until relieved from duty. Where the driver is paid by trip rate the pay due him for waiting and watching shall be added to the trip rate.

(*k*) A Highway Driver called for work shall report one-half hour prior to his schedule time of departure and shall be paid his schedule rate of pay for such one-half hour period provided he fulfils the rules of the Company during that period.

Article 12

Classification, Hours and Overtime, etc., of Mechanics

(*a*) *Classifications*

Class A.—A mechanic who served his full and proper apprenticeship period for five years or more and who under the present regulations of the Ontario Department of Labour on graduating as a first-class journeyman, is qualified to do all necessary machining pertaining to the Motor Vehicle Repair trade; capable of performing all necessary machinery overhauling of motor, clutch, steering, transmission, differential and brakes; required to have a good knowledge of automotive electricity and sufficiently skilled without supervision of any kind to be able to detect bad workmanship and to take preventive measures in the repair of motors and all other car parts in order to reduce repair expense and road breakdowns.

Class B.—A mechanic who has served the required time as an apprentice, and upon the completion of such training period has successfully passed the required examination, but who has not had the opportunity to learn machining operations; capable of dismantling, assembling and adjusting motor, clutch, steering, brakes, transmissions and differential assembly, and required to have some knowledge of automotive electricity.

Class C.—Labourers.

Class D.—Apprentices. Employees engaged for the purpose of learning the motor vehicle repair trade, who are duly indentured under the Ontario Apprenticeship Act and who work under the close supervision of a Class A mechanic.

(*b*) Mechanics shall be responsible for the quality of their work and if negligent in the performance of their duties will be required to pay the cost of parts which may be damaged or broken as a result, and make the required repairs in their own time, provided such negligence can be proved by the Company to the Local Committee.

(*c*) Nine consecutive hours of service, exclusive of the meal period which shall not be longer than one hour, shall constitute a day's work for mechanics, labourers, and apprentices, and if required to work beyond the tenth hour in any one day, they shall be paid at the rate of time and one-quarter as from the beginning of the eleventh hour of service. Employees shall be allowed one day's rest in seven, not necessarily Sunday.

Article 13

Overtime, Holiday and Sunday Work

(*a*) Except as provided in Clause (*b*) hereof, all time worked in excess of ten hours in each day by any employee shall be paid for at the rate of time and one quarter.

(*b*) All time worked in excess of ten hours in each day by mechanics, labourers and apprentices, as specified in Article 12, shall be paid for at the rate of time and one-quarter.

(*c*) All employees shall be allowed one day's rest in seven, not necessarily Sunday. Any work performed on Sundays or any seventh day of rest, and on the following Statutory Holidays, shall be paid at the rate of time and one-quarter; New Year's Day, Good Friday, Victoria Day, Labour Day, Thanksgiving Day and Christmas Day. Should any of the said holidays fall on Sunday, the day observed by the public will be treated and paid for as the Holiday.

Article 14

Deadheading

An employee deadheading on Company's business shall receive his schedule of pay.

Article 15

Records

Records of the hours and wages of the employees shall be kept by the Company in proper form, and shall be available for inspection by properly authorized persons or committees.

Article 16

Arbitration

In the event that either party to this Agreement feels that any provision contained therein is causing undue hardship to either the Company or an employee, the party affected shall have the right to refer the matter to the Committee, provided for in Article 9 of the Agreement, and, failing satisfactory adjustment, to the Arbitration Committee as provided for in Article 21.

Article 17

Uniforms

Employees required to wear a uniform shall be supplied with them on the following basis:—

(1) In the first year of service the employee will pay 100 per cent of the cost.

(2) In the second year of service the employee will pay 50 per cent of the cost.

(3) In the third and every other year of service thereafter the uniform will be supplied free.

Article 18

Vacations

All employees in the service of the company for three years or more shall be allowed three days' vacation with pay each year.

Article 19

An employee, at the discretion of the Company, shall be permitted leave of absence without pay, for a period not to exceed ninety days, such permission to be obtained in writing. Unless the employee so furloughed reports for duty on or before the expiration of his furlough, his name shall be taken from the seniority roster, provided, however, that an employee who has obtained leave of absence as above shall be entitled to an extension beyond ninety days by making application in writing to the proper office of the Company in ample time to obtain such extension. If such extension is not granted then he must return to duty at the expiration of the period for which leave of absence was given or furnish proof of his inability to do so.

Leave of absence shall not be granted an employee for the purpose of engaging in work outside the company's service, except in the event of illness.

A notice of all leave of absence granted, or any extensions thereof, shall be given by the Company to the authorized representative of the employees and the Brotherhood.

Article 20

Change of Terminal

An employee, who on the instructions of the Company, moves from one terminal to another shall be entitled to free transportation for himself and the dependent members of his family, as well as household effects, mode of transportation to be determined by the Company.

Article 21

Settlement of Disputes

The complaint or grievance of any employee which is not adjusted in accordance with the provisions of Article 9 of this Agreement within thirty days from the date when such conduct or grievance is made known to the Company and the duly authorized representative of the employees, shall be adjusted by an Arbitration Committee consisting of two to be chosen by the Company and two by the employees' General Committee.

These arbitrators shall be chosen by both parties to this agreement within ten days from the date on which either party advises the other that the appointment of such a committee is desired, and in the event of failure of either party to make its selection within that period, the Minister of Labour for Ontario shall be requested to do so.

In the event that these four do not agree within ten days, the Minister of Labour for the Province of Ontario shall be requested to name the fifth member of the Committee who shall act as Chairman. The decision of the majority of the Committee thus composed shall be final and binding on both parties.

Article 22

Strikes and Lockouts

During the term of this Agreement the Company agrees that there shall be no lockouts, and the Canadian Brotherhood of Railway Employees and Other Transport Workers agrees that there shall be no strikes of its members employed by the Company.

Article 23

Bonding

Employees who may be required by the Company to give a Bond shall do so, at the expense of the Company.

Article 24

Rates of Pay

(*See* Report).

Article 25

Duration of Agreement

This agreement shall become effective upon date of execution, and shall remain in effect for a period of one year, and shall be renewed from year to year unless within sixty days before the termination hereof either party shall furnish the other with notice of termination or proposed revision or addition to any provision hereof. In such event, negotiations on any such proposal, revision or addition, shall take place between the parties within thirty days of such notice. All provisions not so terminated or proposed to be revised or added to, shall continue in full force and effect.

EXHIBIT 2

Article 24

Rates of Pay

City Drivers:

Who work within a radius of ten miles of the municipality in which they are employed:—

In municipalities of population of 40,000 or less—41½ cents per hour.

In municipalities of population of more than 40,000.

First six months—41½ cents per hour.

After six months—46½ cents per hour.

Warehousemen:

Not including employees engaged in clerical or office work.

In municipalties of population of 40,000 or less—41½ cents per hour.

In municipalities of population of more than 40,000—

First six months—41½ cents per hour.

After six months—46½ cents per hour.

Mechanical and Apprentices:

Two and one half cents per hour increase over what was paid to various classes as at January 1, 1942.

Highway Drivers:

For all time for watching, waiting or where otherwise referred to in this agreement as scheduled rate of pay—51½ cents per hour.

Four wheel trailer, double hook up or dolley—10 cents per hour additional.

Unless agreed upon by the parties, no change in the existing trips, trip rates or in the method of paying Highway Drivers shall be made during the currency of this agreement.

Minority Report

In the matter of the Industrial Disputes Investigation Act and of a dispute between Martin Transports, Limited, Employer and its truck drivers and helpers, warehousemen, foremen, checkers, clerks, mechanics and helpers, etc., members of the Canadian Brotherhood of Railway Employees and Other Transport Workers, Employees.

To the Honourable the Minister of Labour.

While I agree with the other members of the Board with reference to the refusal to order a closed shop or the check-off system, and have further concurred with them in arriving at terms of an agreement to be entered into between the Company and the Union, I entirely disagree with the remaining members of the Board as to any raise of wages being granted or recommended by the Board to the employees, upon the following grounds:—

While the Industrial Disputes Investigation Act still authorizes the Board of Conciliation under such Act to deal with wage allowances or other remuneration of employees, Order in Council P.C. 8253, Sec. 11 (1), provides that except by written permission of the National War Labour Board, established under such Order in Council, no employer shall increase the basic scale of wage rates paid by him at the effective date of this order, viz., November 15, 1941, and by Sec. 18 it is provided that this order shall supersede any inconsistent provisions of any Dominion law, order or regulation, so that the powers of the Board of Conciliation are now superseded by this Order in Council P.C. 8253 where inconsistent. The Martin Transports, Limited, is an employer within this Order in Council as defined by Sec. 2. Any Board of Conciliation is therefore without power to raise the basic scale of wages which was in existence on November 15, 1941, and no employer, within the meaning of this Order in Council, is permitted to increase his basic scale of wage rates without the written permission of the National War Labour Board.

While the Board of Conciliation may still deal with wages so long as it does not increase the basic scale of wage rates, the power to increase the basic scale of wage rates is taken away from it by this Order in Council. Therefore the recommendation for an increase in the basic scale of wages of 2½ cents per hour, as recommended by the other two members of the Board, is entirely beyond their jurisdiction and without effect. Both the employer and myself as representative of the employer, have, from the effective date of this Order in Council P.C. 8253, taken exception to the power of the Board to make any recommendation as to the increase in the basic wage rate and all submissions made on behalf of the employer were made subject to this objection.

The National War Labour Board, to which this power is given by this Order in Council, has not in any way delegated its authority to this Board, nor is the National Board authorized by such Order in Council to delegate its authority, except as to Regional Boards, and under the rulings of the National Board the class of business carried on by the employer is reserved to be dealt with by the National Board and not by the Regional Boards. It is inconceivable in any event that the National War Labour Board would be satisfied to accept the findings of a Board of Conciliation on evidence heard only by the Board of Conciliation and not transcribed by any official stenographer and which, in this case, involves a recommendation which will practically put the company into bankruptcy and increase its annual outgo by $30,000 a year. Furthermore, any increase in the basic rate of wage is contrary to the declared policy of the Government, which fixed the wage ceiling at the basic rate of wage existing on November 15, 1941, and it would appear to me that the attempt to raise this basic rate of wage, as made by the majority of the Board in their report, violates in every way the declared policy of the Government and should not be permitted.

In addition, I would urge very strongly that on the merits outside the statutory objection to the finding of the Board, no such finding is justified by the evidence. At the time of the appointment of the Board in this dispute, the Board was governed by the provisions of Order in Council P.C. 7440, and it was so governed up to the time of the effective date of Order in Council P.C. 8253 on November 15, 1941, and it is clearly apparent that Martin Transports, Limited, in the basic rate of wages paid to its employees, was well within the provisions of Order in Council P.C. 7440 and that no order increasing the basic rate of wages could have been given under P.C. 7440. The company had given an over-all wage increase of 2½ cents an hour in May of 1940, which brought its rate to the highest wage rates that had been paid by the Company. Subsequently, in June of 1941, after this Board was constituted and upon the recommendation of the then chairman of the Board, the company agreed to further increase the rate of wages paid by 1½ cents an hour up to the 1st of October, 1941, the date of expiry of the then existing contract

between the employer and the employees. This increase was purely voluntary upon the part of the employer, as the rate of wage was fixed by agreement until the 1st of October, 1941. The company has since maintained this increased wage of 1½ cents per hour.

Having complied with the provisions of Order in Council P.C. 7440, which governed at the time of the appointment of the Board, and being therefore in a position to deny any increased rate of wage under P.C. 7440, the effect of the recommendation of the majority of the Board to now increase the rate of wage 2½ cents per hour, is an attempt to usurp the power reserved to the National War Labour Board, and the attempt is thus made to use Order in Council P.C. 8253 as an instrument to raise the basic rate of wages, whereas the whole intention, in accordance with the policy of the Government, was to put a ceiling on wages and prevent increase in basic rates of wages. If this were allowed, there would be a complete circumvention of the declared policy of the Government to put a ceiling on wages and prevent increases in the basic rate of wages and to change the entire basis upon which the question of the fair and reasonable nature of the wages paid was governed.

In addition to the fact that such increase in wage rates was not justified under Order in Council P.C. 7440, the company contends, and has furnished evidence in support of its contention, that it is financially unable to pay any additional wage. The present company took over the assets of the former company, which was unable to meet its liabilities, under the provisions of The Creditors Arrangement Act, the creditors of the company being paid only 20 per cent of their claims in cash and the balance of their claims being converted into capital stock of the company. In addition, fresh money was put in and the company was reorganized. At no time in the history of the company has it ever paid a dividend to shareholders. The Directors' fees and Administrative Officers' charges are exceedingly low.

An exhaustive brief has been filed by the company at the request of the Board showing its financial position on the 31st of December, 1941, and an estimate for the year 1942.* This estimate is based upon the volume of business being the same, maintenance of the freight rates at the increased scale fixed six months ago, the operation costs experienced in the last half of 1941, and that no cost-of-living bonus or further increase in wages be required to be paid. The company showed that for the year ending the 31st of December, 1940, it had a net profit of $1,332.59; that in 1941 it made an increase in profits for the first half of the year, before providing for taxes, of $34,391.09. During the second half of the year it was met with increased costs of gasoline and gasoline tax amounting to between $75,000 and $95,000 per year, increase of wages of 1½ cents per hour granted on the recommendation of the Board amounting to $17,000, and costs of Unemployment Insurance amounting to $6,000 per year, so that there was a loss in the second half-year term of $3,417.17—November showing a loss of $7,076.21 and December $8,268.08. Normally, the second half of the year is more profitable.

In the forecast in its brief for 1942 there would be an estimated net profit on the basis given above of $4,328.91, but since making this estimate, the discount which it previously secured on tires has been done away with and therefore the expenditure for tires, if it purchased the same number as last year, would show an increase in price of $18,870 to be paid. Taking this off the estimated net profit of $4,328.81, it would have a deficit of $14,542 for the year 1942 on the same rate of wage as now being paid. If, in addition to that the company was forced to pay the 2½ cents per hour recommended by the majority of the Board, this would cost the Company a further $30,000 at least, making a deficit for the year of about $45,000, relying on other things being equal. With the upset conditions and war conditions, possible changes in regulations affecting gasoline, oil and tires, the chances are that the loss for the year would be still higher.

The main suggestion made by the majority of the Board in their report is that better management would do away with this loss or American business might increase. Under the regulation of prices now in effect, this company would not be allowed to raise its freight rates to deal with the situation, and it would appear that the recommendation made by the other members of the Board would simply mean that the company would be bankrupt at the end of a year's operations, as it has no reserves, has never paid shareholders any dividends and has carried on at a very low cost.

On the further moot question as to rates of wages paid by competitors, it was difficult to get any basis of comparison. Martin Transports, Limited, operates from Montreal to Windsor and to Niagara Falls. Competition west of Toronto is not so much of a cut-throat variety as that east of Toronto. East of Toronto there is a great deal of cut-throat competition and the rates of the cut-throat type of competition must be met by

* *Editor's Note.*—*See* footnote on page 266.

the company to retain business. Different companies get different kinds of service on the trip runs, so that it is hard to make any comparison. Evidence was called from the managers of two companies—the Metropolitan Company and the Jack Marsh Company, and these were the only companies from which evidence was taken, where cross-examination could be had of the witnesses.

So far as the Metropolitan Company was concerned, it had recently entered into an agreement with the union increasing rates, and just what the effect of its increase in rates would be, could not be told.

Clearly the rates of the Jack Marsh Company which operates from Oakville to Montreal, were lower than those of Martin Transports, Limited, so that, of the two companies inquired into by oral evidence, one was higher, owing to recent union organization, and the other was lower.

Smith Transport was another company which gave two different reports as to the rates of wages paid. I would not consider that any comparison of its rates should be used in view of the different statements as to the rates paid, unless the owner of the company was examined on oath and open to cross-examination. So far as the other companies were concerned, Martin Transports gave the best information it could give as to the rates paid. Some were up and some were down. So far as my recollection of the evidence given is concerned, it would not appear to me that there could be said to be any rate generally prevailing among the competing companies which were doing work similar to Martin Transports, Limited, and that there could therefore be no justification for recommending an increase in the rate of pay as being a prevailing rate. No such thing as a prevailing rate, in my opinion, exists.

I would therefore most strongly urge that there is no jurisdiction in this Board to raise the basic rate of wage 2½ cents per hour as recommended. It violates the provisions of Sec. 11 (1), of P.C. 8253, and the attempt to make such recommendation is an usurpation of the powers of the National War Labour Board and there has been no delegation of powers by the National War Labour Board to this Board which would justify any recommendation for raise of wage, and, if the rates of wages are to be raised, they could only be raised after full hearing by the National War Labour Board, personally and in accordance with provisions of Order in Council P.C. 8253.

I would also find that on the merits Martin Transports, Limited, was paying the rates of wages which were required under Order in Council P.C. 7440 at the time this Board was appointed and up to the time the said Order in Council was repealed and that there was no justification for any raise of rates of pay under Order in Council P.C. 7440, and that the attempt now to raise the basic scale of wages under the provisions of Order in Council P.C. 8253 is a complete reversal of the Government policy of fixing a wage ceiling for which said Order in Council was passed and should not be countenanced.

I would most strongly urge that the report of the majority of the Board in favour of an increase in the basic rate of wages of 2½ cents an hour is beyond the jurisdiction of this Board, contrary to the provisions of Order in Council P.C. 8253 and the declared policy of the Government against increase of wage rates, and also against the merits of the case and entirely beyond the financial ability of Martin Transports, Limited.

All of which is respectfully submitted,

Dated at Toronto this 12th day of February, A.D., 1942.

(Sgd.) V. A. Sinclair, Company's Nominee.

Report of Board in Dispute between Dominion Textile Company, Limited, and Its Employees at St. Gregoire de Montmorency, P.Q.

On February 6 the Minister of Labour received a unanimous report from the Board of Conciliation and Investigation established to deal with a dispute between the Dominion Textile Company, Limited, and certain of its employees at St. Gregoire de Montmorency, P.Q., members of the National Catholic Union of Textile Workers of St. Gregoire. (LABOUR GAZETTE, September, 1941, page 1040).

The personnel of the board was as follows: the Honourable Mr. Justice Garon Pratte, of the Quebec Superior Court, Quebec, P.Q., chairman, appointed on the joint recommendation of the other two members; Mr. J. D. Cote, Montmorency Village, P.Q., appointed on the nomination of the employees; and Mr. Guy Roberge, Quebec, P.Q., appointed on the nomination of the employer.

In accordance with the provisions of Section 63 of the Industrial Disputes Investigation Act, the interested parties had agreed in advance to be bound by the recommendations of the board (LABOUR GAZETTE, September, 1941, pages 1087, 1088).

A translation of the board's report is printed below.

Report of Board

The Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Ont.

Sir:—

The Board of Conciliation and Investigation established by you to deal with a dispute between the Dominion Textile Company, Limited and a group of its employees at St. Gregoire de Montmorency, has the honour to submit its report.

The Dominion Textile Company, Limited, during the first half of 1941, in order to remain in a position to meet the competition from plants more modern than its own, has changed greatly the disposition of the card room in its St. Gregoire mill. Using the modern technique, the company grouped in the same room a great number of carding machines which up to then had been distant from one another in different rooms; old-fashioned machines were replaced by others of the same type but of recent models; and a certain number of new machines were installed. There is no need to mention that the modernization of the card room was to have important results as far as the workers there employed were concerned. The room thus changed would require less hands than before, and the course of operations being changed by a more convenient arrangement of the machines and by the addition of new machines, the work required from the employees in this room would necessarily not be the same. This from the standpoint of the employer was to bring about the opportunity to revise the wages so that they would correspond with the new work. For this reason, on June 21, 1941, the company posted the wage rates it intended paying to the employees of the card room as from July 5.

It must be noted here that in the card room some employees doing work comparable to that of labourer are paid on an hourly basis, while many machine operators whose zeal can have an effect on production are on piece-work. In this last case, the unit price is supposed to be set in such a way that the worker can, in return for a week of honest labour, receive the basic wage that the employer has previously established, after giving due consideration to the value of the goods produced and the orders on wages, as adequate pay for the average employee on a given work.

Immediately after the posting of the new wage rates, the employees expressed their dissatisfaction. Those who were supposed to be paid on an hourly basis claimed that the work required from them was too strenuous, while those on piece-work maintained that the unit prices were so low that they would be unable to earn the amount set as the basic wage. The organized workers informed their union of their grievance. The union took up the matter and proceeded to examine the situation with the employer, at the same time enjoining the employees from leaving the mill as they had said they might. They would not listen to their authorized leaders, and on July 5 they refused to work at the rates proposed by the company and left the establishment. This stoppage of work lasted until the 10th of July. At this date, after mediation by an officer of your Department, work was resumed under the terms of an agreement that was supposed to settle temporarily the dispute. This agreement is joined to the present report as annex "A". During the time stipulated in this agreement, the employees were to make a loyal trial of the new working conditions. This trial period was rather short, because on July 31 the employees were sending to your Department a request for the establishment of a Board of Conciliation and Investigation.

These were the nature and the circumstances of the dispute we were to deal with.

The Board held several sittings in a hall of the St. Gregoire mill near the card room. This allowed us to observe the employees concerned at work, to look into the individual tasks, and to examine the various operations. We heard the testimony of twelve (12) employees representing the various classes of workers concerned, and of two cost accounting experts. For nearly three weeks these two experts watched the employees at work and accurately took down the time taken by each for every operation on his own particular work during a cycle of the operations. The time thus taken by an employee, multiplied by the number of cycles occurring during the day's work, was bound to give the time taken by the employee to accomplish the various tasks required from him by the employer. In all cases, the testimony of these experts was that the burden of work imposed by the employer was not too heavy and could be shouldered by the employees.

We also heard the foreman of the St. Gregoire shop and the foreman of a similarly arranged shop at the Sherbrooke mill of the Company. According to this last witness, the employees operating the carding machines at the Sherbrooke mill have been doing for many years, without complaining, the same work that the Company requires from its employees at St. Gregoire and which they claim they are unable to do. In order to avoid any possible mistake in this matter, we proceeded to Sherbrooke where we established the accuracy of this last testimony.

In the course of our investigation the Company sent a letter to the chairman of our Board acknowledging that, after having given notice of the rates it intended to enforce, it had realized that it was advisable to make certain changes both in the setting of machines and in the distribution of labour. Some of those changes had already been made when the inquiry began; the others were to be made at once. The letter of the Company is attached to the present report as Annex "B". In our recommendations, it will be noted that these changes are considered to have already been made.

The list of the different classes of workers and also the recommendations of the Board concerning them follow:—carders, strippers, lap carriers, lap layers, doffers, also workers operating lap winders, drawings, slubbers, interdrafts and speeders.

The evidence brought before the Board, including the changes that the employer has pledged himself to put into effect proves conclusively that in no case was the work required of the workers in excess of what is normally demanded of the average worker. And, in particular, as far as the piece-workers are concerned, it has been shown that the average worker is able to complete all required operations and still yield the output which will enable him to earn the basic wage provided for each case at the unit rates offered by the employer.

The Board therefore cannot recommend any change in the work demanded of the different classes of workers, nor in the unit prices fixed as far as the piece-workers are concerned. It goes without saying, however, that all the workers must enjoy the benefits which may be conferred upon them by the Orders in Council passed under the War Measures Act (Chapt. 206 of S.R.C. 1927) wherever they can be applied.

It appears, therefore, that if the workers had some reason to be dissatisfied with the changes proposed by the employer, their grievances were not such that they could not be settled without interrupting work. In the circumstances, it seems obvious that the dispute was the result of a psychological factor among the workers, which became more acute because the company seemed decided to act rapidly. The workers, not grasping the scope of the changes made by the company, and preoccupied only with the fact that they were asked to operate more machines than previously, did not realize that their work had become simplified and declared themselves unable to do the job even before having given it a trial. And when they went back to work for a trial period, they did not give everything they had, convinced as they were from the start that they were being asked to do the impossible. Yet, the employer acknowledges the fact that the workers of St. Gregoire stand comparison with those of any other mill in Canada.

We found that the conciliatory spirit and the comprehension of their mutual problems shown by the mill superintendent and by the union head should prevent any conflict, and, in case of conflict, should help to bring forth a settlement insuring each party that all their essential rights will be respected. But this goodwill can only produce results if the employer feels that the union with which he deals enjoys the full confidence of its members. In the case under review, the production of the mill would not have been stopped at the expense of the employer, of the workers and of the community, if the workers had followed the advice of their authorized leaders. The heads of the union well understand that while they have the duty to demand the rectifying of the workers' just grievances, they also have the duty to make their fellow-workers understand their obligations and the right to expect that their wise policies will be adhered to.

It is obvious that in the settlement of technical matters of such complexity as that of fixing piece rates, there will always remain problems to be solved. This is why the Board expresses the wish that the employer and the union study together those matters in order to prevent conflicts. In any case, the parties should be able to settle all conflicts which might arise by using the method put forth in the agreement signed on the 17th of June, 1941, that is, by private, arbitration and without interrupting work.

We list in Annex "C" all the tasks asked by the employer of the workers of the different classes party to the dispute.

Quebec, February 5, 1942.

(Sgd.) Garon Pratte,
(Sgd.) Joseph Daniel Côté,
(Sgd.) Guy Roberge.

ANNEX "A"

SETTLEMENT OF THE CASE OF THE CARD ROOM AT THE MILL OF ST. GREGOIRE OF MONTMORENCY, DOMINION TEXTILE CO.

July 10, 1941.

1. The employees shall resume work by making a loyal trial of the new working conditions.

2. Pieceworkers shall continue to receive the same salary as they had before July 5, 1941, and the guarantee of this salary will remain in force until August 1, 1941, at such date or before, if the conditions above are not judged satisfactory, the Syndicate can request the formation of an Arbitration Board as provided in

the agreement between the Company and the Syndicate, in date of June 17, 1941, or as provided by Provincial or Federal legislation. In that case, the said guarantee shall continue until the decision of the Board has been announced.

If any pieceworker earns under the new conditions more than the guaranteed rates, he will be paid the higher amount.

3. Hourly rates, for cardmen and strippers are fixed, definitely, at 36 cents per hour.

In the case of lap carriers, the rate of 36 cents per hour is guaranteed for a period of two months; after that, the rate applicable to those workers shall be the regular rate applicable to labourers in the mill, 33 cents per hour.

If the above conditions are not judged satisfactory, the Syndicate can request, before August 1, 1941, the formation of an Arbitration Board as provided in the agreement between the Company and the Syndicate, in date of June 17, 1941, or as provided by provincial or federal legislation.

4. No employee shall be dismissed or intimidated, if he returns to work.

5. Both parties undertake to amend their agreement of June 17, 1941, in such a way as to prevent in the future any further sudden stoppages of work such as have just occurred.

Recommended by Federal Conciliator,
(Signed) E. M. G. QUIRK,

Approved by The Dominion Textile Co.,
(Signed) W. D. FLEMING,

Approved by The Textile Syndicate of Montmorency,
(Signed) HONORE D'AMOUR,

ANNEX "B"

DOMINION TEXTILE COMPANY LIMITED
710 VICTORIA SQUARE,
MONTREAL, CANADA

September 27, 1941.

Hon. Judge GARON PRATTE,
346 Chemin St. Louis,
Quebec City, Que.

Dear Judge Pratte:—

This will serve to confirm the statements I made Friday when giving evidence regarding changes in the jobs which we have already made and also those which are going to be made. We list these below:—

Changes already made since First Contemplated Lay-out:

(1) The addition of one lap carrier making two in all; these men remove the fly from underneath the card as well as carry two sets of laps for each card. It was felt that the original job of one lap carrier was too heavy.

(2) Lap Winders: Under recommendation of the machinery manufacturers, we were advised that one operator could handle three lap winders and at a required efficiency of 70 per cent; our experience, both in Montmorency and in Montreal, proved that the job was too heavy, so we reduced the number of machines from three to two, and increased the percentage of efficiency required from 70 per cent to 75 per cent.

(3) Inter-Drafts: The original lay-out for these twenty frames was one tender for four frames with the total of three doffers for the twenty frames; our experience indicated that we would have a more satisfactory running condition if each operator was given a doffer for his four frames; we therefore put in two extra doffers making a total of five tenders and five doffers on the twenty frames.

Changes found necessary and yet to be made:

(1) Drawings: In order to balance the production from the drawing frames with that of the cards, the speed of these frames will be reduced approximately 18 per cent; this will improve the running condition very considerably and, in addition to this change, on the recommendation of the R. E. Loper Company representatives, we are reducing the percentage of efficiency required from 90 per cent to 88 per cent, the net result will be that the piece-work rates will be approximately 20 per cent higher than to-day with a greatly improved operating condition.

(2) Slubbers: It was found that, out of the eight slubbers, four of Woonsocket make were running six turns slower on the front roll than the other four frames; as these frames were supposed to have been operating at the higher speed, the piece-work rates had been calculated accordingly. Now that we have discovered the difference, piece-work rates on these four slubbers will be corrected to compensate for the lower speed which will mean that the rates will be increased approximately 3·2 per cent for production from these four machines.

(3) Speeders: The original lay-out was two doffers for fourteen frames; the mill reported that this condition was such that, in their opinion, a third doffer was advisable and this hand has already been added.

Apart from the changes mentioned above, there have been certain increases granted in the basic wage to several occupations and also percentage of efficiency required has been reduced for certain types of work.

We might add that, if in the future, conditions change or we find that further changes should be made, we will do so immediately.

As explained, it is our hope that the Syndicate will eventually be able to strengthen their position in relation to the control of their members so that, in future, it will be possible for the management and the representatives of the Syndicate to discuss and agree on whatever changes are necessary, thus obviating any recurrence of a disagreeable nature such as we have experienced in the past few months.

Again thanking you for your fine co-operation,

Yours respectively,

Dominion Textile Company, Limited,

(Sgd.) F. R. DANIELS,
Manager of Grey Mill Operations.

ANNEX "C"

WORK ALLOTMENTS

DOMINION TEXTILE CO., MONTMORENCY BRANCH

MONTMORENCY CARD ROOM

February 3, 1942.

Card Men—
45/46 cards per man.
Put up laps (2/3 per 8 hour shift).
Doff cans (6 per 8 hour shift).
Clean normally once per 8 hour shift.
Clean thoroughly at week-ends.

Lap Winder Tenders—
2 machines per tender.
Creel 322 cans per 8 hour shift.
Doff 316 laps per 8 hour shift.
Clean normally once per 8 hour shift.
Clean thoroughly at week-ends.
75 per cent production asked to make basic rate.

Drawing Tenders—
2 on 60 deliveries and 1 on 48 deliveries.
Put up 365 laps per 8 hour shift,
Doff 365 cans per 8 hour shift.
Clean normally twice per 8 hour shift,
Clean thoroughly at week-ends—60 deliveries.
88 per cent production asked to make basic rate.

Slubber Tenders—
4 Frames per tender.
Creel 250 cans per 8 hour shift.
Help doffer to doff.
Clean normally once per shift.
Clean thoroughly at week-ends.
84 per cent production asked to make basic rate.

Inter-draft Tenders—
4 Frames per tender.
Creel 207 cans per 8 hour shift.
Help doffer-cleaner to doff and clean.
Clean thoroughly at week-ends.
85 per cent to 89 per cent production asked to make basic rate depending on hank run.

Speeders—
4 Frames per tender 3·75 hank, 3 frames per tender on 3·00 hank.
Creel 539 roving per 8 hour shift.
Clean normally once per shift.
86/87 per cent production asked for to make basic rate.

Mop Yarn Speeders—
4 Frames per tender.
Varying creeling depending on count and twist run.
Clean normally once per shift.
Clean thoroughly at week-ends.
75/90 per cent production asked for to make basic rate depending on hank and twist run.

Doffers (9)—
1 on 8 slubbers—doff and clean.
5 on 20 inter-drafts—doff and clean.
3 on 14 speeders—doffing only.

STRIKES AND LOCKOUTS IN CANADA DURING FEBRUARY, 1942

THE following table shows the number of disputes, workers involved and time loss for February, 1942, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in man working days
*February, 1942.....	16	2,901	23,997
*January, 1942.....	13	2,715	46,606
*February, 1941.....	8	1,787	7,514

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes".

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

While there was an increase in the number of disputes as well as in the number of workers involved during February there was a decrease of nearly 50 per cent in time loss, the strike of gold miners at Kirkland Lake, Ont., having terminated on February 11, the time loss due to this dispute being, therefore, only 13,000 days. Strikes of textile workers at Lachute Mills, P.Q., and automobile parts workers at Windsor, Ont., caused time loss of 9,000 and 1,000 days respectively, while the other 13 disputes involving 686 workers resulted in time loss of only 997 days. In January most of the time loss was due to the strike at Kirkland Lake. In February, 1941, the disputes of importance were three strikes of coal miners in Nova Scotia.

One dispute, involving 1,500 workers, was carried over from January and 15 commenced during February. Of these 16 disputes, 13 were terminated during the month. Three resulted in favour of the employers involved, five in compromise settlements, while five were indefinite. At the end of the month, therefore, there were three strikes or lockouts recorded as in progress, namely: sash and door factory workers, Vancouver, B.C., automobile parts workers, Windsor, Ont., and metal workers, St. Thomas, Ont.

The record does not include minor disputes such as are defined in a previous paragraph,

STRIKES AND LOCKOUTS IN CANADA DURING FEBRUARY, 1942*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†
	Establishments	Workers		
(a) Strikes and Lockouts in progress prior to February, 1942.				
MINING, ETC.—				
Gold miners, Kirkland Lake, Ont.	8	1,500	13,000	Commenced Nov. 18, 1941; for union recognition; terminated Feb. 11; return of workers; in favour of employers.
(b) Strikes and Lockouts commencing during February, 1942.				
MINING, ETC.—				
Coal wheelers, North Minto N.B.	1	(a) 16	16	Commenced Feb. 25; against reduction in number of wheelers; terminated Feb. 25; negotiations; in favour of employer.
Asbestos miners, East Broughton, P.Q.	1	100	200	Commenced Feb. 27; for union agreement and increased wages; terminated Feb. 28; work resumed pending settlement; indefinite.
MANUFACTURING—				
Vegetable Foods—				
Bakery workers, Montreal P.Q.	2	60	138	Commenced Feb. 15; for union recognition, increased wages, reduced hours and against dismissal of two workers; terminated Feb. 17; conciliation (federal), work resumed pending proceedings under I.D.I. Act; indefinite.
Boots and Shoes—				
Shoe workers, Tillsonburg, Ont.	1	10	60	Commenced Feb. 5; for union recognition; terminated Feb. 13; negotiations; compromise (committee recognized).
Textiles, etc.—				
Textile workers, Lachute Mills, P.Q.	1	500	9,000	Commenced Feb. 6; for union recognition and certain wage increases; terminated Feb. 27; conciliation (federal); compromise.
Men's clothing cutters, Montreal, P.Q.	1	15	30	Commenced Feb. 13; against reduction in piece rates; terminated Feb. 16; conciliation (provincial); compromise.
Miscellaneous Wood Products—				
Sash and door factory workers, Vancouver, B.C.	1	17	75	Commenced Feb. 24; for union agreement, 44-hour week, etc.; unterminated.
Basket factory workers, Forest, Ont.	1	61	90	Commenced Feb. 27; for increased wages; terminated Feb. 28; negotiations, work resumed pending settlement; indefinite.
Metal Products—				
Automobile parts factory workers, Windsor, Ont.	1	215	1,000	Commenced Feb. 23; for union recognition; unterminated.
Metal workers, St. Thomas, Ont.	1	99	140	Commenced Feb. 27; for cost of living bonus; unterminated.
CONSTRUCTION—				
Buildings, etc.—				
Truck drivers, North Vancouver, B.C.	1	12	12	Commenced Feb. 23; for increased wages; terminated Feb. 24; conciliation (federal), work resumed pending reference to Regional War Labour Board; indefinite.
Shipbuilding—				
Carpenters, etc., Vancouver, B.C.	1	88	44	Commenced Feb. 27; against demotion of charge hand; terminated Feb. 27; conciliation (federal), work resumed pending investigation; indefinite.
Miscellaneous—				
Truck drivers, Shipshaw, P.Q.	1	144	120	Commenced Feb. 24; for increased rate per hour; terminated Feb. 27; return of workers and replacement; in favour of employer.

STRIKES AND LOCKOUTS IN CANADA DURING FEBRUARY, 1942*—*Concluded*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†
	Establishments	Workers		
(b) Strikes and Lockouts commencing during February, 1942—*Concluded*				
TRADE—				
Ice packers, Hudson, P.Q.	1	*(b)* 4	12	Commenced Feb. 2; for increased wages; terminated Feb. 4; negotiations; compromise.
SERVICE—				
Public Administration—				
Civic garbage collectors, Ottawa, Ont.	1	60	60	Commenced Feb. 19; for increased wages; terminated Feb. 19; negotiations; compromise.

* Preliminary data, based where possible on direct reports from parties involved, in some cases incomplete; subject to revision for the annual review.

† In this table, the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which time was lost to an appreciable extent.

(a) 275 workers indirectly affected. *(b)* 78 ice cutters indirectly affected.

nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not yet declared terminated. Such disputes are listed in this paragraph for a period up to one year after their removal from the table of current strikes. Information is available as to one dispute of this nature, namely: truck drivers and helpers, Toronto, Ont., one employer, Oct. 7, 1941, to Dec. 31, 1941.

In connection with the strike of electric apparatus workers in Toronto from June 4 to June 12, 1941, fourteen employees were fined for striking or inciting to strike contrary to the Industrial Disputes Investigation Act and appeals were entered. The judgment of the court quashing the convictions is outlined in this issue under "Recent Legal Decisions Affecting Labour".

A strike of 150 fish cutters and packers in one establishment at Prince Rupert, B.C., for one hour on January 18 was reported too late for inclusion in the LABOUR GAZETTE for February. Work was resumed pending reference of the wage scale to the Regional War Labour Board for British Columbia.

A dispute involving about 15 men in a stoppage of work in a coal mine at North Minto, N.B., on January 27 was noted in the LABOUR GAZETTE for February, particulars not having been received. Later reports indicated there was a dispute as to the number of men to be employed in a new long wall operation but that work was continued pending a settlement.

A stoppage of work involving 50 carpenters and labourers at Sydney, N.S., on February 2 occurred owing to the dismissal of one man. Work was resumed after two hours pending an investigation and the man was given work on another job.

A stoppage of work for about two hours by 40 employees occurred in a coal mine, operated with steam shovels, at Coal Valley, Alta., on February 16 owing to a dispute as to the employment of an engineer. The union applied for a Board under the Industrial Disputes Investigation Act.

A stoppage of work for two days by nine shooters and loaders in a coal mine at Florence, N.S., on February 25 has been reported too late for inclusion in the tabular statement. Work was resumed pending negotiations as to certain working conditions.

A stoppage of work by 26 labourers planting small trees at Timberlands, B.C., on February 26 was reported too late for the tabular statement. One worker had been dismissed, but work was resumed March 2 when he was given other work.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to February

GOLD MINERS, KIRKLAND LAKE, ONT.—On February 11 this strike, which commenced on November 18, was called off by the union and those on strike reported for work on the following day. In reply to representations to the Minister of Labour that the employers were discriminating against active union workers in re-engaging men, the operators stated that seniority would be adhered to as closely as possible, preference being given according to experience in the work involved in the re-opening of the sections closed during the strike. It was stated that two weeks or more

would be required to re-open these sections. It was also stated that in each mine a committee of workers had been elected by secret ballot to deal with the management regarding grievances and working conditions.

Disputes Commencing during February

BAKERY WORKERS, MONTREAL, P.Q.—A number of employees in one bakery ceased work on February 15 and in another bakery on February 16 to obtain recognition of the Bakery & Confectionery Workers' International Union of America, with increases in wages of $5.00 per week and a reduction in hours from 60 per week to 54. There was also a demand for the reinstatement of certain employees who had been dismissed. As a result of conciliation by the Department of Labour work was resumed on February 18, the dismissed employees being reinstated, and the union applied for a Board under the Industrial Disputes Investigation Act. In this industry a Board can be established only with the mutual agreement of the parties to the dispute, and the employer refused as the dispute involved wage rates which have been placed under the regulation of the National War Labour Board. An agreement, under the Quebec Collective Agreement Act, in effect since 1939 between the master bakers and the Syndicate of Bakery & Pastry Shop Employees was amended in February to provide for a minimum wage scale and a cost of living bonus of $2.50 per week. The international union desired better terms and reduced hours. At the end of the month the matters in dispute were being dealt with by conciliation to bring about further negotiations and a reference of the wage dispute to the Regional War Labour Board for the Province of Quebec.

TEXTILE WORKERS, LACHUTE MILLS, P.Q.—Employees in an establishment where woollen and cotton goods are manufactured ceased work on February 6 following a strike vote on February 2 subsequent to the report of a Board under the Industrial Disputes Investigation Act as outlined elsewhere in this issue. Work was resumed on March 2, the agreement with the union in settlement of the dispute providing for the establishment of a plants' general council, consisting of an employees' general committee and an employer's committee, to meet monthly. The dispute as to minimum wage rates and cost of living bonus was dealt with by a clause stating that the remuneration of employees should be in conformity with the provisions of the laws and governmental orders affecting wages. In connection with picketing the provincial police were sent to prevent obstruction of traffic. A union organizer was fined on a charge of intimidation.

AUTOMOBILE PARTS FACTORY WORKERS, WINDSOR, ONT.—A number of employees in one establishment ceased work at noon on February 23, their proposal for recognition of the United Automobile Workers of America, not having been accepted. An agreement had been made with a committee of employees on which it was alleged union members did not have representation. An application for a Board under the Industrial Disputes Investigation Act had been made in December and a conciliation officer of the Department dealt with the dispute and it was referred to the Chief Conciliation Officer of the Ontario Department of Labour as an Industrial Disputes Inquiry Commissioner. The strike occurred before the inquiry had been completed.

METAL WORKERS, ST. THOMAS, ONT.—A number of employees ceased work on February 27 to secure payment of a cost-of-living bonus. This had been discussed with the management in October and it was stated that a cost-of-living bonus would be paid after February 15 in accordance with the provisions of P.C. 8253. This Order in Council provided for a cost-of-living bonus to meet the increase in the cost-of-living index from October 1, 1941, to January 2, 1942, and as the index was lower by one-tenth of one point no bonus was payable. Increases in wage rates had been made for many of the employees since August, 1939. As a result of conciliation by the Ontario Department of Labour work was resumed on March 6, pending a inquiry by the Regional War Labour Board for Ontario.

CARPENTERS, ETC. (SHIPYARD), VANCOUVER, B.C.—A strike on February 27 in protest against the demotion of a charge hand was terminated in one day as a result of conciliation by the Department of Labour, the case to be investigated by an Industrial Disputes Inquiry Commissioner.

ICE PACKERS, HUDSON, P.Q.—A strike of four ice packers on February 2 involved 78 ice cutters in a stoppage of work for three days. The men sought an increase in wages from 25 and 30 cents per hour to 50 cents. The employer raised the rates by seven cents per hour and gave a cost-of-living bonus, and work was resumed, some of the strikers being replaced.

CIVIC GARBAGE COLLECTORS, OTTAWA, ONT.—The teamsters and loaders engaged in garbage collection ceased work on February 19 to obtain an increase in wages from 50 cents per hour to 60 cents. Work was resumed after one day, pending a settlement. An increase of five cents per hour was made for five and one-half days per week instead of five days, eight hours per day for the loaders and ten hours for the teamsters.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March, 1941, issue, in the review of "Strikes and Lockouts in Canada and other Countries, 1940." The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is taken for the most part from newspapers.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July 25, 1940, provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the LABOUR GAZETTE, August, 1940, page 760.

The number of disputes beginning in the year 1941 was 1,241, involving about 360,000 workers directly and indirectly, with a total time loss of 1,075,000 working days, as compared with 940,000 working days lost in the previous year. About one third of the total time loss in 1941 was in the coal mining industry, and one half in the engineering, shipbuilding and metal industries.

The number of disputes beginning in December was 76, and 3 were still in progress from the previous month, making a total of 79 disputes in progress during the month; 22,400 workers were involved in the disputes in progress during the month and the time loss was 37,000 working days.

Of the 76 disputes beginning in December, 15 arose out of demands for increased wages and 30 over other wage questions; 5 over working hours; 10 over questions as to the employment of particular classes or persons; 14 over other questions as to working arrangements; and 2 on questions of trade union principle. Final settlements were reached in 68 disputes, of which 12 were settled in favour of workers, 40 in favour of employers and 16 resulted in compromises; in 8 other disputes work was resumed pending negotiations.

Australia

The number of disputes occurring in the second quarter of the year 1941 was 129, involving 38,212 workers directly and indirectly. The time loss for this quarter was 141,220 working days.

United States

Preliminary figures show the number of strikes beginning in January as 155, involving 32,500 workers in new strikes. The time loss for all disputes in progress during the month was 390,000 working days.

A strike of 2,400 textile factory workers near Utica, New York, occurred on February 16, over a union jurisdictional dispute. Work was resumed February 23 and the dispute referred to the National Labor Relations Board.

A series of work stoppages occurred in a plant of a motor company at Detroit, Michigan, during the second week of February; in one case 10,000 workers were out for a day, in the other cases for an hour or more. The strikers demanded the discharge of one worker and later protested the discharge of two others. Work was resumed at the request of officers of the union.

A strike of 1,180 welders in shipyards in the Seattle-Tacoma area began January 30, in continuation of the dispute reported in the LABOUR GAZETTE in November and December, 1941, the welders demanding recognition of an autonomous welders' union within the American Federation of Labor. The strike was called off February 17.

The Women's Bureau of the United States Department of Labor has published a report entitled *Employment of Women in the Federal Government 1923 to 1939* showing the trend over recent years in the employment of women in the United States Civil Service. The report deals with the various duties women are performing for the Government both in the District of Columbia and throughout the United States. Data are presented on salaries of women and their various occupations. Copies of the report (price 10 cents each) may be obtained from the U.S. Superintendent of Documents, Washington, D.C.

WARTIME WAGE CONTROL IN CANADA

Interpretative Rulings of National War Labour Board—Enforcement of Fair Wage and Labour Conditions under Administration of Board

IN a press conference on February 24, members of the Executive Committee of the National War Labour Board, headed by the Minister of Labour, Honourable Humphrey Mitchell, clarified several questions in regard to the administration of the Wartime Wages and Cost-of-Living Bonus Order, P.C. 8253, attendant upon the issuance of the second series of interpretative rulings as contained in Bulletin No. 2.

Prefacing the discussion, the Board's executive issued the following statement on the administration of the Order:

Intent of Order

Although this Order was issued last October and became effective in November, and has been explained by the National War Labour Board by means of Interpretative Rulings published in Bulletin No. 1 in December and now by Bulletin No. 2, which is available through the nine Regional War Labour Boards, the nature of the enquiries being received in large volume from employers and from employees indicates that several misunderstandings still exist as to the purpose and the nature of the Order.

Some employees apparently believe, despite emphatic press notices to the contrary, that their employer must pay them a cost of living bonus. Others, taking the Order too literally, believe that they will never get any bonus at all, quite overlooking the fact that the Order does not preclude application by employer, employee or, preferably, both acting together, to a War Labour Board for a determination as to whether or not a bonus should be paid. Then, too, each day brings a few letters from persons who think that the Government pays the bonus, instead of the employer.

It is surprising how many people quite overlook the fact how immeasurably better off they are under a fixed price ceiling and wage control, with small amounts of bonus or no bonus payable, due to a stabilized cost of living, than they would be without these controls. The inevitable result would be an inflation which would hurt wage earners more than any other class of citizen and no feasible bonus arrangement could compensate for more than a small portion of the inflation loss present in pay envelopes.

Although wages are controlled they are not "frozen" in a strict sense because anyone may seek the consideration of a War Labour Board if it can be shown to the Board's satisfaction that a wage or a salary is low when compared with the rates generally prevailing for substantially similar occupations in the locality. As with applications concerning the cost of living bonus, no employer, employee or, preferably, both acting together is precluded from seeking a survey of his situation.

Penalties are provided for employers who contravene the terms of the Order. To date no prosecutions have occurred. This bespeaks the degree of co-operation afforded by employers generally. Employees who blame an employer for not increasing wages or starting to pay a bonus do not in many cases realize that the employer cannot do so without permission. In order to ensure adherence by every employer to the Government's policy, a method for detecting violations is being designed. However, it is thought that few employers will be in a position to disburse any money unnecessarily under the price ceiling.

The control of salary payments to salaried officials under the Wartime Salaries Order and the heavy taxation of corporations round out the Government's program for the control of inflationary tendencies.

Interpretative Rulings in Bulletin No. 2

The National War Labour Board Bulletin No. 2, including both new and former interpretative rulings, has been released through the offices of the nine Regional War Labour Boards. It contains many new items for the guidance of employers and employees generally in observing the requirements of the Board under the Wartime Wages and Cost-of-Living Bonus Order in Council P.C. 8253.

Excluded employers and employees are more clearly defined.

Important to employers is the easier determination of the rank of an employee above or below the rank of foreman, on which determination the whole operation of the order depends.

If the spread between the high and low wage rates for a job exceeds one hundred and fifty percent it is said to be unduly broad.

A change in the term or the inauguration of a so-called welfare plan is subject to authorization of a Board.

Employees of an employer who is paying a cost-of-living bonus, but not to them, may receive an equivalent bonus if the employer desires to include them.

Employers paying a cost-of-living bonus not based on the provisions of the original wages order P.C. 7440 or who granted a general

wage increase expressly in lieu of a cost-of-living bonus are told how to calculate whether the amount being paid is excessive in view of the particular circumstances; if it is excessive it cannot be increased, says the Board, until further rises, if any, in the cost-of-living index justifies the payment of a higher amount. Such bonuses must, however, be increased, if they are not excessive, should a rise in the index occur and all such bonuses, whether excessive or not, must be decreased as the cost-of-living index falls.

A "general wage increase" is partly defined and the Board has something to say about allowances for board and shelter, the payment of bonuses in respect of military service or training, and dismissal allowance.

As before, direction is given as to how an employer or an employee or employees, or both acting in unison, may apply to a War Labour Board for consideration of such matters as the payment of a bonus or of a larger amount of bonus, or deferment of a future amount of bonus, or an increase in wage rates.

Employers or employees' associations having interests in more than one region or province are told how to secure a distribution to all War Labour Boards on the decision of any one Board.

Inspection and Enforcement of Fair Wage Conditions on Government Contracts

With the administration of fair wage and labour conditions on Government contracts now coming under the National War Labour Board (as provided in P.C. 8253) a change was made necessary in the inspection and enforcement set-up.

Prior to the establishment of Wartime Wage Control under P.C. 8253, inspection and enforcement of fair wages and labour conditions on Government contracts was provided under P.C. 5522 of July 22, 1941 (LABOUR GAZETTE, August, 1941, page 869), which empowered the Minister of Labour "to appoint any provincial official or any other person authorized to inspect labour conditions pursuant to the law of any province as his duly authorized representative for the enforcement of the fair wages and labour conditions on Dominion contracts". It also established a penalty for any person who obstructs such a representative in the pursuit of his duties.

P.C. 1774 of March 9, 1942, replaces the foregoing Order and gives recognition to the jurisdiction of the National War Labour Board which was charged in P.C. 8253 of October 24, 1941, with the administration of the fair wage and labour conditions on Government contracts, as well as the administration of the wages and cost-of-living bonus provisions of that Order. P.C. 1774 also contemplates the extension of the appointment of representatives of the Minister of Labour to include provincial wage commissions, parity committees, or other agencies whose inspection function would usefully serve the National or a Regional War Labour Board with respect to the enforcement of those matters with which such Boards are charged.

CONSOLIDATED WARTIME SALARIES ORDER

P.C. 1549 Amends and Consolidates Original Salaries Order P.C. 9298 and Amending Order P.C. 946

IN the February issue of the LABOUR GAZETTE, page 158, reference was made to Order in Council P.C. 946 of February 6 amending the Wartime Salaries Order P.C. 9298.

On March 3, the Minister of Finance, Hon. J. L. Ilsley, tabled in the House of Commons Order in Council P. C. 1549 of February 27, 1942, amending the Wartime Salaries Order and consolidating these and former amendments with the original order.

As pointed out by the Minister of Finance, the principle new amendment made in the consolidating order relates to war industries only, and gives the Minister of National Revenue power to permit, in specific cases and within prescribed limits, the adjustment of the salaries being paid to some individuals engaged in those industries, where there is good cause for such adjustment within the general principle of maintaining unchanged the generally prevailing rate for a given set of duties and responsibilities. There is also a provision for the adjustment of probationary rates of salary being paid to those who have been recently appointed or promoted at less than the normal rate for the work they are doing.

While in its general terms and application the consolidated Order is substantially the same as the original order P.C. 9298, as it now becomes "The Wartime Salaries Order", it is reproduced in full below.

47645—3½

Wartime Salaries Order, P.C. 1549

Whereas by Order in Council P.C. 9298, of November 27, 1941, "The Wartime Salaries Order" was made for the purpose of stabilizing the rates of managerial and executive salaries paid during wartime in the same general way as wage rates are stabilized under the Wartime Wages and Cost of Living Bonus Order, and permitting the payment of a specified cost of living bonus to salaried officials earning less than $3,000 per year;

And Whereas by Order in Council, P.C. 946, of February 6, 1942, certain of the provisions of the said Wartime Salaries Order were amended for the various reasons recited in the said amending Order;

And Whereas the Minister of Finance and the Minister of National Revenue report that it is found that the said Wartime Salaries Order, as amended, bears with special and unintended severity upon industries engaged in the production, repairing and servicing of war supplies by reason of the fact that many of the businesses concerned were necessarily in the process of organization or rapid expansion during the period before the said Order came into effect and had not had sufficient opportunity to adjust the salaries of salaried officials in accordance with changes in their duties and responsibilities;

That the Minister of Munitions and Supply advises that in his opinion serious interference with and loss of production in war industries may result if some provision is not made whereby adjustments in salaries can be made in proper cases;

That it is desirable to enable the Minister of National Revenue after investigation to permit under specified conditions the adjustment of salaries paid to individual salaried officials in industries producing, repairing or servicing war supplies;

That it is desirable to permit, under certain circumstances, the adjustment of the salary rate payable to a salaried official who was appointed or promoted on or after January 1, 1941, and who is receiving a probationary rate of salary which has not been increased above the rate first established at or after the time of the appointment or promotion;

That it is considered administratively impossible for the purpose of clause (i) of sub-paragraph (*d*) of paragraph 2 of the said Order to recognize contractual rights to bonus which are not evidenced in writing;

That it is desirable to make certain minor alterations in the wording of clauses (ii) and (iii) of sub-paragraph (*d*) of paragraph 2 of the said Order as amended in order to clarify the intended meaning of those clauses;

That it is, therefore, desirable to amend further the Wartime Salaries Order; and

That, in order to simplify reference to the Wartime Salaries Order as amended, it is desirable to rescind the original Order and the amending Order of February 6, 1942, and make in their stead, a new Order consolidating the text of the original Order as amended by the Order of February 6, 1942, and the further amendments now proposed.

Now, Therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Finance and the Minister of National Revenue concurred in by the Minister of Munitions and Supply, and under the authority of the War Measures Act, Chapter 206, Revised Statutes of Canada 1927, is pleased to revoke and doth hereby revoke Order in Council, P.C. 9298, of November 27, 1941, and Order in Council, P.C. 946, of February 6, 1942, and make the following order to be called "The Wartime Salaries Order";

ORDER

1. For the purpose of this Order, unless the context otherwise requires,

(*a*) "employer" shall include any person, body corporate or politic, and any association or other body, the heirs, executors, administrators, curators and other legal representatives of such person according to the laws of that part of Canada to which the context extends, irrespective of the number of persons employed by him, but shall not include

(i) the government of Canada; or any board, commission or other organization operated by or under the authority of the Government of Canada, employees of which are subject to the terms and provisions of Order in Council P.C. 6702 of August 26, 1941, and amendments thereto;

(ii) the Government of any province of Canada, or any board, commission or other organization operated by or under the authority of the Government of any province of Canada;

(iii) any municipality, or any board, commission or other organization operated by or under the authority of a municipality;

(iv) any bona fide public hospital certified to be such by the Department of Pensions and National Health;

(v) any religious, charitable or educational institution or association not carried on for purposes of gain.

(*b*) "Salaried official" shall include every employee of an employer who is above the rank of foreman or comparable rank, and for the purpose both of this Order and of the Wartime Wages and Cost of Living Bonus Order any employee receiving salary or wages (excluding cost of living bonus) at a rate of less than $175 per month shall be deemed to be not above the rank of foreman or comparable rank; and anyone receiving a salary or wages (excluding cost of living bonus) at a rate of $50 or more per month shall be deemed to be above the said rank of foreman or comparable rank unless the nature of his duties and responsibilities, or his relationship to other employees, indicates clearly that he is not above the said rank. In cases of doubt or dispute with regard to the rank of any employee or class of employees, the National War Labour Board, or a Regional War Labour Board, shall declare whether that employee or that class of employees is above the rank of foreman or comparable rank for the purpose of this Order and the Wartime Wages and Cost of Living Bonus Order.

(*c*) "Salary" shall include wages, salaries, bonuses, gratuities, emoluments or other remuneration including any share of profits or bonuses dependent upon the profits of the employer and all other forms of "income" as defined by Section 3 of the Income Tax Act if such income is related to the office or position occupied by the recipient and shall include payments to persons other than the employee in respect of services rendered by the employee and also payments in kind, and shall include the aggregate of all salaries paid by any one employer to any one employee, irrespective of how many positions the employee may occupy, and shall include the aggregate of all salaries paid to any employee by parent, subsidiary or affiliated companies resident or carrying on business in Canada; provided, however, that a salesman's commission, unless it has, in the opinion of the Minister of National Revenue, been substituted in whole or in part for another type of remuneration primarily with a view to defeating the purpose of this Order or been unreasonably increased since November 6, 1941, shall not be deemed to be a "salary".

(*d*) "Cost of living bonus" shall mean a periodic supplement to wages or salary occasioned by changes in the cost of living and payable regularly either at the same time as the salary or wages are paid or at least once every month.

(*e*) "The base year" shall mean the year commencing November 7, 1940, and ending November 6, 1941, both inclusive.

2. Unless otherwise permitted by paragraphs 3, 4 and 5 hereof, no employer shall, on or after November 7, 1941:

(*a*) increase the rate of salary paid to a salaried official above the most recent salary rate established and payable prior to November 7, 1941, or if no rate of salary for a particular salaried official were established and payable prior to November 7 because the said salaried official was not employed by the employer prior to the said date, increase the rate of salary above the rate of salary first payable to the said salaried official.

A cost of living bonus established and payable prior to November 7, 1941, shall be regarded as part of the rate of salary established and payable to a salaried official prior to the said date, and as such may continue to be paid at the same rate, but may not subsequently be increased by reason of any increase in the cost of living index unless permitted by paragraph 4 hereof;

(*b*) pay to a salaried official for whom no salary rate was established and payable by such employer prior to November 7, 1941, because the said salaried official was not employed by the employer prior to the said date, a rate of salary higher than the rate previously paid by the said employer to a salaried official performing substantially the same services or if there were no salaried official previously performing substantially the same services a rate of salary higher than a reasonable and proper rate having regard to the salary rates payable to salaried officials for similar services in like businesses;

(*c*) pay fees to a director of a company at a rate in excess of the rate of fees paid to such director in the twelve months ending November 6, 1941, provided, however, that a newly appointed director of a company may be paid fees at the same rate as that paid to other directors of the said company during the twelve months ending November 6, 1941, and the payment thereof to such newly appointed director shall not be regarded as an increase in the salary of the said director for the purposes of this Order;

(*d*) pay as bonus (which, for the purpose of this sub-paragraph, shall include gratuities and shares of profits but shall not include cost of living bonus) a larger total amount to any one salaried official during any year following November 6, 1941, than the total amount paid to the said salaried official as bonus in the base year, provided that:

(i) where the salaried official has a contractual right evidenced in writing which existed at November 6, 1941, to receive such a bonus, defined as a fixed percentage of or in fixed ratio to his salary, the profits of the business, or the amount of sales, output or turnover of the business, the employer may continue to pay the said bonus at the same fixed percentage or ratio as that contracted for previous to November 7, 1941;

(ii) where a salaried official has been engaged or promoted after November 6, 1940, the employer may pay him an amount as bonus not greater than the amount of bonus paid by the same employer to a salaried official doing substantially the same class or grade of work, and if the bonus is computed as a rate based upon some factor such as profits, sales or output, the total amount of it in any year shall be limited as herein provided;

(iii) an employer may in any year after November 6, 1941, pay to a salaried official who was employed by him during the base year a larger amount as bonus than he paid to the said salaried official as bonus during the base year, provided that the said amount of bonus shall not exceed the largest amount paid as bonus by that employer to any one salaried official doing substantially the same class or grade of work during the base year, and that the aggregate amount paid as bonus in the said year after November 6, 1941, by the said employer to all salaried officials who were employed by him in the base year (excluding any amounts payable under clause (ii) hereof to the extent that they are in excess of the amount paid to the same officials in the base year) does not exceed the aggregate amount paid as bonus to the same salaried officials during the base year.

Nothing in this Order shall be deemed to limit the right of the Minister of National Revenue

under the Income War Tax Act and The Excess Profits Tax Act, 1940, to disallow any portion of any salary, bonus, gratuity or share of profits as being an unreasonable and abnormal expense of the employer.

3. (*a*) Notwithstanding anything contained in paragraph 2 hereof, an increase in salary rate may be permitted if the employer establishes to the satisfaction of the Minister of National Revenue that the increase is commensurate with and is occasioned by a bona fide and reasonable promotion (on or after January 1, 1941) of a specific salaried official who has been given added responsibilities and increased duties, providing that the total salary including the increase is not higher than the level of salaries paid to salaried officials for similar services in like businesses, and provided that if the total salary, including the increase is

(i) less than $7,500 per year, such increase is reported on the prescribed form to the Minister of National Revenue within three months of the first payment of the increase, and is approved by the Minister on or before the assessment of the income tax return of the employer for the year in which the increase was made, or

(ii) $7,500 or over, such increase has been reported on the prescribed form and approved by the Minister of National Revenue before the payment of the increase.

(*b*) In case of a promotion or a new appointment to an established position taking place after November 6, 1941, in respect of which the employer in accordance with established policy does not grant the employee the full salary previously paid to the former incumbent of the position to which the employee is promoted or appointed, the Minister of National Revenue may, in the case of a promotion, authorize a temporary increase in salary, and subsequently one further increase, provided that the total increase thereby effected will be within the limits set by the provision of sub-paragraph (*a*) of this paragraph, or, in the case of a new appointment, authorize a temporary salary and subsequently one increase in salary, provided that the increased rate of salary ultimately payable shall not be higher than the limit mentioned in sub-paragraph (*b*) of paragraph 2 of this Order.

(*c*) Notwithstanding paragraph 2 hereof, the Minister of National Revenue may permit an employer to increase the rate of salary paid to a salaried official who has on or after January 1, 1941, been newly appointed or promoted and who is receiving a probationary rate of salary which has not been increased beyond the first rate established on or after the appointment or promotion, provided that the new salary rate permitted by the Minister may not be higher than the rate paid by the employer to the former incumbent of the said position, or if there was no former incumbent, the new salary rate may not be higher than the rate of salary being paid for the same or substantially similar services in like businesses. No increase in salary permitted under this sub-paragraph shall be paid until the permission of the Minister has been obtained.

(*d*) After any increase in salary has been approved in accordance with sub-paragraphs (*a*), (*b*) or (*c*) of this paragraph and a new salary level so established, the provisions of this Order shall apply to the said salary level from the effective date of that increase as if it had been established at November 6, 1941.

4. Notwithstanding paragraph 2 hereof, any employer may, without specific approval of the Minister of National Revenue, pay a cost-of-living bonus not greater than an amount calculated in accordance with sub-paragraphs (*a*), (*b*), (*c*), (*d*) and (*e*) of this paragraph, and based on the cost-of-living index for the Dominion as a whole prepared by the Dominion Bureau of Statistics, to salaried officials receiving salaries of less than $3,000 per year (excluding cost-of-living bonus), and any employer who is paying a cost-of-living bonus under the provisions of the Wartime Wages and Cost-of-Living Bonus Order to an employee regularly receiving wages in excess of $3,000 per year (excluding cost-of-living bonus), may pay a cost-of-living bonus, determined in the manner herein provided, to a salaried official if the salary (excluding cost-of-living bonus) of the said official does not exceed $4,200 per year, and provided that the total remuneration (including salary and cost-of-living bonus) of the said salaried official does not exceed the total remuneration (including wages and cost-of-living bonus) regularly paid by the said employer to an employee not above the rank of foreman or comparable rank and entitled to receive a cost-of-living bonus in accordance with the provisions of the Wartime Wages and Cost-of-Living Bonus Order.

(*a*) If the payment of a cost-of-living bonus is commenced after the effective date of this Order, it shall not be payable in respect of any services rendered prior to February 15, 1942, and it shall reflect no more than the increase in the said index after October 1, 1941;

(*b*) If the salary rate payable to a salaried official on November 6, 1941, included a cost-of-living bonus determined in a manner consistent with sub-paragraphs (*a*) and (*b*) hereof, or pursuant to P.C. 7440 of December 16, 1940, there may be added to such bonus an amount based, in the manner herein provided, on the rise in the index number for October 1, 1941, above the most recent index number used to determine the then current amount of such bonus, and the total salary including such added amount of bonus shall be regarded, for the purposes of this Order, as the rate of salary in effect at November 6, 1941; and further amounts to be added to such bonus, in the manner hereinafter prescribed, shall not be based on any increase in the said index number prior

to October 1, 1941, and shall not be payable in respect of any services rendered prior to February 15, 1942;

(*c*) The rise or fall in the index shall be measured in points, to the nearest 1/10 of one point, after the index has been adjusted to the base of 100 for August, 1939;

(*d*) For each rise of one point in the index, the amount of the bonus or the increase in the amount of the bonus, as the case may be, and for each fall of one point in the index the decrease in the amount of the bonus shall be twenty-five cents per week;

(*e*) The amount of the bonus may be redetermined every three months on the basis of the change in the cost of living shown by the index number for the immediately preceding month as compared with the index number on which the last previous change in the amount of the bonus was based. The amount of the bonus shal not be changed unless the cost of living has changed one whole point or more. Employers shall be guided in determining whether the bonus may be changed by the announcement of the change if any, in the index number as given by the National War Labour Board pursuant to The Wartime Wages and Cost-of-Living Bonus Order, being P.C. 8253, dated October 24, 1941.

5. (*a*) Notwithstanding paragraph 2 hereof, the Minister of National Revenue, if he is convinced that it is necessary in order to maintain the efficient production of war supplies, may permit an employer engaged in the production, repairing or servicing of munitions of war (as defined in the Department of Munitions and Supply Act) or ships, including merchant ships, to grant one increase of an amount approved by the Minister, in the rate of salary paid to

(i) a salaried official who is a citizen of a country other than Canada and who is performing services in Canada requiring special technical or other special qualifications and experience;

(ii) a salaried official who was engaged at a probationary rate of salary on or after January 1, 1940, and prior to December 1, 1941;

(iii) a salaried official whose duties and responsibilities have been substantially increased, since his salary rate was established, by reason of new or additional production for war purposes in the plant, factory firm or other production unit in which he is employed;

(iv) a salaried official whose rate of salary is unduly low in relation to the prevailing rate of salary generally payable for the same or substantially similar services in the same business or in comparable businesses, provided that the new salary rate established by the increase herein permitted shall not exceed the said prevailing rate.

(*b*) Application for permission to pay an increased salary to a salaried official pursuant to the provisions of this paragraph shall be submitted by the employer to the Minister of National Revenue on the prescribed form, setting forth all the facts which in the opinion of the employer warrant the proposed salary adjustment. No payment of an increase in salary pursuant to the provisions of this paragraph, or on account thereof, shall be made to a salaried official until notification has been received by the employer from the Minister stating an increase in salary has been approved and the amount thereof. The decision of the Minister as to whether an increase in salary is to be permitted under the terms of this paragraph, and as to the amount thereof, shall be final and conclusive.

6. Any employer, or his officer or agent, who pays or contracts to pay a salaried official a salary in violation of any provision of this Order or contravenes or fails to observe any of the provisions hereof shall be guilty of an offence and liable on summary conviction to a fine of not less than $100 nor more than $5,000, for each such violation, contravention or failure.

7. The amount of any salary, found by the Minister of National Revenue to have been paid in excess of the amounts permitted by this Order, shall be deemed to be an unreasonable and abnormal expense of the employer for all purposes including the purposes of the Income 1940, and pursuant to subsection (2) of Section 6 of the Income War Tax Act and Section 8 (*b*) of The Excess Profits Tax Act 1940, such amount shall be disallowed as an expense of the employer in assessing the employer's profits subject to taxation under the said Acts.

8. Nothing in this Order shall be deemed to limit the discretionary power of the Minister of National Revenue as provided for in the Income War Tax Act or The Excess Profits Tax Act 1940 and, more particularly, the power of the said Minister to determine whether a salary or rate of salary, whether paid or payable prior to or subsequent to the effective date of this Order, was reasonable and normal for the business, for purposes of assessment under the said Acts.

9. No agreement providing for an increase in the rate of salary above the rate payable at November 6, 1941, shall be enforceable in respect of such increase except and to the extent that such increase is within the amount that may be permitted by paragraphs 3 or 4 hereof, and no action shall lie against any person for breach of contract for complying with the provisions of this Order or for refusing to pay any salary in excess of the amount permitted by this Order.

10. The Minister of National Revenue with the approval of the Governor in Council may make such regulations in furtherance of the provisions of this Order as may be required for carrying this Order into effect and in particular, but not so as to limit the generality of the foregoing, he may provide by regulation for the determination of the persons to whom this Order is applicable with a view to ensuring that salaried officials not subject to the Wartime Wages and Cost-of-Living Bonus Order P.C. 8253, dated October 24, 1941, will be subject to this Order.

11. This Order shall be effective at and after midnight of November 6, 1941.

A. D. P. HEENEY,
Clerk of the Privy Council.

OPERATION OF PRICE CONTROL IN CANADA

Summary of Activities of Wartime Prices and Trade Board in Third Month's Operation of Price Ceiling Policy

CONTINUED development of the campaign to prevent a runaway inflation of prices was made during the third month of the "price ceiling" policy. A program of simplification, economy and conservation was actively developed with the two-fold purpose of making the most of available resources of civilian goods and of reducing costs of such goods to a practicable minimum by eliminating unnecessary "frills" in their production and distribution.

Other steps have been taken to meet situations created by various shortages, such as the lack of raw silk for the hosiery trade, and the sugar rationing order has been supplemented by several clarifications. A number of further price adjustments have been made, arrangements completed in three more industries for higher costs to be "shared out", and prosecutions instituted for violations of the Maximum Prices Regulations, particularly of the sugar rationing order and of the rentals ceiling.

Division of Simplified Practice

The program of simplification, economy and conservation is being directed by the Division of Simplified Practice of the Wartime Prices and Trade Board. A series of meetings was held with representatives of numerous industries. Cost enquiries were begun preparatory to far-reaching plans for cost reduction and conservation. Manufacturers, merchants, consumers and others were invited to offer suggestions for practicable economies in business operations.

Several conservation orders have already been issued. In order to conserve fabrics and the copper for engraving plates no new designs or patterns may be used for rayon prints to be made up into dresses priced at $24.75 a dozen or less. (Administrator's Order No. A20.) Rollers now used for more expensive materials will become available later for the lower price ranges. The sizes of paint and varnish containers have been standardized to conserve materials. (Administrator's Order No. A16.) Uneconomical sizes of cans for food products have been eliminated and the use of tin plate restricted to canning essential, perishable foods of high nutritional value. Cans will no longer be available for unessential foods, for foods which can be preserved or prepared without the use of cans, such as apples, white beans, beets and carrots, pork and beans, spaghetti, and ready-to-serve soups, nor for imported fruits and vegetables. (Administrator's Order No. A24.) Certain types of fruit and vegetable packages have been prohibited, as there is a shortage of supplies, and their manufacturers can no longer inscribe on them wording or trademarks. (Administrator's Order No. A29.) The boxes, cartons and containers used for packages of stationery sold at retail are now subject to regulation. Gift and Christmas boxes and containers are to contain a minimum of 75 per cent of stationery and a maximum of 25 per cent false bottom and padding. Individual containers are not to be used for packets which cost less than 60 cents wholesale. Boxes for staple "papeteries" or boxed stationery must not have false bottoms, padding, flanges or false lids, and must contain at least 90 per cent writing paper and envelopes. The thickness of the board for writing tablets and pads is limited and "bulge, double side, or double top" boxes are forbidden. (Administrator's Order No. A15.)

The campaign for rationalizing retail trade continues. Administrators and Prices and Supply Representatives have been urging retailers to cut down such "frills" as fancy and Easter boxes, c.o.d. deliveries and approval, and to limit wrapping to what is barely necessary. They have asked consumers to co-operate with merchants who restrict delivery service.

Specific Shortages

Other steps have been taken to meet problems arising out of shortages, both present and prospective. An Executive Assistant to the Foods Co-Ordinator has been appointed to co-ordinate representations from the trade and to co-operate with the Agricultural Supplies Board with a view to securing proper arrangements as to priorities in material for manufacturing, processing and distributing food products. He will also examine possibilities of obtaining substitutes, and will keep in touch with experimental work being done in Agritultural Colleges, university, provincial and private laboratories and the National Research Council. Experiments are being made, for example, in the use for cans of a bonderized plate which does not require any tin. The Coal Administrator has asked consumers to build up stocks of fuel now to forestall future possible shortages due to transportation difficulties.

Sugar.—Some problems arising in connection with the sugar rationing system announced last month have been clarified. Extra sugar is

available for church and charitable teas, etc., on the signature of the responsible organizer. Use must be economical and any left over treated as part of the ration of some householder. Beekeepers must apply to the Sugar Administrator through the Provincial Apiarist of each province, for sugar required for feeding their bees. The prohibition of icing, frosting and dusting bakery products with sugar has been suspended until the end of March pending further inquiry.

A number of people have been prosecuted and convicted of buying more than their lawful ration of sugar. Retailers have been reminded that they as well as consumers are responsible for observing ration limitations in spite of difficulties which may arise over the necessity of changing the conventional sizes of packages. A satisfactory decrease in sugar sales has subsequently been reported.

Hosiery.—The disappearance of silk means that hosiery now has to be manufactured from new materials, in which experiments have been carried on since December, 1940, when imports of raw silk were restricted. The introduction of rayon and mercerized cotton hosiery which were not sold during the basic price ceiling period created a special problem in price control. A meeting of Canadian hosiery mills' representatives was called and standard types of full-fashioned hosiery established at prices which fall within the normal general price range for hose (apart from nylon), of 79 cents to $1.25. Henceforth only these standard types may be manufactured and a schedule of maximum prices (exclusive of sales tax) has been issued covering both branded and unbranded lines. (Administrator's Order No. A7.)

Price Adjustments

Salmon, fish meal, etc.—A number of other price adjustments have been made by maximum price orders or orders setting a different basic period. Maximum processors' prices for fresh red and white spring salmon have been set and retailers' mark-ups limited to those of the corresponding season of 1941. (Administrator's Order No. A23.) Maximum prices have been set on fish meal and animal products sold in Canada for use as feed, and linseed oilcake meal. (Board Order No. 101.) The maximum price order on linseed oil has been amended and consolidated. (Board Order No. 100.)

Timber.—The Timber Administrator has issued an order fixing at the highest corresponding prices prevailing during the period from July to December 1, 1941, the maximum selling prices of spruce, balsam, jack pine and poplar pulpwood in the form of cordwood or logs for domestic consumption east of Alberta. (Administrator's Order No. A11.) Any agreement or commitments for sales of pulpwood of this type are subject to the Administrator's approval and licences are required for exports.

Recleaning Grain.—The Wheat Board acting as Administrator for the WPTB has set a maximum charge for recleaning or processing wheat, oats, barley, rye and flaxseed.

Canned Foods.—An order of the Food's Administrator (Administrator's Order No. A30) sets maximum prices at which canners may sell next season's pack of canned tomatoes, peas, corn, green and waxed beans, which together constitute 80 per cent of the entire Canadian vegetable pack. To allow for unavoidable cost increases, it also sets growers' prices at a higher level than those prevailing in 1941. To enable canners to make plans to process large quantities of staple vegetables for the United Kingdom it has been arranged that the Commodity Prices Stabilization Corporation will buy up surpluses at fixed prices.

Fruit and Vegetable Packages.—To meet a serious shortage due to increased costs of material and labour and many new demands on the factories concerned, a schedule of maximum prices has been issued for fruit and vegetable packages, and such terms of sale set as discounts and due dates for accounts.

Other Price Decisions

School Furniture.—Because of a considerable increase in the cost of material and production manufacturers of school furniture may increase their list price by 15 per cent over the list price in April, May and June, 1941, subject to the approval of the Administrator.

Optometrists and Opticians.—The ceiling has been extended to cover services performed by optometrists and opticians, and goods supplied by them have been declared subject to the Maximum Prices Regulations (Board Order No. 96).

Farmers' Supplies.—The ceiling has been removed from transactions between farmers selling, bartering or exchanging a number of types of products, equipment and supplies for their own use. (Board Order No. 102.) In several cases retail prices which were frozen at an anomalously low level have been adjusted to restore their normal relationship to other retail prices, an outstanding case being that of farm machinery. (Administrator's Order No. A8.) Before the basic period about eighty per cent of the farm machinery manufactured and sold in Canada had been increased in price by five per cent as compared with the price prevailing in early 1941. The Administrator was therefore authorized to allow adjustment in the prices of the remaining small percentages of lines, subject to strict conditions.

Used Goods

Reports that under the pressure of scarcity some types of used goods had been sold at prices higher than those of new goods, called forth a reminder that used goods are subject to the Maximum Prices "Ceiling" Regulations and that in any case they may not be sold at prices above the ceiling prices of similar new goods. If a dealer sold no similar new goods during the basic period he is to be governed by the highest lawful price at which similar new goods were sold by others in the same municipality. The Administrator of Used Goods has authority to fix or approve any specific or maximum price for any second-hand goods including prices higher or lower than the selling price prevailing during the basic period, September 15 to October 11. He may require any seller or supplier to make sales or deliveries of second-hand goods to any person at prices he regards as fair and reasonable. He may require any seller or buyer to cancel any sale of second-hand goods made at a price which he considers other than fair and reasonable, or any sale considered undesirable by reason of the need of other buyers or prospective buyers to obtain supplies in reasonable amounts at reasonable prices.

The Administrator also has power to require any person who has bought or obtained delivery of second-hand goods at an unreasonable price or in unreasonable quantity to assign or deliver them to any other person at prices which the Administrator may determine as fair and reasonable.

In addition, the Administrator of Used Goods has power to prescribe or limit, on behalf of the Board, the kinds, models, types, qualities, sizes and quantities of any second-hand goods that may be bought, sold, supplied or distributed by any person and to prohibit the purchase, sale, supply or distribution of any used goods except in accordance with such prescription or limitation. (Board Order No. 98.)

Moving Picture Films

To allow the Administrator of Services to regulate more effectually the supply, distribution and exhibition of moving picture films, he has been empowered to prescribe the terms and conditions of their distribution and exhibition. He may prescribe the terms and conditions under which films may be sold, rented or supplied, and prohibit any transactions not in accordance therewith, and require any person owning or in possession of a motion picture film to dispose of it to anyone at such time and under such terms as he prescribes. He may fix the price or rate at which a film may be exhibited, rented, sold or supplied, and prohibit any exhibition, purchase, sale, rental or supply at a price or rate varying from that fixed by him. No premises that were not used for public exhibition of moving pictures for profit on January 31, 1942, may now be used for the purpose except with written authorization of the Administrator. (Board Order No. 99.)

Allocation of Costs

In three more trades to allow the retail ceiling to be held, the burden of heavier costs has been shared out among processors, manufacturers, wholesalers and retailers.

Men's Made-to-Measure Clothing.—In the case of men's made-to-measure clothing, manufacturers may increase their price on specified ranges by 50 cents per unit on all lines priced at $20 and under, and by 5 per cent on all lines priced at $20.50 and over. On seasonal goods not similar to any sold during the basic period they may increase prices by 10 per cent over those charged during the 1941 season and wholesalers and retailers may increase prices in turn, maintaining as a maximum the mark up used in 1941.

Leather Clothing and Gloves.—In the case of leather clothing and gloves, manufacturers will take a share of the burden of increased costs equal to the share taken by wholesalers and retailers together. This will be limited to a 4 per cent increase over the prices charged by manufacturers from January to March, 1941. Tanners' charges to manufacturers are set in a new lower schedule of maximum prices based on prices approximately those of January, 1941. This list will be used to calculate the subsidy from the Commodity Prices Stabilization Corporation made necessary by the tanners' lowered ceiling. An investigation of costs will be made with a view to securing all possible economies so that the subsidy may be reduced or eliminated as quickly as possible.

Frames for upholstered furniture.—Because of increased wages and higher maximum prices established just prior to the basic period on three hardwoods, the cost of manufacturing frames for upholstered furniture has increased. A higher maximum price has therefore been set for "basic frames", provision made for extra charges to cover "additional features" and a maximum increase of six per cent over basic period prices allowed on other types of frames, all subject to the Administrator's approval. (Administrator's Order No. A18.)

There are other cases in which the "squeeze" is being absorbed to allow the retail ceiling to hold. For example, one hosiery concern has absorbed a 20 per cent increase in the cost of Bemberg yarn, and a large rayon manufacturer an increased cost of 2 cents a yard.

A further step toward solution of the problem of rising import costs was taken when, by Order in Council (P.C. 62/450), import and excise duties and taxes imposed in any country from which Canada imports goods are to be excluded from estimates of value for duty purposes.

Enforcement Procedures

In addition to the sugar prosecutions, leave to prosecute has been issued in several cases under the Maximum Prices Regulations. Proceedings are pending. Many reductions in prices of goods and services have been effected following investigations and enforcement cases not requiring prosecution. By mid-February 52 rental cases had come to trial, resulting in 49 convictions and three acquittals. Fines ranging from $5 to $265 had been imposed. In some cases a further sentence was suspended conditional upon the accused refunding to the tenant all excess rentals collected.

Some enforcement problems have assumed complex forms. For example a new zoning plan for taxi-cab rates in Calgary had to be withdrawn because it broke through the lower individual ceiling of some operators, even though it did not exceed the higher ceilings established by other operators. A request by a restaurant to be allowed to discontinue table d'hote meals was denied on the grounds that a balanced meal a la carte would cost more. A special warning has been issued against the use of inferior substitutes without a corresponding reduction in price and a further warning sounded that the ceiling covers tire repairs and retreading.

DOMINION LEGISLATIVE PROPOSALS OF CANADIAN CONGRESS OF LABOUR

Labour Representation on Wartime Boards Requested—Recommendations Regarding Labour and Wage Control Policies

REPRESENTING approximately 145,000 workers affiliated in national unions, chartered local unions and Canadian branches of a number of international industrial unions, the Canadian Congress of Labour submitted a memorandum of legislative requests to the Dominion Government on February 27.

The delegation from the Congress was received by the following members of the Government, Rt. Hon. W. L. Mackenzie King, Prime Minister; Hon. Humphrey Mitchell, Minister of Labour; Hon. Colin Gibson, Minister of National Revenue; Hon. Louis St. Laurent, Minister of Justice; and Hon. J. T. Thorson, Minister of National War Services.

In the opening paragraphs of its memorandum the Congress reaffirmed its desire to co-operate fully with the Government in making the war-effort as effective as possible and confirmed its pledge of support in the defence of Canada and the United Nations, "wherever that may be necessary, and the maintenance of the democratic principles of justice and freedom." The memorandum also expressed the Congress' desire "to co-operate with other branches of the Labour movement in Canada and with Associations of employers and other groups of citizens in all activities which will promote the welfare of the Canadian people."

The memorandum stressed the importance of national unity and expressed the conviction of the Congress that "the workers of Canada in general earnestly desire an all-out war effort, that they look to the government for leadership and direction and inspiration in this respect, and that they believe that nothing should be allowed to stand in the way of mobilizing the entire resources of the nation in the gigantic struggle in which Canada and her allies are now engaged. . . . .

"The organized workers of Canada, irrespective of the unions to which they belong or the central Labour body which represents them, are, in the opinion of the Canadian Congress of Labour, torn between their eagerness to do everything possible to win the war for democracy and freedom in Europe and Asia and their desire at the same time to protect and extend those principles at home. . . . ."

The memorandum then listed matters, which in the opinion of the Congress "have caused discontent and irritation among the workers" as follows:

(1) The failure to enforce respect for the Labour policy outlined in Order-in-Council P.C. 2685, of June 19, 1942;
(2) The adoption of policies affecting the workers without adequate consultation with the National Labour Supply Council, a representative body which was presumably established for that purpose, among others;
(3) The freezing of wage-levels by Order-in-Council P.C. 7440, of December 16, 1941, in industries covered by the Industrial Disputes Investigation Act, and the inconsistent interpretations of this Order, which led to strikes in the Peck Rolling Mills and McKinnon Industries;
(4) The unwillingness of the Government to enforce the provisions of Order-in-Council P.C. 7440 on the railways, which insisted

upon an abrogation of the employees' rights before paying the bonus;

(5) The appointment on April 29, 1941, of a well-known anti-Labour executive as Controller of National Steel Car Corporation at Hamilton, and the encouragement of a "company union" in the plant, which left the workers worse off than they had been before they went on strike against the attitude of the private employer, and the refusal of the Government to respect its own Labour policy in this and other government-controlled plants;

(6) The amendment of the Industrial Disputes Investigation Act in June, 1941, in such a manner as to restrict the choice of representatives on Boards of Conciliation and Investigation, without consultation with the National Labour Supply Council, and in spite of the protests of Labour;

(7) The appointment in June, 1941, of an Industrial Disputes Inquiry Commission, for which Labour was not allowed to suggest a representative, and which not only delayed and irritated disputes, but in several cases, such as the Canada Packers' and Kirkland Lake disputes, recommended a formula which would have established "company unions," and prevented a settlement of the disputes in a satisfactory manner;

(8) The passing of Order-in-Council P.C. 5830 on July 29, 1941, facilitating the use of troops in Labour disputes, on the presumption that sabotage had occurred in the Arvida strike, and the failure to rescind this Order-in-Council when it was established that the allegation of sabotage was unfounded;

(9) The passing of Order-in-Council P.C. 7307, in September, 1941, which makes strikes illegal unless a vote is taken under outrageously undemocratic conditions;

(10) The freezing of wage levels on October 24, 1941, by Order-in-Council P.C. 8253, without consultation with Labour, or reference to Parliament, thus maintaining for the duration of the war inequalities in wage-rates and restricting the right of the workers to negotiate wage-agreements through their organizations;

(11) The refusal of the Government to apply its Labour policy in the Kirkland Lake strike, where the issue clearly involved the democratic principles of union recognition and collective bargaining;

(12) The ruling of the Deputy Minister of Justice, under date of December 2, 1941, that as Research Enterprises Limited was a wholly-owned and operated Government undertaking, the Minister of Labour would not have authority to direct the Industrial Disputes Inquiry Commission to investigate charges of discrimination by the management, thus leaving employees with no protection of any kind;

(13) The fixing of wage-rates in Ontario and Quebec shipyards by Order-in-Council P.C. 6291, of January 26, 1942, thereby ignoring the process of collective bargaining, and the Government's own wage-policy;

(14) The discouragement of union shop agreements by the Director General of Labour Relations in the Department of Munitions and Supply.

Definite action on three important matters was recommended by the Congress. These were:

(1) Adequate representation of Labour on Government bodies, including industrial councils which will be proposed for the attainment of maximum war-production;

(2) The establishment of a comprehensive Labour policy, under which the right to organize and bargain collectively through the union of the workers' choice will be fully protected by the provision of penalties for infringement of that right, and of machinery for the imposition of such penalties.

(3) The establishment of a wage-policy under which wages and working conditions will be determined by negotiation between representatives of employers and organized workers, subject to such control as may be necessary by industrial councils.

Labour Representation on Government Bodies

Stating that "the only important bodies dealing with the war-effort on which Labour is adequately represented are the National and Regional War Labour Boards," the Congress urged "the Government to give adequate recognition to the Labour movement on Boards and Commissions dealing with every aspect of the war-effort, apart from questions affecting defence policy." In emphasizing this point it was declared: "The workers of Canada for whom the Congress speaks will not be satisfied until they have been accepted as full partners in the war-effort, and until their organizations are given adequate representation on Government bodies generally."

Government Labour Policy

In its memorandum, the Congress dealt at length with the Government's Labour Policy as set forth in Order in Council P.C. 2685, of June, 1940, and criticized the Government for not having enforced the principles set forth in the Order dealing with collective bargaining and freedom of organization. The Congress declared. . . "The fact is, of course, that the Government's so-called Labour policy is not legislation at all, although it is embodied in an Order in Council; it is nothing more than an empty gesture, a 'recommendation' which the Government will not even follow itself, in dealing with civilian employees in Government-owned and controlled plants."

The memorandum then proceeded to a discussion of the situation arising out of the Kirkland Lake strike and urged that "the Government ensure by legislation the right to organize in the union of the workers' choice, and to negotiate agreements with employers, by collective bargaining through that union, with provision for the protection of that right by appropriate penalties applicable to private

employers. It is further urged that these principles be respected by the Government in Government-owned or operated enterprises outside the scope of Civil Service regulations."

The Congress then protested against Order in Council P.C. 7307 of September 16, which provides for the conditions and procedure under which a legal strike may be called. It was requested that this Order in Council be rescinded or amended "in such manner as to provide that only the workers immediately involved in the specific dispute should be allowed to vote, and that only votes actually cast should be counted for or against the strike."

The Congress expressed the opinion that the Order in Council is a "repressive rather than a conciliatory measure, that no machinery has been provided for the settlement of disputes by other means, such as mediation and arbitration, and that nothing has been done to remedy the conditions which lead to strikes."

It was contended that if an adequate Labour Policy was established "it would be unnecessary for workers to go on strike in an effort to obtain proper recognition of their rights by their employers."

Government's Wage Policy

In the course of a lengthy review, strong objection was registered by the Congress to the wage policy of the Government as established in Order in Council, P.C. 8253. It was recommended that:—

"the Government's wage-policy be reconsidered, in consultation with representatives of Labour and industry," with a view to reaching a policy which will be satisfactory to the workers of Canada and ensure their full support. Such a policy might include provisions for conciliation, mediation and arbitration of disputes, and thus prevent stoppages of industrial production. It is essential, not only in the interests of the workers but of the nation, that there be no interference with the right to bargain collectively, by either the Government or employers; on the contrary, that right should be protected by legislation. There should be no arbitrary interference with agreements freely reached by workers and employers through negotiation, unless it can be shown that such agreements are detrimental to the public interest.

It was suggested that the best method of meeting the situation would be in the establishment of an industrial council for each basic industry, consisting of representatives of labour, industry, and the Government. It was considered that such a plan would promote self-government in industry. "The basis of the proposal" the memorandum declared "is to be found in the National Joint Conference Board and the Zone Committees established in the building and construction industry at a conference held in Ottawa a little over a year ago." Hope was expressed that the Government would encourage action along these lines "since the representative character of the proposed industrial council would ensure the fullest possible measure of confidence between the parties involved, with the result that a united effort for maximum war-production would be achieved, and the utmost support for the defenders of democracy would be attained."

Unemployment Insurance

Dealing with the subject of unemployment insurance, the Congress brought to the attention of the Government proposals with respect to the Unemployment Insurance Act which were adopted at the Congress' Convention in September, 1941. These recommended:—

(*a*) that the Act be extended to cover all workers, so far as this is administratively possible;
(*b*) That the present $2,000 ceiling on insurable occupations be eliminated;
(*c*) that where it is shown that the employer is responsible for a Labour dispute, the workers involved shall be eligible for benefits;
(*d*) that the contributions of low-paid workers be reduced;
(*e*) that benefits be increased to provide an amount which will establish a reasonable standard of living, and
(*f*) that the contribution of the Government to the Unemployment Insurance Fund be increased to one-third of the aggregate contribution.

National Fuel Policy

The memorandum referred to the resolution approved by the Congress' Convention requesting the Federal Government to establish a national policy with respect to the coal industry of Canada "which would allocate the Canadian mining companies sufficient of the Canadian market to ensure a decent annual income for mineworkers."

The Congress expressed the belief that a remedy for this situation might be found in the establishment of an Industrial Council for the Canadian coal industry, which would survey the fuel requirements of the nation and devise a policy by which they would be met, so far as practicable, from Canadian coal mines. This Council should be composed of representatives of Labour, employers, and the Government.

Defence of Canada Regulations

Realizing that it was necessary "to take measures against those who would undermine the war-effort" the Congress expressed the feeling that "it was equally necessary to protect at home those democratic rights for which Canada and the Allies are fighting" and

referred to several resolutions adopted at the Congress' convention for amendments to the Defence of Canada Regulations as follows: That the regulations be so amended as to safeguard the rights of free speech and association; that a fair trial be requested for all interned members of Labour unions; that the Government be urged to pursue a policy of greater vigilance with respect to known Fascists and that no Fascist be released from internment except in case of dangerous illness. It was further resolved that all property wrongfully seized by the Government under the Defence of Canada Regulations should be returned to its owners.

Other Requests

In addition to the foregoing recommendations the Congress went on record as being in favour of the following:

(1) The co-ordination of the material and financial resources and the man-power of the nation, so that there may be greater equality of sacrifice and the successful termination of the war be expedited;
(2) The principle of equal pay to men and women workers for equal work;
(3) The principle of vacations with pay for all workers;
(4) Legislation to provide social security in all forms; the increase of old age pensions to $40 per month and the reduction of the age of eligibility to 60;
(5) Assistance to the farmers of Canada in marketing their products at a fair price;
(6) The payment of allowances to each child of men in uniform; of allowances to dependent parents on the same basis as to a wife; of a cost-of-living bonus to all dependents, and of free transportation to men in uniform on home leave;
(7) The exemption of low-paid workers from war-taxation;
(8) The re-establishment of the Dominion Housing Act;
(9) Legislation which will make unions illegal if they are sponsored or controlled by employers;
(10) The employment of local workers on Government contracts before outside workers are brought in to engage in such work, with the provision that union labour be used;
(11) Legislation requiring employers to itemize deductions from wages, on pay-cheques or pay-envelopes;
(12) Provision for workers temporarily displaced from employment by transfer of industries from peace-time to war-time production or by the imposition of priorities;
(13) Continued support for the League of Nations Society in Canada.

Remarks of Prime Minister, Minister of Labour and Minister of National War Services

The Prime Minister, Rt. Hon. W. L. Mackenzie King, considered that the representations were "quite fair" in regard to the three specific major matters contained in the memorandum (set forth in preceding paragraphs). However, in regard to the general representations he thought it would be difficult to attempt to put such in effect in war-time, but that "it was all to the good to emphasize their importance".

Continuing the Prime Minister stated: "If I have any criticism to offer on the presentation, it is that there has not been on your part enough allowance made for the difficulties confronting the government in time of war—difficulties which may appear to you as short-comings on our part".

He emphasized that the war presents many complex problems, and that "there was not a single phase of economic life but what had not been turned topsy turvy".

He pointed to the fact that large groups of new men had been brought in to deal with various industrial problems, and that in the speeding of war production the Government is confronted with many annoying and difficult situations.

"But we are as anxious as you to fulfill the main objective", continued the Prime Minister, who added that "we will go ahead in a co-operative spirit trying to make amends where there are short-comings and to make progress where progress has not been made in the past".

The Prime Minister expressed his appreciation of the help and comfort derived from having the Honourable Humphrey Mitchell as Minister of Labour. "In his appointment", he stated, "we have succeeded in obtaining one who knows the Labour movement from the days of his boyhood. You will find that any representations you have to make may be made in language which both you and he will understand."

Commenting on the vagaries of criticism, the Prime Minister observed that Governments were frequently taken to task for not having this or that man in the Cabinet. He was reminded of Sir Wilfrid Laurier's reply to the same criticism that the public do not always send representatives equal to the requirements of the post. But the Prime Minister observed that if he ever felt sure of the quality of two appointments it was in those of Mr. Mitchell and Mr. St. Laurent, both of whom were outstanding in their spheres. "Yet," he stated, "we had two elections which had stirred up bitterness and only made it difficult to do things as quickly as they should be done."

In conclusion, the Prime Minister re-iterated before the Minister of Labour "to see, wherever it could be arranged, that there was proper and adequate labour representation on war boards and government bodies", and also

to draw to the attention of the other Ministers those sections of the memorandum that concerned their departments.

Replying to the observations of the Prime Minister, Mr. A. R. Mosher, President of the Canadian Congress of Labour, stated that the Canadian Congress of Labour appreciated the problems of the Government but, he added, the purpose of criticism is to help the Government solve some of its problems.

"We are not critical for the sake of being critical", he continued, "but to bring to the side of the Government a large group of people in a co-operative manner rather than in a complaining attitude of mind.

"Labour has no hesitancy in giving up any right essential to the winning of the war", concluded Mr. Mosher, "but we do not feel justified in giving up rights, the loss of which is really injuring the war effort and retarding production."

Minister of Labour

Honourable Humphrey Mitchell, Minister of Labour, stated that since he had not received an advance copy of the Memorandum, his remarks would be brief and would not deal in detail with the matters contained in the presentation.

He declared the Government's wage control policy to be one of "the most courageous steps ever taken in the history of the Dominion". In spite of the ramifications of the problems contained in the administration of that policy, he said a fine relationship between employers and employees had been displayed in the conferences, and problems had been approached in an evolutionary and co-operative spirit.

Indicating that he was fully aware of the responsibilities involved in the administration of that policy, the Minister in conclusion stated: "I am a trade unionist by inheritance and conviction and I sincerely hope to make some contribution to the social life of the Dominion and to labour relations during my difficult term of office."

Minister of National War Services

Honourable Mr. Thorson, Minister of National War Services, emphasized that in the prosecution of the war "certain principles which might have received general acceptance in normal times must give way to the larger objective in wartime." He declared that the wage policy of the government was not put into effect with any thought of repression. "The basic consideration" he asserted, "is to save the people generally from the ravages of inflation—an inflation that would hit the workers first."

CANADIAN AND CATHOLIC CONFEDERATION OF LABOUR SUBMITS MEMORANDUM TO GOVERNMENT

Recommendations Regarding Price and Wage Control—Request Increased Representation on Boards and Commissions

ON March 17, the Canadian and Catholic Confederation of Labour submitted its annual memorandum of proposed legislation to the Government. In the absence of the Minister of Labour, Hon. Humphrey Mitchell, the delegation from the Confederation was received by the Secretary of State, Hon. Norman A. McLarty; Minister of Fisheries, Hon. J. E. Michaud, and the Minister of National Defence for Air Services, Hon. C. G. Power.

In welcoming the delegation, Mr. McLarty referred to the unavoidable absence of the Minister of Labour, Hon. Humphrey Mitchell, who sent a telegram to Mr. Alfred Charpentier, President of the Confederation, expressing his regret at not being able to be present. Mr. McLarty said that the Government always appreciated receiving the memorandum of proposed legislation from the Confederation and that the representations made therein would be given consideration by the whole Cabinet.

Mr. Charpentier then called upon Mr. Picard, General Secretary of the Confederation, to present the memorandum.

In the introduction reference was made to the co-operation being extended by the Canadian and Catholic Confederation of Labour in maintaining and increasing war production essential for victory.

A brief reference was made to the Arvida strike in which the Confederation was involved. It was emphasized that it has been the only important strike in a war industry in which a local of the Confederation has been concerned since the war began. Reference was made to the report of the Royal Commission in which the Confederation's local was exonerated and in which it was declared that the organization had contributed largely to the termination of the strike.

Representation on Boards

Appreciation was expressed for the representation afforded the Confederation on the National Labour Supply Council, the National War Labour Board and the Quebec Regional War Labour Board. At a later stage in the proceedings of the interview, Mr. Charpentier stated that there were other war boards on

which the Confederation should be represented and mentioned particularly the Committee on Post War Reconstruction. He also referred to the recent conference convened in Montreal to discuss the co-ordination of manpower requirements in Canada and the United States and said that it was regretted that the Confederation had not been represented. He asked that consideration be given to this matter in the future in the appointment of delegations to these or similar boards and conferences.

Conscription

Dealing with the subject of conscription for military service overseas, the Confederation placed itself on record "as being favourable to, and approving of, the Government's decision not to enforce conscription for military service overseas." The opinion was expressed that "it would be highly imprudent to decide upon conscription for military service overseas under such circumstances. Such a measure could also cause undue harm to the country's industrial production which is so necessary to our war effort. . . .

"The N.C.C.L., finally, is of the opinion that national unity, so well maintained up till now, would be seriously affected by such a measure. This is one of the reasons for our opposition to the creation of a National Government as the sole object of the sponsors of such an idea seems to be to facilitate the passage of a measure to bring about conscription for military service overseas."

At a later stage in the interview, officers of the Confederation requested the deferment of military service of labour leaders. It was considered that their deferment would leave them to assist in maintaining harmonious employer-employee relations. Reference was also made to the recently announced deferment for military service of labour leaders in the United States (see reference on page 257 of this issue).

The establishment of a French-Canadian Royal Military College in the Province of Quebec was also requested.

Minister of Labour

The Confederation congratulated the Hon. Humphrey Mitchell on his appointment as Minister of Labour and assured him of its "entire co-operation at all time."

Deep regret and sorrow was expressed on the death of Rt. Hon. Ernest Lapointe, which, the Confederation said, was "tempered somewhat upon learning of the happy nomination of his successor, Hon. Louis St. Laurent who, with reason, has the reputation of being one of Canada's best jurists."

Control of Prices

Dealing with the subject of control of prices, the Confederation declared that it was "evident that radical measures were necessary to prevent inflation."

Referring to the instalment buying regulations of the Wartime Prices and Trade Board, it was declared that while these "did not seem to be too radical in so far as articles of luxury are concerned, they are considered too severe for certain necessities which are sold at fairly high prices." Elaborating on what was meant by necessities the memorandum stated: "The articles we mean, for instance, are those which a worker would need if he is getting married and founding a new home, or is moving into new and bigger living quarters or is called upon to furnish an extra one or two rooms in his present lodgings."

Control of Wages

On the subject of wage control as established by P.C. 8253, the Confederation noted "with pleasure" that the National War Labour Board had "proved itself to be quite broad-minded, in its first bulletin, especially with regard to its interpretation of the basic scale of wages and we voice the hope that the Regional Boards will carry out their work, (and we believe that such will be the case), in the same spirit as the National Board has done to date."

The Confederation expressed its gratification on learning that in the Province of Quebec P.C. 8253 "was to be applied in making use of the existing mechanism of the prevailing collective labour agreements in this part of the Dominion. We believe that this procedure will greatly facilitate the application of the order P.C. 8253 due to the supervision exercised by the joint committees. It will constitute the normal complement of the Federal-Provincial inspection service provided for under the order P.C. 5522 and dated July 22, 1941."

It was then suggested that the National War Labour Board and the Regional War Labour Boards be charged with the duty of administering Order in Council P.C. 2685 which outlined the Government's Wartime Labour Policy, in the same manner as Order in Council P.C. 7679 (fair wages conditions).

Dealing with P.C. 7679, the Confederation requested that its application be completely and rigorously maintained. "This decree," the memorandum declared, "provides for minimum wages, which are certainly not exaggerated, and our Confederation would not look kindly upon any concessions to the existing situation made by Ottawa, as a result of the pressure which is presently being brought to bear upon the Government by certain employers."

Stating that Order in Council P.C. 7679 might create certain problems in a few industries, particularly the footwear industry, where only a small percentage of employees are engaged on war contracts, the Confederation suggested that in such cases a national conference of the industry concerned be held to study the whole problem and find the best possible solution.

Later it was claimed by one of the delegates, that P.C. 7679 was not being observed in the shoe industry, and the Government was asked to make an inquiry into the matter. In this connection the Hon. C. G. Power stated that companies working on war contracts had to pay the basic wage provided in P.C. 7679, and some found it inconvenient after a few weeks when the contracts had expired, to revert to their regular wage rates. Mr. Picard said that the Confederation did not wish the Government to change P.C. 7679, but that a National Conference should be called for each industry in order to study the matter. Mr. Charpentier proposed that all companies working on war contracts to the extent of 10 per cent of their total output be required to pay the basic wages provided by the Order in Council. Mr. Power, however, did not agree with this suggestion, pointing out that it would be rather difficult to determine whether one particular company works constantly to the extent of 10 per cent of its business on war contracts.

Finally in connection with minimum wages the Confederation made the following suggestion:

"Minimum wage laws, enforced by governmental organizations, already exist in most of the provinces of Canada. There is the Industrial Standards Act in Ontario and the Quebec Minimum Wage Act in the province of Quebec, for instance. These laws give rise to ordinances which establish minimum wages in various industries not affected in any way by existing collective labour agreements. Our Confederation thinks that the order P.C. 8253 should allow these ordinances to be revised whenever the Government Commissions dealing with minimum wage laws believe it to be advisable, provided that all revisions and amendments only come in force after they have been approved by the National War Labour Board."

Chairman, Unemployment Insurance Commission

The Confederation requested that a French-Canadian be appointed as Chairman of the Unemployment Insurance Commission to succeed the late Dr. Joseph Sirois. Mr. McLarty told the delegation that this matter had already been attended to and that Mr. Louis Trottier of Montreal had been appointed to that post.

Unemployment Insurance

The Confederation requested that the Unemployment Insurance Act be amended to include all those earning less than $2,500 a year; that the scale of benefits be increased in favour of those with family responsibilities; and that the sections of the Act dealing with insured persons' record books and unemployment insurance stamps be simplified. It was stated that this latter question was giving rise to considerable criticism.

Following the presentation of the memorandum a lengthy discussion took place concerning the drift of rural workers to the city where they competed with unemployed urban workers for jobs in war industries. It was claimed that there was still a considerable number of unemployed in the city and that until these were absorbed into employment, the movement of rural workers to the city should be discouraged. It was also claimed that many women were being employed in war industries, while men of non-military age were still unemployed. In this connection, Mr. Power said that it was fairly well established that there was certain work in industry at which women were more dexterous than men and therefore it was necessary to utilize their services.

Concluding the interview, Hon. J. E. Michaud thanked the delegation for their presentation and joined with the delegates in mourning the absence of the late Minister of Justice, Rt. Hon. Ernest Lapointe and recalled that he always had shown a great deal of interest in the work of the Confederation.

Mr. Michaud promised that the Confederation's memorandum would be studied, and told the delegates that whenever they had demands to make of the Government, they should do so without fear. He warned them, however, that it would not always be possible to grant them.

In this connection, he referred especially to the request for exemption from military service for union officials, made by Mr. Charpentier, and stated that farmers, fishermen and many other groups were asking for this privilege, and that if all were granted deferment no one would be left to defend the country. "The best way to defend the trade unions is by defending Canada first," Mr. Michaud concluded.

CHILD HEALTH IN RELATION TO EMPLOYMENT

A study of the health records during their school careers of a group of men drafted under the United States Selective Service Act has been made by the United States Public Health Service. Medical examinations of the drafted men have shown a high percentage to be physically unfit for army service. Similar conditions have been revealed in Canada. The study showed that "many of the defects for which they were rejected for service were present in childhood, and predictions of a future unfit condition in a significant number of cases could have been made on the basis of fair-to-poor nutrition and posture. More concentrated attention on prevention and cure of ill-health during the period of growth of these individuals would undoubtedly have resulted in reducing the proportion of physically unfit."

In commenting on this report, the New York State Department of Labor in its Industrial Bulletin, January, 1942, asserts that "the present increase in the number of child workers involved and the urgency of maintaining good health, make it necessary to retain and, where warranted, amplify protective measures found useful in the past. It is therefore not only appropriate but necessary to re-examine the bases for our peace-time standards for the protection of child workers and young people from the point of view of wartime needs."

Facts relating to the health of children in employment were gathered from a number of studies. One made in Cincinnati compared the strength, lung capacity and mental development of working children and school children. It showed that "on the whole, school furnishes a better background for physical development than industry, in that school children are always ahead of working children. It is even more evident that school furnishes a better background for mental development."

Similar studies made in Sweden, Russia and Italy "all revealed an inferiority in the general physique of working children in contrast to school children."

The article stresses the importance with respect to the future health of the adult of safeguarding the critical period of growth associated with maturation. It is during this period that the child's industrial career often begins. The article states:

"Periods of growth require adequate nutrition, including fresh air and sunlight, and sleep, and freedom from undue fatigue if there is to be no impairment of the process. That the working environment may seriously interfere with the growth process is suggested by the comparative measurements of working and school children already cited."

A significantly higher death rate for the 15- to 19-year group than for 10- to 14-year olds indicates the greater susceptibility of the adolescent to serious illness. It is during such a dangerous period that many children enter employment.

The importance of good working conditions in mitigating the adverse effects of employment on the health of children was stressed. Proper lighting, ventilation, seats, hours, speed of work and safety measures may eliminate some of the dangers to health. On the other side, it was pointed out:

"Working conditions may contribute to skeletal and muscular deformities. Knock-knees and bow-legs are known to occur in predisposed persons employed in occupations requiring prolonged standing. Young persons who are growing rapidly and are employed too early in occupations requiring prolonged standing or carrying of heavy loads also have a tendency to flat feet. Variations in the shape of the chest and deformities of the spinal column are commonly observed effects of work in the needle trades and heavy farm labour. Heavy work requiring excessive muscular force or the use of certain groups of muscles while others remain inactive will, in the long run, show results in overdevelopment of some muscles and underdevelopment of others... The Heart Committee of the New York Tuberculosis Association in examination of 1,000 newsboys, found flat feet more frequent among them than among average school children and a greater proportion of spinal curvature among those boys who carried heavy loads."

After a recent survey the United States Department of Labor reported "a higher accident frequency rate for the age group under 21 than for any other age group including those workers 60 years and over." Fatigue is an important factor in causing accidents and it appears from other studies on employed juveniles that "physiological immaturity entails greater susceptibility to fatigue. . . We have ample proof of the harmful effects of fatigue in increasing susceptibility to illness and decreasing efficiency on the job in the adult. Fatigue in a child will, in addition, interfere with growth by affecting appetite and utilization of food and disturbing sleep." The immature worker lacks the physical co-ordination and the mental and emotional maturity to perform many industrial jobs safely.

The findings of these studies, in the opinion of the New York State Department of Labor, all point to the need for improved standards for the protection of child workers in order that they may develop into physically fit adults unhandicapped by disabilities and defects arising from unsuitable employment.

WAR EMERGENCY TRAINING PROGRAM

Statistical Summary for February, 1942

REPORTS from the 111 technical and vocational schools and training centres in which War Emergency Training was conducted in February indicate that the total number in the classes at the end of that month was 14,978. While the enrolment in the industrial and R.C.A.F. classes exceeded that of any previous month there was a reduction in the numbers in the Army classes because of National Defence Headquarters having made other arrangements for some of the Army tradesmen who had been in training under the program.

Placements in February exceeded those of any previous month. From the industrial classes 2,541 graduates were placed in employment in war industries and 37 trainees left these classes to enlist in various units of the Armed Forces. From the R.C.A.F. classes 905 graduates were enlisted in the Air Force during February.

Of the total in training at the end of February 5,286 were in the industrial pre-employment classes where training is provided in the fundamental operations of trades for which workers are most in demand with specialized training for such occupations as machine shop work, welding, metal work, electricity and radio mechanics, and operations in connection with aircraft production.

In the part-time (evening) classes conducted at the request of employers in war production with the object of up-grading selected employees there were 1,449 receiving instruction at the end of February.

The number in the pre-enlistment classes for the R.C.A.F. at February 28 was 5,175. These classes provide for the Air Force all the basic training in aero-engine and airframe mechanics and wireless operating (ground). Classes in radio mechanics are also included in the program and since November classes have been conducted in 9 schools in which educational refresher courses are given for air-crew personnel for the R.C.A.F. Enrolment in these classes is restricted to suitable trainees selected by the Air Force. Instruction is given in mathematics, physics, English and such other subjects as the R.C.A.F. may determine with the object of bringing trainees up to the educational standard required for enlistment as air-crew personnel.

Navy and Army tradesmen in training at the end of February numbered 3,068. In these classes training is provided for enlisted men as tradesmen and mechanics, the courses followed being those approved by responsible officers of the service concerned.

To meet the varying needs and requirements of wartime industry the pre-employment courses of training are adjusted from time to time in accordance with the needs in different localities and under different circumstances. In late months arrangements were made whereby the number of women in training was increased especially in the Province of Ontario. Schools in the Provinces of Quebec, Saskatchewan, Alberta and British Columbia also have had women enrolled in the industrial classes. The numbers of women trainees in the provinces concerned are shown in a foot-note in Table 1. The trades in which instruction is given to women include machine shop practice, fine instrument mechanics, electric wiring and work connected with the production of aircraft parts.

Although not part of the War Emergency Training Program, the regular classes in Provincial and Municipal technical schools are making a very substantial contribution in training workers for war industry. During this winter 17,392 persons were enrolled in evening classes for instruction in occupations related to war production. The majority of those enrolled were employed during the day in non-essential occupations or in unskilled work and availed themselves of this opportunity to take training to fit them for more skilled employment. The enrolment was distributed by courses of training as follows: Machine Shop and fitting 2,597, electricity and radio mechanics 3,014, woodworking 2,056, motor mechanics 1,794, drafting and blue-print reading 3,997, welding 1,814, aircraft and sheet-metal 1,182, miscellaneous trades 938. These classes provide from 4 to 6 hours training per week and are in progress for 6 or 7 months of each year.

Explanation of Tables

Dominion and provincial totals of the numbers in training at February 1, numbers enrolled in February; and the numbers in the classes at the end of February are shown in Table 1. The table also shows the numbers who have been in the classes from April 1, 1941 to the end of February, 1942 (the first eleven months of the current fiscal year). Placements, enlistments and withdrawals during February and since April 1, 1941 are also shown in Table 1.

Table 2 shows by provinces and individual schools the numbers in training at February 28 with the main categories of trade training being provided in each school. The numbers

(Continued on Page 305)

(1) Part-time (evening) classes carried on at request of employers in war production with object of up-grading employees.

WOMEN TRAINEES.—The total in training in the pre-employment classes from April 1, 1941 to February 28th, 1942, includes the following numbers of women: Quebec 18, Ontario 5,164, Saskatchewan 66, Alberta 44 and British Columbia 122.

The pre-employment total at the end of February includes the following numbers of women: Ontario 1,010, Saskatchewan 41, Alberta 37 and British Columbia 21.

The total number placed in employment from April 1, 1941 to February 28th, 1942 includes the following numbers of women: Ontario 3,568, Saskatchewan 20, Alberta 2 and British Columbia 86

The total number placed in employment in February included the following numbers of women: Ontario 898, Saskatchewan 20, Alberta 2 and British Columbia 17.

RECENT REGULATIONS UNDER DOMINION AND PROVINCIAL LEGISLATION

Pilotage Dues in British Columbia—Merchant Seamen Order—Hours in Alberta—Minimum Wages in Quebec and Alberta—Ontario Workmen's Compensation—Trade School Regulations in Quebec

WAR conditions have necessitated a revision of pilotage dues in British Columbia and a relaxation of the nine-hour day standard in Alberta for the rolling mill industry. There have been three amendments to the Merchant Seamen Order. Six Quebec minimum wage orders relating to the cotton textile industry, the match industry, waste materials, the canning industry, the dairy industry and taxi-cabs in Montreal and district have been renewed, and an amendment has been made in the Alberta minimum wage order relating to the hotel and restaurant industry. The coverage of the Ontario Workmen's Compensation Act has been extended to garage businesses, parking and used car lots and to those engaged in storing and dealing in motor vehicles and in the construction or operation of telephone lines irrespective of the number of workmen employed in these undertakings. The first regulations under the Quebec Trade-Schools Act have been issued.

Canada Merchant Seamen Order 1941

Three amendments have been made in this order, which was established by P.C. 2385, April 4, 1941 (LABOUR GAZETTE, 1941, p. 650), and which provides for the discipline of merchant seamen whose actions delay or are likely to delay the departure of a ship. Under it Committees of Investigation are set up to conduct preliminary examinations, and cases may then be referred to Boards of Inquiry which have power to impose punishment. P.C. 5088, July 10, 1941, extends the scope of the order to merchant ships of all countries except the United States, Japan and any other country which might be designated by the Governor in Council. Originally the order had covered merchant ships of Great Britain, Belgium, Czechoslovakia, the Netherlands, Norway, Poland, Greece and any other country the Governor in Council might designate. P.C. 5088 also raised from 48 to 72 hours the time limit within which a seaman who has been removed from his ship by a Committee of Investigation must be brought before a Board of Inquiry—thus relieving a difficult administrative problem.

P.C. 81/6954, September 6, 1941, was also designed to remove an administrative difficulty. Under the original order, a Board could, among other things, order a detained seaman "released to his ship." The difficulty was, however, that the seaman's ship had usually left port. The word "his" was therefore changed to "a".

P.C. 7891, October 11, 1941, specifies that the disciplinary provisions of the order apply to any seaman accommodated in a manning pool "who refuses to go to sea on a ship of his own nationality, or in any other ship to which he might be assigned, or who engages in activities likely to cause delay in the departure of any ship." The term "manning pool" refers to the seamen's manning pools set up under the authority of P.C. 14/3550, May 19, 1941, (LABOUR GAZETTE, 1941, p. 957).

Canada Shipping Act

War conditions have given rise to an order gazetted January 10 increasing by a 25 per cent surcharge all pilotage dues in the Pilotage, District of British Columbia. By-law 5 of the District has also been amended to provide higher fixed rates for movage between certain specified points and for pilotage services in special cases. A pilot must be paid $15 for attending a vessel while compasses are being adjusted. If attending a vessel on a trial trip, he is to receive $50 for the first 12 hours, and $5 an hour thereafter.

A new by-law has been substituted for No. 6. It makes rulings regarding the methods of computing mileage, draught, tonnage and detention charges. It also establishes a minimum tonnage charge of $15, and sets a maximum of 5,000 tons on which tonnage charges may be computed. One and a half rates are required of vessels employing a pilot for only part of the calls and movages they make on any voyage in the district, but certain trips are excepted from this provision.

These regulations are in addition to certain adjustments made May 30, 1941, in the rates of this pilotage district under the War Measures Act (LABOUR GAZETTE, 1941, p. 958). In case of conflict, the latter take precedence over regulations under the Canada Shipping Act.

Alberta Hours of Work Act

Because the rolling mill industry in Alberta is mainly engaged in supplying material for Dominion war contracts, a relaxation of the nine-hour day standard has been granted by the Board of Industrial Relations. The new regulation, gazetted and effective December 31, 1941, permits workers employed on a tonnage basis to work an 11-hour day.

Previously, workers of this class had been paid for an 11-hour day, but because they were granted rest periods of from 30 to 40 minutes between heats at least four times a day, actual working hours did not exceed nine. The new order permits the actual working hours to exceed nine but employees will not be required to be on shift on any one day for a greater period than 11 hours.

Alberta Minimum Wage Act

By an order of the Board of Industrial Relations gazetted February 28, hospitals and nursing homes have been removed from the list of undertakings to which Order 3 relating to women employed in the hotel and restaurant industry is applicable (LABOUR GAZETTE, 1941, p. 555).

Ontario Workmen's Compensation Act

The coverage of this Act has been extended to two groups of undertakings formerly excluded under regulation 43 or excluded under regulations 45 and 46 if they employed less than six or four workmen. Regulation 113 gazetted November 15, 1941, and effective from January 1, 1942, bring workers employed in public garages, parking stations, parking lots and used car lots and undertaking storing and dealing in motor vehicles under Part I of the Act. They are assigned to class 11 of schedule 1 for purposes of assessment, but if they are carried on as a part of any industry in a different class, they are to be deemed part of that industry for purposes of the Act. Two previous regulations are amended to bring them into line with the new regulation. Public garages are removed from the list of industries wholly excluded from the operation of Part I under regulation 43. Regulation 46 is amended to bring within Part I automobile repair shops and garages operating independently of any industry under Schedule 1 when they employ less than four workmen.

Regulation 114 also gazetted November 15, and effective from January 1, 1942, brings under Part I all those engaged in the construction or operation of telephone lines or works by removing this group from the list of industries, undertakings in which are excluded under regulation 45 if they employ less than six workmen.

Quebec Minimum Wage Act

Six orders have been renewed. Two were gazetted January 31, two on March 7, and the others on January 10 and 17.

Order 8 dealing with the cotton textile industry (LABOUR GAZETTE, 1941, p. 31) and Order 27 relating to the canning industry (LABOUR GAZETTE, 1940, p. 123) have been renewed until February 1, 1943.

Order 10 relating to workers engaged in the pasteurization, manufacture, and distribution of dairy products in Montreal and district, (LABOUR GAZETTE, 1938, p. 1097) and Order 13 concerning the match industry (LABOUR GAZETTE, 1938, p. 1099) have been extended until April 1, 1943.

Order 25 concerning waste materials (LABOUR GAZETTE, 1939, p. 301) is to remain in force until March 1, 1943.

Order 26-A relating to taxi-cabs and automobiles for hire in the city and district of Montreal (LABOUR GAZETTE, 1941, p. 435) is extended to December 1, 1942.

Quebec Trade-Schools Act

The first regulations issued under this Act which was proclaimed July 15, 1941, were gazetted March 7. They are embodied in two orders-in-council, one dated July 23, 1941, and an amending one of October 9, 1941. Similar legislation and regulations are now in force in Nova Scotia, Ontario, Manitoba, Saskatchewan, Alberta, and British Columbia.

The Act is declared applicable to all arts, trades or vocations connected with aviation, building and printing and to the trades of mechanic, blacksmith, boilermaker, stationary engineman, draughtsman, electrician, operator of internal combustion motors, telegraphist, solderer, rivetter, mason, tinker and tinsmith, turner, vulcanizer, shoemaker, hairdresser, barber, tailor, and cutting and sewing. It also applies to correspondence courses.

The regulations declare that trade schools must obtain the approval of the Provincial Secretary in regard to the competency of instructors, the efficiency of the teaching methods or apprenticeship system, the admission requirements, the duration of the course, the safety and suitability of the buildings and equipment used and the sanitary condition of the buildings.

Children under 16 may not be admitted to a trade school. The use of misleading advertising or promises leading pupils to believe that a position is assured them are forbidden. A school approved by the Provincial Secretary may advertise the fact only in these words, "school under permit only, pursuant to the Trade-Schools Act".

All trade schools are required by the Act to hold a permit from the Provincial Secretary. The regulations specify that applicants for permits must furnish particulars and documents regarding the name of the school, whether it is a new or an established one, the nature of its incorporation if any, addresses, experience and academic qualifications of all

staff both teaching and administrative, trades to be taught, school program, examinations, certificates, fees, references, contracts with pupils, means of subsistence and in particular whether the products or services of the school are to be sold to the public. The nature of the publicity planned by the school must be stated and a pledge given that no other form of advertising will be adopted without the approval of the Provincial Secretary. In general, the applicant is required to prove that the school is competently staffed, adequately equipped and prepared to give a suitable professional training in one or more trades at reasonable rates. A fee of $10 must accompany the application for a permit.

Before September 2 of each year, every trade school is required to file an annual report covering the school term ending June 30. The report must note changes in any of the particulars furnished when applying for a permit and must contain a complete statement on the term just ended including information as to the time devoted to the teaching of each trade, attendance statistics and examination results. A fee of $2 must accompany the report.

COMBINES INVESTIGATION ACT

Supreme Court of Canada Affirms Convictions in Shipping Container Combine Case—Alberta Court Allows Appeals of Accused in Tobacco Combine Case

THE Supreme Court of Canada on February 3 unanimously dismissed the appeals of all appellants in the case of The King v. Container Materials Limited et al., and affirmed the majority judgment of the Ontario Court of Appeal delivered on May 30, 1941, which declared seventeen companies manufacturing shipping containers, one incorporated trade association and one trade association officer guilty of offences in undue restraint of trade under Section 498 of the Criminal Code (LABOUR GAZETTE, June, 1941, pp. 642-646). The judgments dismissing the appeals, written by Sir Lyman P. Duff, Chief Justice of Canada, and Hon. Mr. Justice Kerwin, are of significance as the most important contribution of the past decade dealing with interpretation of the laws against undue restriction of competition and monopolization of trade.

Proceedings against the convicted companies and individuals had been commenced at the instance of the Attorney General of Canada following the report of the existence of a combine after investigation under the Combines Investigation Act. The accused were tried in Toronto by Mr. Justice Hope of the Supreme Court of Ontario sitting without a jury, who found all parties guilty of combining to restrain trade in contravention of Section 498 of the Criminal Code, and imposed fines totalling $161,500 (LABOUR GAZETTE, September, 1940, pp. 986-990). J. C. McRuer, K.C., of Toronto, assisted by R. M. Fowler and J. L. McLennan, appeared for the Crown in the Supreme Court. Argument was heard from December 2 to 17, 1941.

Judgment of Chief Justice of Canada

Sir Lyman P. Duff, Chief Justice of Canada, stated that he was in agreement with indicated conclusions of the majority of the Court of Appeal in respect of fact as well as in respect of law. His final summation, providing a brief outline of the class of offences condemned, follows in full.

"The enactment before us, I have no doubt, was passed for the protection of the specific public interest in free competition. That, in effect, I think, is the view expressed in Weidman v. Shragge in the judgments of the learned Chief Justice, of Mr. Justice Idington and Mr. Justice Anglin, as well as by myself. This protection is afforded by stamping with illegality agreements which, when carried into effect, prevent or lessen competition unduly and making such agreements punishable offences; and, as the enactment is aimed at protecting the public interest in free competition, it is from that point of view that the question must be considered whether or not the prevention or lessening agreed upon will be undue. Speaking broadly, the legislation is not aimed at protecting one party to the agreement against stipulations which may be oppressive and unfair as between him and the others; it is aimed at protecting the public interest in free competition. That is only another way of putting what was laid down in Stinson-Reeb v. The King (supra) which, it may be added, was intended to be in conformity with the decision in Weidman v. Shragge, as indicated in the passages quoted in the judgment.

"The lessening or prevention agreed upon will, in my opinion, be undue, within the meaning of the statute, if, when carried into effect, it will prejudice the public interest in free competition to a degree that the tribunal of fact finds to be undue, and an agreement to prevent or lessen competition to such an extent is, accordingly, an offence against Sec. 498 (*d*).

"The learned trial Judge, as well as the learned Justices of the Court of Appeal, directed their attention to the effect of the agreement from this point of view. The learned trial Judge observed that the agreement was 'to put free competition into a straight jacket'. Mr. Justice Masten said 'free competition was stifled'. The learned Chief Justice of Ontario says that 'the purpose of the agreement was to extinguish so far as

these manufacturers were concerned all competition in the barter and sale of those products in Canada just as completely as if Container Materials Limited had a monopoly of them'.

"The majority of the Court of Appeal rightly held, I think, that the aim of the parties to this agreement was to secure effective control of the market in Canada; it may be added that in this they were very largely successful. But the fact that such was the agreement affords in point of law a sufficient basis for a finding that the agreement was one which, if carried into effect, would gravely prejudice the public interest in free competition, and a conviction under Section 498 (*d*).

"With respect to the other points raised by the Appellants it is sufficient to say that I have had an opportunity of reading the judgment of my brother Kerwin and I fully concur with him as regards these points. The appeal should be dismissed."

Principles of general application, as stated in the judgment of Mr. Justice Kerwin, concurred in by Rinfret, Hudson and Taschereau, JJ., included the following:

"It was argued that it was not sufficient for the Crown to show an agreement or arrangement, the effect of which would be unduly to prevent or lessen competition, but that the agreement or arrangement must have been intended by the accused to have that effect. This is not the meaning of the enactment upon which the count was based. *Mens rea* is undoubtedly necessary but that requirement was met in these prosecutions when it was shown that the appellants intended to enter, and did enter, into the very arrangement found to exist."

"Under the decision in the Stinson-Reeb case, the public is entitled to the benefit of free competition except in so far as it may be interfered with by valid legislation, and any party to an arrangement, the direct object of which is to impose improper, inordinate, excessive or oppressive restrictions upon that competition, is guilty of an offence. A comparison between section 498 of the Code and section 498A (which was enacted subsequent to the decision in the Stinson-Reeb case) indicates that there has not been any change in the rule. Once an agreement is arrived at, whether anything be done to carry it out or not, the matter must be looked at in each case as a question of fact to be determined by the tribunal of fact upon a common sense view as to the direct object of the arrangement complained of. The evidence in these cases of what was done is merely better evidence of that object than would exist where no act in furtherance of the common design had been committed. So viewing the matter, there can be no question that not only was there some evidence upon which the trial judge could convict but the evidence was overwhelming that all the appellants at one time or another conspired, combined, agreed or arranged to prevent or lessen competition in the production, manufacture, purchase, barter, sale, transportation or supply of corrugated and solid fibre boxes or shipping containers, and that they conspired to do so unduly."

Wilson Boxes Limited, granted a new trial after being convicted and fined $5,000 when tried with the other accused companies, pleaded guilty on March 4, 1942, to the offence of combining to unduly prevent or lessen competition and was fined $2,500 by Mr. Justice MacKay in Assize Court at the City of Toronto.

Proceedings in Tobacco Case

The convictions of twenty-six companies and nine individuals engaged in tobacco manufacturing or distribution on charges of breaches of section 32 of the Combines Investigation Act were set aside by the Alberta Court of Appeal in a judgment delivered by Mr. Justice Ford on February 5. The appellants had been tried before a jury presided over by Mr. Justice S. J. Shepherd on charges laid under the Combines Investigation Act. This action had followed a stay of proceedings which had been entered by the Crown in 1940 in a trial in which all but two of the appellants had been charged with contravening Section 498 of the Criminal Code. (LABOUR GAZETTE, August, 1941, pp. 949-952.)

The principal ground on which the Appeal Court quashed the conviction of those appellants who had been charged previously under Section 498 of the Criminal Code was that section 28 of the Combines Investigation Act Amendment Act, 1935, constituted a bar to the proceedings. This section provides that "No person shall be charged with, tried for or convicted of any offence against this Act, by the same information, upon the same evidence or at the same time as he is charged with, tried for or convicted of an offence against section four hundred and ninety-eight of the Criminal Code."

The court in further review of the law indicated that a preliminary inquiry before a magistrate on the Combines Investigation Act charges should have been held. Additional grounds for allowing the appeals were held to justify allowing those of the two firms not previously charged under the Criminal Code and the granting of a new trial for these two firms. The principal one of these was indicated in the view of the Court to relate to the procedure under which the jury requested and were supplied with the transcript of the addresses of counsel, after they had returned to consider their verdict. The judgment also included opinions that the question of proof of the most important ingredient of the offence, that the combine had operated or was likely to operate to the detriment of the public, had not been adequately put to the jury by the Trial Judge, and that effect must be given to the objection that no warning was given as to the danger of acting upon the uncorroborated evidence of accomplices.

The judgment of Mr. Justice Ford was concurred in by Chief Justice Harvey, Mr. Justice Lunney and Mr. Justice Ewing. It was delivered after the death of Mr. Justice Clarke, the fifth member of the court, who sat on the hearing of the appeal. Application for a rehearing of the appeal and for an order staying entry of the appeal judgment was made by the Attorney General of Alberta on the ground that judgment in these circumstances by the remaining four members of the court was not an effective determination of the issue. This application was dismissed on March 10 by the same four members of the court.

One convicted manufacturing company did not appeal from the verdict of the jury and the sentence imposed by the Trial Judge.

HOUSING OF WAR WORKERS IN GREAT BRITAIN

THE problem of providing accommodation for workers engaged on war work away from their homes has been a matter of concern to the Ministry of Labour and National Service working in co-operation with the Ministry of Health. The need is particularly acute for three groups of workers. Dock labourers must be moved quickly from place to place as traffic has to be concentrated in different ports at different times. Accommodation for building workers is required wherever construction work is going on. Munitions workers create a special problem because of their large numbers and because the plants are often remote from populous centres. Evacuees, the armed forces, decentralized Government departments, private firms and people migrating from more dangerous areas compete with the industrial worker for available accommodation.

The problem has been dealt with according to the particular needs and circumstances of each area. In some places sufficient householders have offered accommodation to workers. In others the Government has requisitioned and reconditioned unoccupied dwellings for housing workers. In still others the Government has used its powers to prohibit the furnishing of accommodation to any one except those engaged in essential war work and has shifted evacuees away from factory areas. Where a munitions plant has been built in a rural area and sufficient houses are not available either for voluntary or compulsory billeting, hostels have been built or, as an alternative solution, employees continue to live at home but may be given an allowance to cover daily travelling expenses in excess of 3s. per week.

In June, 1940, the administration of the Factory Act was transferred from the Home Secretary to the Minister of Labour and National Service who announced on June 27:—

> I have established a Factory and Welfare Advisory Board, the membership of which was recently announced, to assist me in stimulating and developing to the fullest extent the health, safety and welfare arrangements inside the factory, and the billeting, feeding and welfare arrangements outside the factory in order to help in maintaining maximum output. I have also established in the Ministry a Factory and Welfare Department, of which the Factory Department transferred from the Home Office forms a part, for the purpose of carrying out the new duties imposed upon me. Divisional and local welfare officers to deal more particularly with welfare arrangements outside the factory are being appointed. The local welfare officers will be attached to the local Labour Supply Committees and will act in co-operation with the local authorities and the various local voluntary organizations. I am glad to say that I have obtained the co-operation of the national voluntary organizations, who have agreed to set up a Central Consultative Committee for this purpose.

Voluntary Co-operation

In securing accommodation for workers the policy of the Government at first was to rely on voluntary co-operation from householders. In areas to which war workers were to be transferred local authorities at the request of the Ministry of Health listed available lodgings and deposited the list with the local employment officer who directed workers to suitable lodgings. Rates for accommodation were determined by private arrangements between lodgers and landladies. In some areas the Ministry of Health paid the salary of a full-time organizing officer and staff appointed by the local authority to deal with the housing problem.

Compulsory Billeting

Where insufficient accommodation was offered on a voluntary basis, the Government resorted to compulsory billeting for such persons as agricultural and industrial workers, soldiers and evacuees. This scheme was authorized by Defence Regulation 22 passed early in the war under the Emergency Powers (Defence) Act. This regulation empowers the Minister of Health to appoint billeting officers with authority to serve billeting notices on householders requiring them to provide accommodation. Failure to comply with a billeting notice makes the householder liable to a fine up to £50 or to imprisonment up to 3 months or to both. Tribunals to hear complaints in regard to

billeting notices may be set up where necessary.

Billeting powers are usually delegated by the Minister of Health to the local authorities who appoint billeting officers and enlist the co-operation of voluntary organizations in making an inventory of accommodation. By August, 1941, 150 areas had received compulsory billeting powers. Lists of billets are kept at the local employment offices, many of which now have reception committees often drawn from voluntary organizations. Members of these committees meet trains and direct new arrivals to their billets. Compulsory billeting arrangements have been made mainly for individual war workers but in some cases are extended to include their wives and families.

Householders served with a billeting notice are required to provide lodging only. They are encouraged to supply one or two meals a day if possible. The Ministry of Health pays each householder 5s. a week through the local post office for each billet and deducts this amount from the worker's salary. If meals are provided, the lodger and the landlady arrange their own terms for the board.

Hostels

Where compulsory billeting is not feasible either due to lack of houses or because local authorities were unable to cope with the administrative problem, the Government has sanctioned the building of hostels. In view of the urgent need for accommodation and the scarcity of building labour and materials the Government permits the erection of hostels only when other means of accommodating workers have failed.

The Ministry of Works and Buildings erects the hostels, but where possible the management is delegated to voluntary organizations such as the Co-operative Holidays Association, the Holiday Fellowship Committee and the Y.W.C.A. Last June the Minister of Labour and National Service set up the National Service Hostels Corporation Ltd. to control the hostels either through approved agents or by direct management. The Minister has also appointed an Advisory Committee composed of representatives of the government departments concerned with production, employers and trade unions which he consults on hostel matters. A special Board of Management supervises thirty-five hostels built for land workers. Hostels for employees of Royal Ordnance factories are directly controlled by the Ministry of Supply.

The standard pattern for the hostels is a three-wing structure with one wing containing dormitories, a second containing welfare facilities such as dining room, recreation hall, kitchen, sick-room, etc. and a connecting wing with washing facilities. This standard unit accommodates approximately 50 workers and can be duplicated any number of times so that some hostels are made up of 20 such units and house as many as 1,400 workers. Usually the hostels are delivered to sites in prefabricated units and assembled on concrete foundations already prepared. They are made of a variety of materials to avoid a drain on any one kind.

Rates at one hostel where the workers' earnings averaged 3 guineas a week were 25s. a week. This covered three meals and use of all the welfare facilities. Meals were served at all hours to accommodate shift workers and rooms were allotted so that all those in the same shift slept in the same dormitory. Recreational activities were organized by the managers of the hostel. Each unit was staffed with a matron and a woman steward to look after the welfare of the residents.

About 150 hostels for single workers and quarters for married workers have been or are being built, and were expected to provide accommodation for 60,000 single workers and 7,000 married workers by the end of 1941. Hostels have not proved as popular with the workers as was expected by their promoters. Reluctance to live away from home or to move away from a familiar neighbourhood has prevented many workers from choosing hostel life in preference to daily commuting between distant points. Some have found living at home cheaper, especially if they can obtain daily travel subsidies.

Joint Production Committees for Royal Ordnance Factories in Great Britain

The Director General of Ordnance Factories has announced that joint production consultative and advisory committees are to be established in all ordnance factories. Existing trade union arrangements will continue but machinery is being set up so that the workers can put forward grievances and suggestions through elected committees. The trade unions will supervise the election of the workers' representatives and there is to be a central joint council under the chairmanship of the Director General at which all matters affecting Royal Ornnance Factories may be discussed. On the draft constitution of the committees, the Director General has been consulting with the trade unions. It is expected that regular meetings of these joint bodies will assure a maximum amount of co-operation in the munitions industry.

AUSTRALIAN ARBITRATION MACHINERY DURING THE WAR

THE principle which has prevailed in Australia for the settlement of industrial disputes is compulsory arbitration. In the federal field, the machinery is set up under the Commonwealth Conciliation and Arbitration Acts, 1904-34, and consists of a Commonwealth Court of Conciliation and Arbitration and certain ancillary machinery. There has been a tendency, especially since 1929, to lay less stress on compulsion and to elaborate the supplementary conciliation features. Some difficulty has been encountered in the fact that the scope of the Commonwealth Court is limited by the constitution to "industrial disputes extending beyond the limits of any one State", though this limitation has declined in importance with the growth of industry.

The need for speed in adjusting grievances became imperative after the outbreak of war, and the Government used its special war powers to pass the National Security (Industrial Peace) Regulations on December 16, 1940. They were amended on February 10, March 5, and December 16, 1941. These regulations (which were summarized in the Labour Gazette, 1941, p. 143) removed limitations on the scope and procedure of the Court. Intrastate disputes have been brought within the scope of the Court; employers and employees are required to notify the Registrar or a Deputy Registrar appointed under the Act of any situation which might lead to an interruption of work, and even if an open dispute does not exist the Court may determine the matter or have a Conciliation Commissioner or Board of Reference do so, and, moreover, under the amendment of December 16, 1941, the Secretary of the recently created Department of Labour and National Service must also be notified, and if the Court, a Conciliation Commissioner or a Board of Reference has not already commenced hearings, the Minister may direct a Conciliation Commissioner to determine the matter forthwith; the Court may make any terms of an award a common rule for the whole industry (the section of the Act which purported to give this power was declared *ultra vires* in 1911); an award is no longer invalidated if it contains provisions relating to matters not within the ambit of the dispute, if the proceedings have been conducted other than by conciliation or arbitration or if legal formalities have not been adhered to; additional Conciliation Commissioners have been appointed and their powers extended; and it is no longer necessary for an award to be made before a Board of Reference can be appointed (under the Act, the Court, after it has made an award, may appoint a Board to deal with future questions which might arise).

The most serious industrial trouble has been in the coal mining industry, where unrest has continued from the years before the war. The difficulty has persisted in spite of the continuous efforts of the Court and of the appointment of additional district Reference Boards, and as a result the Government has established special machinery for the industry.

This machinery was set up under the National Security (Coal Mining Industry Employment) Regulations of February 20, 1941 (amended July 10 and September 3), and consists of a Central Reference Board and Local Reference Boards. The Central Board decides all disputes referred to it as well as all matters arising out of existing awards of the Court, and it has all the powers which the Court possesses in regard to disputes in other industries. It is, however, independent of the Court except that its chairman is a Judge of the Court. In addition to the chairman its members include a special representative of employers and employees respectively, and other employer and employee representatives selected by the chairman. It acts according to equity and without regard to technicalities or legal forms. The Local Boards are established by the Governor-General on the recommendation of the Central Board, and they consist of a chairman and two or three representatives each of employers and employees. There is an appeal to the Central Board from a decision of a Local Board, but otherwise no award of either the Central or a Local Board can be challenged in any court.

At the same time, the power given to the Minister of Labour and National Service by the amendment of December 16, 1941, in the Industrial Peace Regulations to direct a Conciliation Commissioner to deal with an incipient dispute, applies also to the coal mining industry. Under the amendment, moreover, any award regarding coal mining which has been or may be made by such a Commissioner may not be varied or set aside, and no inconsistent award may be given by any tribunal except after a reference made with the consent of the Minister. This ensures that the settlement of a recent dispute regarding annual leave, which was made by a Conciliation Commissioner, will not be disturbed.

ACTIVITIES OF UNEMPLOYMENT INSURANCE COMMISSION

Unemployment Insurance and Man-Power Inventory—First Unemployment Insurance Benefit Paid—Report of Claims for Unemployment Insurance—Report of Employment and Claims Offices—Employment conditions at the end of February

INSURANCE books issued to thousands of Canadian workers on July 1, 1941, must be turned in with the close of the fiscal year on March 31, 1942. New books will be issued to all insured workers.

In connection with the issuance of new books it is necessary to conduct a re-registration of insured workers so as to revise the records of the Commission and keep them up to date.

In addition to this re-registration of insured workers, the Unemployment Insurance Commission has been entrusted by the Minister of Labour with the task of registering workers, whether insurable or not, for a man-power inventory. This man-power inventory is designed to give the Government a clear idea of Canada's man-power with a view to the development and prosecution of essential war industry on the most effective basis.

The Unemployment Insurance Commission is in a particularly advantageous position to help in such an inventory. Through its 100 Employment and Claims Offices scattered across the Dominion, it is in contact with employers and workers. It is proposed to make the inventory as complete and as effective as possible. It is part of Canada's War effort.

First Unemployment Insurance Benefit Paid

The first unemployment insurance benefit cheque ever issued in Canada was paid to Andrew Stuart Dart, 20-year old, Winnipeg resident. Mr. Dart was formerly employed in a Winnipeg Theatre.

A feature of the benefit aspect of the unemployment insurance plan has been the small number of claims received up to date. At the end of February only $1,843.38 had been paid in benefits.

This indicates the importance as well as the advisability of having started Unemployment Insurance in Canada during a period of high employment, when claims upon the Unemployment Insurance Fund are few. In this way the Fund will have an opportunity to grow, and will be all the more adequate to meet future claims should a period of unemployment occur.

Report of Claims for Unemployment Insurance Benefit

Application for insurance benefit is filed at the nearest local Employment and Claims Office of the Unemployment Insurance Commission. Claimants located in a centre where there is no Employment and Claims Office file their claims either by mail, or with a special representative.

After applications for benefit are filed at local Employment and Claims Offices, they are forwarded to the respective Regional or District Offices for adjudication of the claim. At the Regional or District Office, the Insurance Officer either allows the claim, declares the claim not allowable or disallows the claim. Up to and including February 28, the nine Insurance Officers located at Vancouver, Edmonton, Saskatoon, Winnipeg, London, North Bay, Toronto, Montreal and Moncton had received 862 claims for adjudication. Of the 862 claimants, 792 had their claims allowed, 64 claimants were either disqualified, or had their claims declared to be not allowable. In addition, 6 claims were pending decision.

The total number of benefit cheques issued as at February 28, 1942, was 254, and the total amount paid out in unemployment insurance benefits as at that date was $1,843.38.

Insurance Registration

Reports from the district offices of the Unemployment Insurance Commission show that 151,401 employers have registered throughout Canada, and that they have requisitioned 2,981,847 insurance books for their employees.

A progress report of registration of employers and employees on February 28, 1942 contained the following figures:—

Region	Employers Registered	Books Requisitioned
British Columbia	12,821	237,036
Prairie	30,000	417,000
Ontario	57,881	1,214,366
Quebec	39,199	881,671
Maritimes	11,500	231,774
	151,401	2,981,847

Unemployment Insurance Fund

On February 28, 1942, the Unemployment Insurance Fund had received a total of $34,467,516.39 from contributions made since the beginning of July 1, 1941, when the Unemployment Insurance Act went into effect. Employer and Employee contributions were made by bulk payment, meter credits and the purchase of Unemployment Insurance stamps. The Dominion Government adds its share of 20 per cent to the total employer and employee contributions.

Statement of Receipts to February 28, 1942

Unemployment Insurance Stamps.	$17,417,238 99
Meter Credits	5,201,532 79
Bulk Payments	5,911,870 73
Government Contribution	5,703,012 71
Interest on Investments	233,700 00
Miscellaneous Receipts	114 65
Refunds from Inspectors	46 52
Total Receipts	$34,467,516 39

Up to February 28, 1942, the Unemployment Insurance Commission, with the authorization of the Investment Committee, has invested $33,135,990.33 in bonds of the Dominion of Canada.

Report of Employment and Claims Offices for January, 1942

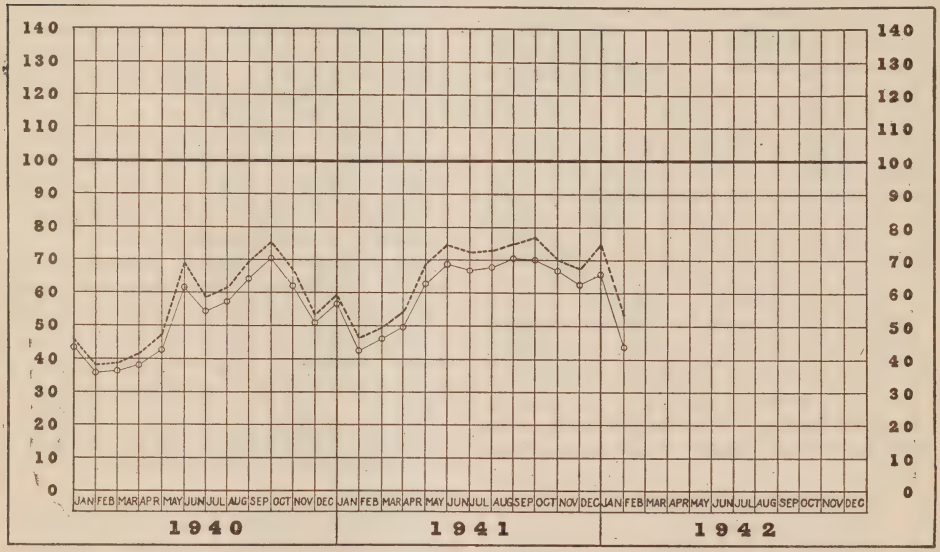
Records of the Employment and Claims Offices of the Unemployment Insurance Commission for the month of January, 1942, showed a decline of nearly 43 per cent in the average daily placements when compared with those of December, 1941. This adverse change was mainly due to reduced placements in the Province of Quebec. The December records included reports both from the Provincial employment offices, as well as those recently opened by the Commission, whereas January figures covered the activities of the latter class only. A decline of 38 per cent also was shown from the number reported by employment offices in January a year ago. Under the December comparison, a very heavy decrease was shown in services, followed likewise by substantial losses in logging, construction and manufacturing, smaller reductions, too, being reported in transportation, trade and farming. The only divisions to record gains were finance and mining and these were very small. When compared with January a year ago, placements in services and construction were much fewer, while logging and farming also showed appreciable reductions; however, a moderate increase was registered in manufacturing and nominal gains in transportation, trade, finance and mining.

The accompanying chart shows the trend of employment since January, 1940, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at employment offices throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the curves of vacancies and placements in relation to applications declined sharply during January, 1942, standing at 53·4 and 43·4, respectively, as compared with 74·4 and 65·4 in December, 1941 and with 59·4 and 56·7 in January a year ago.

The average number of vacancies reported daily by employers to the offices of the Commission throughout Canada during January, 1942, was 1,033, as compared with 1,661 during the preceding month and with 1,462 in January a year ago.

The average number of applications for employment received daily by the offices during the month under review was 1,933, in comparison with 2,232 in December, 1941 and with 3,169 during January last year.

The average number of placements made daily by the offices of the Commission during January, 1942 was 839, of which 548 were in regular employment and 291 in work of one week's duration or less, as compared with a total daily average of 1,460 during the preceding month. Placements in January a year ago averaged 1,346 daily, consisting of 857 placements in regular and 489 in casual employment.



During the month of January, 1942, the offices of the Commission referred 23,331 persons to vacancies and effected a total of 21,801 placements. Of these, the placements in regular employment were 14,241, of which 10,816 were male and 3,425 were female, while placements in casual work totalled 7,560. The number of vacancies reported by employers was 16,242 for men and 10,581 for women, a total of 26,823, while applications for work numbered 50,250, of which 34,805 were from men and 15,445 from women. Reports for December, 1941 showed 43,181 positions available, 58,020 applications made and 37,943 placements effected, while in January, 1941, there were recorded 37,988 vacancies, 82,392 applications for work and 34,990 placecents in regular and casual employment.

The following table gives the placements effected by employment offices, each year, from January, 1932, to date:—

Year	Placements		
	Regular	Casual	Totals
1932	153,771	198,443	352,214

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications———— Vacancies - - - - - - - - Placements—o—o—o—o—o—o

NEW BRUNSWICK

There was a decrease of more than 30 per cent in vacancies listed at New Brunswick Offices when compared with the preceding month and of over 48 per cent in comparison with January, 1941. Placements, likewise, were nearly 36 per cent fewer than in December and almost 61 per cent below those of the corresponding month last year. Services and construction were largely responsible for the total reduction shown in placements from January, 1941, although manufacturing, trade and logging also showed small declines. Placements by industrial groups numbered:—services 326.; construction 75; logging 42 and trade 36. During the month 130 men and 47 women were placed in regular employment.

NOVA SCOTIA AND PRINCE EDWARD ISLAND

Opportunities for employment, as shown by calls received at Employment and Claims Offices in Nova Scotia and Prince Edward Island during January, were 10 per cent fewer than in December and nearly 7 per cent below those of January a year ago. Placements were also 9 per cent under those of the previous month and 8 per cent fewer than in the corresponding month a year ago. The decrease in placements from January last year was mainly owing to a heavy decline in construction, although this was largely offset by substantial gains in services and manufacturing, changes in other groups being inconsiderable in volume. Industrial divisions in which most of the placements were effected were:—services 1,450; construction 684; manufacturing 306 and logging 119. There were 1,108 men and 139 women placed in regular employment.

QUEBEC

During the month of January, 1942, positions offered through Employment and Claims Offices in the Province of Quebec were nearly 78 per cent less numerous than in December and 77 per cent fewer than in the corresponding month a year ago. Positions, also, were nearly 92 per cent below those of the previous month and almost 91 per cent under the

number recorded during January, 1941. Very heavy declines in placements from January last year were reported in services, logging and construction, followed by others of smaller proportions in manufactuirng, trade and transportation, changes in other groups being small. Industrial divisions in which most of the placements were effected were:—services 434; construction 246 and manufacturing 153. Regular placements numbered 496 of men and 277 of women.

Ontario

The demand for workers, as shown by orders listed at Employment and Claims Offices in Ontario during January, was nearly 20 per cents lower than in December, 1941 and 10 per cent below that of the corresponding month a year ago. Placements, too, showed a decrease of over 14 per cent from those reported during the previous month and also from January last year. Marked reductions in placements from January, 1941, were recorded in construction, services and agriculture, as well as a minor loss in logging, these declines being partly offset by a pronounced increase in manufacturing, augmented by smaller gains in transportation, trade and finance. Placements by industrial divisions included:—manufacturing 2,732; services 3,540; logging 1,349; construction 1,066; trade 458; transportation 272 and agriculture 166. There were 4,670 men and 1,762 women placed in regular employment.

Manitoba

Employment Offices in Manitoba were notified in January of nearly 23 per cent fewer vacancies than in the previous month, but 48 per cent more than in January a year ago. Placements were over 5 per cent better than in December and nearly 8 per cent higher than in the corresponding month of 1941. When comparing placements by industrial divisions with January last year, the most important changes were gains in logging and manufacturing and losses in construction and agriculture. Improvement, although smaller in volume, also was shown in trade, services, mining and transportation. Industrial groups in which the majority of placements were effected were:—logging 1,026; services 764; manufacturing 261; construction 176 and trade 112. Regular placements numbered 1,608 of men and 241 of women.

Saskatchewan

During January, vacancies offered through Employment and Claims Offices in Saskatchewan were almost 13 per cent fewer than in December, but showed only a fractional loss from January, 1941. Placements were 47 per cent below those of the previous month, but recorded a nominal increase over the corresponding period last year. Important changes in placements, when compared with January, 1941, consisted of a gain in logging and declines in services and agriculture. Small increases only were reported in all other groups. Industries in which employment was found for 100 workers or over included:—services 545; logging 282; construction 142 and agriculture 100. There were 566 men and 260 women placed in regular employment.

Alberta

Employment opportunities, as indicated by orders received at Employment and Claims Offices in Alberta during January, were 10 per cent below those of December, 1941, but nearly 16 per cent better than those of January last year. Placements were almost 15 per cent fewer than in the previous month, but only fractionally less than the corresponding period of 1941. Except for a moderate gain in logging and a reduction of similar proportions in agriculture, changes in other groups were small and consisted of increases in transportation, mining, trade and construction and losses in services and manufacturing. The majority of placements recorded during the month were in the following industries:—logging 688; services 525; agriculture 191 and construction 110. During the month 1,133 men and 271 women were placed in regular employment.

British Columbia

Orders received at Employment and Claims Offices in British Columbia during January called for 36 per cent fewer workers than in the previous month and nearly 22 per cent fewer than in January, 1941. There was also a decrease in placements of 40 per cent from December and of 32 per cent from the corresponding month a year ago. In comparison with January last year, marked reductions in placements occurred in services and construction, minor changes being recorded in all other groups, including small gains in trade, logging and transportation, and slight losses in agriculture and manufacturing. Placements by industrial groups numbered:—services 1,076; construction 621; manufacturing 415 and trade 105. There were 1,105 men and 428 women placed in regular employment.

Movement of Labour

During the month of January, 1942, the offices of the Unemployment Insurance Commission effected 14,241 placements in regular employment. Of these, 2,252 were of persons

* 1,463 placements effected by offices now closed.

to whom was granted the reduced transportation rate, 763 proceeding to centres within the same province as the despatching office and 1,489 to other provinces. The reduced transportation rate which is 2·5 cents per mile with a minimum fare of $4, is granted by the railway companies to bone fide applicants at the employment offices who may desire to travel to distant employment for which no workers are available locally.

In the Province of Quebec, there were issued 3 certificates at the reduced rate to carpenters travelling from Rouyn to Chicoutimi. The movement in Ontario was wholly provincial and consisted of 552 persons. To points within the same zone as the despatching office, Fort William was responsible for 51 bushmen, 13 teamsters, 3 cooks, 2 sawmill labourers, one cookee, one camp clerk and one watchman; Port Arthur for 257 bushmen, 48 teamsters, 20 cookees, 19 carpenters, 11 barn builders, 14 cooks, 5 axemen, 4 foremen, 4 barn bosses, 3 truck drivers, 3 tractor operators, 2 watchmen, 2 blacksmiths, one scaler, one clerk, one assistant mechanic, one hotel general and 30 labourers for the Hydro Electric; and Sudbury for 24 bushmen, one millhand and one cook. In addition, North Bay sent to Timmins 7 bushmen, 3 cooks, one clerk, one teamster; to Sudbury 4 bushmen; and to Toronto one powder man; Pembroke transferred to Port Arthur 8 carpenters, and to Welland 1 millwright; while London directed to Timmins 2 teamsters. Manitoba Offices assisted in the transferral of 1,041 workers of whom 14 were provincial and 1,027 were interprovincial. Of the former, Dauphin shipped to points within its own zone 4 bushmen, and Winnipeg forwarded 6 bushmen and 2 farm hands; the remaining men journeying to provincial points being one electrician and one cook proceeding from Winnipeg to Flin Flon. The interprovincial movement was to Ontario and Saskatchewan and emanated from Winnipeg, 18 bushmen going to Yorkton and the following to Port Arthur:—917 bushmen, 31 teamsters, 24 cookees, 6 oilers, 8 cooks, 5 miners, 4 chore boys, 3 mechanics, 2 shovel operators, 2 dragline operators, 2 blacksmiths, one steam engineer, one mucker, one machine helper, one clerk and one construction foreman. Vouchers in Saskatchewan for reduced fare were granted to 8 persons destined for provincial employment and 432 for interprovincial. Of the first-named, Saskatoon sent to points within its own territory 4 bushmen and one sawmill hand and Prince Albert 3 sawmill hands. Interprovincially, Prince Albert consigned to Sault Ste. Marie 31 bushmen, to Edmonton 3 bushmen and to Flin Flon 3 sawyers and one bushman. Regina forwarded to Port Arthur 267 bushmen and to Winnipeg 29 bushmen, and Saskatoon despatched to Dauphin 17 bush-

men and to Sault Ste. Marie 81 bushmen. Alberta certificates were 215 in number, 185 provincial and 30 interprovincial, all of the persons so transferred being sent from Edmonton as follows:—to points within its territory,—144 bushmen, 7 miners, 7 teamsters, 4 cooks, 4 cookees, 4 mine labourers, 2 carpenters, 2 truck drivers, 2 saw filers, 2 housekeepers, one accountant, one welder, one sawyer, one cat man (oil refinery) one lumber handler, one millhand, and one pipe fitter; to Prince Rupert 20 bushmen, 5 painters, 4 sawyers, and to Vancouver, one bushman. In British Columbia only one person took advantage of the reduced fare—a farm hand proceeding from Vancouver to a point within the territory covered by that office.

Of the 2,252 workers who profited by the reduced transportation rate during January, 1,739 were conveyed by the Canadian National Railways, 498 by the Canadian Pacific Railway, 12 by the Temiskaming and Northern Ontario Railway, 2 by the Northern Alberta Railway and one by the Pacific Great Eastern Railway.

Employment Conditions at the End of February

Placement activities as reported by Employment and Claims Offices during the month of January, 1942, together with statistical summaries for that period, are covered by an earlier section of this report. Later reports received from these offices indicate that conditions at the end of February were as follows:—

Farming operations in the Maritime Provinces were confined chiefly to chores, pruning and odd jobs. Unfavourable road conditions resulting from heavy storms interfered with marketing in some areas, Fishermen not engaged in fishing operations were busy building traps and repairing buildings. Boats were being made ready for herring fishing. In Nova Scotia, logging activities were confined chiefly to chopping, there being few applicants for this work. Lumbermen in New Brunswick reported that great progress was made during the past two months and that a great scale of logs and pulpwood had been yarded during the winter. The lumber scale will exceed that of former years. Portable saw mills were working overtime in green woods. In northern New Brunswick, large quantities of spoolwood were being manufactured. Coal mining continued steady. All manufacturing plants, except canneries and evaporators, operated full time. Construction projects progressed favourably but little new work was begun. Freight traffic continued to be very heavy, while passenger traffic by rail was also heavy and bus traffic showed an increase where road conditions had improved. Quite a large number of women were placed in casual employment but only a small number were placed in regular employment.

There was more demand for experienced farm hands in Ontario with few experienced men applying. In most areas, winter rates prevailed but in other areas higher wages were offered. Farmers in some areas were becoming anxious concerning the likelihood of obtaining help when spring work opened. In the northern section of the Province, logging operations were reduced considerably and while no lay-offs of any consequence had taken place, logging operations will soon taper off in accordance with seasonal conditions. Men involved in displacements from logging were being absorbed in the log haul, despite their lack of experience. In the northwestern portion of the Province, logging operations had reached a seasonal peak and the demand for experienced loaders, cutters and teamsters exceeded the supply. Mining was steady with some demand for experienced underground miners, few qualified applicants being available. Manufacturing concerns, with but few exceptions, were very busy. Delay in deliveries of essential materials was reported in a few cases. Iron and steel, textile plants, moulding shops, lumber mills and paper mills were busy, operations in two shifts and three shifts being reported from many centres. The shortage of skilled tradesmen in the metal trades continued. Some offices reported difficulty in placing men over fifty years of age while, in employment for women, one large centre reported that employment was largely restricted to single women between eighteen and thirty-five years of age. In the automobile industry and in subsidiary plants, the shift to war production was occasioning some dislocations but adjustments were being made rapidly. Construction was, in general, rather quiet although some offices reported extensive additions to large plants. Favourable progress was reported on projects underway while repair work provided intermittent employment for tradesmen in many centres. Owing to the continued scarcity of domestic workers, numerous orders remainded unfilled. Many day workers were placed in casual employment.

In the Prairie Provinces, there was a rising demand for farm workers, with few applicants available. Many farmers were enquiring concerning wages for spring work while applicants were reluctant to accept farm employment and were holding back preferring construction or factory work. The demand for

bushmen remained fairly steady, there still being a considerable number of unfilled orders. Placements continued to be made but other applicants refused to go to the woods so late in the season. Coal mining had slackened off, a number of mines working only three or four days a week but no heavy lay-offs were expected. Manufacturing remained steady, supply of workers being sufficient to meet the demand. There was little activity in the construction industry. Some workmen were laid off at an airport project while waiting for delivery of materials. Cold weather slowed down construction on a dam project. There was little highway work. Railways reported freight, express and passenger service as being good. Air transportation also was good. Trade, in general, remained steady. A few farm implement firms laid off a number of employees pending spring buying. A few men's clothing firms reported difficulty in obtaining stock. There was an increase in the demand for domestics and housekeepers from rural areas and many orders for domestics in the cities remained unfilled. There was also an increased demand for day workers with sufficient supply available at most points. Shortage of teachers was reported in Saskatchewan.

Applicants for farm work in British Columbia were rather scarce. Improved weather conditions caused an increase in demand. Higher wages offered facilitated a number of placements. The 1941 wrapped apple stock was diminishing fast and cold storage stock will soon be cleared. Logging operations in Vancouver area were nearing capacity, orders being easily filled. There was no special demand for loggers in most areas although placements were still being made. Minor labour difficulties were reported. Reforestation camps absorbed a few men. Saw mills were fairly active. Mines were working full time and a few orders for skilled miners were unfilled. Manufacturing plants, in general, operated on full time. Some difficulty was experienced in getting a sufficient number of stationary engineers to meet the need. Requirements of the construction industry for skilled tradesmen and labourers were readily met, there being some surplus of applicants. Four 10,000 ton freighters were launched from British Columbia shipyards. The demand for skilled shipyard tradesmen remained brisk. Some satisfactory placements were effected. Sufficient unskilled labour was available. Longshoring was dull. Experienced household workers were very scarce.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA

Industrial Situation as Indicated in Reports of Employers, Trade Unions and Value of Building Permits

IN view of the transference of the functions of the Employment Service of Canada to the Unemployment Insurance Commission, information formerly presented in this article concerning applications, vacancies and placements made by the offices of the Employment Service will now be found in the preceding article entitled "Activities of Unemployment Insurance Commission", under the heading "Report of Employment and Claims Offices for January, 1942". In this section information is given concerning the number of applications for work, existing vacancies and the number of placements made through the Employment and Claims Offices of the Unemployment Insurance Commission. The latest available information concerning the employment situation in Canada is also given in another section, under the heading "Employment Conditions at the end of February".

The accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting January 1, was 12,833, the employees on their payrolls numbering 1,657,990, compared with 1,688,298 (revised) in the preceding month.

The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for January was 2,116 having an aggregate membership of 323,598 persons, 4·3 per cent of whom were without employment on February 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

Recorded in the concluding section of this article and indicative of the employment situation in the building trades are the detailed statistics compiled by the Dominion Bureau of Statistics each month showing the value of building permits granted and the value of building materials.

During January the total value of building permits granted in 54 of the larger municipalities was $4,229,027 compared with a total of $3,569,557 (revised) the value of building permits granted in 52 municipalities during January, 1941.

The Employment Situation at the Beginning of January, 1942, as Reported by Employers

In accordance with the movement invariably indicated at the beginning of January in the experience of the years since 1920, there was a decline in industrial employment at January 1, 1942. The loss, as usual, resulted from the completion or suspension of work in the outdoor industries, and from the closing of establishments over the holidays and for inventories and repairs. It was, however, on a scale decidedly below normal, the number of persons laid off and the percentage decline being the smallest on record for the beginning of January.

The 12,833 employers furnishing data to the Dominion Bureau of Statistics reported a staff of 1,657,990, as compared with 1,688,298 at December 1, 1941. This was a reduction of 30,308 men and women, or 1·8 per cent. The latter figure constitutes only from a quarter to a third of the average percentage loss indicated at January 1 in the years 1921-1941. In this period, the contraction at the beginning of January has ranged from 3½ per cent to 13½ per cent, averaging 6·6 per cent.

Based on the 1926 average as 100, the crude index stood at 165·8 at January 1, as compared with 168·8 in the preceding month; the latest figure was exceeded only by those of December 1 and November 1, 1941, being 23·5 per cent higher than the index of 134·2 at January 1 of last year, previously the maximum for January.

Since the shrinkage at the opening of 1942 was decidedly below average, the seasonally-adjusted index showed an advance, rising from 164·8 at December 1, 1941, to 172·3 at the date under review. These two seasonally-corrected figures are the highest to date; the latest gain is the twenty-second in a series which has extended uninterruptedly from March, 1940.

Not only were the decreases in employment at the date under review unusually small, but they also varied from the average in their distribution. Thus, curtailment in manufacturing over the last twenty-one years has accounted for some 54 per cent of the total decline, and construction for about 31 per cent, the remaining 15 per cent being divided among the logging, mining, communications and transportation groups, while trade has nearly always shown an increase at the opening of the year. At January 1, 1942, however, the falling-off in manufacturing was decidedly below normal, the persons laid off constituting less than a fourth of the total number released. The percentage decline in construction was also less-than-average, but only slightly so; since the decrease in several other industries, particularly manufacturing, was very noticeably below normal, the workers released from construction constituted a larger-than-usual proportion of the total reduction.

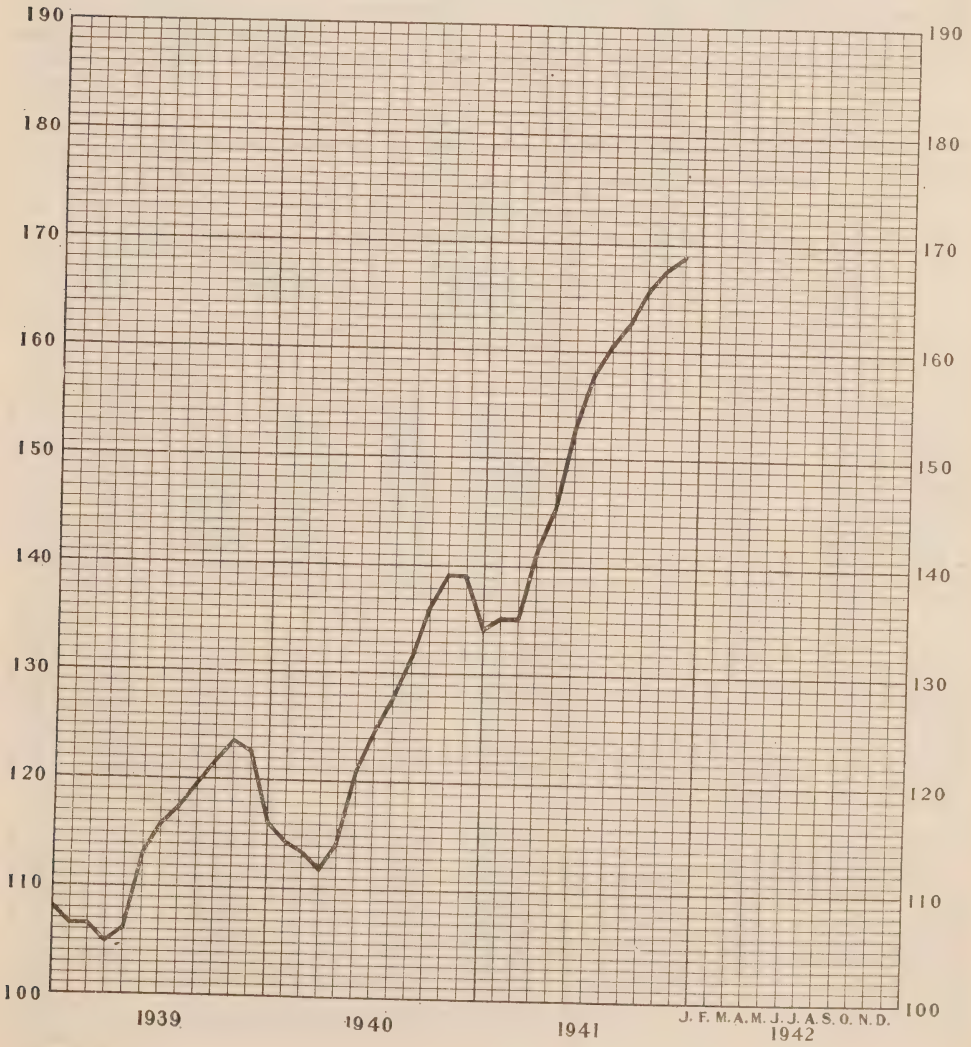
The contraction in employment in manufacturing took place wholly in the production of non-durable goods, there being a contra-seasonal advance in the durable goods class, mainly in the iron and steel division. Food, textile and lumber plants showed the largest losses, but in each case they were of less-than-average proportions for January 1. In manufacturing, as a whole, some 7,300 persons were laid off; this decline of 0·7 per cent (the first to be indicated in a year), reduced the index to 187·0, as compared with 188·4 at December 1, and 187·5 at November 1; these three are the highest on record. The latest index was over 31 per cent higher than that of 142·5 at January 1, 1941.

Among the non-manufacturing groups, services, mining, transportation and construction and maintenance showed curtailment; that in transportation and construction was below normal, but in services and mining, the loss rather exceeded the average. Employment in the latter at January 1 continued to be adversely affected by industrial disputes. On the other hand, logging, communications and trade reported improvement, which, in the case of the first two groups, was contra-seasonal. The gain in trade was above normal, although it was smaller than that recorded at January 1, 1941.

Following are the unadjusted, general indexes of employment at January 1 in the years since 1926, based on the 1926 average as 100:—1942, 165·8; 1941, 134·2; 1940, 116·2; 1939, 108·1; 1938, 113·4 and 1937, 103·8.

For January 1, 1941, 12,467 employers had furnished returns showing that they had an aggregate staff of 1,316,774 men and women; as compared with 1,364,601 in the preceding month, this was a reduction of 47,827, or 3·5 per cent. The largest losses had then taken place in the non-manufacturing industries, particularly in construction.

The general slowing down of industrial production over the holidays, together with the contractions in employment in the industries affected by seasonal conditions, resulted in a



considerable reduction in the payrolls distributed for services rendered in the last week in December. While the decline in employment in the Dominion amounted to 1·8 per cent, that in the reported earnings was 6·1 per cent. The payrolls disbursed at December 1 had aggregated $46,132,298, while those distributed at January 1 were given as $43,314,727. The average per capita earnings paid out at the former date amounted to $27.32, as compared with the average of $26.12 paid at the latter.

The Course of Wartime Employment

In the first twenty-eight months of the war, employment generally in the Dominion has shown unprecedentedly large advances; the few interruptions to this expansive movement have been almost wholly due to seasonal curtailment in the industries greatly affected by the seasonal factor. From September 1, 1939, to January 1, 1942, the index rose by 38·6 per cent. The importance of this gain is emphasized by comparison with that of about 14½ per cent in the five years ending 1939,

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

47645—6½

while in the period from 1921 to 1939, the general index rose only by approximately 28 per cent.

It is estimated that the firms co-operating in the monthly surveys of employment have enlarged their working forces by some 462,000 persons from the outbreak of hostilities to January 1. Quite apart from the seasonal aspect, this figure tells only part of the story, since the smaller firms which are not covered by the monthly returns must also have certainly added considerably to their personnel. The armed and the auxiliary forces have likewise absorbed large numbers of men of working ages; in many cases those having been withdrawn from industry have had to be replaced by substitutes from various sources. The growth in industrial employment and the withdrawals from civilian life have undoubtedly brought about far-reaching changes in the pre-war industrial, occupational, sex and age distributions of workers in the Dominion. At present, no information is available respecting the last three of these distributions, while changes in the industrial pattern are only partially indicated in the statistics now on record.

The advance in employment in manufacturing as a result of the war has for obvious reasons been greater than that in the other industries. From September 1, 1939, to January 1, 1942, the staffs of manufacturers furnishing current statistics to the Bureau were increased by approximately 373,000. As a result, the index number of employment in factories rose by over 62 per cent in the twenty-eight months. This gain greatly exceeds that of 38·6 per cent given above for all industries.

The growth in the durable goods industries has been of particular significance. From 100·4 at the outbreak of hostilities, the index

number in this class has risen to 213·3 at the latest date, or by over 112 per cent. The number of persons employed in this category constituted 59 per cent of all those reported in manufacturing at January 1, 1942, a proportion greatly in excess of that of 40 per cent engaged in the durable goods industries at the outbreak of hostilities.

Employment in the production of non-durable goods has also increased substantially since September 1, 1939, the index rising from 141·9 at that date to 167·0 at January 1, 1942. These industries are ordinarily much quieter during the winter, owing to seasonal curtailment, particularly in the food groups. In spite of this factor (which also operates in

[1] The relative weight shows the proportion of employees reported in the indicated industry, to the total number of employees reported in Canada by the firms making returns at the date under review.

the case of many lines in the durable goods class), employment in the large majority of manufacturing industries was in considerably greater volume at the latest date than it was at September 1, 1939.

The non-manufacturing industries in the first twenty-eight months of war have also shown important advances; these, however, are not comparable in extent with those in manufacturing. In these divisions, the comparison between the situation at the outbreak of war and that at the beginning of January is also greatly complicated by seasonal movements in industry. This factor partly accounts for the particularly large gains shown in logging and trade, as well as for the substantial decline in construction at January 1, 1942, as compared with September 1, 1939. In mining, employment in the twenty-eight months has increased by 5·7 per cent, in communications, by 15·5 per cent, in transportation, by 12·3 per cent, in services, by 10·7 per cent, and in trade, by 27·8 per cent, while the reduction in construction amounted to 18·1 per cent.

All provinces have shared in the expansion recorded in the first twenty-eight months of war, and the eight cities for which data are segregated have also shown important increases, which have exceeded those indicated in the various provinces to which the municipalities belong.

Statistics of Earnings

The results of the tenth tabulation of statistics of weekly earnings as reported by establishments ordinarily employing 15 persons and over, are contained in the present report. The figures are preliminary.

The 1,657,990 men and women employed at January 1 by the 12,833 establishments furnishing information to the Dominion Bureau of Statistics were paid $43,314,727 for services they rendered in the final week in December. In the last report, these establishments had indicated a staff of 1,688,298 employees, whose earnings in the period of observation in November had amounted to $46,132,298. A decrease of 30,308, or 1·8 per cent in the number of employees was accompanied by a loss of $2,817,571, or 6·1 per cent in the aggregate weekly payrolls. The decline, which follows a succession of advances, was due in the main to the loss in working time over the holiday season, and to that resulting from curtailment of operations in some of the more highly seasonal industries. The last report had shown increases in the personnel and the payrolls, the former rising by 0·7 per cent, and the latter by 1·9 per cent.

For the first time in many months, the per capita earnings declined, falling from $27.32 in the last week in November, to $26.12 in December. The reduction is undoubtedly seasonal in character, there having invariably been a recession in employment, and consequently in payrolls, between December and January in the period since 1920. The per capita average, while lower than in the last week in September, October or November, was higher than in any preceding week for which in-

Relative weight of Employment by Provinces and Economic Areas as at Jan. 1, 1942.	100·0	8·3	0·1	5·0	3·2	30·8	42·2	10·7	5·0	2·0	3·7	8·0

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

formation is on record. The following are the more recent weekly averages: In August, $26.04; September, $26.37; October, $27.02; November, $27.32 and December, $26.12.

The earnings of the 1,688,005 employees reported by the 12,795 establishments whose returns were tabulated in the last report, had amounted to $46,128,842 in the last week in November, the per capita average having been given as $27.33. The present report shows slight alterations in some of the figures previously issued, mainly as a result of the inclusion of late returns.

Table I contains a summary of the statistics of earnings for the provinces, the eight leading cities, and the main industrial groups. Table II gives index numbers for a comprehensive list of industries in the Dominion, while Table III gives information for the leading industries by provinces and economic areas. The statistics are subject to revision.

Pending the establishment of a more satisfactory basic period for an index number of earnings, the data furnished for the last week in May have been revised to serve as a starting point from which may be measured the current changes in the purchasing power distributed in payrolls by the establishments co-operating in the current surveys of employment and earnings. The employees of such firms constitute a large proportion of the total working force engaged in industries other than agriculture in the Dominion. The presentation of the figures of earnings in the form of an index number gives a clearer picture of the situation than can be obtained from the use of the current aggregate or average per capita figures. The latter especially are very considerably affected by the dilution of labour which has been a marked feature of the situation in recent months.

The firms furnishing information for the first of January, as already stated, reported the disbursement of $43,314,727 in salaries and wages for the final week in December, as compared with $46,132,298 in the last week in November, while the payrolls that the same employers distributed to those on their staffs at June 1 for services rendered in the last week in May amounted to $38,594,713. An index number based upon this figure stood at 112·2 in the final week in December, compared with 119·5 in the last week in November. The decline in the latest period of observation is the first to be indicated in the brief record of these statistics, the movement having been steadily upward during the summer and autumn; the index of earnings in the period of observation in June was 103·9; in July, 106·9; in August, 109·8; in September, 113·3 and in October, 117·3. Meanwhile, an index number of employment, recalculated on the comparable base, rose to 102·9 at July 1, 105·0 at August 1, 106·4 at September 1, 108·4 at October 1, 109·6 at November 1, 110·4 at December 1, while at January 1, it was 108·4. Thus, the falling-off in the earnings distributed at the beginning of January, for the reasons already given, exceeded that in employment. Until the last report, however, the increases in payrolls have been at a relatively higher rate than those in the number of employees, notwithstanding the employment of growing numbers of inexperienced workers whose earnings are usually lower than those of employees having longer service. It seems probable that a resumption of these trends will be indicated in the next report, since the factors contributing to this situation may be expected to continue in operation. Among these factors may be mentioned the growing concentration of workers in the highly-paid heavy industries, the continuance of wartime cost-of-living allowances, in some cases at rising rates, and the extensive use of overtime work; seasonal declines in activity in those industries reporting a considerable proportion of casual workers will also doubtless be reflected in higher average earnings, despite the anticipated further dilution of labour.

Until recently, the preliminary index numbers of payrolls in manufacturing showed more pronounced gains than those in all industries, even though large numbers of inexperienced workers were added to the personnel; the curtailment of operations over the holidays, however, affected the earnings of factory employees to a rather greater extent than those of other classes. The index in manufacturing declined from 123·4 in November to 114·5 in December, a loss of 7·2 per cent; this exceeded that of 6·1 per cent reported in the all-industries index in the same comparison. The following are the index numbers of payrolls in the last week in the indicated months: May, 100; June, 103·6; July, 107·3; August, 110·8; September, 115·4; October, 120·4; November, 123·4, and December 114·5. Meanwhile, the index of employment on a comparable base, which had risen to 112·1 at December 1, showed a decline at January 1, lowering it to 111·3; as already stated, the falling-off was decidedly below normal. A comparison of the data with those prepared by the United States Bureau of Labor Statistics shows somewhat similar movements, from May 15 to December 14. The American Index of payrolls in manufacturing had advanced by 18·2 per cent, and that of employment by 7·6 per cent, while at January 15 the increase in the earnings was 20·3 per cent, and in employment, 6·2 per cent.

Earnings by Industries

Manufacturing.—The 972,565 persons employed at January 1 by the co-operating manufacturers throughout the Dominion were paid $25,590,151 for their services in the preceding

week. The same firms had employed 979,858 persons at the beginning of December, and had disbursed $27,579,080 in earnings in the last week in November; a decrease of 0·7 per cent in the number of employees was accompanied by that of 7·2 per cent in their aggregate earnings. The per capita average accordingly also showed a reduction, falling from $28.15 in the last week in November, to $26.31 in the last week in December.

There was a further moderate advance in the employment afforded in the durable goods division of manufacturing, but the earnings in this class were lowered as a result of stoppages over the holidays; the increase in the former was 0·6 per cent, while there was a reduction of 7 per cent in the reported payrolls. In the non-durable class, the decrease of 2 per cent in employment was accompanied by that of 7·7 per cent in the reported earnings, the relatively greater falling-off in the latter also being due to loss in working time at the holiday season.

The highest earnings in the manufacturing classes were again those reported in the production of miscellaneous non-metallic mineral products, largely petroleum products; those in the iron and steel, non-ferrous metal, beverage and pulp and paper industries were also unusually high. These classes employ a large proportion of males, and require many highly skilled and experienced workers.

In general, the lowest per capita averages were reported in the tobacco, leather and textile groups, in which considerable numbers of females are employed; not only are the earnings in these categories affected by the sex distribution, but also by the age distribution of workers therein, since the women tend, in the main, to belong to the younger age groups. In considering the relative earnings, it must also be noted that the existence or the absence of overtime work is also a factor, while the employment of any considerable number of casual workers greatly affects the per capita earnings in any industry.

Logging.—In logging, there was an increase of 3·1 per cent in the number of employees reported, accompanied by a gain of 2·2 per cent in the aggregate earnings; the disparity is due, in general, to the fact that those added to the working forces are usually taken on at the lower rates of pay, while it is also probable that a number of camps closed down for the holidays. The per capita average showed a decline, falling from $17.92 in the last week in November, to $17.77 in the last week in December. It must again be mentioned that the figures of earnings given in this report make no allowance for the value of board and lodging, frequently a part of the remuneration of employees in logging camps.

Mining.—Employment in mining showed a seasonal decline of 3·3 per cent, and there was a decrease of 8·1 per cent in the aggregate earnings, most of which took place in the metallic ore division, in which conditions in December continued to be affected by an industrial dispute; the slackening in operations over the holidays also contributed to the discrepancy in these percentages. The statistics show that 83,459 persons were paid $2,687,345 for their services in the last week in December, a per capita figure of $32.20. The average per employee in the last week in November had been $33.89.

Communications.—In communications, there was a gain of 0·2 per cent in the number employed, and of 2·3 per cent in the weekly earnings. The average pay envelope contained $28.08 in the period of observation in December, compared with $27.51 in the same week in November.

Transportation.—The transportation industries reported at January 1 an aggregate working force of 127,460 men and women, whose earnings in the preceding week amounted to $4,523,484. The former figure was lower by 3·1 per cent than that at December 1, while the reported earnings in the last week in December were lower by 1·6 per cent than those disbursed by the same employers in the final week in November. There was, however, a considerable increase in the average earnings of the individual, which rose from $34.94 in the last week in November, to $35.49 in the same period in December.

Construction.—Construction was seasonally quieter, there being a loss of 13·1 per cent in the number of workers, and of 14·7 per cent in the reported earnings. There were reductions in employment and earnings in building, railway and highway construction and maintenance. The per capita earnings in the group as a whole declined from $24.14 in the last week in November, to $23.67 in the period of observation in December.

Services.—The service establishments furnishing returns showed a seasonal decrease in the number of their employees, together with a reduction of about the same proportion in the aggregate earnings reported. The contents of the average pay envelope were therefore practically unchanged, being $16.73 in the final week in December, as compared with $16.75 in November. These averages are lower than in any other industrial group, partly because of considerable proportions of female and part-time workers, and partly because the earnings quoted exclude the value of board and lodging, in many cases a part of the remuneration of employees in hotels and restaurants. This group accounts for some 61 per cent of those in the service industry.

Trade.—In trade, there was a gain of 3·3 per cent in the reported employees, accompanied by an advance of 2·2 per cent in the aggregate payrolls distributed. The reported per capita earnings slightly decreased, falling from $23.21 in the last week in November, to $22.96 in the last week in December. Many of the extra workers employed about the holiday season were part-time employees, whose earnings were consequently below the average.

Finance.—In the financial group, 62,632 men and women were reported to have earned $1,870,457 in the last week in December, a per capita average of $29.86. In the last return, their employees had aggregated 62,947, and their earnings, $1,854,470, an average of $29.46 per employee. The inclusion of the date for financial organizations raises the general per capita figure of earnings in the Dominion to $26.26 in the last week in December, as compared with $27.40 in the same period in November; without the finance group, the average for the Dominion in December was $26.72, and in November, $27.32.

Earnings by Provinces

A review of the data for the various areas shows generally lowered employment in most of the provinces; the exceptions were Prince Edward Island and Nova Scotia, which reported minor gains. As a result of the holidays, all provinces recorded declines in the aggregate payrolls disbursed by the co-operating establishments. The losses in the weekly payrolls ranged from that of 0·9 per cent in Alberta, to 8·7 per cent in Saskatchewan, and 9·7 per cent in Nova Scotia.

The average per capita earnings were generally lower, except in Manitoba and Saskatchewan, where the decline in employment rather exceeded that in the reported earnings, with the result that in each of these two provinces the average pay envelope in the last week in December was slightly higher than in the final week in November.

Table 1 gives preliminary data on employment and earnings for various industries in each of the five economic areas. The industrial groups included are those employing considerable numbers of persons. With very few exceptions, the aggregate and average earnings in the various industries in each province were lower in the last week in December than in November. In Quebec, the decline in payrolls in manufacturing lowered the per capita average in that group to a figure that was below the all-industries average, in the former the average being $24.06, and in the latter, $24.18; this is the first time in the period of observation that such a situation has been indicated. In Ontario, the average in manufacturing declined from $29.68 in the last week in November, to $27.59 in December, while the general figure fell from $28.97 in the former to $27.38 in the latter period of observation. These losses exceeded the reductions in the Dominion as a whole.

Earnings by Cities

Although there were increases in the number of employees in Quebec City, Ottawa, Windsor and Vancouver, the aggregate payrolls declined in these centres, as well as in the remaining cities for which data are segregated. The losses in earnings ranged from that of 2·3 per cent reported in Winnipeg, to 8·6 per cent in Montreal. In Montreal, Quebec, Toronto, Windsor, Winnipeg and Vancouver, the declines were rather greater than in the province to which the city belongs.

Employment by Economic Areas

Seasonally reduced activity was reported in all provinces except Prince Edward Island and Nova Scotia, where the trend was slightly upward; the losses ranged from 0·8 per cent in Ontario and 0·9 per cent in Alberta, to 2·8 per cent in Quebec, 5·5 per cent in New Brunswick and 9·8 per cent in Saskatchewan. Employment in all five economic areas was brisker than at the beginning of January of last winter, or of any year for which statistics are available.

Maritime Provinces.—The contraction in employment in this area at January 1, 1942, took place in New Brunswick, there being small gains in Prince Edward Island and Nova Scotia. In the Maritime Provinces as a unit, employment declined in manufacturing, logging, mining and construction, the losses in the last-named being greatest. On the other hand, transportation showed seasonal improvement. Within the manufacturing division, there were considerable gains in iron and steel plants, but lumber, food and pulp and paper mills released employees.

Statements were received from 927 establishments in the Maritime area employing 137,595 persons, compared with 140,618 at the beginning of December. This recession of 2·1 per cent practically coincided with the average recorded at that date in the period, 1921-1941, although it was rather larger than the decrease in employment noted at the beginning of January of last year. The index then, however, was some 54 points lower than that of 183·9 at the latest date, when it was higher than in any other January of the record.

A total of 883 employers had furnished data for January 1, 1941, showing an aggregate payroll of 96,811 workers, compared with 99,231 in the preceding month.

Quebec.—The curtailment in Quebec at the beginning of January was decidedly below normal in the experience of the years since 1920, being also much smaller than that indicated at January 1, 1941. The index, at 175·0 at the latest date, was over 35 points higher than that of 139·6 at the opening of 1941, previously the maximum for January in the twenty-one years for which statistics are available. The latest index was, indeed, exceeded in this period only by the figures for November 1 and December 1 of 1941.

Manufacturing showed a falling-off, mainly in the textile, lumber, rubber, clay, glass and stone, leather, pulp and paper and food plants. Logging, transportation, construction, mining and services also reported losses; those in transportation and construction were considerable but in the remaining divisions they were small. On the other hand, seasonal improvement took place in hotels and restaurants and retail trade, and within the manufacturing division, in tobacco, chemical, iron and steel and non-ferrous metal factories. In many cases, operations will have been resumed early in the New Year in the establishments which were partially or wholly closed over the holiday season and for purposes of inventory. The labour forces of the 3,210 co-operating firms aggregated 510,415 workers, as against 524,932 at December 1, 1941.

For January 1, 1941, 3,120 establishments had reported a staff of 400,193 men and women, compared with 429,146 in the preceding month; the index then stood at 139·6.

Ontario.—Manufacturing in Ontario showed seasonal declines, widely distributed among the branches of this industry. The greatest reductions were in the lumber, textile, food and rubber divisions, while smaller losses took place in pulp and paper, electrical apparatus, leather, clay, glass and stone, chemical and other factories. On the other hand, tobacco and iron and steel plants were decidedly busier. In the non-manufacturing industries, there were contractions in services, mining, transportation and construction. Logging and retail trade, however, showed further improvement.

A combined staff of 700,455 was employed by the 5,545 businesses from which returns were received, whose employees had numbered 705,878 at December 1. This decrease of 5,423 persons, or 0·8 per cent, was the smallest recorded at January 1 in any year since 1920; the loss was decidedly below normal, the average loss at January 1 in the period, 1921-1941 being about six per cent. The latest index, at 172·6, was many points above that of 141·1 at the same date in 1941, being at its maximum for January in the period of observation.

The firms furnishing data for January 1, 1941, had numbered 5,382, and their employees, 564,158, as compared with 570,481 in the preceding month.

Prairie Provinces.—Shrinkage on a scale slightly larger than that noted at the opening of 1941 was reported in the Prairie Provinces at January 1, 1942, when statistics were tabulated from 1,808 employers of 177,761 workers, or 5,545 fewer than at December 1. This contraction was much below average in the experience of the last twenty-one years. The index at the date under review stood at 131·4, as compared with 116·2 at January 1, 1941. There were reductions in Manitoba, Saskatchewan and Alberta at the latest date, that in Saskatchewan being greatest.

Manufacturing, communications, transportation and construction showed losses at the beginning of January, 1942, the largest of these being in construction. In the manufacturing division, the greatest declines were in food and clay, glass and stone plants, while lumber mills were busier, and slight improvement was reported in iron and steel works. Employment also increased in logging, mining and retail trade, the gains in the last-named being considerable.

For January 1, 1941, 1,777 establishments had reported 152,570 employees, a loss of 3,438 as compared with the preceding month. The index then was over fifteen points lower than at the date under review.

British Columbia.—The recession in British Columbia involved fewer workers than that indicated at the beginning of January of last year, being also smaller than the average loss at January 1 in the period, 1921-1941. The 1,343 employers furnishing information reported 131,764 persons on their staffs at the date under review, as against 133,564 at December 1, 1941.

Lumber and food factories, logging, construction and transportation recorded curtailment, that in construction being most extensive. On the other hand, iron and steel and non-ferrous metal plants and retail trade were more active. Employment generally was in much greater volume than at January 1, 1941, when the 1,303 co-operating firms and branches had employed 103,042 men and women; the index then stood at 116·0, compared with 142·5 at the opening of 1942. These two figures are the highest for January in the period since 1920.

Employment by Cities

Employment in Hamilton showed little general change; in Montreal, Toronto and Winnipeg, curtailment was indicated, while the trend was upward in Quebec City, Ottawa,

Windsor and Vancouver. Employment in each of these centres was brisker than at January 1 in 1941, or any other year of the record.

Montreal.—The recession in Montreal involved a smaller number of workers than at January 1 in any earlier year for which information has been compiled, with the exception of 1935. Statements were received from 1,853 establishments with 237,232 employees, as compared with 242,752 at December 1, 1941. A contraction was shown in manufacturing as a whole, the largest losses being in food, textile and leather plants; on the other hand, employment in iron and steel continued to expand. Among the non-manufacturing industries, services, transportation and construction were slacker, while employment in retail trade was seasonally active. The index, at 156·5, was considerably higher than at the beginning of January in 1941, when 1,809 firms had reported payrolls aggregating 191,216 persons, compared with 197,640 in the preceding month.

Quebec.—Manufacturing showed a moderate increase, but services and construction released employees. The 221 co-operating employers in Quebec City enlarged their staffs from 27,025 at December 1, to 27,242 at the beginning of January. The general gain was contra-seasonal in the experience of other years of the record. A loss had been indicated at the same date in 1941, and employment was then at a lower level, according to the 218 establishments making returns, which had employed 20,094 men and women.

Toronto.—Toronto firms showed a seasonal decrease in personnel at January 1, 1942. The reduction was smaller than usual for the time of year; 3,632 persons were laid off by the 1,908 firms furnishing data, reducing their working forces to 216,623. The index stood at 168·8, as compared with 171·6 in the preceding month; these two are the highest in the record. The January 1, 1941, figure had been 137·1.

As compared with December 1, 1941, there were losses in manufacturing at the date under review, the most noteworthy being in the textile, food, rubber, printing and publishing and non-ferrous metal groups, while iron and steel workers afforded more employment. Construction, transportation and trade were slacker.

Returns for January 1, 1941, had been tabulated from 1,847 employers of 178,365 workers at January 1, compared with 177,407 in the preceding month; the improvement than indicated was contra-seasonal.

Ottawa.—There was a falling-off in manufacturing in Ottawa, but transportation, construction and trade were brisker. The result was a moderate increase in employment on the whole; the staffs of the 245 reporting establishments included 22,387 men and women, as compared with 21,675 in the preceding month. A smaller gain had been recorded at the same date of last year, when the index of employment was many points lower. Statements had then been furnished by 241 employers with a personnel of 17,838.

Hamilton.—Data were received from 341 firms in Hamilton employing 58,241 workers, as against 58,287 in the preceding month. Manufacturing showed a falling-off, mainly in electrical apparatus, textile and food plants, while iron and steel works afforded more employment. Trade was also more active, but other groups showed little general change. This decline in manufacturing as a whole was the smallest reported at January 1 in any of the years for which statistics are available. The 335 establishments co-operating at the same date last year had reported 44,762 employees, compared with 45,068 at December 1, 1940. The index then was many points lower than the latest figure of 178·5, which is the highest ever recorded at the opening of the year.

Windsor.—There was an increase in activity in Windsor at the beginning of January. The gain was mainly in manufacturing, notably in the iron and steel industries; trade was also brisker. Construction released a few workers, while little general change was shown in other divisions. Returns were compiled from 200 firms with 33,849 persons on their staffs, as compared with 33,179 in the preceding month. Employment was at its maximum for the period of observation, being considerably greater than at January 1, 1941. The trend then had also been upward, according to information from 196 business men, whose payrolls had then included 26,800 men and women.

Winnipeg.—Employment in manufacturing and construction declined moderately in Winnipeg, the largest loss in the former being in vegetable food factories. Transportation and trade, on the other hand, showed improvement, that in the last-named being on a fairly large scale. The 561 co-operating establishments reported 54,495 employees, compared with 55,355 in the preceding month. This decrease was seasonal, but was below average in the experience of the last twenty years. The index, at 130·7, was many points above that for January 1, 1941, when returns had been tabulated from 545 employers of 51,451 persons.

Vancouver.—Heightened activity was indicated in Vancouver, according to information

from 586 firms employing a staff of 58,737, as compared with 58,414 at December 1. A decrease had been noted at the same date of last year, and the index then was nearly 38 points lower than that of 166·6 at the beginning of January. There were losses in lumber and food, manufacturing, and in construction and transportation, while iron and steel plants and retail trade showed improvement. For January 1, 1941, 576 establishments had reported 43,858 men and women on their paylists, compared with 44,159 in the preceding month.

Employment by Industries

Manufacturing.—As already stated, the decline in employment in manufacturing at January 1, 1942, was the smallest ever reported at that date, there being a loss of 0·7 per cent as compared with December 1. This compares very favourably with the average reduction of nearly seven per cent from December to January in the years since 1920. The shrinkage at the date under review, as in January of other winters, was partly due to comparatively brief shutdowns for inventory and over the holiday season. In each of the preceding years for which data are now available, employment has shown partial recovery in the weeks succeeding January 1. On the average, this has amounted, up to the date of the next report (February 1), to about 50 per cent of the decrease indicated at the opening of the year.

The manufacturers making returns for January 1, 1942, numbered 7,069, and their staffs aggregated 972,565, compared with 979,858 at December 1. The index fell from 188·4 in the preceding month, to 187·0 at the date under review. As compared with 142·5 at January 1, 1941 (previously the maximum for that date), there was an increase of 31·2 per cent.

The seasonally corrected index rose from 190·6 at December 1, 1941, to 199·5 at January 1. The latter was the highest figure recorded in any month for which statistics are available.

The most extensive reductions at the date under review were in vegetable food, textile and lumber factories, which released 3,869; 3,349 and 2,944 employees, respectively. Large losses also took place in pulp and paper, rubber, leather, and clay, glass and stone plants, while there were smaller reductions in fur, beverage, electrical apparatus and miscellaneous manufacturing establishments, and in central electric stations. On the other hand, tobacco, iron and steel, non-ferrous metal and chemical works afforded more employment. The gain in iron and steel was most pronounced, greatly exceeding the improvement which had been indicated at January 1, 1941, in such factories, in which the trend previously had almost invariably been downward at the beginning of January. The expansion in iron and steel (the twenty-fourth successive increase in as many months), resulted in the greatest volume of employment yet recorded in that industry, which employed some 342,000 men and women at January 1. This was 20·6 per cent of the total number on the staffs of the co-operating employers in all industries at the date under review.

The index numbers of factory employment (1926=100) at the first of January in recent years are as follows:—1942, 187.0; 1941, 142·5; 1940, 118·2; 1939, 104·3; 1938, 108·6; 1937, 102·4 and 1936, 96·8.

The 6,814 manufacturers making returns for the same date in 1941 had reported a personnel of 733,367, a decline of 11,614 workers, of 1·6 per cent, from the preceding month.

Logging.—Bush operations, on the whole, showed a further gain at January 1. The experience of the years since 1920 shows that there is customarily, though not invariably, an exodus from logging camps over the holiday season. Employment was quieter than in January of 1941, or of 1938, but was more active than at that date in any other year of the record. The latest index stood at 258·1, compared with 250·3 in the preceding month, and 276·1 at January 1, 1941. A combined working force of 76,575 was reported by the 468 co-operating camps, which had employed 74,264 men in the preceding month. Improvement was shown in Ontario, Manitoba, Saskatchewan and Alberta, while elsewhere, moderate reductions in staff were indicated.

Mining.—There was a seasonal contraction in mining operations at the beginning of January, there being losses in the extraction of metallic ores and of coal and other non-metallic minerals. Returns were received from 422 operators having 83,459 employees, compared with 86,283 at December 1. A rather smaller decrease had been indicated in mining as a whole at January 1, 1941, when employment was nevertheless in smaller volume; the index, at 177·5 at the latest date, was some ten points higher than at January 1 of last year, previously the highest in the record for that date.

Communications.—A slight contra-seasonal increase in personnel was reported in telephonic communications, while telegraphs reported an insignificant reduction. Activity in the communications division as a whole was greater than at the beginning of January a year ago, or of any other year since 1931. The payrolls of the companies furnishing data rose

from 26,879 in the preceding month, to 26,928 at January 1, 1942.

Transportation.—The curtailment indicated in transportation was on a smaller scale than that noted at the same date in 1941, being also decidedly less-than-average for the beginning of January in the experience of the years since 1920. The index, at 101·1, was higher than at January 1 of 1941 or of any other year since 1930. There were reductions at the date under review in street railway transportation, cartage and storage and in shipping and stevedoring, those in the latter group being pronounced. On the other hand, steam railway operation showed some improvement. Information was received from 557 employers, who reported 127,460 workers at January 1, as compared with 131,573 in the preceding month.

Construction and Maintenance.—As already mentioned, the loss in personnel in construction at the date under review was below the average for January in the experience of the last twenty-one years being also smaller than that noted at January 1, 1941. The index of employment in construction, at 124·7, was many points above that of 83·0 at the same date of last winter, and was also the highest for January in the period since 1920.

Statements for January 1, 1942, were tabulated from 1,448 contractors and divisional superintendents, whose staffs aggregated 156,669, a decrease of 13·1 per cent as compared with their December figure of 180,194. Highway construction showed considerable curtailment from the preceding month, and there were also large contractions in building while smaller reductions were reported in railway construction and maintenance.

Services.—There was a decline, on the whole, in the service group at January 1; employment in hotels and restaurants slightly decreased, and laundries and dry-cleaning establishments were seasonally slacker. The co-operating firms in this division, numbering 613, reported 37,429 employees, as compared with 37,968 in the preceding month. A moderate gain on the whole had been noted at the beginning of January, 1941, but the index was lower than at the date under review, when it stood at 168·0. This figure was the highest in the record for the beginning of January.

Trade.—Trade afforded considerably more employment, the general gain being greatly above the average at January 1 in the years since 1920. It was, however, smaller than that recorded at the beginning of January of last winter. There were seasonal losses in wholesale establishments, but large additions to staffs were reported in retail stores. The 2,195 employers furnishing returns had 176,905 persons on their staffs, compared with 171,279 at December 1. The January 1 index stood at 172·4, as compared with 167·1 in the preceding month, and 160·8 at the same date in 1941. Employment in trade at the opening of the present year was in rather greater volume than in any other month in the period of observation.

Finance.—At the beginning of January, 761 financial institutions and branches reported a staff of 62,632 employees, compared with 62,947 in the preceding month. The index stood at 121·3; in the preceding month it was 121·9, while at January 1, 1941, the figure was 112·4. The addition of the returns for this group to those furnished for the manufacturing, logging, mining, transportation, communications, construction, services and trade industries brings the total number of persons included in the January 1 survey of employment, to 1,720,622 in 13,594 establishments, and lowers the index of 165·8 in the industries above enumerated, to 163.6; when the employees of the co-operating financial organizations were added to the general figures for December 1, 1941, the index was lowered from 168·8 to 166·5. At January 1, 1941, the general index had been 134·2, while that including the financial organizations was 133·5.

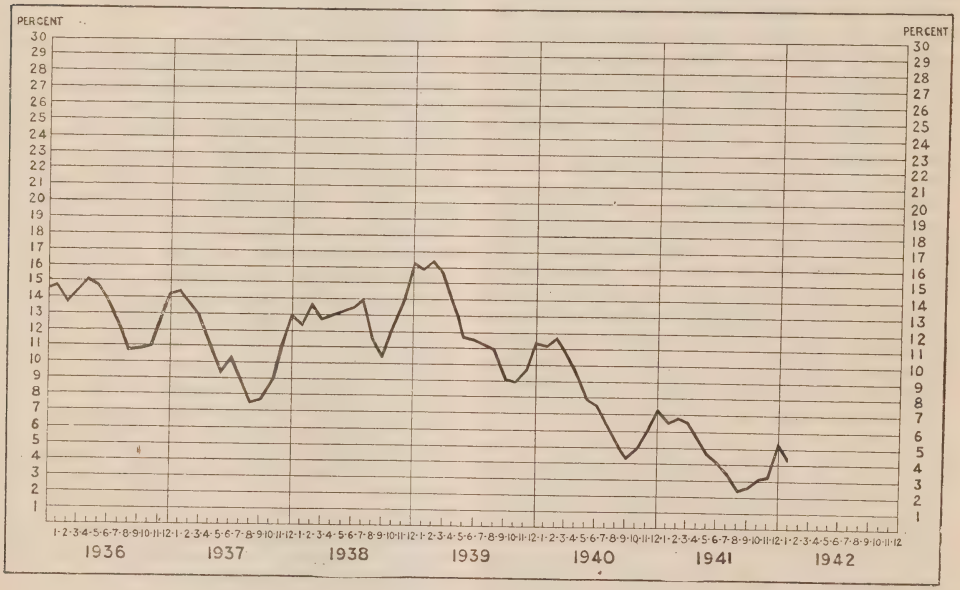
Index numbers of employment for the Dominion, in industries other than finance, are given in Table 11.

Unemployment in Trade Unions at the close of January, 1942

Unemployment in the following report has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades or who are involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Reports were tabulated at the close of January from 2,116 labour organizations having a total membership of 323,598 persons, of whom, 14,066, or a percentage of 4·3, were without work, in contrast with percentages of 5·2 at the close of December and 6·6 at the end of January, a year ago.

The moderate improvement shown in January over the preceding month was due principally to decidedly better conditions among lumber workers and loggers, pronounced seasonal expansion for garment workers, and



substantially higher levels for steam railwaymen; these increases were more than sufficient to offset moderate seasonal reductions in work afforded members in the building and construction trades. In comparison with December, fair advances were observed in Ontario and British Columbia; in New Brunswick, Quebec, Saskatchewan, and Alberta there were nominal increases, only. On the other hand, there were fractional recessions in Nova Scotia and Manitoba. In contrast with reports tabulated for January, 1941, noteworthy expansion was apparent in Quebec, Alberta and British Columbia; in Nova Scotia, New Brunswick, Saskatchewan, and Ontario there were advances on a moderate scale, while in Manitoba there was a slight contraction.

A separate compilation is made each month of unemployment among trade union members in the largest city in each province, with the exception of Prince Edward Island. In contrast with the preceding month, Toronto unions indicated a substantial increase in work and in Montreal and Vancouver, also, there were fair advances; fractional increases, only, were reflected in returns received from unions in Saint John and Edmonton, while in Winnipeg and Regina there were nominal contractions; in Halifax there was a tendency toward slightly reduced employment. In comparison with conditions at the close of January, a year ago, members in Montreal, Halifax and Vancouver were substantially better employed. In Regina and Saint John there were advances of somewhat lesser degree and in Toronto and Edmonton there were nominal gains, only. Winnipeg was the only city in this comparison to reflect a contraction in work and the decrease there was not pronounced.

The chart, which accompanies this article, illustrates the trend of unemployment by months from January, 1936, to date. The curve of unemployment in January, 1942, rested at a moderately lower level than in December, 1941, thus reflecting a fair increase in available work. The point of the curve rested at a substantially lower level than at the end of January, a year ago, thus manifesting noteworthy improvement during the period under review.

There were 657 reports tabulated from unions in the manufacturing industries. These organizations had a combined membership of 147,319 persons, of whom, 4,602, or a percentage of 3·1 were without work, in contrast with percentages of 4·7 at the end of the previous month and 4·8 at the close of January, 1941. In comparison with December, impressive expansion due to the re-opening of the season, was apparent in reports received from unions in the garment trades. Among cigar and tobacco and leather workers there was a slightly upward movement; nominal increases, only, were noted for bakers and confectioners, papermakers, hat, cap and glove and woodworkers. Electric current employees.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

textile and carpet workers, tailors, butchers, meat and fish packers, jewellery workers, mine, mill and smeltermen, and gas workers were reported as being fully employed. On the other hand, fractional decreases in work afforded, were reflected in returns received from unions of soft drink workers and printing pressmen. Conditions for members in the iron and steel trades and among metal polishers and clay, glass and stone workers remained unchanged, the high levels shown in December, continuing during the period under survey. Slightly reduced activity was observed for rubber workers and general labourers; among fur workers there was a noteworthy contraction. A large majority of the trades participated in the advance over January, 1941. A considerably higher employment level was observed for members in the iron and steel trades. The situation as reported by papermakers, printing pressmen and textile and carpet workers also reflected appreciable increases in work. From the percentage viewpoint, especially, rubber and woodworkers were much better employed. On the contrary, an appreciable contraction was observed among leather workers and a noteworthy decline was indicated for fur workers.

Reports were received from 55 unions of coal miners, whose total membership was 22,114 persons. Of these 226, or a percentage of 1·0 were unemployed. This percentage was identical with that shown in the preceding month. In January, 1941, the percentage of unemployment stood at 2·4. In contrast with the preceding month, unions in Alberta and British Columbia reflected nominal increases and in New Brunswick members were reported as fully employed. On the other hand, in Nova Scotia, there was a fractional recession. In comparison with the situation at the close of January, 1941, New Brunswick unions, as in the previous comparison reported their membership as being fully engaged. Conditions in Alberta and British Columbia reflected appreciable advances; in Nova Scotia there was a nominal gain, only.

Reports were tabulated from 247 unions in the building and construction trades. These organizations had a total membership of 36,671 persons, of whom, 5,214, or a percentage of 14·2, were without work, in contrast with 10·6 per cent in December and 17·4 per cent at the close of January, a year ago. In contrast with December, a minor increase was noted among tile layers, lathers and roofers; fractional advances, only, were indicated by steam shovel and dredgemen and electrical workers. On the other hand nominal contractions were reflected in reports received from unions of plumbers and steamfitters and hod carriers and building labourers. From the percentage viewpoint, bridge and structural iron workers and granite and stonecutters manifested noteworthy contractions, but as their memberships are small, these changes involved but few workers. Seasonal influences were largely responsible for the substantial decreases in work afforded bricklayers, masons and plasterers, painters, decorators and paperhangers and carpenters and joiners. An upward trend over January, 1941, was shown in a majority of the trades. Much higher levels were observed for carpenters and joiners and hod carriers and building labourers; among bricklayers, masons and plasterers, plumbers and steamfitters, and tile layers, lathers and roofers there were advances of lesser degree. From the percentage viewpoint, although involving but few members, steam shovel and dredgemen were much busier; a nominal advance, only, was apparent for electrical workers. On the other hand, bridge and structural iron workers, although but few members only were involved, indicated a noteworthy contraction. A substantial decrease in work afforded was noted for painters,

TABLE I.—PERCENTAGE OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

decorators and paperhangers and much lower levels were observed among granite and stonecutters.

Reports were received from 855 organizations in the transportation industries. The total membership was 75,463 persons, of whom, 2,379, or a percentage of 3·2, were unemployed, in contrast with percentages of 4·9 in December and 5·3 at the end of January, 1941. Moderately higher levels prevailed for navigation workers and steam railway employers, when contrasted with December; among teamsters and chauffeurs the increase was nominal, only; while street and electric railway employees reported the same percentage of members out of work, as that shown in the previous month. In comparison with the situation in January, 1941, conditions among steam railway employees improved substantially and appreciable expansion was apparent, also, among navigation workers; fractional advances only were in evidence among teamsters and chauffeurs. The situation among street and electric railway employees, as in the previous comparison, remained unchanged.

Returns were received from 10 unions of retail shop clerks whose aggregate membership was 3,193 persons. Of these, 4, or a percentage of 0·1 were without work on the last day of January. This percentage was identical with that shown in December. These members were reported as being fully engaged in January, a year ago.

Reports were tabulated from 97 unions of civic employees, whose combined membership was 9,981. Of these, 185, or a percentage of 1·9 were unemployed, in comparison with 0·5 in December and 1·9 at the end of January, 1941.

At the close of January, in the miscellaneous group of trades, there were 151 reports tabulated. These showed a total membership of 11,991 persons, of whom, 205, or a percentage of 1·7 were without work, in contrast with 2·3 per cent in December and 3·9 per cent at the end of January, a year ago. In comparison with the previous month, minor advances were apparent for hotel and restaurant employees and stationary engineers and firemen; a fractional increase only was in evidence among barbers. On the contrary, a nominal decline was observed among unclassified workers; among theatre and stage employees a slight contraction was noted. In contrast with conditions in January, a year ago, stationary engineers and firemen indicated an appreciable advance and among hotel and restaurant and theatre and stage employees conditions improved, although to a lesser degree; among barbers a nominal increase only occurred. On the other hand, a tendency toward reduced activity was in evidence among unclassified workers.

Returns were tabulated from 6 unions of fishermen having a total membership of 2,578 persons, of whom, 350, or a percentage of 13·6 were without work, in contrast with percentages of 17·7 in December and 21·0 in January, a year ago.

Reports were received from 4 unions of lumber workers and loggers. The total membership was given as 2,768, of whom 307 were unemployed. This was a percentage of 11·1. The percentage without work in December was 30·3 and at the end of January, 1941, the percentage of unemployed members stood at 9·4.

Table 1 shows by provinces the percentage of members, who were on the average unemployed each year from 1931 to 1941, inclusive, and, also, the percentage of unemployment for January of each year from 1931 to 1940, inclusive and for each month from January, 1941, to date. Table 11 summarizes the returns in the various groups of industries for the same months as Table 1.

Building Permits Issued in Canada During January, 1942

The January report of building permits compiled by the Dominion Bureau of Statistics includes returns from 162 of the 204 municipalities in Canada which have systems for issuing such permits and of this number 112 reported detailed operations. The remaining 50 advised that no permits had been issued during the month of January while 42 municipalities had failed to report at the close of February 12.

The total value of permits reported as issued in the month of January is $6,288,995. Revised values for the month of December include returns from 203 municipalities and aggregate $8,391,308. Reports were received from 54 of the 58 original municipalities and show a value of $4,229,027 for January. The corresponding revised value for December includes 58 returns and is $6,199,652, while the January, 1941 value was $3,569,557.

The total value of permits issued by all municipalities during the twelve months of the past wear was $135,301,519. The value of the 58 municipalities for the same period was $101,047,815, while their corresponding value in 1940 was $80,274,350.

During the month of January new construction of all types amounted to 78·0 per cent of the total value, while the percentage of new residential construction was 23·9.

TABLE 1.—VALUES AND CLASSIFICATIONS OF BUILDING PERMITS ISSUED IN CANADA, BY PROVINCES, JANUARY, 1942

Classification of Permits	Canada	Provinces			
		Prince Edward Island	Nova Scotia	New Brunswick	Quebec
	$	$	$	$	$
All Permits—Total Value	6,288,995	.....	84,000	28,300	1,432,127

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

NOVEMBER-DECEMBER RECORD

THE British *Ministry of Labour Gazette* for January, 1942, summarizes the November-December employment situation in Great Britain as follows:—

The number of men and boys registered at Employment Exchanges in Great Britain as wholly unemployed at December 8 was 92,343, a decrease of 2,992 as compared with November 17. Of this total, 27,578 had been classified by interviewing panels as unsuitable for ordinary industrial employment.

Those registered as on short time, or otherwise temporarily suspended from work on the understanding that they were shortly to return to their former employment, numbered 4,426; this was a decrease of 1,488 as compared with November 17. Those registered as unemployed casual workers (being persons who normally seek their livelihood by jobs of short duration) numbered 9,523 a decrease of 1,261 as compared with November 17.

The corresponding figures for women and girls on the registers at December 8 were 72,881 wholly unemployed, 8,835 temporarily stopped, and 346 unemployed casual workers. Of those wholly unemployed 2,812 had been classified by interviewing panels as unsuitable for normal full-time employment, and 2,873 had been classified as unable for good cause to transfer to another area. As compared with November 17 the numbers wholly unemployed showed a decrease of 3,768, those temporarily stopped a decrease of 1,263, and unemployed casual workers an increase of 24.

The number of applicants for unemployment benefit or allowances on the registers at December 8 was 129,791, as compared with 138,229 at November 17, and 586,081 at December 9, 1940.

United States

Seasonal declines in trade, construction, and manufacturing accounted largely for the decrease of about 1,235,000 in civil non-agricultural employment from mid-December to mid-January, according to a report issued by the United States Secretary of Labor, Miss Frances Perkins. The decrease in employment in wholesale and retail trade amounted to 760,000 workers, and reflected the usual reduction in temporary personnel employed to handle the Christmas holiday trade. Contract construction showed a decrease of 161,000 as a result of reductions in both Federal and non-Federal construction. Total factory employment declined by 145,000, employment falling sharply in consumer durable goods industries converting to war production and in many seasonally curtailed non-durable goods industries. War industries, however, continued to expand at a rapid rate. Government employment was reduced by 57,000 as temporary post-office personnel was released.

Civil non-agricultural employment totalled approximately 39,850,000 in January, 1942 and was 2,700,000 greater than in January, 1941. During the year manufacturing has accounted for an increase of 1,500,000 workers. Federal, State, and local government employment increased 443,000, trade rose 250,000; transportation and public utilities 250,000; finance and service 118,000; contract construction 90,000; and mining 26,000.

The decrease in manufacturing employment from December to January was of less than the usual seasonal proportions, but was larger than the decline that occurred during the corresponding period of the previous year. The chief reduction among consumers' durable goods industries—which are converting their facilities, completely or partially, to the manufacture of munitions—occurred in automobile plants where 50,000 fewer wage earners were employed.

Other consumer durable goods industries showing substantial employment declines were stoves, radios and phonographs, furniture, washing machines, clocks and watches, jewelry, and silverware. Substantial reductions were also reported by the following metal working industries: hardware, plumbers' supplies, stamped and enamelled ware, wirework, and lighting equipment. Although seasonal factors were responsible for declines in a number of the non-durable goods industries, shortages of raw materials caused decreases in such industries as hosiery, rubber tires and tubes, woollen and worsted goods, carpets and rags, and silk and rayon.

Employment for all manufacturing industries combined decreased 1·3 per cent over the month to 132·5 per cent of the 1923-25 average. Factory pay rolls increased 1·8 per cent over the month to 173·2 per cent of the 1923-25 average. Compared with January, 1941, factory employment advanced 14·7 per cent and pay rolls 43·5 per cent. The considerably greater increase in pay rolls reflects expansion in working hours, overtime-payments, and wage-rate increases.

Among the mining industries, the only substantial decrease between December and January occurred in quarrying and non-metallic mines. Little significant change occurred in either anthracite or bituminous coal, metal mining or crude petroleum producing. The largest increases over the year were in metal mining, quarrying and non-metallic mining, and bituminous coal mining. Changes over the month in the various public utilities were of about the usual seasonal amounts while telephone and telegraph companies reported the largest gains over the year interval.

In retail trade, post-holiday employment showed the usual seasonal curtailment with a loss of 15 per cent, while pay rolls decreased 12 per cent. Wholesale trade employment declined seasonally by 1·5 per cent over the month, while pay rolls showed virtually no change.

A Factory Nursery Centre in England

Rowtree and Company, Limited, York, has established its own nursery centre within the factory to encourage married women with children to accept employment. The Company considered that it could provide such facilities more quickly than the local authority and that the expense of providing the premises, equipment and staff was justified by the acute need for women workers. Under the two-shift system work continues from 6 a.m. to 10 p.m. and a residential nursery would be necessary for night and shift workers. It was decided, however, to open a Day Nursery only.

The Company's nursery centre consists of a crèche for children under two years of age and a nursery school for those from two to five. It is staffed by a superintendent, three trained nursery workers and several young helpers. Average attendance is between 50 and 60, and the children arrive as early as 7.30 a.m. The factory canteen manageress is responsible for providing the children with four meals a day and has a special permit from the local Food Office which enables her to obtain foods suitable for children. Medical care is provided by the company's medical department and consists of a preliminary examination and a weekly check-up. The mothers of the children pay 5s. a week for one child, 8s. for two and 10s. for three.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wage Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by Orders in Council of April 9, 1924, and of December 31, 1934. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On May 30, 1941, an Order in Council, P.C. 3884, was passed rescinding the schedule of minimum wage rates set out in the "B" conditions which had been in effect since December, 1934, and establishing increased rates of 35 cents and 25 cents respectively for male and female workers over eighteen years of age. It also made provision for a system of permits to employ beginners and handicapped workers at sub-standard rates, and provided penalties for non-compliance with the prescribed rates.

On October 4, 1941, P.C. 3884 was revoked by the passage of Order in Council P.C. 7679 and minimum rates were prescribed for all employees of Government contractors and subcontractors. (The full text of this Order in Council appears at pages 1226 and 1227 of the Labour Gazette for October.)

The four major changes made by the new Order are: (1) the application of the minimum rates to *all* employees of contractors and subcontractors throughout an establishment of which any port may be engaged on Government orders, and not only as previously to those employees actually engaged on Government work; (2) the addition of a new minimum wage rate of 20 cents an hour for employees under 18 years of age whose rates previously had been set by provincial regulation; (3) the authorization of special beginners' rates; and (4) the exemption from the necessity of obtaining beginners' permits unless the number of beginners exceeds a quota of 20 per cent of the total number of employees in any establishment.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were susperseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight-Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. This clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor or any other persons doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuation of the work be paid fair wages:

The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide or except in cases of emergency as may be approved by the Minister."

This Act, like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by federal grant in the form of contribution, subsidy, loan, advance, or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, and certain other works being carried out under agreements with the provinces which are also assisted by grant of federal funds, the same labour conditions are enforced which apply to works of building and construction undertaken by the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages for overtime and as to the proper classification of any

work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours, on contracts for governmental supplies and equipment the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

War Contracts

All contracts awarded by the Department of Munitions and Supply are subject to labour conditions for the protection of the workpeople concerned.

In the case of building and construction contracts, the labour conditions include fair wages schedules based on the rates current in the particular district where the work is being performed, and provide that the working hours shall not exceed eight per day and forty-four per week.

In the case of contracts for the manufacture and overhaul of aircraft, the labour conditions include one scale of minimum wage rates which has been approved for all work of this nature undertaken in Eastern Canada (Ontario, Quebec and the Maritime Provinces), and a separate and higher scale for all such contracts undertaken in Western Canada (comprising the area from Fort William to the Pacific Coast). These contracts are subject also to a working week of not more than forty-eight hours, provision being made that any necessary and authorized overtime work shall be paid for at a rate of not less than one and one-half times the regular rate.

Contracts for shipbuilding and repair are all subject to labour conditions including fair wage schedules based on the rates current in the district where the work is being executed. Provision is made for the observance of working hours of not more than forty-eight per week and for a wage rate of not less than one and one-half times the regular rate for any overtime that is necessary and authorized by the Dominion Government inspector in the plant.

Contracts for the manufacture of equipment and supplies for the defence forces are subject to the 'B" labour conditions of the Fair Wages Order in Council referred to in the introduction to this article.

Schedules Prepared and Contracts Awarded during February

During the month of February, the Department of Labour prepared, on request, 109 fair wages schedules for inclusion in building and construction contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

Particulars of the contracts which have been entered into recently by the various Government departments (other than the Department of Munitions and Supply) appear hereunder:—

Group "A" Contracts

(1) *Works of Construction, Remodelling, Repair or Demolition*

Note: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work, and also specify that the rates of wages set out therein are "*minimum* rates only" and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instances where such higher rates are fixed by provincial legislation."

Department of Public Works

Alterations and additions to a public building at Pembroke, Ont. Name of contractors, Estate Walter Beatty, Pembroke, Ont. Date of contract, January 30, 1942. Amount of contract, $9,349.54. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 80
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 40

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Mining, Non-ferrous Smelting and Quarrying

DELORO, ONTARIO—DELORO SMELTING AND REFINING CO. LTD. AND COMMITTEE OF EMPLOYEES.

Agreement reached following an application for a board under the Industrial Disputes Investigation Act which was later withdrawn when agreement was reached through the Industrial Disputes Inquiry Commission. Agreement to be in effect from February 14, 1942, to August 1, 1942, and thereafter until 30 days' notice.

Hours: 8 per day where possible, 48 per week; overtime and work for day workers on Sundays at time and one half. For electric furnace operations, 9 hours per day, a 54 hour week; for shift work, overtime after 56 hours in a week; for work where Sunday operations are the rule, a week to be 56 hours, with straight time on Sundays. Wage rates in effect at time agreement made to be maintained; the company to pay to each employee at March 31, 1942, and at the end of each subsequent quarterly period for the duration of the war a "goodwill" bonus of 10 per cent of the earnings of each such employee during the previous three months. The Company will continue to pay the wartime cost of living bonus in accordance with Order in Council P.C. 7440 of December 16, 1940. Vacation: one week per year after one year's service. Provision is made for seniority rights and for the settlement of disputes.

SAULT STE. MARIE, ONTARIO.—CHROMIUM MINING AND SMELTING CORPORATION LTD. AND THEIR EMPLOYEES.

Agreement reached following the board under the Industrial Disputes Investigation Act, as reported in the LABOUR GAZETTE, October, 1941, page 1189, and this issue page 263. Agreement to be in effect from January 28, 1942 to July 27, 1942, and thereafter subject to 30 days' notice. Hours (subject to requirements indicated by federal government): 8 per day for shift employees, 8 or 9 per day for day workers according to nature of operations; employees on shift work to operate on change shifts as now established to ensure days of rest; day workers electing to work 7 days per week will be subject to call but, work permitting, will have Sundays off; day workers electing to work 6 days per week will not be subject to call for work on Sundays. Overtime at time and one half except a shift worker replacing by agreement his relief man. Wage rates now established to be maintained. During normal times employer will pay wages equal to or above prevailing rates in the community for similar work. During war conditions, wages will follow the principle formulated by the federal government and in accordance with Order in Council 8253 of October 27, 1941 and amendments. Vacation: only shift employees on a 7 day week basis and day employees electing to work a 7 day week to be given a vacation with pay, such annual vacation to be from 3 days during second year of service to 15 days after five years' continuous service. Provision is made for seniority rights, for collective bargaining and the settlement of disputes.

Manufacturing: Metal Products

WINNIPEG, MANITOBA.—MACDONALD BROTHERS AIRCRAFT LIMITED, WINNIPEG, AND INTERNATIONAL ASSOCIATION OF MACHINISTS, LODGE 741.

Agreement reached following application for a board under the Industrial Disputes Investigation Act (LABOUR GAZETTE, November, 1941, page 1342) and conciliation by the Industrial Dispute Inquiry Commission and subsequent withdrawal of the application (LABOUR GAZETTE, December, 1941, pages 1488 and 1468, and this issue page 263).

Agreement in effect from January 24, 1942, to December 31, 1942, or 1943 if notice is given by neither party.

The Company recognizes a shop committee of the union who are employees of the company as the bargaining agent of the employees. Hours: 48 per week; overtime at time and one half for first four hours and double time thereafter; double time also for work on Sundays (or other day assigned where work on Sunday necessary due to 7 day operations) and seven specified holidays. The wage schedule in effect at the time the agreement made is to continue until any change is permitted by the National War Labour Board. A cost-of-living bonus to be paid in accordance with the federal government Order in Council P.C. 8253 of October 27, 1941, or subsequent Orders in Council. Provision is made for seniority rights and for the settlement of disputes.

COLLECTIVE AGREEMENT ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Agreement Act was assented to June 22, 1940, and was summarized in the LABOUR GAZETTE, August, 1940, page 812. It replaces the Collective Labour Agreements Act, 1938. Agreements and regulations under the "Collective Labour Agreements Act," the "Act respecting Workmen's Wages" and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Agreement Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act made obligatory on all employers and employees in the trade, industry, commerce or occupation throughout the province or within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable with due regard to economic conditions, an Order in Council may be passed granting the application and making the provisions of the agreement obligatory from the date the Order in Council is adopted. The Order in Council may be amended or revoked by a further Order in Council on the recommendation of the Minister of Labour after consulting the parties to the agreement and after the required notice has been published in the *Quebec Official Gazette*. A parity committee (formerly called a joint committee) must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and noted in the *Quebec Official Gazette*, the committee is constituted a corporation. A parity committee may require certificates of competency from workers within the scope of the agreement and such by-laws must be approved by Order in Council and published in the *Quebec Official Gazette*. Proceedings under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues from May, 1938, to July, 1940. Proceedings under the Collective Agreement Act are noted in the issues beginning August, 1940.

Recent proceedings under the Act include the extension of two new agreements and the amendment of eight other agreements, all of which are noted below. In addition, requests for the amendment of the following agreements were published in the *Quebec Official Gazette:* fur industry, Quebec, in the issue of February 7; barbers and hairdressers at Quebec, the embroidery industry throughout the province, building trades at Sorel, garages and service stations at Quebec and plumbers at Three Rivers, in the issue of February 14; hardware stores at Quebec, barbers and hairdresses at St. Johns and Iberville, the fur industry (wholesale) at Montreal, the lithographing industry throughout the province and building trades at St. Johns, in the issue of February 21; bakers at Montreal, building trades at Val d'Or and Amos, building materials throughout the province and building trades at St. Jerome, in the issue of February 28. In addition, Orders in Council were published in the *Quebec Official Gazette* during February, approving the levying of assessments by certain parity committees.

Manufacturing: Vegetable Foods

BAKERS AND BAKERY SALESMEN, MONTREAL

An Order in Council, dated February 18, and published in the *Quebec Official Gazette*, February 21, amends the previous Order in Council for this industry (LABOUR GAZETTE, October, 1939, page 1064, September, 1940, page 970, January, 1941, page 70, February, page 183, and January, 1942, page 110). The basic weekly wage rates are unchanged at $21 for journeymen bakers and pastry cooks, $18 for helpers, $12 for apprentices, $25 to $29 for foremen (with the addition of a rate of $32 for foremen in establishments of 16 or more men), $18 for salesmen and distributors plus commissions; extra employees 50 cents per hour for journeymen bakers and 40 cents for helpers; inspectors where employed, $25 per week. A cost-of-living bonus of $2.50 per week is added to the weekly minimum wage. Effective from February 15, 1942, an additional cost-of-living bonus is payable in accordance with the federal government Orders in Council P.C.

8253 and 9514 of 1941. The agreement is extended to December 31, 1942, and thereafter from year to year, subject to notice.

Manufacturing: Fur and Leather Products

TANNERY INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated February 13, and published in the *Quebec Official Gazette*, February 21, amends the previous Orders in Council for this industry (LABOUR GAZETTE, March, 1940, page 282, February, 1941, page 183, August, page 1008 and October, page 1313). The 10 per cent increase in hourly rates granted as a war bonus from September 13, 1941, is rescinded and replaced by a cost-of-living bonus of 25 cents per week for each rise of one point in the cost-of-living index since August, 1939, for all adult male employees, and a bonus of one per cent of their basic weekly wage rates for each such point rise, for male employees under 21 years and female workers where the basic wage rates of such are less than $25 per week.

Manufacturing: Textiles and Clothing

MEN'S AND BOYS' CLOTHING INDUSTRY, PROVINCE OF QUEBEC

An Order in Council dated February 13, and published in the *Quebec Official Gazette*, February 21, amends the previous Orders in Council for this industry (LABOUR GAZETTE, December, 1937, page 1385, December, 1939, page 1279, November, 1940, page 1202, August, 1941, page 1008 and September, page 1159). The minimum wage scale which was originally printed in the LABOUR GAZETTE, January, 1937, page 104, is amended for certain classes: class EE (steam machine pressers on coats and general underpressers on vests) is replaced by class D-1 (steam machine pressage on coats and general underpressers on vests) with minimum hourly rates of 51 cents in zone I, 46 cents in zone II and 44 cents in zone III; in class E, choppers on coats are deleted and the following new class added—class D-2 (choppers on coats, pants and vests) 49 cents in zone I, 44 cents in zone II and 42 cents in zone III; the wage rates for class FF (underpressers in the pants department) are changed to 42 cents in zone I, 38 cents in zone II and 36 cents in zone III; choppers on odd pants are deleted from their previous group and made into a new group with minimum hourly rates of 45 cents in zone I, 41 cents in zone II and 39 cents in zone III.

DRESS MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated January 29, and published in the *Quebec Official Gazette*, February 7, amends the previous Orders in Council for this industry (LABOUR GAZETTE, October, 1940, page 1075, and November, page 1202) but does not affect the summary previously given.

Manufacturing: Printing and Publishing

PRINTING TRADES, MONTREAL

A correction to the Order in Council summarized in the LABOUR GAZETTE, June, 1941, page 704, was published in the *Quebec Official Gazette*, February 28, which does not affect the summary previously given.

Manufacturing: Metal Products

RAILWAY AND TRAMWAY CAR AND BUS MANUFACTURING INDUSTRY, MONTREAL

An Order in Council, dated February 14, and published in the *Quebec Official Gazette*, February 14, extends the term of this agreement (LABOUR GAZETTE, March, 1940, page 282, April, page 390, January, 1941, page 70, April, page 473, and May, page 593) by extending the terms of the agreement to March 1, 1943.

Manufacturing: Non-metallic Minerals, Chemicals, etc.

PAINT MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated February 20, and published in the *Quebec Official Gazette*, February 28, extends the term of this agreement (LABOUR GAZETTE, March, 1940, page 282, and January, 1942, page 110) to May 1, 1942.

Construction: Buildings and Structures

BUILDING TRADES, VAL D'OR AND AMOS

An order in Council, dated January 29, and published in the *Quebec Official Gazette*, February 7, extends the term of the agreement (LABOUR GAZETTE, June, 1941, page 704, and October, page 1315, and December, page 1573) to February 11, 1943.

Transportation and Public Utilities: Water Transportation

LONGSHOREMEN (INLAND AND COASTAL NAVIGATION), MONTREAL

An Order in Council, dated February 20, and published in the *Quebec Official Gazette*, February 28, extends the term of this agreement (LABOUR GAZETTE, June, 1939, page 629; February, 1940, page 173; April, page 391; June, page 610; February, 1941, page 184; April, page 473; June, page 705; July, page 854; August, page 1013; September, page 1162; November, page 1425, and February, 1942, page 234) to April 30, 1942.

Service: Business and Personal

BARBERS AND HAIRDRESSERS, THREE RIVERS

An Order in Council, dated February 26, and published in the *Quebec Official Gazette*, February 28, makes obligatory the terms of an agreement between L'Union nationale catholique des Maîtres-Barbiers et Coiffeurs, Inc. (The National Catholic Union of Master Barbers and Hairdressers, Inc.) of Three Rivers and L'Union nationale catholique des Employés Barbiers et Coiffeurs (The National Catholic Union of Employed Barbers and Hairdressers) of Three Rivers. Agreement to be in effect from February 28, 1942, to February 27, 1943, and thereafter from year to year, subject to notice, and includes: the cities of Three Rivers and Cap de la Madeleine and within two miles of them (zone I); the cities of Shawinigan Falls and Grand'Mère and within two miles of them (zone II); and the town of Louiseville and within two miles of it (zone III).

Hours: 56 per week in zones I and II, and 62 hours in zone III. Weekly wage rates: for barbers and male hairdressers, $15 plus 50 per cent of receipts in excess of $22 made by the

employee during the week or $20 per week without percentage; female hairdressers, $14. Rates are also set for part time employees. A cost of living bonus is provided for with increases in the cost of living over October 1, 1941 (in accordance with the federal Order in Council, P.C. 8253 of 1941). A scale of minimum charges to customers is provided for. Apprentices to be paid from $5 for second six months to $10 after 18 months.

FUNERAL UNDERTAKERS, MONTREAL

An Order in Council, dated February 13, and published in the *Quebec Official Gazette*, February 21, makes obligatory the terms of an agreement between La Section des Directeurs de Funérailles du District de Montréal de l'Association des Marchands détaillants du Canada (The Montreal District Funeral Directors' Section of the Retail Merchants' Association of Canada) and Le Syndicat des Employés de Pompes Funèbres de Montréal, Inc. (The Union of Funeral Undertakers' Employees of Montreal, Inc.). This agreement applies to all funeral directors and embalmers and their employees on the Island of Montreal and Isle Jésus, and within 10 miles of the Island of Montreal, and is in effect from February 21, 1942, to February 20, 1943, and for another 30 days if a new agreement has not then been adopted.

Hours: 66 per week; overtime at time and one half the minimum rates. Minimum wage rates: embalmers $28 and $30 per week, or $8 per embalming; automobile mechanics from 45 cents per hour for third class to 60 cents for first class mechanics; servicemen from $18 for inexperienced men to $23 after three years; extra employees 40 cents per hour. A cost of living bonus is provided for in accordance with federal Order in Council P.C. 8253 of 1941. Students learning embalming are not paid; apprenticeship to be for one year.

PRICES, RETAIL AND WHOLESALE, IN CANADA, FEBRUARY, 1942

Cost of Living, Prices of Staple Articles and Index Numbers

THE official index number of the cost of living in Canada, calculated by the Dominion Bureau of Statistics on the base period 1935 to 1939 as 100 advanced from 115·4 at the beginning of January, 1942 to 115·7 at the beginning of February due to advances in the food group and in certain miscellaneous items. In the former group increases in the prices of potatoes, onions, meats and tea more than offset declines in the prices of fruits and eggs. A fractional decline was recorded in the clothing group while the rent, fuel, and home furnishings groups were unchanged. Comparative figures for the total index at certain dates are 115·7 for February, 1942; 115·4 for January; 115·5 for October, 1941; 108·2 for February, 1941; 103·8 for February, 1940; and 100·8 for August, 1939, the last prewar month.

After adjustment to the base 100·0 for August, 1939, as required by Order in Council P.C. 8253, the index was 114·8 at the beginning of February; 114·5 for January; and 114·6 for October, 1941, thus showing an increase of two-tenths of one point between October, 1941, and February, 1942, and a wartime increase in the cost of living of 14·8 points down to February 2.

Foods advanced 24 per cent between August, 1939, and January, 1942; clothing 19·7 per cent; home furnishings and services 16·9 per cent; fuel and light 14·0 per cent; rent 7·1 per cent; and miscellaneous 5·7 per cent.

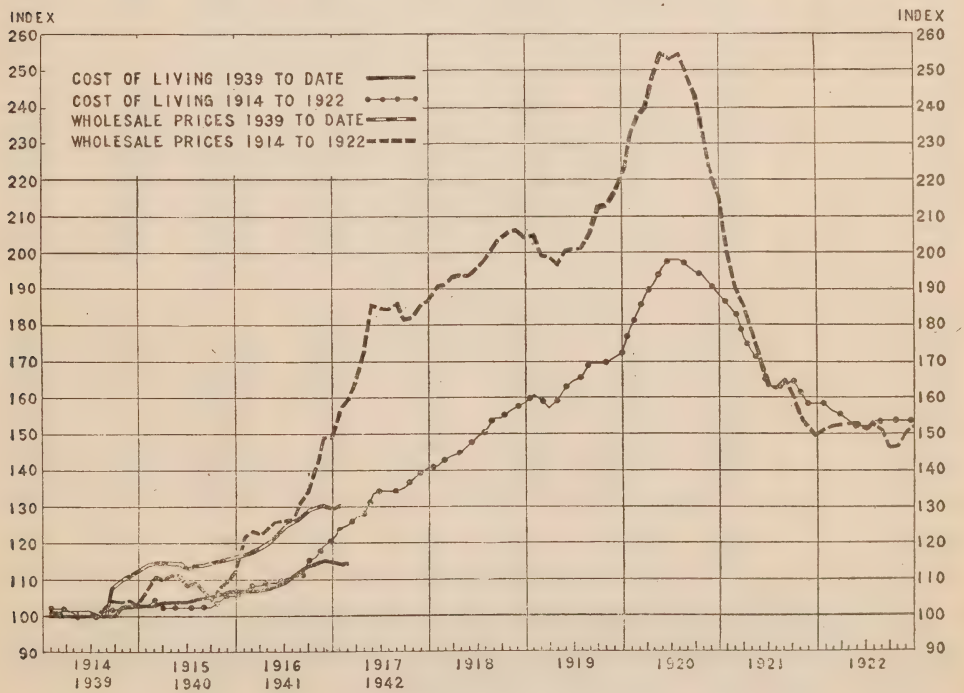
The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941, the Order having been amended to change the effective date from November 17 to December 1. The text of P.C. 8527 which appeared in the LABOUR GAZETTE for November on page 1371 provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, except under the regulations of the Wartime Prices and Trade Board. In the LABOUR GAZETTE for December on pages 1498 to 1501 under the title "Stabilization of Prices in Canada" there appears an outline of the measures taken by the Board. Prices of fresh fruits and vegetables, furs and certain kinds of fresh, cured and canned fish were exempted by the Board from the provisions of the maximum prices regulations. The order does not apply to sales by farmers and fishermen to dealers or processors of live stock, poultry, eggs, milk, cream, dairy butter, farm made cheese, honey, maple syrup and fish but does apply to sales by such dealers and processors and to sales by farmers and fishermen to consumers. On December 19, 1941, the Board announced that an increase in the price of milk by one cent per quart might be authorized in certain areas and under specified conditions. Authorization for similarly limited increases in retail prices of some kinds of tea in certain provinces, by amounts up to five cents per pound, was announced on January 16. On January 20 the Board re-established the price ceiling on onions, the basic period being the week ended January 10, 1942, and on March 10 the price ceiling on potatoes was re-established, the basic period to be February 2 to February 7.

The index number of the cost of living was constructed on the basis of a survey of

expenditure of 1,439 families of wage-earners and salaried workers with earnings between $450 and $2,500 in 1938. The average expenditure was $1,453.90 divided as follows: food (31·3 per cent), $443; shelter (19·1 per cent), $269.50; fuel and light (6·4 per cent), $90.50; clothing (11·7 per cent), $165.80; home furnishings (8·9 per cent), $125.70; miscellaneous (22·6 per cent), $319.40.

The last named group includes health (4·3 per cent), $60.80; personal care (1·7 per cent), $23.90; transportation (5·6 per cent), $79.30; recreation (5·8 per cent), $82.10; life insurance (5·2 per cent), $73.30. Other expenditure not directly represented in the index was $40.

The Dominion Bureau of Statistics has issued an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. The figures at certain dates since August, 1939, are: August, 1939, 100·0; September, 100·0; October, 103·8; November, 104·3; December, 104·3; January, 1940, 104·2; February, 104·3; March, 105·5; April, 105·5; May, 105·3; June, 105·3; July, 106·4; August, 106·8; September, 107·9; October, 108·4; November, 109·7; December, 110·0; January, 1941, 110·4; February, 110·1; March, 110·2; April, 110·7; May, 110·9; June, 112·7; July, 114·9; August, 117·7; September, 119·4; October, 120·1; November, 121·4; December, 120·6; January, 1942, 119·9; February, 120·3.



The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with prices in the period of 1914-1922.

Wholesale Prices

The Dominion Bureau of Statistics index number of wholesale prices on the base of 1926 as 100 was 94·6 for February, 1942, as compared with 94·3 for January; 93·6 for December, 1941; 85·2 for February, 1941; and 72·3 for August, 1939, the last prewar month. In the classification according to chief component materials five of the eight main groups advanced during the month. Changes were slight except in the iron and its products group which advanced 2·2 per cent. The increase in the general index between August, 1939, and February, 1942 was 30·8 per cent. Canadian farm products advanced 34·2 per cent in the same period, consumers' goods 30·4 per cent, and producers' goods 30·1 per cent.

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1942

BASE: PRICES IN JULY 1914 AND IN AUGUST 1939 = 100

*** For the period 1913 to 1934 the former series on the base 1926=100 was converted to the base 1935-1939=100.**

The cost of living bonus provided for by P.C. 8253 must be based on the index shown in the left-hand column. For each rise of one point in the index the amount of the bonus or its increase shall be:—(1) twenty-five cents per week for all adult male employees, and for all other employees employed at basic wage rates of twenty-five dollars or more per week, and (2) one per cent of their basic weekly wage rates for male employees under twenty-one years of age and female workers employed at basic wage rates of less than twenty-five dollars per week.

modern houses, $25–35 per month, semi-modern, $10–$15. s. Delivered from mines. v. Workingmen's houses are mostly of four and five rooms; modern $24–$28, semi-modern, $20–$24.

* In the province of Quebec a provincial sales tax of 2 per cent and in the cities of Montreal and Quebec an additional municipal tax of 2 per cent are not included in the prices for fuel.

INDEX NUMBERS OF WHOLESALE PRICES IN CANADA CALCULATED BY THE DOMINION BUREAU OF STATISTICS†

† The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in Other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

* Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive, 502, and since January, 1934, the number is 567.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of February of seventy-six staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except the following are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers; milk, bread, shoulder of veal, leg roast of pork, unsliced bacon, dairy butter, evaporated apples, vinegar and coal oil. Information as to the prices of the foregoing with the exception of milk and bread is obtained by the correspondents of the LABOUR GAZETTE. The prices of milk, bread, fuel and the rates for rent are obtained by the Bureau of Statistics and by the correspondents of the LABOUR GAZETTE.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

By Order in Council P.C. 8965, dated November 21, 1941 (LABOUR GAZETTE, December, 1941, page 1462) the price ceiling established by P.C. 8527 (LABOR GAZETTE, November, 1941, page 1371) was extended to rentals charged for all real property, the order to be administered by the Wartime Prices and Trade Board. Under authority conferred by Order in Council P.C. 5003 (LABOUR GAZETTE, October, 1940, page 995), the Board from time to time fixed maximum rentals for housing

accommodation in certain of the cities in the list on page 244. In these cities the maximum rentals already fixed continue unchanged, based in some cases on those in effect on January 2, 1940, and in the others on those in effect on January 2, 1941. The former are Halifax, New Glasgow, Sydney, Thetford Mines, Kingston, Ottawa, Windsor, Brandon, Calgary, Nanaimo, New Westminster, Prince Rupert, Vancouver and Victoria; the latter are Truro, Moncton, Brockville, Belleville, Fort William, Hamilton, Niagara Falls, Oshawa, Peterborough, Port Arthur, St. Catharines, Sault Ste. Marie, Regina, Edmonton, Medicine Hat, and Lethbridge. In all the other cities in the list the maximum rental for any housing accommodation is the rental which was in effect on October 11, 1941. Provision is made under the orders of the Board for variation of the maximum rentals for any accommodation under certain special circumstances affecting the accommodation.

Retail Prices

Meat prices increased slightly between the beginning of January and the beginning of February following increases in wholesale markets. Prices were somewhat lower than at the beginning of October but were substantially higher than one year ago. Beef prices were influenced by the demand for cattle from the United States. Sirloin steak averaged 33·9 cents per pound at February 2, 33·7 cents at January 2, and 31·1 cents at February 2, 1941. Lamb increased during the month from 31·2 cents per pound to 31·8 cents. Fresh loin of pork averaged 32·8 cents for February, 32·6 cents for January, and 24·7 cents for February, 1941. Sliced bacon was 43·1 cents for January and February as compared with 32·3 cents for February, 1941. Fresh eggs at 39·1 cents per dozen were one cent per dozen lower than for January and 8 cents lower than for December, 1941. The price in February, 1941, was 29·7 cents per dozen. Creamery butter at 38·4 cents per pound for February was unchanged from the preceding month and only slightly higher than one year earlier. Production for January decreased 12 per cent as compared with the preceding month and 9 per cent as compared with January, 1941. Stocks in storage at February 1 were about 17 per cent greater than at February 1, 1941. A substantial increase in the price of potatoes was shown at February 2 as compared with the previous month. Comparative figures are 37·6 cents per 15 pounds for February, 31 cents for January and 26 cents for February, 1941. The price of onions increased from 5·7 cents per pound to 6·5 cents.

The following are the prices reported for Welsh coal, "cobbles" and "French nut" at the beginning of February, 1942: Halifax, $19; Charlottetown, $17.90; Moncton, $18.50; Saint John, $18.50; Quebec, $16.50; Three Rivers, $17.25; Sherbrooke, $18.75; St. Hyacinthe, $17.50; Montreal, $17.75; Ottawa, $18.75; Kingston, $18.50; Belleville, $18.50; Oshawa, $18; Toronto, $16; St. Catharines, $18; Hamilton, $17.50; Brantford, $17; Galt, $17.50.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices, in Great Britain and certain of the principal industrial and commercial countries appeared in the October, 1941, issue of the Labour Gazette. Since these monthly notes are all compiled from British and foreign sources, the information contained therein usually deals with conditions prevailing some months previous to the date of publication in the Labour Gazette. In Great Britain both wholesale and retail trade are now subject to government control, the main objects of which are to conserve supplies of vital materials and to protect the public from unwarranted increases in prices. In order to achieve these ends the government of the United Kingdom has fixed retail and wholesale prices of some articles and is controlling the entire trade in some commodities, including importation and exportation.

Great Britain

Wholesale Prices.—The Board of Trade index number, on the base 1930=100, was 156·4 for January, an increase of 0·3 per cent for the month and of 4·6 per cent over the January, 1941, level. As compared with December, prices were 0·7 per cent higher for food and tobacco, due chiefly to higher prices for cereals. Industrial materials and manufactures were only slightly changed in this period.

The *Statist* index number, on the base 1867-1877=100, was 146·5 at the end of December, an increase of 0·7 per cent for the month. Foods were 1·4 per cent higher, due entirely to the advance of 2·9 per cent in vegetable foods. There were only minor changes in industrial materials groups.

Cost of Living.—The index number of the *Ministry of Labour Gazette*, on the base July, 1914=100, was 200 at January 1, a de-

cline of 0·5 per cent for the month. This was due to a decrease of one per cent in food prices, although clothing and sundries increased slightly.

Australia

WHOLESALE PRICES.—The index number of the Commonwealth Bureau of Census and Statistics, of wholesale price index numbers for basic materials and foodstuffs, on the base 1928-1929=1,000, was 1,089 for September, as compared with 1,070 in August and 1,044 in July. Of the seven groups, five showed advances in each of the last two months, while the rubber and hides group and the building materials group were practically unchanged.

United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number on the base 1926=100, was 96·0 for January, an increase of 2·6 per cent for the month. All groups showed increases over the previous month's level, with the exception of a fractional decrease in the fuel and lighting materials group. The groups showing the greatest increases were farm products, foods and chemicals and allied products.

COST OF LIVING.—The Bureau of Labour Statistics index number, on the base 1935-1939=100, was 111·9 at January 15, an increase of 1·3 per cent for the month, all groups contributing to the increase.

FATAL INDUSTRIAL ACCIDENTS IN CANADA, 1941

Analyzed According to Industries, Localities and Months

AN analysis of fatal industrial accidents in Canada during the calendar year 1941 by industries, causes, provinces and months is presented in the accompanying tables. The accidents recorded are those occurring to persons gainfully employed during the course of, or arising out of their employment; also included are fatalities from industrial diseases reported chiefly by provincial workmen's compensation boards. Quarterly reviews, each containing an analysis of accidents occurring during the period covered, appeared in the LABOUR GAZETTE, for May, August and November, 1941, and February, 1942.

The record is compiled from reports from the following governmental authorities,—The Board of Transport Commissioners of Canada; The Explosives Division of the Federal Department of Mines; The Workmen's Compensation Boards of Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia; The Ontario Chief Factory Inspector; and the British Columbia Department of Mines. In addition, reports were received also from the correspondents of the LABOUR GAZETTE resident in the principal industrial centres throughout Canada.

Industrial accidents reported in the press are also included in the record after inquiry has been made to avoid duplication. Most of the accidents in agriculture are recorded from press reports, and while it is not known to what extent the accidents in this industry are covered, it is believed that in this respect the record is fairly complete. To a great extent, however, the information obtained from press reports is used to supplement information received from official sources.

Table I gives an analysis of accidents by industries and causes, Table II by provinces, and Table III by months. The last two tables also include summary figures for 1940, which are a final revision of the figures published in the LABOUR GAZETTE, March, 1941, by the inclusion of accidents occurring in 1940 which were reported too late for incorporation into the annual statements. These accidents were included in the supplementary reports in the LABOUR GAZETTE, for May, August and November, 1941, and February, 1942. The figures for 1941, being still incomplete, are accordingly to some extent not comparable with the completed figures for 1940.

In some industries, where considerable changes in figures from year to year appear, these may be attributed to changes in industrial conditions or to particular occurrences. For example, in the mining group there was an increase in the number of fatalities from 175 in 1940 to 252 in 1941, which may be partly explained by the fact that during 1941 there was a major disaster in coal mining resulting in the loss of 29 lives; and there was also an increase of 36 fatalities in metalliferous mining in 1941. In the manufacturing group there was an increase from 144 in 1940 to 230 in 1941; also in the transportation group there was an increase from 236 to 314 which may be accounted for by an increase in the employment index figures for these industries.

There were four disasters during the year under review, the most serious of which occurred on October 31, when 29 miners were killed by carbon monoxide poisoning following an explosion of fire damp in a coal mine at Nordegg, Alberta. Two disasters occurred to men engaged in ferrying aircraft from Canada to Britain; twenty-two of these men were killed on August 10, when an Atlantic ferry plane crashed after taking off in Britain for Canada; and another ferry plane crash on taking off in England for Canada on August 14 resulted in 21 fatalities to men in this industry. Another disaster occurred on February 24, as a result of which eleven ice

workers lost their lives when a truck conveying them across the frozen surface of the St. Lawrence River, near Longueuil, Quebec, took a wrong turn, going off the ice road and plunged into an open stretch of water. Five other ice cutters who were in the truck were rescued.

On December 16, a collision of a freight train with a snow train at Mont Joli, Quebec, caused another serious accident when nine labourers were killed and 20 others were injured. While on a voyage from Melgrave, N.S., to Halifax the crew of six members were drowned on October 10, when a tug was lost.

On March 18, a terrific explosion and fire wrecked a fur dyeing plant in Montreal, five workers losing their lives and about 60 others being injured. The cause of the spark setting off an explosion of cleaning liquid was not revealed at the coroner's inquest.

On July 24, near Vancouver, B.C., an engineer, a baggageman and two firemen were killed in a collision of two trains. Another train collision at Antelope, Saskatchewan, on September 26, resulted in the deaths of an engineer, two firemen and a trainman. On December 10, a section foreman and three section labourers were killed when a freight train struck their hand car in a fog, near Vancouver, B.C.

On June 24, at East Coulee, Alberta, four men lost their lives following an explosion in a coal mine. The fourth man, the mine manager, died from gas fumes during rescue work.

The crew of four men were killed when a ferry plane crashed on a hillside in Britain after crossing from Canada, on September 1; and another ferry plane crash at St. Hubert, Quebec, on February 19, resulted in the deaths of two pilots and a radio operator. When a ferry plane was lost while en route from Canada to Britain, the crew of three lost their lives on October 11. A pilot, a co-pilot and a stewardess were killed in a trans-Canada plane crash, near Armstrong, Ontario, on February 6.

Three labourers were killed on February 25, in a gravel pit cave-in at Transcona, Manitoba. On January 14, a labourer and two linemen engaged on airport construction lost their lives when they were pinned under an overturned truck, at Pennfield, New Brunswick.

When a canoe capsized in a wind storm, three miners were drowned near Sioux Lookout, Ontario, on May 31. Three men were drowned on June 1 when a salvage boat was wrecked in a storm, off Graham Island, B.C.

On April 28, three R.C.M.P. Veteran Guards were killed when a truck crashed into a tree, near Cedars, Quebec. Three forest fire fighters were drowned in Sault au Cochon River, Saguenay Co., Quebec, on May 27; and an assistant inspector and two telephone repairmen were killed in a collision of a railway flat car with their speeder during a forest fire, on June 10.

Three labourers engaged in logging were killed by lightning, near Moncton, N.B., on July 25.

On August 17, three liquid air plant workers were burned to death in a fire, when steel tools being used to repair a tank in the oxygen room caused a spark igniting the liquid air. An explosion in a chemical plant at Niagara Falls, Ontario, on September 3, resulted in the deaths of three workers.

Fatalities by Causes

The classification of accidents according to causes shows that the largest number, 523, came under the category "moving trains, vehicles, etc." This includes all accidents due to cars or engines, including mine and quarry cars, and to automobiles and other power vehicles and horse-drawn vehicles, as well as accidents caused by moving implements (both those impelled by power and those drawn by horses) by moving watercraft and by aircraft (civil aviation). The largest number af accidents in this category, 157, appears under the heading "automobiles and other power vehicles and implements", with 102 classified under the heading "being struck or run over by, or crushed by or between cars and engines", (58 of these being engaged in steam railways); 87 were in connection with watercraft (11 of these being in logging, 15 in fishing and trapping, and 33 in water transportation); 74 appear under aircraft, (61 of which being in connection with the ferrying of aircraft, 43 of which resulted from two plane crashes in August); 43 were due to derailments and collisions (41 of which were in steam railways); 25 were caused by animal drawn vehicles and implements; 22 by mine and quarry cars; and 13 were caused by persons "falling from or in cars or engines."

Next in order were "dangerous substances", causing 237 fatalities as follows: 48 were due to electric current, 44 to explosive substances, 40 to hot and inflammable substances and flames, 40 to mine explosions from gas, coal-dust, etc., 26 to gas fumes, poison, etc., 24 to conflagrations, and 15 to steam escapes, boiler explosions, compressed air.

"Falling objects" caused 234 fatalities, of which 83 were due to trees and limbs, while 63 occurred in mines and quarries; 37 were due to objects falling from elevation, loads, piles; 19 to breaking or loosening of straps, cables, etc., 11 to collapse of structure, and 11 to other falling objects.

Fatalities numbering 221 were caused by "falls of persons", classified as follows: 72

from elevations, 69 into pits, shafts, harbours, rivers, etc., (some of which resulted in drowning), 19 from loads, etc., 16 from ladders, 14 due to collapse of support, 7 into holds of vessels, 7 falls on the level, 6 on sharp objects, 6 into tanks, vats, kilns, etc., and 5 down stairs and inclines.

Hoisting apparatus caused 40 fatalities, 36 were caused by prime movers, 34 were caused by animals (20 of which were due to horses), 27 by handling of objects, 25 by working machines, 25 by striking against or being struck by objects, and 7 by tools.

The category "other causes" includes 110 fatalities of which 61 were due to industrial disease, strain, etc., 20 to lightning, frost, storms, sunstroke, 16 to cave-ins, land slides, ice jams, etc., 4 to infection not elsewhere specified, 4 to shooting and violence, 3 to drownings not elsewhere specified, and 2 concerning which no particulars were available.

Fatalities by Provinces

The classification of accidents according to provinces shows that the largest number, 538, occurred in Ontario. There were 410 in Quebec, 207 in British Columbia, 106 in Alberta, 91 in Nova Scotia, 59 in New Brunswick, 48 in Manitoba, 43 in Saskatchewan, 5 in Prince Edward Island, and 2 in Yukon and Northwest Territories. In Ontario the fatalities occurred by industries as follows: manufacturing, 122; construction, 84; transportation and public utilities, 84; mining, non-ferrous smelting and quarrying, 78; agriculture, 62; service, 36; logging, 34; trade, 26; electric light and power, 8; and fishing and trapping, 4. In Quebec, the largest number, 121, was in transportation and public utilities, with 57 in manufacturing, 54 in construction, 38 in agriculture, 38 in mining, non-ferrous smelting and quarrying, 33 in service, 30 in logging, 25 in trade, 11 in electric light and power, 2 in fishing and trapping, and 1 in finance. In British Columbia there were 80 fatalities in logging, 41 in mining, non-ferrous smelting and quarrying, 30 in transportation and public utilities, 22 in manufacturing, 15 in construction, 6 in fishing and trapping, 6 in service, 4 in agriculture, 2 in electric light and power, and 1 in trade. In Alberta and Nova Scotia there were respectively 54 and 25 fatalities in mining, non-ferrous smelting and quarrying, and no other industry experienced as many fatalities in these provinces. Transportation and public utilities registered the largest number in New Brunswick and Manitoba, there being respectively 18 and 13 in this industry; while in Saskatchewan the highest number, 14, was in agriculture.

Fatalities by Industries

The total number of fatalities recorded for the year was 1,509, being classified under the various groups of industries as follows: transportation and public utilities 314 or 20·81 per cent of the total; mining, non-ferrous smelting and quarrying, 252 or 16·70 per cent; manufacturing, 230 or 15·24 per cent; construction, 194 or 12·86 per cent; logging, 170 or 11·26 per cent; agriculture, 143, or 9·48 per cent; service, 88, or 5·83 per cent; trade, 63 or 4·17 per cent; electric light and power, 30, or 1·99 per cent; fishing and trapping, 24, or 1·59 per cent; finance, 1, or ·07 per cent.

The table of fatalities by months indicates that the greatest number, 163, occurred in August, while the lowest total, 82, was recorded in April. The table gives the total number of persons gainfully employed in most of the industries, the latest census figures available being given in each case. For agriculture, logging, construction, trade, finance, service, etc., the figures were those of the decennial census of 1931, for manufacturing, from the annual census of industry for 1939, for mining, fishing, electric light and power, steam railways, street and electric railways, telegraphs and telephones, and express, from the annual census of industry for 1940.

While the latest figures available as to numbers employed are not in any instance those for the year under review, they are included, however, for general comparative purposes.

Fatal and Non-Fatal Accidents in Canada Reported by Provincial Workmen's Compensation Boards

The Labour Departments records of industrial accidents include only fatal accidents and fatalities arising out of employment, including those due to industrial diseases, etc. The only information of a comprehensive nature as to non-fatal accidents is from the Workmen's Compensation Boards in the various provinces, except in manufacturing, mining, and steam and electric railway operation, in which accidents are dealt with by various governmental departments and commissions. These are also covered by the Workmen's Compensation Boards.

The annual reports of the several Workmen's Compensation Boards are reviewed from time to time in the LABOUR GAZETTE, information being given as to accidents, amounts paid in compensation, etc. The annual reports of the Provincial Workmen's Compensation Boards for 1940 were summar-

ized in the following issues: Nova Scotia, New Brunswick, Manitoba and Saskatchewan, May, 1941, pages 562-564; Quebec, June, 1941, page 653; Ontario and British Columbia, July, 1941, pages 825-827; and Alberta, December, 1941, page 1575.

In none of the provinces does the Board have jurisdiction over accidents in all industries, so that the accidents recorded are those in certain industries only. Most of the Boards deal with accidents in logging, mining, manufacturing, construction, transportation and public utilities, excluding agriculture, trapping, finance, domestic service, etc., but include to some extent fishing, trade and government service.

The accompanying table summarizes the figures as to non-fatal accidents recorded by the several Workmen's Compensation Boards for 1935, 1936, 1937, 1938, 1939, 1940 and also include some preliminary figures for 1941. It may be observed that the Department of Labour's figures show more fatal industrial accidents as occurring during each year than the total number of fatal accidents which were included by the Provincial Workmen's Compensation Boards for that year. This difference is largely accounted for by the fact that the Provincial Boards do not record accidents in all industries. In addition, however, the Board's records only show accidents to employees, while the records of the Department of Labour register accidents to all persons occupied in industry, including employers and workmen carrying on their own business, of whom there are many, particularly in trucking, trade, etc., as well as in agriculture.

TABLE I.—FATAL INDUSTRIAL ACCIDENTS IN

CAUSE	Agriculture	Logging	Fishing and Trapping	Mining, Non-Ferrous Smelting and Quarrying	Metalliferous mining	Coal mining	Non-metallic mineral mining and quarrying, n.e.s.	Structural materials	Manufacturing	Vegetable foods, drink and tobacco	Animal foods	Textiles and clothing	Leather, fur and products	Rubber products	Saw and planing mill products	Wood products	Pulp, paper and paper products	Printing and publishing	Iron, steel and products	Non-ferrous metal products	Non-metallic mineral products
A.—Prime Movers:
